# Beckett Bridge

Historic Whitcomb Bayou Circa 1921

County Project No. PID 2161 FDOT Financial Project No.: 424 385-1-28-01

January 2013

## Alternatives Workshop Scheduled

An Alternatives Workshop is scheduled for the ongoing Beckett Bridge (Riverside Drive) Project Development and Environment (PD&E) Study. The workshop will be held on Wednesday, January 23rd, 2013 from 5:00 pm until 7:30 pm at the Tarpon Springs Yacht Club, located at 350 N. Spring Boulevard in Tarpon Springs.

The purpose of this informal workshop is to provide you with an opportunity to learn more about the alternatives currently under consideration, ask questions, and express your comments and concerns. A court reporter will be available to record your comments. A brief video presentation will be shown continuously and can be viewed at any time during the meeting.

### Alternatives Workshop

**Date:** January 23, 2013

**Time:** 5:00 p.m. to 7:30 p.m.

**Place:** Tarpon Springs Yacht Club  
350 N. Spring Boulevard  
Tarpon Springs, FL 34689

Information about the conceptual design and possible impacts of the various alternatives will be on display. Representatives of the project team will be available to answer questions and listen to your ideas. We look forward to your input!

## About the Project

Pinellas County, in coordination with the Florida Department of Transportation and the Federal Highway Administration (FHWA), is conducting a PD&E Study to evaluate the removal, rehabilitation or replacement of the existing bridge. The study began in January 2011. Since then a number of alternatives have been evaluated. The results of this evaluation will be presented at the workshop.

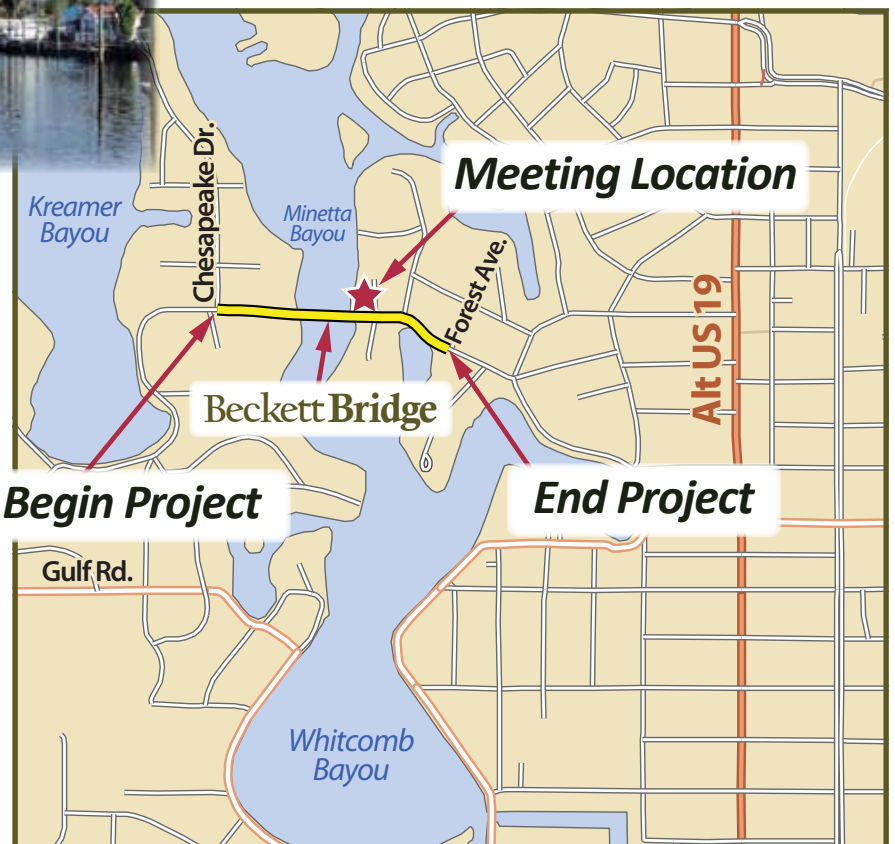

The existing Beckett Bridge crosses Whitcomb Bayou, which provides access to the Anclote River and eventually the Gulf of Mexico. The Bridge was originally constructed in 1924 as a timber structure with a steel movable span. The timber portions of the bridge were replaced with concrete in 1956. The bridge provides six feet of vertical clearance and 25 feet of horizontal clearance between the fenders for boats passing through the channel.

In recent years, costly and disruptive repairs have been required to keep the bridge operating safely. The bridge structure and machinery have deteriorated.

Some of the bridge features do not meet current design standards. No shoulders are provided and the existing sidewalks are very narrow. Major rehabilitation or replacement of the bridge is needed to keep the bridge open and operating efficiently.

The bridge is eligible for listing in the National Register of Historic Places. The bridge played an important role in the early development of Tarpon Springs and is one of a few remaining historic bridges of similar design in Florida.

## Alternatives Considered

### No-Build

Only routine maintenance would be performed as needed to keep the bridge open to traffic until safety issues would require it to be closed. Repair or replacement would be considered at a later date.

### No-Build with Removal of the Existing Bridge

Only routine maintenance needed to keep the bridge open will be performed until it is no longer safe for traffic. The bridge would then be demolished. A new bridge would not be constructed.

### Rehabilitation

Extensive repairs would be required to extend the life of the bridge for approximately 25-30 years. The existing roadway configuration (typical section) and navigational clearances would remain the same. The bridge would not be widened. Repair of the bridge structure will include extensive concrete and steel repair. The electrical and mechanical systems would be replaced.

### New Movable Bridge

The existing bridge would be demolished and a new two-lane movable bridge would be constructed in approximately the same location. Traffic would be detoured during construction. The new bridge will provide 7.8 feet of vertical clearance and 25 feet of horizontal clearance for boats passing under the bridge.

### New Mid-Level Fixed Bridge

The existing bridge would be demolished and a new two lane, mid-level bridge would be constructed in approximately the same location. Traffic would be detoured during construction. The bridge will provide 28 feet of vertical clearance and 25 feet of horizontal clearance for boats passing under the bridge. Two options were developed for this alternative. The options impact different areas of adjacent property.

## Share Your Comments

We look forward to receiving your questions, ideas, and comments. Written comments will be included in the official project record. Comment forms will be available at the Alternatives Workshop.

Comments and questions can also be submitted via the project website:

[www.pinellascounty.org/beckettbridge](http://www.pinellascounty.org/beckettbridge)

or by contacting Tony Hornik, PE, SI, at:

[thornik@co.pinellas.fl.us](mailto:thornik@co.pinellas.fl.us)

or by phone: (727)464-3640

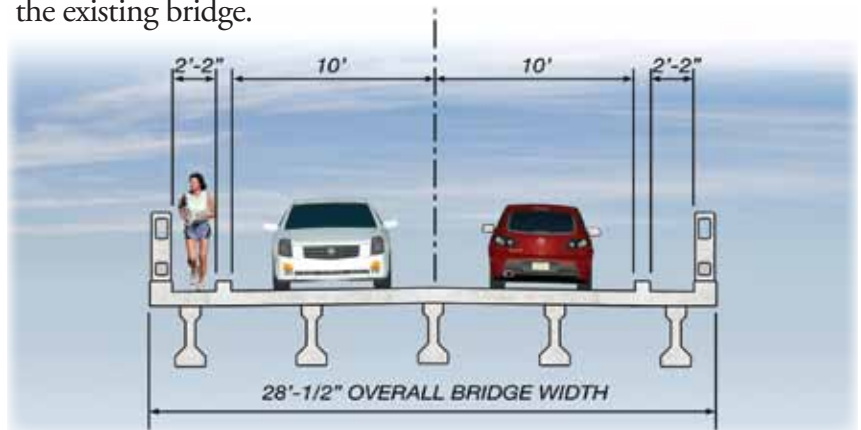

## Project Schedule

- Based on comments received from the public and further engineering and environmental analyses, a "Preferred Alternative" will be selected by the County and presented at a Public Hearing in Summer 2013.
- Approval of the selected alternative by the FHWA is anticipated to be obtained in Winter 2013.

## Typicals Sections

### Existing Bridge Typical

The existing typical section consists of one, 10-foot wide, travel lane in each direction and 2-foot 2-inch-wide sidewalks separated by a curb on both sides of the bridge. The typical section for the No-Build or Rehabilitation alternatives would remain the same as the existing bridge.

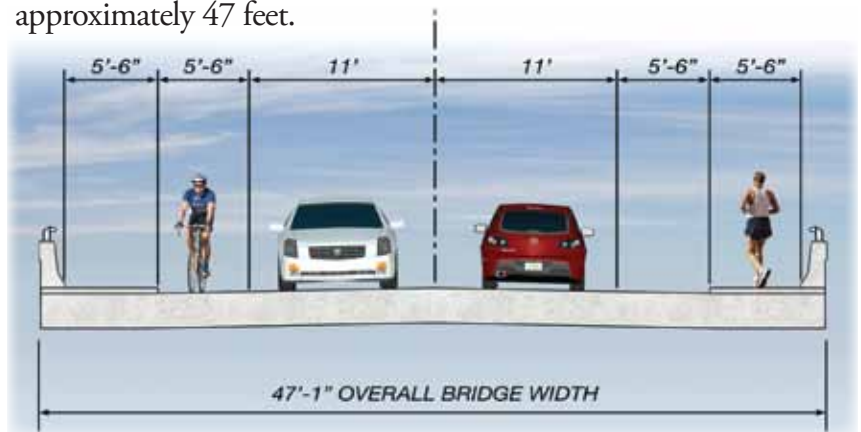

## Proposed Bridge Typicals

The proposed bridge typical section for the bridge replacement options are shown below.

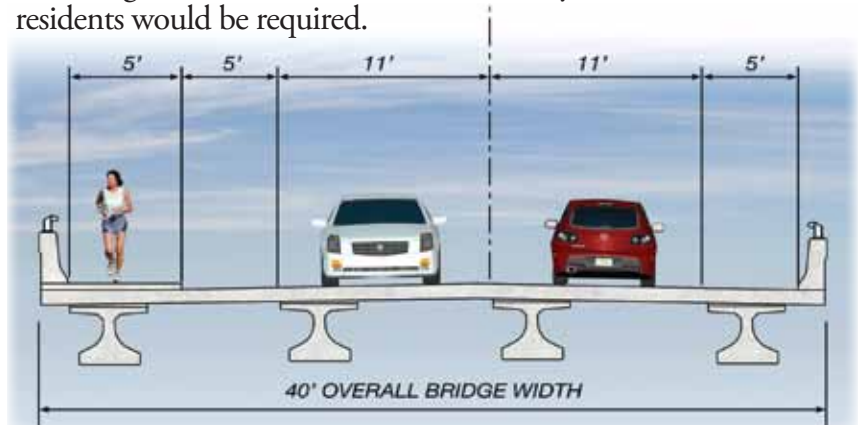

### Movable Bridge Typical

A new movable bridge would provide two 11-foot lanes with 5½ foot wide outside shoulders, and 5½ foot wide sidewalks on both sides of the bridge. The width of the new bridge would be approximately 47 feet.

