

Purpose & Needs

Please put a red sticker dot below the three needs that you think are the most important.

STUDY PURPOSE:

Eliminate fatal and severe injury crashes and prioritize accessibility of multimodal options for vulnerable users, through design and operational strategies that support existing and future places.

NEEDS

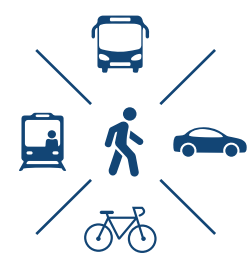

1. Design and operate street consistent with surrounding land uses to support existing and future destinations

2. Increase the frequency and safety of crossing opportunities for bicyclists and pedestrians

3. Improve transit access and service efficiency

4. Provide better multimodal access for Communities of Concern

5. Improve bicyclist and pedestrian safety and comfort along the corridor