### Fixed Bridge Typical

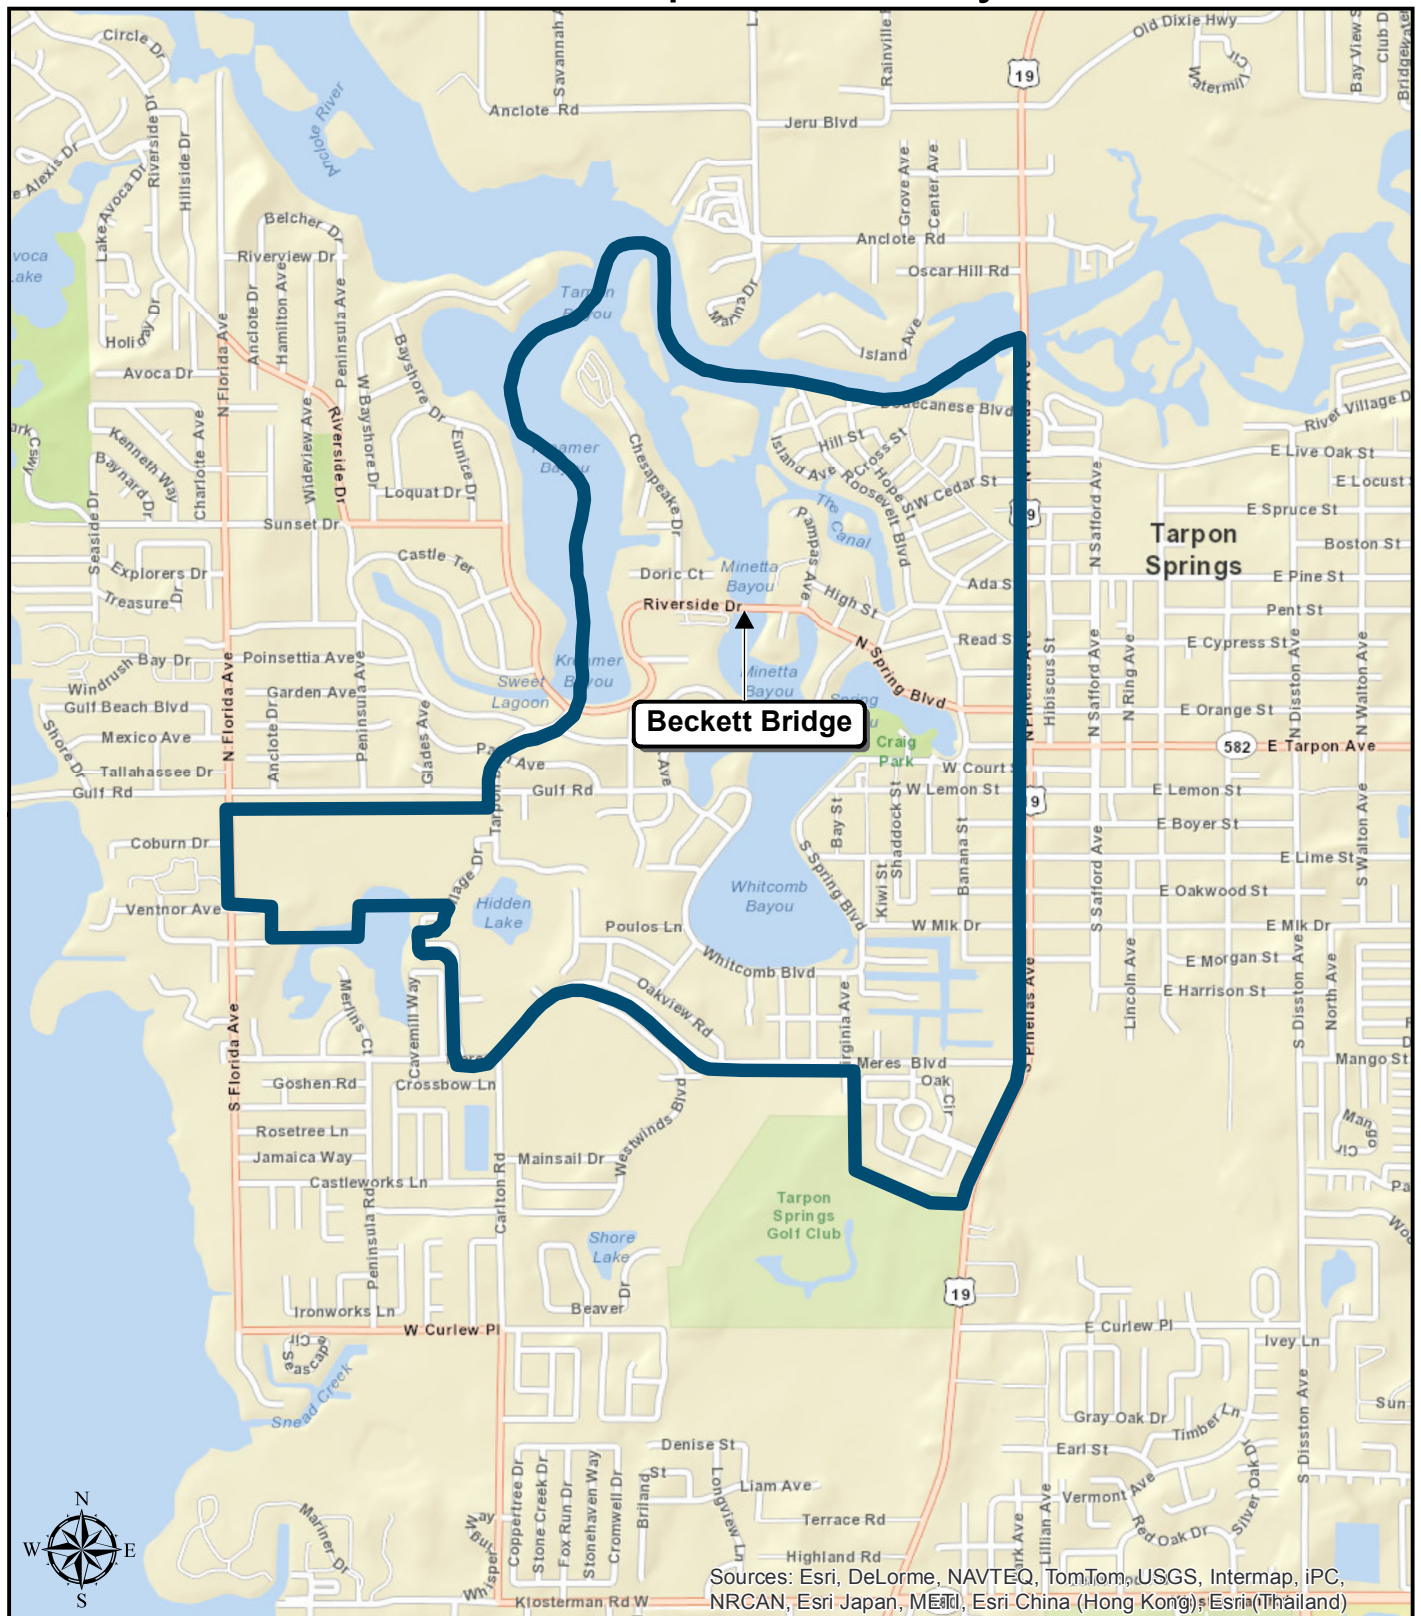

A new fixed bridge would provide two 11-foot lanes with 5-foot outside shoulders on both sides and a 5-foot wide sidewalk on the north side only. The width of the new bridge would be 40 feet. Retaining walls which would block driveway access to some residents would be required.

## **Beckett Bridge PD&E Study - Alternatives Workshop Responses to Comments**

### **Pedestrian/Bicycle Facilities**

The existing sidewalks are only 2 feet 2 inches wide and do not meet standards established by the American Disabilities Act. There are no bicycle lanes or shoulders on the existing bridge. Current design standards for similar bridges include shoulders and wider sidewalks.

Sidewalks, 5.5 feet wide, are proposed on both sides of the Movable Bridge Alternative. Shoulders, which can be used by experienced bicyclists, also 5.5 feet wide, are also proposed on both sides of a new movable bridge.

In addition to accommodating cyclists, the proposed shoulders improve safety for pedestrians and allow cars on the bridge to pull over out of the travel lanes to allow emergency vehicles to pass. Shoulders also provide a safer area for disabled vehicles to pull over.

A future recreational trail, the Howard Park Trail, is proposed to cross the Beckett Bridge. Accordingly, improved pedestrian and bicycle facilities should be considered when bridge improvements are made.

For the Movable Bridge Alternative, six-foot wide sidewalks and four-foot wide shoulders are also proposed on Riverside Drive, approaching the bridge, between Chesapeake Drive and Forest Avenue. Because of the limited right-of-way, a six-foot wide sidewalk is proposed only on the north side of the roadway between the bridge and Chesapeake Drive. No sidewalks are proposed on the south side of the roadway, adjacent to the Bayshore Mobile Home Park. No impacts to residential property adjacent to the roadway will occur from construction of the sidewalks or shoulders for the movable bridge alternative.

A new bridge is designed to last about 75 years. Although there are currently no sidewalks on the roadway beyond the project limits, they could be added within the next 75 years, depending on future development and funding. It is much more expensive to add sidewalks to the bridge after it is constructed.

Providing wider sidewalks or shoulders on the existing bridge would require widening of the bridge. The Rehabilitation Alternative, as proposed, does not include widening of the existing bridge.

**Extensive additional engineering analysis is required to determine if a sidewalk could be added to the existing bridge as part of the Rehabilitation improvements.**

On average, more than 7,000 vehicles a day travel over the Beckett Bridge in both directions. Closing one lane to vehicular traffic would not be practical if the bridge remains.

**Vertical Clearance**

A permit from the US Coast Guard (USCG) will be required if a new bridge is constructed. The USCG has the authority to determine the minimum height required for a new fixed bridge. There are no official guidelines for clearances at this location.

A number of waterfront property owners along Whitcomb Bayou have expressed concern about their loss deep water access if a new fixed bridge is constructed. In addition, some of these property owners already have boats which require the bridge to open. The Bayshore Mobile Home Park also provides docks for sailboats and other recreational boats for seasonal residents. Accordingly, it is not anticipated that the USCG would permit a fixed bridge with a vertical clearance of 6 – 8 feet.

**Historical Context and Significance**

The bridge has been determined to be eligible for listing in the National Register of Historic Places by the State Historic Preservation Officer (SHPO).

If SHPO determines that the Preferred Alternative results in an “adverse impact” to the bridge, efforts to offset this impact (mitigation) will be required. Examples of actions that could offset the impact could include the following:

- Photographic documentation of the bridge which will be archived.
- Preservation of a portion of the bridge to be displayed in a public area with educational information to preserve the history of the bridge.

The project team recognizes the historic character of the community and will consider possible impacts to the historic character when selecting a Preferred Alternative.

A Cultural Resource Committee has been established to address the historical significance of the bridge and to provide input during the development of alternatives and selection of a Preferred Alternative. This committee includes representatives of the SHPO, FDOT, Tarpon Springs Historical Society, and City and County staff.

If the Rehabilitation Alternative is selected as the Preferred Alternative, additional coordination with the SHPO would be required during development of the final design plans for the needed repairs.

**Costs**

Cost Estimates for the proposed alternatives are provided below.

Rehabilitation	\$9.5 M
 New Movable Bridge (7.8 feet Vertical Clearance)	 \$15.8 M
 New Fixed Bridge (28 feet Vertical Clearance)	 \$11.1 M + Cost to Purchase Right-of-Way

Costs include Design, Construction and Construction Engineering Inspection. The cost estimates for a new Fixed Bridge does not include the cost to purchase adjacent property for additional right-of-way. No right-of-way is required for the New Movable Bridge.

### **Flooding and Roadway Repair**

Addressing the need for roadway maintenance on Riverside Drive outside the project limits (Chesapeake Drive to Forest Avenue) is not included in this PD&E Study. The study's focus is evaluation of potential improvements to the existing bridge. Roadway work associated with the Preferred Alternative selected for the bridge improvements will be limited to Riverside Drive within the project limits. Although Pinellas County owns and operates the Beckett Bridge, the City of Tarpon Springs is responsible for maintenance on Riverside Drive/N. Spring Boulevard. A copy of the Summary of Comments will be provided to the City of Tarpon Springs.

Currently no stormwater management system exists within the project corridor. If a replacement bridge is selected as the Preferred Alternative, a curb and gutter drainage system is proposed. The proposed system will convey collected stormwater runoff from the roadway to Whitcomb Bayou in the vicinity of the bridge. This system may reduce flooding in some areas. During final design, evaluation of methods to address flooding issues near the bridge will be continued in more detail.

The low elevation of the area contributes to local flooding. Raising the elevation sufficiently to completely eliminate flooding issues near the bridge would require acquisition of property adjacent to the roadway.

### **Community/Property Impacts**

Construction of a new movable bridge, as proposed, will not require acquisition of any additional adjacent property. In contrast, construction of either option for the proposed new fixed bridge will require acquisition of about two acres of adjacent property. Depending on the alternative, three to five residences would require relocation and impacts could occur to some residents of the Bayshore Mobile Home Park.

Although visual impacts are subjective, it is recognized that the fixed bridge would impact the view from the adjacent properties.

### **Traffic and Evacuation**

Recent traffic studies indicate that on average, approximately 7,700 cars travel over the Beckett Bridge on a daily basis. Pinellas County recognizes that this section of Riverside Drive is an important route to Tarpon Avenue, which is considered a designated emergency evacuation route.

Traffic calming measures, including installation of additional speed "humps" on Riverside Drive were not evaluated as part of the Beckett Bridge PD&E Study. Decisions concerning the need for additional speed "humps" within the project area would be made by the City of Tarpon Springs.

### **Detour**

Detouring traffic during construction of the Rehabilitation or the Replacement alternatives would require construction of a temporary bridge next to the existing bridge, or constructing the bridges cannot be avoided without impacting substantial additional adjacent property owners. Efforts will be made during design to minimize the detour as much as possible. However, the anticipated length of the detour is six months for the Rehabilitation alternative, one year for construction of a movable bridge, and two years for construction of a fixed bridge.

In addition to detouring traffic around Whitcomb Bayou via Whitcomb Boulevard, two other detour routes are available. Traffic can also be diverted from Alternate US 19 to Florida Avenue using Meres Boulevard. If adequate advanced notice and signing are provided, it also may be possible to divert traffic south of the project corridor via Klosterman Road, Carlton Road and Curlew Road to reach Florida Avenue.

## **Beckett Bridge PD&E Study - Alternatives Workshop Responses to Comments**

### **Pedestrian/Bicycle Facilities**

The existing sidewalks are only 2 feet 2 inches wide and do not meet standards established by the American Disabilities Act. There are no bicycle lanes or shoulders on the existing bridge. Current design standards for similar bridges include shoulders and wider sidewalks.

Sidewalks, 5.5 feet wide, are proposed on both sides of the Movable Bridge Alternative. Shoulders, which can be used by experienced bicyclists, also 5.5 feet wide, are also proposed on both sides of a new movable bridge.

In addition to accommodating cyclists, the proposed shoulders improve safety for pedestrians and allow cars on the bridge to pull over out of the travel lanes to allow emergency vehicles to pass. Shoulders also provide a safer area for disabled vehicles to pull over.

A future recreational trail, the Howard Park Trail, is proposed to cross the Beckett Bridge. Accordingly, improved pedestrian and bicycle facilities should be considered when bridge improvements are made.

For the Movable Bridge Alternative, six-foot wide sidewalks and four-foot wide shoulders are also proposed on Riverside Drive, approaching the bridge, between Chesapeake Drive and Forest Avenue. Because of the limited right-of-way, a six-foot wide sidewalk is proposed only on the north side of the roadway between the bridge and Chesapeake Drive. No sidewalks are proposed on the south side of the roadway, adjacent to the Bayshore Mobile Home Park. No impacts to residential property adjacent to the roadway will occur from construction of the sidewalks or shoulders for the movable bridge alternative.

A new bridge is designed to last about 75 years. Although there are currently no sidewalks on the roadway beyond the project limits, they could be added within the next 75 years, depending on future development and funding. It is much more expensive to add sidewalks to the bridge after it is constructed.

Providing wider sidewalks or shoulders on the existing bridge would require widening of the bridge. The Rehabilitation Alternative, as proposed, does not include widening of the existing bridge.

Extensive additional engineering analysis is required to determine if a sidewalk could be added to the existing bridge as part of the Rehabilitation improvements.

On average, more than 7,000 vehicles a day travel over the Beckett Bridge in both directions. Closing one lane to vehicular traffic would not be practical if the bridge remains.

**Vertical Clearance**

A permit from the US Coast Guard (USCG) will be required if a new bridge is constructed. The USCG has the authority to determine the minimum height required for a new fixed bridge. There are no official guidelines for clearances at this location.

A number of waterfront property owners along Whitcomb Bayou have expressed concern about their loss deep water access if a new fixed bridge is constructed. In addition, some of these property owners already have boats which require the bridge to open. The Bayshore Mobile Home Park also provides docks for sailboats and other recreational boats for seasonal residents. Accordingly, it is not anticipated that the USCG would permit a fixed bridge with a vertical clearance of 6 – 8 feet.

**Historical Context and Significance**

The bridge has been determined to be eligible for listing in the National Register of Historic Places by the State Historic Preservation Officer (SHPO).

If SHPO determines that the Preferred Alternative results in an “adverse impact” to the bridge, efforts to offset this impact (mitigation) will be required. Examples of actions that could offset the impact could include the following:

- Photographic documentation of the bridge which will be archived.
- Preservation of a portion of the bridge to be displayed in a public area with educational information to preserve the history of the bridge.

The project team recognizes the historic character of the community and will consider possible impacts to the historic character when selecting a Preferred Alternative.

A Cultural Resource Committee has been established to address the historical significance of the bridge and to provide input during the development of alternatives and selection of a Preferred Alternative. This committee includes representatives of the SHPO, FDOT, Tarpon Springs Historical Society, and City and County staff.

If the Rehabilitation Alternative is selected as the Preferred Alternative, additional coordination with the SHPO would be required during development of the final design plans for the needed repairs.

**Costs**

Cost Estimates for the proposed alternatives are provided below.

Rehabilitation	\$9.5 M
 New Movable Bridge (7.8 feet Vertical Clearance)	 \$15.8 M
 New Fixed Bridge (28 feet Vertical Clearance)	 \$11.1 M + Cost to Purchase Right-of-Way

Costs include Design, Construction and Construction Engineering Inspection. The cost estimates for a new Fixed Bridge does not include the cost to purchase adjacent property for additional right-of-way. No right-of-way is required for the New Movable Bridge.

### **Flooding and Roadway Repair**

Addressing the need for roadway maintenance on Riverside Drive outside the project limits (Chesapeake Drive to Forest Avenue) is not included in this PD&E Study. The study's focus is evaluation of potential improvements to the existing bridge. Roadway work associated with the Preferred Alternative selected for the bridge improvements will be limited to Riverside Drive within the project limits. Although Pinellas County owns and operates the Beckett Bridge, the City of Tarpon Springs is responsible for maintenance on Riverside Drive/N. Spring Boulevard. A copy of the Summary of Comments will be provided to the City of Tarpon Springs.

Currently no stormwater management system exists within the project corridor. If a replacement bridge is selected as the Preferred Alternative, a curb and gutter drainage system is proposed. The proposed system will convey collected stormwater runoff from the roadway to Whitcomb Bayou in the vicinity of the bridge. This system may reduce flooding in some areas. During final design, evaluation of methods to address flooding issues near the bridge will be continued in more detail.

The low elevation of the area contributes to local flooding. Raising the elevation sufficiently to completely eliminate flooding issues near the bridge would require acquisition of property adjacent to the roadway.

### **Community/Property Impacts**

Construction of a new movable bridge, as proposed, will not require acquisition of any additional adjacent property. In contrast, construction of either option for the proposed new fixed bridge will require acquisition of about two acres of adjacent property. Depending on the alternative, three to five residences would require relocation and impacts could occur to some residents of the Bayshore Mobile Home Park.

Although visual impacts are subjective, it is recognized that the fixed bridge would impact the view from the adjacent properties.

### **Traffic and Evacuation**

Recent traffic studies indicate that on average, approximately 7,700 cars travel over the Beckett Bridge on a daily basis. Pinellas County recognizes that this section of Riverside Drive is an important route to Tarpon Avenue, which is considered a designated emergency evacuation route.

Traffic calming measures, including installation of additional speed "humps" on Riverside Drive were not evaluated as part of the Beckett Bridge PD&E Study. Decisions concerning the need for additional speed "humps" within the project area would be made by the City of Tarpon Springs.

### **Detour**

Detouring traffic during construction of the Rehabilitation or the Replacement alternatives would require construction of a temporary bridge next to the existing bridge, or constructing the bridges cannot be avoided without impacting substantial additional adjacent property owners. Efforts will be made during design to minimize the detour as much as possible. However, the anticipated length of the detour is six months for the Rehabilitation alternative, one year for construction of a movable bridge, and two years for construction of a fixed bridge.

In addition to detouring traffic around Whitcomb Bayou via Whitcomb Boulevard, two other detour routes are available. Traffic can also be diverted from Alternate US 19 to Florida Avenue using Meres Boulevard. If adequate advanced notice and signing are provided, it also may be possible to divert traffic south of the project corridor via Klosterman Road, Carlton Road and Curlew Road to reach Florida Avenue.

COMMENTS: Keep the moveable bridge  
update it keep the old charm  
of Tarpon Springs the fixed bridges  
don't look like anything in Tarpon

I am a part time snow bird and  
I came to chase tarpon because  
of its old charm.

COMMENTS: The <sup>new</sup> moveable Bridge option 47'1" overall  
with the least impact to area is my  
choice. a 12 month bridge shut down would  
be hard enough, little line a 24 month  
plus option that would end up being  
the 3yr option in end. you have  
a parking Home on Chesapeake that  
will also be affected via an extended  
shut down. Cost of taking properties  
could run in to long delays and  
would probably cost much more in  
end than the moveable Bridge option.  
Thank you

COMMENTS: My name is David Banther, I am a Pinellas County native raised in Tarpon Springs. My family lives in Tarpon, we have a business on Orange St, we are members at the Yacht Club. I am also a candidate for Tarpon Springs City Commission Seat 4.

I would plead with the county to go with the rehab option. In 25-30 yrs I am sure we will have better technology & options for replacement. Going with a fixed option will greatly disrupt the historic nature of this area and also negatively affect property owners.

As a resident business owner and former member of the Tarpon Springs Historical Preservation Board, I respectfully ask the city to rehab the bridge and not disturb Tarpon Springs.

COMMENTS: \_\_\_\_\_

I am a part-time Resident of Tarpon Springs.  
I do try to ride my bike over Beckett  
Bridge & find it trying. Please do what  
you can to provide a good bike lane both  
ways on that bridge. I do not wish to  
see the bridge demolished & not replaced.  
I do not know which of the replacement  
ideas is better, but please include bike  
lanes for safe travel ~~across~~ across  
the bridge.

Thanks - Lois Barth

COMMENTS: The moveable bridge though  
more expensive, seems to  
cause the least impact as for  
as change from the older bridge  
the properties near the bridge will  
not be effected as much.

I support the moveable  
bridge, it fits best for the  
community.

COMMENTS: When I look at these options, there are  
2 major points that I look at: one being cost effective  
and one minimal impact. The clear winner to me is the  
movable bridge. Both fixed options have significant impact  
for surrounding properties, as the cost estimate of \$11 million  
does not include ROW costs. These costs are huge, and  
will likely exceed the \$6.8 million estimate for the movable  
bridge. On the other hand, rehab cost 9 million last  
we will have to address the issue again not too far  
ahead in the future, so that is no option for me.  
Impact and cost of the movable bridge are low enough  
to be optimal for all residents and nearby property  
owners.

COMMENTS: Either of the movable options I would  
favor. REHABILITATION KEEPS THE STATUS QVO  
(which would be improved with a new movable  
width passages and bicycle lanes would enhance  
neighborhood usage.  
These two options maintain current right-of-ways  
and keep the bridge corridor a residential  
neighborhood travel lane.  
The fix alternatives would turn this road  
into a freeway and are therefore  
preposterous because of the impact to  
properties, wideways, and the calm of the neighborhood.  
My choice would be for rehabilitation to preserve the unique  
bridge and neighborhood.

COMMENTS: The bridge needs to be replaced - no doubt

- ① The only solution is a movable bridge. This option will minimally impact the surrounding AREAS & neighborhoods.
- ② You conveniently left out the cost of the fixed bridge. You did not include the cost of home renovations & road improvements. If you had I feel the total cost of this bridge would outweigh the cost of the movable bridge.  
Movable bridge cost - 15 mil.  
Fixed bridge 11 mil plus houses & road improvements.
- ③ Movable bridge - 1 yr of detours. Acceptable length of time to be inconvenienced.
- ④ Fixed bridge - 2 yrs of detours - UN Acceptable
- ⑤ We live in a democracy & the citizens shall be able to choose the option!

COMMENTS: THE LARGE FIXED BRIDGE IS NOT  
ACCEPTABLE. IT DISPLACES TOO MANY PEOPLE AND  
DO MUCH PROPERTY. IT IS NOT IN KEEPING  
WITH THE SCENIC AND WELCOMING NATURE OF  
TARPON SPRINGS. IT IS HORRIBLY UNATTRACTIVE -  
SIMPLY PUT JUST UGLY. IT IS CONCRETE  
OVERLOAD.  
PLEASE CHOOSE THE BRIDGE WITH ONE  
WIDE SIDEWALK FOR PEOPLE GENERALLY AND  
THE HANDICAPPED. MUCH MORE PLEASING TO  
LOOK AT AND WOULD TAKE LESS TIME TO  
COMPLETE. IT WOULD FIT THE NEIGHBORHOOD.  
THANK YOU.

COMMENTS: THE TEAR DOWN AND NOT RE-BUILD  
IT TOTALLY UNACCEPTABLE. PEOPLE THAT  
ARE WEST OF THE BRIDGE HAVE LIMITED  
ACCESS TO GET EAST IF THERE IS A STORM  
AND WE HAVE TO MOVE OUT.

MORE FLOODS WITH A LITTLE RAIN DUE TO POOR  
ENGINEERING WHEN THE WEST WINDS DIVISION  
WAS BUILT

→ WHITCRAIB BLVD WILL BE UNDER WATER WITH A STORM -  
CARLTON TO KLOSTERMAN NEEDS FLA AVE (RIGHT  
NEXT TO GULF)

→ GULF RD FLOODS FROM SCHOOL PARKING LOT  
CHANGES

FLA AVE FLOODS AT MIDDLE SCHOOL & HIGH SCHOOL  
IN AREAS WHERE SCHOOL PUT IN NEW  
PARKING LOTS.

COMMENTS: The <sup>new</sup> moveable Bridge option 47'1" overall  
with the least impact to area is my  
choice. a 12 month bridge shut down would  
be hard enough, little time a 24 month  
plus option that would end up being  
the 3 yr option in end. you have  
a parking Home on Chesapeake that  
will also be affected via an extended  
shut down. Cost of taking properties  
could sum in to long delays and  
would probably cost much more in  
end than the moveable Bridge option.  
Thank you

COMMENTS: I am not in favor of complacency in light of a potentially unsafe bridge. I am also not in favor of removal without replacement - specifically for fear of eliminating an evacuation route.

With regard to replacing the bridge with either fixed or movable, my concerns rest with historic preservation and aesthetics of the area, as well as with the tremendous impact to traffic patterns. The fixed bridge alternative will produce a tremendous eyesore and result in diverted traffic to High Street, which will be extremely negative to the many walkers, cyclists, and pet owners who use that peaceful street every day. By contrast, the movable bridge will produce minimal traffic impact and minimal change to the aesthetic value of the area.

With regard to minor repairs extending the bridge life by 25 years - how long can we afford to "kick the can down the road?" Costs will be tremendously higher and bridge conditions will continue to deteriorate without a permanent solution.

Lastly, I am greatly concerned about cost. If the project proceeds as has been explained, the vast majority of funding will be from federal, state and county treasuries. We cannot sustain a major hit to our local budget.

COMMENTS: After viewing the various options, the New Moveable Bridge is the best options. Least impact to property owners, same life/duration as fixed bridges. Same width for travel lanes & more sidewalks & shoulders - safer & easier for bikers & pedestrians. If you include potential ROW costs (possible legal challenges if eminent domain is necessary) then the costs could surpass the estimate for the fixed bridge options. *HAVE to do something.*

COMMENTS: I THINK THE BEST SOLUTION IS FOR A NEW  
MOVABLE BRIDGE. WE DEFINITELY NEED A BRIDGE SO THE OPTION  
OF JUST REMOVING IT IS NOT A DESIRABLE ONE. I WOULD  
PREFER A FIXED SPAN BRIDGE BUT THE COST TO ACQUIRE  
R.O. WOULD BE PROHIBITIVE. THEREFORE THE BEST  
DEAL FOR EVERYONE WOULD BE THE NEW MOVABLE BRIDGE!!

COMMENTS: We are pleased to be considered for the process that affects our lives as well as property values. It is my opinion that a fixed bridge be considered with sufficient clearance for boats as well as large vehicles safely taking into consideration the needs of those with disabilities. The old (existing) bridge has been removed several times already. We need long term views at this time.

COMMENTS: I used to live off of Riverside Drive in the mobile home park, with a perfect view of the bridge. ~~I would like to see the bridge replaced with a movable bridge. I must say that any other option other than the proposed movable bridge is not acceptable. It would hamper the easy access to the mobile home park and any other adjacent properties.~~  
Please choose a movable bridge

COMMENTS: I urge the Commissioners to select the design for a new moveable bridge for the following reasons:

1. Provides a new bridge, up to code.
2. Very important - does not disrupt the lives of residents & how forced relocations and for several "waterfront" homes, placing a wall between their houses and the water, effectively reducing their homes' value as well as the residents' quality of life. Too much human cost.
3. It would provide an unlimited vertical clearance for boats.
4. The cost differential between moveable and fixed bridges is not significant when the cost of purchasing right-of-way is added in.
5. The existing bridge does not have a safe sidewalk. I walk it, and wide vehicles with side mirrors are a menace. Also cars are veering toward the side to avoid the speed bumps, creating more threat.
6. Removal of the bridge would be great - but too inconvenient for residents.

*Note: All comments are part of the public record and are available for viewing by the public and the media.*

**Mr. Tony Horrnik:**

**I'm glad that Pinellas County is looking into improvements for the Beckett Bridge. As it is, it's nearly impossible for pedestrians or bicyclists to feel safe crossing this bridge.**

**After a quick Internet search, I found that the average baby stroller width is 23-27" and the average bicycle handlebar width is 25-27". I then measured my own torso from elbow to elbow (walking position) and found it to be approximately 27". Walkers or runners don't have enough room to move their arms and safely stay within the confines of the 2'2" walkway. Bicyclists aren't able to walk the bike across the bridge on the sidewalk because the handlebars won't fit. Since many children are bicyclists, they should not have to ride or walk their bike in traffic. Finally, the only feasible way to get a baby stroller across the bridge is to either push it in traffic (surely not a good idea!) or fold up the stroller and carry it plus the baby across the bridge (just as bad of an idea).**

**I find it ironic that Tarpon Springs prides itself on its bike trail. Yet, those of us west of the bridge must DRIVE to the trail in order to use it. Yes, there's a roundabout way to get to the trail. But, when bike-riding is a family activity, children (and many adults) cannot deal with the extra mileage the detour would entail. In addition, many of us would like to make Tarpon Springs a "walking community," but not at the risk of being side-swiped by a mirror from a large car or truck passing us on the bridge.**

**There is now national, state, and local emphasis on health and fitness. Since Beckett Bridge impedes pedestrian efforts for walking, running, and biking, I believe you have no other choice but to expand the sidewalk portion of the bridge. Even if a decent sidewalk is only on one side of the road, it would be a vast improvement over what we have now.**

**Thank you,**

**Nancy Corey, 793 Chesapeake Dr., #4, Tarpon Springs, FL 34689; [ngc44118@gmail.com](mailto:ngc44118@gmail.com)**

Preferred option:  
New Moveable  
Bridge.

COMMENTS: After viewing the various options, the New Moveable Bridge is the best options. Least impact to property owners, same life/duration as fixed bridges. Same width for travel lanes & more sidewalks & shoulders - safer & easier for bikers & pedestrians. If you include potential ROW costs (possible legal challenges if eminent domain is necessary) then the costs could surpass the estimate for the fixed bridge options. **HAVE to do something.**

COMMENTS: The moveable bridge though  
more expensive, seems to  
cause the least impact as for  
as change from the older bridge  
the properties near the bridge will  
not be effected as much.

I support the moveable  
bridge, it fits best for the  
community.

COMMENTS: When I look at these options, there are  
2 major points that I look at: one being cost effective  
and one minimal impact. The clear winner to me is the  
movable bridge. Both fixed options have significant impact  
for surrounding properties, as the cost estimate of \$11 million  
does not include ROW costs. These costs are huge, and  
will likely exceed the \$6.8 million estimate for the movable  
bridge. On the other hand, rehab cost 9 million last  
we will have to address the issue again not too far  
ahead in the future, so that is no option for me.  
Impact and cost of the movable bridge are low enough  
to be optimal for all residents and nearby property  
owners.

COMMENTS: \_\_\_\_\_

I have gone over and under that bridge many times in the past 50 years. As a long time resident of Tarpon Springs, I just love that bridge and can't bear to see it fall in disrepair.

After reading the alternatives and discussing the project with other natives, I would vote for the construction of a new mid-level fixed bridge.

COMMENTS: \_\_\_\_\_

~~WE ARE IN FAVOR OF A NEW MOVABLE BRIDGE. THE EXISTING BRIDGE IS DANGEROUS FOR PEDESTRIAN AND BICYCLE TRAFFIC BECAUSE OF THE NARROW SIDEWALKS. WE HAVE WATCHED THE RIVER BOAT TRAFFIC AND CONCERNED THAT THE VERTICAL CLEARANCE IS ADEQUATE FOR ACCESS TO WHITCOMB BAYOU. IF THE BRIDGE IS NOT ALREADY LISTED IN THE NATIONAL REGISTER OF HISTORIC PLACES, WE ARE NOT IN FAVOR OF HAVING IT LISTED. THIS WOULD ONLY MAKE REPLACEMENT MORE DIFFICULT.~~

~~OUR PROPERTY IS LOCATED ON DORIC COURT~~

COMMENTS: I would like to see Rehabilitation of the bridge. No need to spend any more money than it takes to repair. The bridge is a historic landmark.  
I would like to know if you have plans to fix Riverside Drive east of the bridge - the road floods w/ every high tide & rain. The potholes and bumps in the road are not acceptable. Many of a shock absorber has been broken going over this road. Can you at least repair the road & fix the holes & bumps?

Looking forward to hearing from you  
Thank you

COMMENTS: I THINK THE BEST SOLUTION IS FOR A NEW  
MOVABLE BRIDGE. WE DEFINITELY NEED A BRIDGE SO THE OPTION  
OF JUST REMOVING IT IS NOT A DESIRABLE ONE. I WOULD  
PREFER A FIXED SPAN BRIDGE BUT THE COST TO ACQUIRE  
R.O. WOULD BE PROHIBITIVE. THEREFORE THE BEST  
DEAL FOR EVERYONE WOULD BE THE NEW MOVABLE BRIDGE!!

COMMENTS: We are pleased to be considered for the process that affects our lives as well as property values. It is my opinion that a fixed bridge be considered with sufficient clearance for boats as well as large vehicles safely taking into consideration the needs of those with disabilities. The old (existing) bridge has been removed several times already. We need long term news at this time.

COMMENTS: I would prefer to see bridge closed to car traffic, fishing-biking no problem. It should be kept Historic! in keeping with our city. I am absolutely opposed to spending tax dollars on making the Beckett Bridge bigger. It is a waste of money AND would only benefit a very few.

COMMENTS: THE LARGE FIXED BRIDGE IS NOT  
ACCEPTABLE. IT DISPLACES TOO MANY PEOPLE AND  
DO MUCH PROPERTY. IT IS NOT IN KEEPING  
WITH THE SCENIC AND WELCOMING NATURE OF  
TARPON SPRINGS. IT IS HORRIBLY UNATTRACTIVE -  
SIMPLY PUT JUST UGLY. IT IS CONCRETE  
OVERLOAD.  
PLEASE CHOOSE THE BRIDGE WITH ONE  
WIDE SIDEWALK FOR PEOPLE GENERALLY AND  
THE HANDICAPPED. MUCH MORE PLEASING TO  
LOOK AT AND WOULD TAKE LESS TIME TO  
COMPLETE. IT WOULD FIT THE NEIGHBORHOOD.  
THANK YOU.

COMMENTS: After reading the alternatives  
I came to the conclusion that the best  
solution would be a new mid-level  
fixed bridge.

28' vertical will provide small  
sailboats passage as well as larger cabin  
cruisers at 25' horizontal.

I realize it will cost more but over  
the years with no bridge-tender this will offset  
the cost. I have used the bridge first with  
a 26' slope with a tall mast and later with a  
26' staves for over 69 years. This is my opinion!  
The water depth does not allow for large sail-boats!  
in the Bay.

COMMENTS: We, residents of Tarpon Springs, strongly believe the rehabilitation of the Beckett Bridge is the only good solution for the following reasons:

- 1) Beckett Bridge is a significant historic structure, eligible for listing in the NRHP, and likewise be eligible for possible federal funding towards its repair.
- 2) The new alternatives (movable + fixed) are not only extremely costly, but none of those ROW costs have been analyzed.
- 3) Tarpon Springs is a beautiful community known for its inland waterways. The new alternatives will destroy a portion of that uniqueness with a slick passover bridge that could be built anywhere.
- 4) The properties in the ROW versions also need to be considered for their loss of waterfront and view, and the devaluation of the community tax base. Another cost not analyzed.
- 5) Tarpon Springs is already a built-out community in this area. A bridge solution does not have to look to population expansion.
- 6) There are other routes to the west side of the city that heavy trucks and school buses can and should use, but this route will always serve as an important route for residents.
- 7) Tarpon Springs is an important Heritage Tourist attraction and this historic bridge is part of that attraction that brings dollars to this community and Pinellas County.

COMMENTS: I am not in favor of complacency in light of a potentially unsafe bridge. I am also not in favor of removal without replacement - specifically for fear of eliminating an evacuation route.

With regard to replacing the bridge with either fixed or movable, my concerns rest with historic preservation and aesthetics of the area, as well as with the tremendous impact to traffic patterns. The fixed bridge alternative will produce a tremendous eyesore and result in diverted traffic to High Street, which will be extremely negative to the many walkers, cyclists, and pet owners who use that peaceful street every day. By contrast, the movable bridge will produce minimal traffic impact and minimal change to the aesthetic value of the area.

With regard to minor repairs extending the bridge life by 25 years - how long can we afford to "kick the can down the road?" Costs will be tremendously higher and bridge conditions will continue to deteriorate without a permanent solution.

Lastly, I am greatly concerned about cost. If the project proceeds as has been explained, the vast majority of funding will be from federal, state and county treasuries. We cannot sustain a major hit to our local budget.

COMMENTS: \_\_\_\_\_

**No Build**

**YES.** I would approve this option at this time.

**No Build with Removal of the Existing Bridge.**

**No.** Since Riverside Drive is a hurricane evacuation route, I believe a usable bridge should remain available.

**Rehabilitation.**

**Yes and No.** Rehabilitation could be done in the future.

**New Movable Bridge.**

**No.** Riverside Drive would have to be widened by at least nine and a half feet on each side, and the lack of a high curb would be hazardous to pedestrians. I do not know how many property owners would be impacted by not having a movable bridge.

**New Mid-Level Fixed Bridge.**

**No.** Riverside Drive would have to be widened by at least six feet on each side, and the lack of a high curb would be hazardous to pedestrians.

COMMENTS:

① No build / only routine maintenance alternative: I do not like this option. If the bridge has a "max" safe use time of 10 yrs from now, less the year gone until the decision is made - that does not leave alot of time until traffic could not use it. This bridge is important in moving traffic from the Sunset Beach area into town. I feel we need to keep this roadway open & functional - especially when a storm evacuation route is needed.

② Rehabing the Existing bridge in my estimation would be a waste of money because you'd spend almost 10 million & only get a max of 25-30 yrs of use. Then you'd have the same problem you have now. In 30 yrs if you could rehab it again I'm certain it would cost probably double - that is 20 million to rehab.

③ To me building a new bridge is the best long term option. I like the movable bridge choice as it does less change to the East & west approaches. It also looks closer to the existing bridge in construction. This would give us a functional bridge for 75 yrs.

④ I do not like the fixed bridge alternative as they seem like over-kill. They are really intrusive to the properties to the East & West. To me the right serves no useful purpose. Tarpon has a good bit of shoreline that is low by this bridge & we need a functional bridge to give us access before flooding from a storm might occur. As far as boat traffic, in my opinion there are not enough large boats using this part of the river.

COMMENTS: As stated in the presentation, the Beckett Bridge is historically significant. As such, it is my opinion that any replacement structure should retain a character and profile as similar to the existing structure to meet current codes. The bridge approaches pass through residential sections of old Tarpon Springs, preferably any new structure should impact current residents minimally. Options meeting my goals are (A) do nothing and re-address the problem in the future, (B) repair the existing bridge for a life extension of 25-30 years, or (C) Replace the existing bridge with a new, movable bridge, my choice is (C).

The high clearance, fixed bridge options have no characteristics similar to the historic structure being replaced and will have an adverse impact on the current residents on Riverside Drive, including the trailer park. Additional impacts of the fixed span bridges include major disruptions to traffic patterns for adjoining residents, mitigation of the increased run-off water from the longer approaches to the bridge, the disruption to existing run-off water flows, and the aesthetic impact of the lengthened approach ramp structure. Given the limited movable bridge opening history (18 or so openings in 2011) with four of those occurring for larger boat access during Epiphany and the Christmas boat parade, the large boat traffic pattern doesn't justify a high clearance fixed bridge. The vast majority of historical boat traffic can be accommodated by the proposed new movable bridge option.

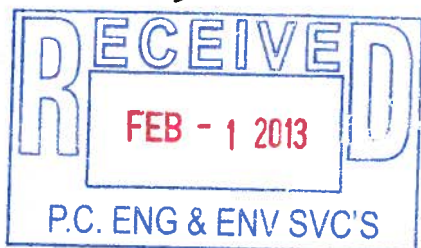

Lastly, some bridge option must be provided for daily access to downtown Tarpon as well as emergency evacuation when needed.

450 Moorings Cove Drive, Tarpon Springs, Florida 34689 (727) 938-6969

Engineering and Technical Support Division,  
14 S. Ft Harrison Avenue-6th Floor,  
Clearwater, FL 33756

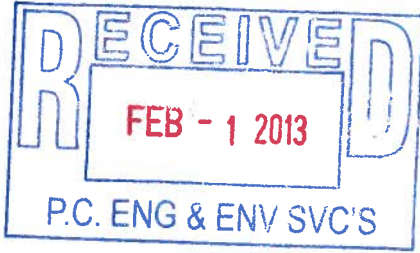

Dear Tony,

I am president of the Board of Directors for The Moorings Condominium Association. The entrance to our facility containing 84 owners is on Whitcomb Blvd adjacent to a blind curve. Our concern is that closing Beckett bridge increases the traffic in our area to a dangerous degree. Obviously we would prefer it not be closed but would recommend that if any closure is necessary that detour signs be erected to route traffic from South Florida Ave to Meres Blvd.

Our facility is on a canal that requires entrance to Whitcomb Bayou for boat traffic. The bridge at the entrance has a clearance of 60 inches. The Moorings, Calista Cay and the Banyons have the potential of hundreds of boats on that canal but due to the limitation of the bridge on Whitcomb Blvd it is obvious that we have no need for a lift Beckett bridge. Whitcomb Bayou has a prohibition on new docks and to my recollection any thing South of Beckett Bridge with the exception of one sailboat wouldn't require a lift bridge.

One sacrifice would be rerouting the Christmas parade.

Sincerely, Bob Terbush 727-692-4130

COMMENTS: I would prefer to see bridge closed to car traffic, fishing-biking no problem. It should be kept Historic! in keeping with our city. I am absolutely opposed to spending tax dollars on making the Beckett Bridge bigger. It is a waste of money AND would only benefit a very few.

**Mr. Tony Horrnik:**

**I'm glad that Pinellas County is looking into improvements for the Beckett Bridge. As it is, it's nearly impossible for pedestrians or bicyclists to feel safe crossing this bridge.**

**After a quick Internet search, I found that the average baby stroller width is 23-27" and the average bicycle handlebar width is 25-27". I then measured my own torso from elbow to elbow (walking position) and found it to be approximately 27". Walkers or runners don't have enough room to move their arms and safely stay within the confines of the 2'2" walkway. Bicyclists aren't able to walk the bike across the bridge on the sidewalk because the handlebars won't fit. Since many children are bicyclists, they should not have to ride or walk their bike in traffic. Finally, the only feasible way to get a baby stroller across the bridge is to either push it in traffic (surely not a good idea!) or fold up the stroller and carry it plus the baby across the bridge (just as bad of an idea).**

**I find it ironic that Tarpon Springs prides itself on its bike trail. Yet, those of us west of the bridge must DRIVE to the trail in order to use it. Yes, there's a roundabout way to get to the trail. But, when bike-riding is a family activity, children (and many adults) cannot deal with the extra mileage the detour would entail. In addition, many of us would like to make Tarpon Springs a "walking community," but not at the risk of being side-swiped by a mirror from a large car or truck passing us on the bridge.**

**There is now national, state, and local emphasis on health and fitness. Since Beckett Bridge impedes pedestrian efforts for walking, running, and biking, I believe you have no other choice but to expand the sidewalk portion of the bridge. Even if a decent sidewalk is only on one side of the road, it would be a vast improvement over what we have now.**

**Thank you,**

**Nancy Corey, 793 Chesapeake Dr., #4, Tarpon Springs, FL 34689; [ngc44118@gmail.com](mailto:ngc44118@gmail.com)**

COMMENTS: \_\_\_\_\_

I have gone over and under that bridge many times in the past 50 years. As a long time resident of Tarpon Springs, I just love that bridge and can't bear to see it fall in disrepair.

After reading the alternatives and discussing the project with other natives, I would vote for the construction of a new mid-level fixed bridge.

COMMENTS: After reading the alternatives  
I came to the conclusion that the best  
solution would be a new mid-level  
fixed bridge.

28' vertical will provide small  
sailboats passage as well as larger cabin  
crusers at 25' horizontal.

I realize it will cost more but over  
the years with no bridge-tender this will offset  
the cost. I have used the bridge first with  
a 26' slope with a tall mast and later with a  
26' staves for over 69 years. This is my opinion!  
The water depth does not allow for large sail-boats!  
in the Bay.

COMMENTS: We, residents of Tarpon Springs, strongly believe the rehabilitation of the Beckett Bridge is the only good solution for the following reasons:

- 1) Beckett Bridge is a significant historic structure, eligible for listing in the NRHP, and likewise be eligible for possible federal funding towards its repair.
- 2) The new alternatives (movable + fixed) are not only extremely costly, but none of those ROW costs have been analyzed.
- 3) Tarpon Springs is a beautiful community known for its inland waterways. The new alternatives will destroy a portion of that uniqueness with a slick passover bridge that could be built anywhere.
- 4) The properties in the ROW versions also need to be considered for their loss of waterfront and view, and the devaluation of the community tax base. Another cost not analyzed.
- 5) Tarpon Springs is already a built-out community in this area. A bridge solution does not have to look to population expansion.
- 6) There are other routes to the west side of the city that heavy trucks and school buses can and should use, but this route will always serve as an important route for residents.
- 7) Tarpon Springs is an important Heritage Tourist attraction and this historic bridge is part of that attraction that brings dollars to this community and Pinellas County.

COMMENTS: I would like to see Rehabilitation of the bridge. No need to spend any more money than it takes to repair. The bridge is a historic landmark.  
I would like to know if you have plans to fix Riverside Drive east of the bridge - the road floods w/ every high tide & rain. The potholes and bumps in the road are not acceptable. Many of a shock absorber has been broken going over this road. Can you at least repair the road & fix the holes & bumps?

Looking forward to hearing from you  
Thank you

COMMENTS: \_\_\_\_\_

~~WE ARE IN FAVOR OF A NEW MOVABLE BRIDGE. THE EXISTING BRIDGE IS DANGEROUS FOR PEDESTRIAN AND BICYCLE TRAFFIC BECAUSE OF THE NARROW SIDEWALKS. WE HAVE WATCHED THE RIVER BOAT TRAFFIC AND CONCERNED THAT THE BRIDGE VERTICAL CLEARANCE IS ADEQUATE FOR ACCESS TO WHITCOMB BAYOU. IF THE BRIDGE IS NOT ALREADY LISTED IN THE NATIONAL REGISTER OF HISTORIC PLACES, WE ARE NOT IN FAVOR OF HAVING IT LISTED. THIS WOULD ONLY MAKE REPLACEMENT MORE DIFFICULT.~~

~~OUR PROPERTY IS LOCATED ON DORIC COURT~~

COMMENTS: \_\_\_\_\_

**No Build**

**YES.** I would approve this option at this time.

**No Build with Removal of the Existing Bridge.**

**No.** Since Riverside Drive is a hurricane evacuation route, I believe a usable bridge should remain available.

**Rehabilitation.**

**Yes and No.** Rehabilitation could be done in the future.

**New Movable Bridge.**

**No.** Riverside Drive would have to be widened by at least nine and a half feet on each side, and the lack of a high curb would be hazardous to pedestrians. I do not know how many property owners would be impacted by not having a movable bridge.

**New Mid-Level Fixed Bridge.**

**No.** Riverside Drive would have to be widened by at least six feet on each side, and the lack of a high curb would be hazardous to pedestrians.

COMMENTS: AFTER VIEWING THE VARIOUS DESIGNS OFFERED TO REPLACE THE BECKETT BRIDGE IT APPEARS THAT THE BEST OPTION IS TO REPLACE THE BRIDGE WITH A NEW MOVABLE OPENING BRIDGE. HERE ARE MY REASONS: SINCE TARPON SPRINGS IS A WATER BASED COMMUNITY IT WOULD LIMIT TOO MANY EVENTS TO HAVE A FIXED BRIDGE. IN THE FUTURE WHICH WE CANNOT SEE, THE BAYOUS MAY BE A VALUABLE PLACE TO PUT SAIL BOATS IN TIME OF STORMS. ALSO THE EVENTS WE CAN PREDICT, EPIPHANY & CHRISTMAS BOAT PARADE COULD BE LIMITED. PROPERTY VALUE IS A BIG CONCERN FOR THE CHOICE OF FIXED BRIDGES. THE COST DIFFERENCE BETWEEN A MOVABLE BRIDGE & A FIXED ARE CLOSE & AFTER PURCHASING LAND FOR RIGHT OF WAY PLUS THE COST OF THE BRIDGE IT COULD BE MUCH MORE THAN A MOVABLE BRIDGE. MANY PEOPLE & THEIR HOMES WOULD BE AFFECTED BY THE FIXED BRIDGE OPTION. SOME LOSE THEIR HOMES SOME LOSE THEIR WATER FRONT THAT THEY BOUGHT THE HOUSE FOR IN THE FIRST PLACE. ESTHETICALLY SOME HOME OWNERS WOULD BE LOOKING AT A CONCRETE WALL INSTEAD OF THE BEAUTIFUL BAYOUS. I BELIEVE THE ORIGINAL DESIGNER HAD A REASON OR VISION TO MAKE THE BAYOUS ACCESSIBLE TO ALL VESSELS. THUS THE PASCOLE BRIDGE.

IN GENERAL, WITH A FIXED BRIDGE SOLUTION WAY, TOO MUCH IS LOST FOR TOO MANY PEOPLE. WITH A MOVABLE BRIDGE NO ONE, OR PROPERTY, IS HARMED OR CHANGED AND THE POTENTIAL IS ALL POSITIVE FOR EVERYONE.

I DO HAVE A SAILBOAT WITH AN AIR DRAFT OF 90' SO A MOVABLE BRIDGE WOULD BE IN MY BEST INTEREST ALSO.

COMMENTS: What is the difference in cost between the new movable bridge + the new mid level fixed bridges

Fixed bridge would not require a bridge tender 24 hrs/day.

What is the average size of the boats that would use this access?

COMMENTS: The bridge needs to be replaced - no doubt

- ① The only solution is a movable bridge. This option will minimally impact the surrounding AREAS & neighborhoods.
- ② You conveniently left out the cost of the fixed bridge. You did not include the cost of home renovations & road improvements. If you had I feel the total cost of this bridge would outweigh the cost of the movable bridge.  
Movable bridge cost - 15 mil.  
Fixed bridge 11 mil plus houses & road improvements.
- ③ Movable bridge - 1 yr of detours. Acceptable length of time to be inconvenienced.
- ④ Fixed bridge - 2 yrs of detours - UN Acceptable
- ⑤ We live in a democracy & the citizens shall be able to choose the option!

COMMENTS: I urge the Commissioners to select the design for a new moveable bridge for the following reasons:

1. Provides a new bridge, up to code.
2. Very important - does not disrupt the lives of residents & how forced relocations and for several "waterfront" homes, placing a wall between their houses and the water, effectively reducing their homes' value as well as the residents' quality of life. Too much human cost.
3. It would provide an unlimited vertical clearance for boats.
4. The cost differential between moveable and fixed bridges is not significant when the cost of purchasing right-of-way is added in.
5. The existing bridge does not have a safe sidewalk. I walk it, and wide vehicles with side mirrors are a menace. Also cars are veering toward the side to avoid the speed bumps, creating more threat.
6. Removal of the bridge would be great - but too inconvenient

COMMENTS: As stated in the presentation, the Beckett Bridge is historically significant. As such, it is my opinion that any replacement structure should retain a character and profile as similar to the existing structure to meet current codes. The bridge approaches pass through residential sections of old Tarpon Springs, preferably any new structure should impact current residents minimally. Options meeting my goals are (A) do nothing and re-address the problem in the future, (B) repair the existing bridge for a life extension of 25-30 years, or (C) Replace the existing bridge with a new, movable bridge, my choice is (C).

The high clearance, fixed bridge options have no characteristics similar to the historic structure being replaced and will have an adverse impact on the current residents on Riverside Drive, including the trailer park. Additional impacts of the fixed span bridges include major disruptions to traffic patterns for adjoining residents, mitigation of the increased run-off water from the longer approaches to the bridge, the disruption to existing run-off water flows, and the aesthetic impact of the lengthened approach ramp structure. Given the limited movable bridge opening history (18 or so openings in 2011) with four of those occurring for larger boat access during Epiphany and the Christmas boat parade, the large boat traffic pattern doesn't justify a high clearance fixed bridge. The vast majority of historical boat traffic can be accommodated by the proposed new movable bridge option.

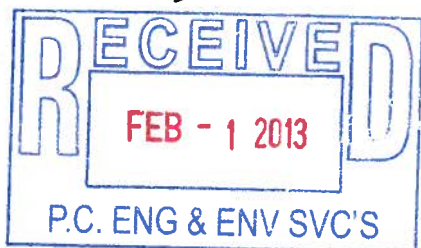

Lastly, some bridge option must be provided for daily access to downtown Tarpon as well as emergency evacuation when needed.

COMMENTS:

① No build / only routine maintenance alternative: I do not like this option. If the bridge has a "max" safe use time of 10 yrs from now, less the year gone until the decision is made - that does not leave alot of time until traffic could not use it. This bridge is important in moving traffic from the Sunset Beach area into town. I feel we need to keep the roadway open & functional - especially when a storm evacuation route is needed.

② Rehabing the Existing bridge in my estimation would be a waste of money because you'd spend almost 10 million & only get a max of 25-30 yrs of use. Then you'd have the same problem you have now. In 30 yrs if you could rehab it again I'm certain it would cost probably double - that is 20 million to rehab.

③ To me building a new bridge is the best long term option. I like the movable bridge choice as it does less change to the East & west approaches. It also looks closer to the existing bridge in construction. This would give us a functional bridge for 75 yrs.

④ I do not like the fixed bridge alternative as they seem like over-kill. They are really intrusive to the properties to the East & West. To me the right serves no useful purpose. Tarpon has a good bit of shoreline that is low by this bridge & we need a functional bridge to give us access before flooding from a storm might occur. As far as boat traffic, in my opinion there are not enough large boats using this part of the river.

Dear Tony,

I am president of the Board of Directors for The Moorings Condominium Association. The entrance to our facility containing 84 owners is on Whitcomb Blvd adjacent to a blind curve. Our concern is that closing Beckett bridge increases the traffic in our area to a dangerous degree. Obviously we would prefer it not be closed but would recommend that if any closure is necessary that detour signs be erected to route traffic from South Florida Ave to Meres Blvd.

Our facility is on a canal that requires entrance to Whitcomb Bayou for boat traffic. The bridge at the entrance has a clearance of 60 inches. The Moorings, Calista Cay and the Banyons have the potential of hundreds of boats on that canal but due to the limitation of the bridge on Whitcomb Blvd it is obvious that we have no need for a lift Beckett bridge. Whitcomb Bayou has a prohibition on new docks and to my recollection any thing South of Beckett Bridge with the exception of one sailboat wouldn't require a lift bridge.

One sacrifice would be rerouting the Christmas parade.

Sincerely, Bob Terbush 727-692-4130

COMMENTS: Either of the movable options I would  
favor. REHABILITATION KEEPS THE STATUS QVO  
(which would be improved with a new movable  
width passages and bicycle lanes would enhance  
neighborhood usage.  
These two options maintain current right-of-ways  
and keep the bridge corridor a residential  
neighborhood travel lane.  
The fix alternatives would turn this road  
into a freeway and are therefore  
preposterous because of the impact to  
properties, wideways, and the calm of the neighborhood.  
My choice would be for rehabilitation to preserve the unique  
bridge and neighborhood.

COMMENTS: I attended the meeting & reviewed all of the options. First I would like to say that I definitely want a bridge. The option of not having a bridge is NOT a good idea. Its many people would be inconvenienced.

My first choice would be to have the current bridge rehabed. I think the current weight limits should stay & it should be expanded. Another option would be to rehab the bridge but make it non-operational. There are so few boats that use it, therefore it doesn't make sense to spend so much money to have a bridge that only opens 10 times a year.

My second option would be to have the movable bridge with a usable walkway on one side.

I definitely don't want either of the fixed bridges. They do not fit in with the surrounding area & they are unsightly.

COMMENTS: There is only 2 options that  
are logical fix or swing bridge (movable)  
ONE WALK WAY ONLY ON ONE SIDE  
would also be cost effective. To take  
property from people because you can is  
not the right thing to do.  
This Bridge is Historical + was even  
in the movie "WINTER"  
I personally would ask you to fix  
this Historical Bridge. Thank you

COMMENTS: \_\_\_\_\_

My primary comment is to make certain  
the bridge is not eliminated

Secondarily, I am against the fixed bridge options.  
I believe they are not only overly intrusive, they  
destroy the ambience of the community, specifically  
that area.

I would like the County to further explore the  
rehab option, including looking at opportunities  
to relocate (grandfather) existing boats at docking  
facilities past the bridge. Would likely be less  
costly.

If a movable bridge option is selected, care should  
be taken to retain the character & existing style  
of the bridge in keeping with the history  
of Tarpon Springs

COMMENTS: \_\_\_\_\_

I support strongly one of the following options - rebuild the cement bridge  
or  
Rebuild a moveable bridge.

Having no bridge is not a viable option for many reasons.  
The nursing home depends on immediate access.  
Flooding could cut off this area completely.  
Increased traffic through residential areas  
Thank you

COMMENTS: Tarpon Springs is a historic  
treasure - a fixed bridge would be  
a horrible eyesore. If a fixed bridge  
was in place with all the changes to  
the neighborhood what about River view  
& its problems leading to this huge  
bridge  
Rehabilitation or a ~~movable~~ movable  
bridge is the best and ONLY option.  
Anything else would destroy the  
historic beauty of the area.

**Everybody's Talking!**

**A bridge in Kentucky:** Looking for a historic bridge? There's one available for free in Kentucky. The 82-year-old, 450-foot metal truss span should be preserved, so the state is offering to dismantle and deliver the bridge to its new home for free. "The new owner just needs to reassemble it and maintain it with its original characteristics intact," says H.B. Elkins, a state highway department spokesman. The bridge is structurally sound, but a new bridge is required in that location to handle heavier traffic. Elkins added that the cost of saving the bridge can't exceed the cost of demolishing it.

Tony your initial T/S - Bridge Session - meeting was well done and properly prepared.

Enclosed is a message on Bridge in Kentucky that has a part in history. Bob Fisher 2/1/13 memo

I used to work for World Class Publishing operation Called Reed (England)-Elsevier (Holland) They had about 80 Business & Professional Magazines which included 14 Construction Mags and a number of Engineering Mags like "Plant Engineering" that had extensive history on building/replacing bridges data. They own world's largest Exhibit & Trade Show facility and conducted World-wide Major Shows for Industry. Further, they published Industry data and Economics Info for Industry & Government. Also produce Data for Legal & Medical utilization. You may be able to obtain meaningful Bridge Construction info/data thru them if your interested.

A thought to ponder - we live on Chesapeake Drive and our road construction project seems like it's **taking forever**. Started 6/1/12 - now at 2/1/13 -many of us think it's taking far too long. Too much unproductive time factors and not enough progress gain in our book + dust, dirt, noise!

Remunerative financial incentives for the contractor for early completion could make a difference Pinellas Co.data reflects almost 2 million visitors take T/S path-way for Fred Howard Park yearly

COMMENTS: As a part-time resident  
at 403 Riverside Dr, Bay Shore Cause RV Park,  
my concern is the displacement of  
some residents in this park. My  
second concern is the current walkway  
is much too narrow and unsafe.  
I don't feel a double walkway and  
bikeway is necessary on the new  
structure. Thank you for your  
interest in my opinion.

COMMENTS: It is amazing that, in our little old town of Tarpon Springs, a draway at Beckett Bridge would even be imagined. We have worked hard to keep our unique small town identity, and we neither need nor want to be a Clearwater.

In addition, to consider uprooting families and taking away property for a few boats a year just does not seem appropriate.

A 25-30 year fix should more than suffice for us.

I request that all options except rehabilitation be removed from consideration.

January 30, 2013

Dear Mr. Horrnik,

We are writing to you about the Beckett Bridge Project. We are the owners of the property at 164 North Spring Blvd., which is located on Spring Bayou. We appreciate the opportunity to share our thoughts on the Beckett Bridge project.

In order for us and our neighbors to access the Gulf of Mexico we must go under the current Beckett Bridge. We understand the need to upgrade the bridge and are pleased that you and the County are including the stakeholders early in the process. Our primary concerns would be vertical clearance and aesthetics. It would be wonderful if we are able to ensure that all of the folks on our side of the bridge will continue to have the same access, and even a bit more clearance, than they have enjoyed in the past. Our country has always strived to rebuild its infrastructure a little safer, a little better and hopefully a little pleasing to the eye (this is not always true) than before. We hope this will be the case for the Beckett Bridge

Thank you very much for your attention in this matter

Very Truly Yours,

  
John Byrnes

  
Wilma Byrnes

*Tarpon Springs Area  
Historical Society*

February 6, 2013

Mr. Tony Hornnik, P.E.  
Pinellas County Environment & Infrastructure Dept.  
14 S. Ft. Harrison Avenue, 6th Floor  
Clearwater, Florida 33756

Dear Mr. Hornnik:

I am writing on behalf of the Tarpon Springs Area Historical Society to express our opposition to the possible demolition of the Beckett Bridge. The Historical Society has reviewed the Pinellas County plans for Beckett Bridge which include the restoration of the existing bridge and several alternatives for construction of either a fixed or movable new bridge. We have also reviewed the National Register of Historic Places Registration Form prepared for Beckett Bridge by the County's historic resources consultant Janus Research and dated April 23, 2012.

The Historical Society fully supports the restoration of Beckett Bridge and urges the Board of County Commissioners to more completely evaluate additional renovation methods and techniques that would extend the life of the bridge. The Historical Society is strongly opposed to the demolition of Beckett Bridge and opposes the proposed alternatives to build a new bridge.

The Historical Society is in favor of retaining the historic Beckett Bridge for the following reasons. The Beckett Bridge is eligible for the National Register of Historic Places for its critical part in encouraging the development of the City of Tarpon Springs. The City and its citizens have a long history of positive actions to preserve its historic character including resurrection of the historic downtown, renovations of many significant historic buildings, the adoption of a historic preservation ordinance applicable to its downtown and historic residential areas and the preservation of the Sponge Docks, a working waterfront and major tourist destination. The demolition of the Beckett Bridge to install a new bridge is not consistent with the historic character of the City in general and, specifically, is incompatible with the low density waterfront area in the vicinity of the Bridge.

Additionally, the Historical Society is in favor of restoring the Beckett Bridge due to its status as a significant historic structure built in 1924. The Beckett Bridge is one of only seven remaining bascule bridges (drawbridges) in Florida and is the oldest of these remaining bascule bridges. The extreme rarity of the Beckett Bridge emphasizes the importance of preserving the Bridge in its current location and for its original use as a bridge between the east and west sides of the City.

Thank you for your consideration of our opinion and we urge you to preserve the Beckett Bridge.

Sincerely,

Cynthia Tarapani  
President

c: Board of Directors and General Membership

COMMENTS: I donot understand Wtly  
you need 2 Bike lanes and sidewalks on BOTH  
sides of Movable Bridge. The only people who use  
the South side are people who fish. PLUS  
there is ONLY ONE sidewalk on both sides  
of Bridge. Especially on the EAST side you can  
only walk 1 Block and have to cross the road to  
get to the side walk that doesnot exist in front  
of the YACHT CLUB. I like the Idea of Fix first  
Movable second choice, depending on cost, the second  
choice Movable seems logical. NO BRIDGE IS  
Not an option. Please use common sense - Evacuation during  
storms?

COMMENTS: I am a snowbird and spend  
6 mos. here in Florida. I chose to settle  
in Tampa (feel and ethnic history. I admire  
the cities efforts to keep the Greek  
charm and avoid making it look like  
every other modern city. Part of that  
charm is the historic lift bridge. A  
line nearby and would hate to see  
the bridge removed.

I would like to see the Rehabilitation  
chosen as the solution.

I believe the life of the bridge  
could be extended by lowering the weight  
limit and for maintaining the current  
use by heavy vehicles (I see trucks  
far over the weight limits using the  
bridge extensively).

COMMENTS: The Beckett Bridge can not be  
eliminate because whitcomb Blvd can  
not handle it.  
Therefore, I feel the best option for  
the area, is to build a new movable  
bridge now before traffic gets worse.

COMMENTS: THE FIXED BRIDGE OPTIONS WHICH  
CLOSE PAMPAS AVE AND REROUTE LOCAL TRAFFIC  
TO HIGH STREET WILL CREATE AN ACCESS PROBLEM  
FOR TRACTOR/TRAILERS, LARGE TRUCKS AND VEHICLES  
WITH BOAT TRAILERS THAT WISH TO ENTER BOAT  
YARD/MARINA AT THE NORTH END OF PAMPAS  
AVENUE. THESE VEHICLES ALREADY HAVE A  
DIFFICULT TIME NEGOTIATING THE TURN FROM  
SPRING BLVD TO PAMPAS AVE. IT WILL BE  
IMPOSSIBLE FOR THEM TO TURN FROM HIGH  
STREET TO PAMPAS AVENUE. IN ADDITION,  
IT DOESN'T MAKE SENSE TO SEND COMMERCIAL  
TRAFFIC DOWN A NARROW RESIDENTIAL  
STREET (HIGH STREET).

February 6, 2013

Mr. Tony Hornik, P.E.  
Pinellas County Environment & Infrastructure Dept.  
14 S. Ft. Harrison Avenue, 6th Floor  
Clearwater, Florida 33756

Dear Mr. Hornik:

I am writing on behalf of the Tarpon Springs Area Historical Society to express our opposition to the possible demolition of the Beckett Bridge. The Historical Society has reviewed the Pinellas County plans for Beckett Bridge which include the restoration of the existing bridge and several alternatives for construction of either a fixed or movable new bridge. We have also reviewed the National Register of Historic Places Registration Form prepared for Beckett Bridge by the County's historic resources consultant Janus Research and dated April 23, 2012.

The Historical Society fully supports the restoration of Beckett Bridge and urges the Board of County Commissioners to more completely evaluate additional renovation methods and techniques that would extend the life of the bridge. The Historical Society is strongly opposed to the demolition of Beckett Bridge and opposes the proposed alternatives to build a new bridge.

The Historical Society is in favor of retaining the historic Beckett Bridge for the following reasons. The Beckett Bridge is eligible for the National Register of Historic Places for its critical part in encouraging the development of the City of Tarpon Springs. The City and its citizens have a long history of positive actions to preserve its historic character including resurrection of the historic downtown, renovations of many significant historic buildings, the adoption of a historic preservation ordinance applicable to its downtown and historic residential areas and the preservation of the Sponge Docks, a working waterfront and major tourist destination. The demolition of the Beckett Bridge to install a new bridge is not consistent with the historic character of the City in general and, specifically, is incompatible with the low density waterfront area in the vicinity of the Bridge.

Additionally, the Historical Society is in favor of restoring the Beckett Bridge due to its status as a significant historic structure built in 1924. The Beckett Bridge is one of only seven remaining bascule bridges (drawbridges) in Florida and is the oldest of these remaining bascule bridges. The extreme rarity of the Beckett Bridge emphasizes the importance of preserving the Bridge in its current location and for its original use as a bridge between the east and west sides of the City.

Thank you for your consideration of our opinion and we urge you to preserve the Beckett Bridge.

Sincerely,  
  
Cynthia Tarapani  
President

Tony,

After attending the Alternative Workshop last night I want to express my opinion to you in writing regarding this issue.

Beckett Bridge fits the character of our quaint town of Tarpon Springs. I feel the construction of a modern sky rise bridge will ruin the personality of the entire city not to mention the millions of dollars of tax payers monies that you will have to pay to attain properties that are deemed waterfront. Plus the fact it is totally unnecessary to up root families from their homes when there are options that require no changes or minimal. Build a bridge that is functional and esthetically fitting to our area. In other words rejuvenate Beckett Bridge. I really don't understand why Option A and B were part of the discussion. Do your committee members actually agree that a bridge of that magnitude would fit in our area and not esthetically ruin everything? Tourists come from all over the world to visit our quaint city and to view the history of our heritage not to ride over a large bridge that doesn't fit the environment. Doesn't anyone remember the dolphin movie filmed mostly in Tarpon Springs with Beckett Bridge starring in the film? Another point I would like to make is that waterfront property is very scarce in Pinellas County. Why would the county take away people's waterfront access plus their boat access to the gulf? How is that even an option?

I would hope that Beckett Bridge continues to be a historical site for our town and if a choice has to be made I would vote for rehabilitation or a movable bridge.

Thank you for your consideration.  
Maria

Subject: Pinellas County Beckett Bridge Project Form submission

This information is the result of a Beckett Bridge Project form submission from the Pinellas County web site.

My\_Name-- Jeff Ganiere

My\_Address-- 330 North Spring Blvd.

city-- Tarpon Springs

ZIP\_code-- 34689

phone-- (727) 939-8273

email [Jeff@Ganiere.com](mailto:Jeff@Ganiere.com)

Comments-- The idea of replacing the draw bridge with a fixed, medium height span would be devastating to me and my family. Our view of the Mineta Bayou would be gone. I, more than anyone would be harmed if the medium height fixed bridge were to replace the existing bascule bridge. Our riparian rights would be incredibly violated. My residence and the life I have worked so hard to build and maintain would be destroyed for no conceivable good reason. In fact only harm can come to me, my family and Tarpon Springs itself with the building of such

a bridge. I even doubt that your buttress wall would comply with code for having minimal roadway visibility regarding egress to our property. Additionally, such a high bridge merely would encourage people to drive even faster than what they already do on Spring Blvd. You have put in speed bumps that go a little ways toward slowing traffic down in this residential area, but the long approach to the bridge would only encourage speeding.

Next, we don't keep our sailboat in front of our home now because the bascule bridge is so narrow as to render it tricky to navigate the narrow channel under the bridge. My desire would be to see the bridge removed in its entirety. The determining factor for me rarely using the bascule bridge is because of the narrow channel. In my opinion, it is pure Tom Foolery to say that the reason for a fixed span is because nobody uses the bascule bridge. It is my belief that if we had an open passage, or minimally a modern bascule bridge, Cramer, Spring and Mineta bayous would become popular destinations. Property value would improve, Tarpon Springs would see much more restaurant activity and the downtown generally would become even more revitalized. Tarpon Springs water ways could once again become as popular as they were in the 1920's when stilt houses abounded and social events proliferated. Open water access would greatly benefit Tarpon Springs.

My last point at this writing is that the price of a new bascule or the fixed bridge is about the same. Removing the bridge altogether and allowing an open channel would be the least expensive and provide Tarpon Springs the greatest benefit. We were told that the new bascule would be about 15 million, opposed to 12 million for the fixed span. However the 12 million for the fixed bridge did not include property acquisition lost tax revenue, legal expenses and cost overrides due to years of litigation. It is my fervent hope that the fixed bridge option be quickly dismissed as inappropriate for this area.

email betsy@ganiere.com

Comments-- I attended the Beckett Bridge Alternative presentation at the Tarpon Springs Yacht Club. The only reasonable choice presented was the building of a new movable bridge. This would allow for continued access to all types of boats into the bayous and would not result in families losing their homes along the proposed route. The fixed mid level structure (either one proposed) is the wrong choice for these reasons:

- Many families would lose their homes or have their property values decimated by the new bridge.
- The proposed structure does not allow for all boats to pass - specifically most sail boats.
- Such a structure significantly alters the laid back "fishing village" complexion that has made Tarpon Springs a desirable place to live and visit. The meandering road circling the bayou would change into a industrial-like speedway.
- The proposed approaches and decent would encourage drivers to speed. Even now with narrow lanes and (decidedly inadequate) speed bumps, drivers accelerate substantially coming off the bridge. Steeper, straighter lanes would encourage this. At both ends, there are sharp curves with limited visibility of approaching traffic and, particularly at the east end, significant pedestrian traffic crossing the street. Property damage, injuries and possibly loss of life seem inevitable.

I respectfully ask the planners to choose the moveable bridge with the same environmental footprint as the current bridge, allowing Tarpon Springs to move forward with a safe bridge while not disturbing the historic complexion of our city.

Comments-- I am a resident of the Harborwatch subdivision and a Board Member of the Tarpon Springs Yacht Club. I have attended two presentations of the Beckett Bridge project and appreciate the thoroughness of the studies accomplished so far. As resident of HW I am concerned of a potential two year bridge closure, especially during hurricane season when Beckett Bridge is an important evacuation route. As a TSYC Board member our concern is the de-facto isolation of the Yacht Club during the construction period and the potential obstruction of the Club's view if a 16' retention wall is built for the Fixed Bridge option. For these reasons, I would like to have another option considered,

consisting of a new fixed bridge, 40' wide and 8' clearance. The low historic operating cycles of the bridge do not justify the inconvenience and excessive costs of the 28' fixed bridge option. Most of the annual cycles are associated with bridge maintenance and testing, boat traffic for the Epiphany Cross Diving affair and the Christmas boat parade. Relocating the four trapped sail boats would be required and the Yacht Club could be of help to facilitate alternatives. Please contact me for further discussion of this proposed option.

Comments-- I am currently in Hawaii working on a project with the Navy, otherwise I would be at the meeting. There NEEDS to be a bridge. I strongly feel that it does NOT need to be a draw span bridge. The waterway leading into Whitcomb and Spring bayous, and the bayous, are considered NOT navigable by the U.S. Coast Guard and the U.S. Army Corps of Engineers. At low tide, the water in the bayous is very shallow. Any boat that draws any amount of water at all, simply can not come and go at low tide. That is why there are no large boats moored in the two bayous. A fixed span bridge with a vertical clearance of 8' to 10' at high water will support the boat traffic, with the exception of sailboats, and if I am not mistaken, there are currently no sailboats moored in either bayou. The bayous will never be dredged and will only get more shallow each year. There is no reason that the taxpayers of Pinellas County should pay for a draw span bridge, and its maintenance, and an on call bridge tender, when it will only be used a few times each year. A fixed span

bridge is all that is needed. No periodic maintenance, no on call bridge tender. Just a bridge. In a nut shell, only sailboats would be affected by the lack of a draw span bridge. I wish I knew how few times it has actually been opened for boat traffic since it was rebuilt a few years back. The costs for a draw span bridge simply can NOT be justified. ALL of the tax payers of Pinellas County can use a fixed span bridge. Only sail boats entering or leaving Whitcomb and Spring bayous will use a draw span bridge. We don't need to pay for that. For all of the above reasons, I also feel that the lack of a draw span bridge will not affect the property value of homeowners on the bayous what-so-ever. If someone would please read this at the meeting on my behalf, or ensure that someone with the county sees this, it would be greatly appreciated. Thank you. Russell Kelly, 602 Riverside Drive, Tarpon Springs.

Comments-- I live west of the center of downtown Tarpon and use Beckett Bridge to travel to and from my home. To close the bridge permanently would be extremely dangerous in case of evacuation. My suggestion is that the bridge be repaired and when it can no longer be repaired then make it a permanent bridge with no extra bike lanes or walking lanes. In other words, don't expand the existing bridge. We are a bedroom community - leave it alone.

**Dear Sirs,**

**Having lived in Tarpon Springs for almost 60 years, I would urge you to keep our bridge as it is, doing the repairs necessary to keep it open. To me, it is a historic landmark that should be saved, not replaced by a modern bridge that would overpower the view of our beautiful Anclote River. There also should be a way to slow cars and trucks as they go over the bridge (not the little humps that people completely ignore). It is one "of a few remaining historic bridges of similar design in FL". Save our bridge.**

**Sincerely,**

**Sharon Sawyer

Comments-- I picked up a brochure about the Beckett Bridge project at Tarpon Springs Yacht Club last week. I was surprised at the appearance of the brochure (glossy, well done, etc.) and would have been just informed with a less pricey flyer. Since I live off Sunset Dr. the closing of the bridge would have an impact. Hopefully a cost effective bridge replacement will be found.

Dear Property Owner or Interested Party:

RE: Beckett Bridge PD&E Study from Chesapeake Drive to Forest Avenue  
Tarpon Springs, Pinellas County, Florida  
County Project Number: PID 2161  
FDOT Financial Project No.: FM 424385-1-28-01  
Alternatives Community Workshop

Pinellas County is hosting an Alternatives Workshop to obtain input from community residents, business owners, property owners and other interested stakeholders concerning the proposed removal, rehabilitation or replacement of the Beckett Bridge in Tarpon Springs. The workshop will be held on Wednesday, January 23, 2013 from 5:00 pm to 7:30 pm at the Tarpon Springs Yacht Club located at 350 N. Spring Boulevard, Tarpon Springs, Florida, 34689. A map showing the project limits and meeting location is provided in the enclosed newsletter.

This informal workshop will be conducted in an open house format. No formal presentation will be made. Information about the conceptual design and potential impacts of alternatives under consideration will be on display. Additional information concerning the project scope and schedule, and future opportunities for community involvement, will be provided. Representatives from the project team will be available to take comments and answer questions.

For additional information, please contact me at (727) 464-3640 or at [thornik@co.pinellas.fl.us](mailto:thornik@co.pinellas.fl.us). Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. Persons with disabilities requiring reasonable accommodations to participate in the meeting should call (727) 464-4062 (VOICE/TDD) no later than seven days prior to the meeting.

Thank you for your interest in this project.

Sincerely,

A handwritten signature in black ink that reads "Tony Hornik". The signature is written in a cursive style.

Tony Hornik, P.E., S.I.  
Project Manager

Alternatives Community Workshop

Dear Mr. Stringer:

Pinellas County is hosting an Alternatives Workshop to obtain input from community residents, business owners, property owners and other interested stakeholders concerning the proposed removal, rehabilitation or replacement of the Beckett Bridge in Tarpon Springs. The workshop will be held on Wednesday, January 23, 2013 from 5:00 pm to 7:30 pm at the Tarpon Springs Yacht Club located at 350 N. Spring Boulevard, Tarpon Springs, Florida, 34689. A map showing the project limits and meeting location is provided in the enclosed newsletter.

This informal workshop will be conducted in an open house format. Information about the conceptual design and potential impacts of alternatives under consideration will be on display. Additional information concerning the project scope and schedule, and future opportunities for community involvement, will be provided. Representatives from the project team will be available to take comments and answer questions. Comment forms will be available.

Mr. Tony Horrnik, P.E., Project Manager, may be contacted for additional information at (727) 464-3640 or at [thornik@co.pinellas.fl.us](mailto:thornik@co.pinellas.fl.us). Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. If you need special accommodations under the Americans with Disabilities Act, or require translation services (free of charge), please contact Mr. Tony Horrnik at least seven days before the meeting.

Thank you for your interest in this project.

Sincerely,

  
David E. Scott, P.E.  
Executive Director

Alternatives Community Workshop

Dear Commissioner Larsen:

Pinellas County is hosting an Alternatives Workshop to obtain input from community residents, business owners, property owners and other interested stakeholders concerning the proposed removal, rehabilitation or replacement of the Beckett Bridge in Tarpon Springs. The workshop will be held on Wednesday, January 23, 2013 from 5:00 pm to 7:30 pm at the Tarpon Springs Yacht Club located at 350 N. Spring Boulevard, Tarpon Springs, Florida, 34689. A map showing the project limits and meeting location is provided in the enclosed newsletter.

This informal workshop will be conducted in an open house format. Information about the conceptual design and potential impacts of alternatives under consideration will be on display. Additional information concerning the project scope and schedule, and future opportunities for community involvement, will be provided. Representatives from the project team will be available to take comments and answer questions. Comment forms will be available.

Mr. Tony Hornnik, P.E., Project Manager, may be contacted for additional information at (727) 464-3640 or at [thornnik@co.pinellas.fl.us](mailto:thornnik@co.pinellas.fl.us). Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. If you need special accommodations under the Americans with Disabilities Act, or require translation services (free of charge), please contact Mr. Tony Hornnik at least seven days before the meeting.

Thank you for your interest in this project.

Alternatives Community Workshop

Dear Mr. Schurman:

Pinellas County is hosting an Alternatives Workshop to obtain input from community residents, business owners, property owners and other interested stakeholders concerning the proposed removal, rehabilitation or replacement of the Beckett Bridge in Tarpon Springs. The workshop will be held on Wednesday, January 23, 2013 from 5:00 pm to 7:30 pm at the Tarpon Springs Yacht Club located at 350 N. Spring Boulevard, Tarpon Springs, Florida, 34689. A map showing the project limits and meeting location is provided in the enclosed newsletter.

This informal workshop will be conducted in an open house format. Information about the conceptual design and potential impacts of alternatives under consideration will be on display. Additional information concerning the project scope and schedule, and future opportunities for community involvement, will be provided. Representatives from the project team will be available to take comments and answer questions. Comment forms will be available.

Mr. Tony Horrnik, P.E., Project Manager, may be contacted for additional information at (727) 464-3640 or at [thornik@co.pinellas.fl.us](mailto:thornik@co.pinellas.fl.us). Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. If you need special accommodations under the Americans with Disabilities Act, or require translation services (free of charge), please contact Mr. Tony Horrnik at least seven days before the meeting.

Thank you for your interest in this project.

Sincerely,

David E. Scott, P.E.  
Executive Director

### Notice of Meeting/Workshop Hearing

#### OTHER AGENCIES AND ORGANIZATIONS

##### [Pinellas County Department of Environment & Infrastructure \(DEI\)](#)

The Pinellas County Department of Environment and Infrastructure announces a public meeting to which all persons are invited.

DATE AND TIME: January 23, 2013, 5:00 p.m. – 7:30 p.m.

PLACE: Tarpon Springs Yacht Club, 350 N. Spring Boulevard, Tarpon Springs, Florida, 34689

GENERAL SUBJECT MATTER TO BE CONSIDERED: Pinellas County, in coordination with the Florida Department of Transportation (FDOT) and the Federal Highway Administration (FHWA), invites you to attend an Alternatives Public Workshop concerning the proposed removal, rehabilitation or replacement of the Beckett Bridge (Riverside Drive) over Whitcomb Bayou in Tarpon Springs. Study limits extend from Chesapeake Drive to Forest Avenue in Tarpon Springs, Pinellas County. Aerial maps depicting the various alternatives being considered will be on display along with other project information for public review. A video presentation about the project will be shown continuously during the meeting. Pinellas County representatives will be available to discuss the project and answer questions. Attendees are encouraged to come to this meeting at any time between 5:00 p.m. and 7:30 p.m. to review the improvements under consideration. More information can be viewed on the project website at [www.pinellascounty.org/beckettbridge](http://www.pinellascounty.org/beckettbridge).

A copy of the agenda may be obtained by contacting: Tony Horrnik, P.E., S.I., Project Manager, Environment and Infrastructure, 14 S. Ft. Harrison Avenue, 6th Floor, Clearwater, FL 33756, or at (727) 464-3640 or at [thornik@co.pinellas.fl.us](mailto:thornik@co.pinellas.fl.us).

Pursuant to the provisions of the Americans with Disabilities Act, any person requiring special accommodations to participate in this workshop/meeting is asked to advise the agency at least 7 days before the workshop/meeting by contacting: (727) 464-4062 (VOICE/TDD). Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. If you are hearing or speech impaired, please contact the agency using the Florida Relay Service, 1(800)955-8771 (TDD) or 1(800)955-8770 (Voice).

If the above contains all content in this notice, click 'Save to HTML File and Finish'. Otherwise copy/paste this content into a Word file; ONLY edit the FULL TEXT portion if applicable, then upload the Word file from Notice Home.

# NOTICE: ALTERNATIVES COMMUNITY WORKSHOP

## Beckett Bridge Study

Pinellas County, in conjunction with the Florida Department of Transportation, will conduct an Alternatives Workshop for the ongoing Beckett Bridge (Riverside Drive) Project Development and Environment (PD&E) Study. Alternatives include

removal, rehabilitation, or replacement of the Beckett Bridge. This informal workshop will be conducted in an open house format; no formal presentation will be made. The meeting will be held on Wednesday, January 23, 2013, from 5:00 pm to 7:30 pm, at the Tarpon Springs Yacht Club located at 350 N Spring Boulevard in Tarpon Springs.

All interested parties are encouraged to attend this meeting, review materials on display, and express their opinions concerning this project. For further information, please contact Mr. Tony Hornik, P.E., S.I., Project Manager, at (727) 464-3640. For additional information please visit <http://www.pinellascounty.org/beckettbridge>. Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. Persons with disabilities requiring reasonable accommodations to participate in the meeting should call (727) 464-4062 (VOICE/TDD) prior to the meeting.

**Around the region**

# A collection that's a real trip

Area artists depict different places that inspired them, from Brooklyn and Manhattan to France.

BY MICHELE MILLER  
Times Staff Writer

NEW PORT RICHEY — The deer, it seemed, were everywhere. They were where you might expect them to be: in the woods and on the ski slopes of Indianhead Mountain in the "Big Snow Country" of Michigan's Upper Peninsula. But they also often ventured into town, sometimes invading back yards to munch on the summer blooms or leave tell-tale tracks in the snow in winter.

"It was amazing to watch. They were almost tame," said Jane Wertanen, 69, of Port Richey, a former art teacher who started taking photographs when she resided, for a time, in the place where her husband, Alvin, grew up.

Then she took to her easel to paint what she had seen.

The result: an oil painting called *Resilience* that is hanging at the Progress Energy Art Gallery in New Port Richey. It's part of an exhibit called "On and Off the Beaten Path," featuring the works of about 20 area artists through Jan. 26.

"It's meant to take the viewer on a journey through the artist's eyes," said gallery director Nancy Ciesla, pointing out a photograph of a simple beach gate taken in Volusia County by New Port Richey resident Bette MacDonald called Gate to Wilbur-by-the-Sea.

"Unless you've been there you'd have never seen that gate," Ciesla said. "This exhibit is taking people to a place they've never been."

Indeed, the works at the modest gallery take a visitor from the waters off Key West to the tenement rooftops in Brooklyn, a German cemetery and a hospital garden in Arles, France.

The latter was painted Tampa impressionist-realist Terry Klaaren, who followed in the strokes of Vincent Van Gogh,

Artist Fran McLean, left, and Progress Energy Art Gallery director Nancy Ciesla hang Jane Wertanen's painting *Resilience*, a scene of deer in the snow from Indianhead Mountain, Mich. Wertanen, a former art teacher, lives in Port Richey.

**IF YOU GO**

**On and Off the Beaten Path**

**What:** An exhibit of travel-inspired artwork by various local artists

**When:** Through Jan. 26 noon to 6 p.m. Wednesday through Saturday.

**Where:** Progress Energy Art Gallery, 6231 Grand Blvd., New Port Richey. For information call (727) 848-6500 or visit nprgallery.com.

Edith Huber's image of a masked woman, *Night in Venice*, joins the artful travelogue at Progress Energy Art Gallery.

photograph. It's part of an ode to New York, flanked by a photograph of a busy Times Square and an eye-catching rendition of the Manhattan skyline painted by Fred Mannarino of Spring Hill.

"I'm a romantic at heart," Mannarino said, explaining how he melded the experiences of two very different places — Manhattan and Miami — into one painting. The retired commercial artist grew up in Brooklyn but spent years traveling in the Navy during the Korean

War. He drew upon a memory of a long-ago evening spent watching the moon rise over Miami from an aircraft carrier moored offshore. Two years ago he decided to recapture that mood on canvas by painting Manhattan. "I just wanted to give a feeling for the city at dusk, at twilight, where the light is just starting to flicker on the water," he said.

New York City with a tropical twist — as seen through the artist's eyes.

Now journey on.

# Group revives effort to carve out a city

Harbor Fire District, including downtown Palm Harbor, Ozona and Crystal Beach, he hopes to hear from East Lake residents too. East Lake has its own fire district.

"We are in the preliminary stages," Atherton said. "We want everyone to give us input to determine how to move forward."

For years, some Palm Harbor residents have wished they had a city government rather than relying on the Pinellas County Commission. The main reason, Atherton said, is because Palm Harbor residents are in a municipal services taxing unit and pay Pinellas County to fund their municipal services.

"There are many who feel we don't get back what we pay in taxes," he said. "Up until now, I was not interested in incorporating, but recently I've felt we've needed local representation."

About four years ago, another group, the Greater Palm Harbor Coalition, pushed for incorporation. However, due in large part to a group of Crystal Beach residents who wanted to remain independent, the coalition's work was tabled.

James Kleyman, one of the leaders of the former coalition, is serving as an unofficial adviser to the new group. He believes another reason past campaigns failed was that residents "were not educated and did not understand the differences of city and county government," he said. However, recent events have frustrated residents, Kleyman said.

Kleyman believes many in the community saw more of a need for localized government back in April when the Pinellas County commissioners decided to amend the His-

**FAST FACTS**

**To join board**

The Palm Harbor Coalition is looking for volunteers to serve as board members. Here are the requirements:

- Be a resident or business owner within Palm Harbor.
- Have time and passion to devote to the process. This may involve several meetings a month for up to a year.

To apply, send your name, address and contact information to Norm Atherton, P.O. Box 26, Palm Harbor, Florida 34682. An application will also be available on the Palm Harbor Coalition website, [www.PalmHarborCoalition.org](http://www.PalmHarborCoalition.org). The deadline to apply is Jan. 18.

toric Palm Harbor Master Plan to allow property owners to use transfers of development rights to expand. "Palm Harbor was treated horribly with that. (Pinellas County) stepped all over the community," Kleyman said.

Ultimately, voters would decide whether or not Palm Harbor would incorporate, and in order for that to happen, the Palm Harbor Coalition will need to get the go-ahead from the Florida Legislature to proceed.

Until then, Atherton encourages those interested to contact the coalition to help with the process.
