Concordance Index..... (44 - 53)

1 MR. CLOSTERMAN: Welcome to the Public Hearing
2 concerning improvements to the Beckett Bridge.

3 My name is Tim Closterman. I am the Pinellas County
4 communications director. Joining me this evening is Tony
5 Horrnik, he is a Pinellas County project manager; Ann
6 Venables, a consultant project manager with URS; and Jim
7 Phillips is a chief bridge engineer with URS.

8 Thank you for attending this important meeting.
9 There are a number of elected and appointed officials or
10 their representatives here this evening. I know of
11 Tarpon Springs City Commissioner David Banther. Will you
12 please stand? Thank you very much for joining us this
13 evening.

14 If there are any other federal highway
15 administration, state, county, city elected or appointed
16 public officials who would like to be recognized, please
17 stand and introduce yourself.

18 (No response.)

19 The formal portion of this hearing includes an
20 introduction, a video presentation, and public testimony.
21 I will let you know that the video is approximately 30
22 minutes long tonight. So once we start that, just so you
23 know, it's about 30 minutes.

24 Initially, I will introduce the project and describe
25 the laws and the rules under which this public hearing

1 will be conducted for the official record. Then a video
2 presentation will be shown that discusses the Project
3 Development and Environment, or PD&E process. The
4 alternative is evaluated during the PD&E study and the
5 recommended alternative. After the video presentation,
6 we will conduct the public testimony portion of the
7 hearing.

8 If you want to make a public statement with the
9 microphone and have not filled out a speaker's card, you
10 can get one from a member of the project team. So I've
11 received one already, but we have cards up front as well
12 as the back corner over there.

13 You can also obtain a speaker's card after the
14 video presentation. Once I receive the cards, I will
15 call your name in the order that the speaker's cards were
16 received. Your comments will be included in the official
17 public record of this hearing. Please note that this is
18 an opportunity for you to state your views and comments
19 about the design, location and impacts of the recommended
20 alternative. If your statement includes questions, we
21 will be available to answer them after the formal portion
22 of the hearing is completed.

23 If you have questions related to the noise study,
24 please talk with the noise specialist, Carrol Fowler.
25 Carrol, if you could please raise your hand. Carrol's in

1 the back by the exit sign.

2 I will now proceed with the introduction for the
3 Public Hearing record.

4 The time is now 6:09 p.m. This Public Hearing is
5 being conducted on February 26, 2014, at the Tarpon
6 Springs Yacht Club located at 350 North Spring Boulevard,
7 Tarpon Springs, Florida.

8 This Public Hearing is being held in accordance with
9 the Federal Aid Highway Act of 1968 as amended 23 USC
10 12840 CFR 1500 to 1508, 23 CFR 771, Section 339.155,
11 Florida Statute and Executive Order 11988 Floodplain
12 Management and Executive Order 11990 Protection of
13 Wetlands of the Constitution of the United States of
14 America.

15 This Public Hearing was advertised consistent with
16 the federal and state requirements and is being conducted
17 consistent with the Americans with Disabilities Act of
18 1990.

19 The purpose of the Public Hearing is to share
20 information with the general public and community about
21 the proposed improvement, its conceptual design, all
22 alternatives under study and potential beneficial and
23 adverse social, economic and environment impacts upon the
24 community.

25 The Public Hearing also serves as an official forum

1 providing an opportunity to the public to express their
2 opinions and concerns regarding the location, conceptual
3 design and potential social, economic, and environmental
4 effects of the proposed improvements on the community.

5 A verbatim transcript is being made of all oral
6 proceedings. In addition, all written and oral material
7 will be made part of the official public record for the
8 project.

9 This Public Hearing is being held relative to State
10 Project Number 42438512801 and County Project Number PID
11 2161. The federal aid project number is to be determined
12 at a later date.

13 The Federal Highway Administration, in accordance
14 with federal law, cooperates with the State of Florida in
15 planning and developing Federal Aid Transportation
16 improvements. The FHWA reviews and approves all Federal
17 Aid actions proposed by the Florida Department of
18 Transportation.

19 The proposed improvement involves replacement of
20 the Beckett Bridge which crosses Whitcomb Bayou in Tarpon
21 Springs, Pinellas County, Florida. This Public Hearing
22 is being held to give all interested persons the right to
23 understand the project and comment on the concerns for
24 the County.

25 Public participation at this hearing is encouraged

1 and solicited without regard to race, color, creed,
2 religion, sex, age, national origin, disability, or
3 family status. This information is also provided in the
4 project handout and on the sign displayed at this
5 hearing.

6 Before we watch the video, I do have to -- please
7 note I have to make one correction to the video
8 presentation. It states that the no-build alternative,
9 or do nothing alternative, is not recommended for further
10 consideration. However, the no-build alternative will
11 remain viable until the end of the study.

12 So we'll go ahead and dim the lights now and start
13 the video. And as I mentioned at the beginning, it's
14 about a 30-minute video.

15 VIDEO PRESENTATION

16 Pinellas County welcomes you to the Public Hearing
17 for the Beckett Bridge Project Development and
18 Environment, or PD&E study.

19 Pinellas County, in coordination with the Florida
20 Department of Transportation and the Federal Highway
21 Administration is conducting a PD&E study for the
22 removal, rehabilitation or replacement of the Beckett
23 Bridge. The limits of the project extend along Riverside
24 Drive from Chesapeake Drive to Forest Avenue in Tarpon
25 Springs. The study has been underway since January 2012.

1 The existing two-lane bridge spans Whitcomb Bayou,
2 connecting areas west and north of the bayou to downtown
3 Tarpon Springs. Riverside Drive, also known as North
4 Spring Boulevard, is an extension of Tarpon Avenue, which
5 is a designated evacuation route. Beckett Bridge
6 provides access to major roadways including US 19 for
7 coastal residents during emergency evacuation. Boats in
8 Whitcomb Bayou must pass under the Beckett Bridge to
9 access the Anclote River and eventually the Gulf of
10 Mexico.

11 Beckett Bridge is a bascule, or moving bridge. It
12 was constructed in 1924 as a timber bridge with a steel
13 movable span. In 1956, the timber spans were replaced
14 with concrete. The bridge remains one of only a few
15 historic highway single-leaf bridges of similar design
16 left in Florida. The bridge has been in service for more
17 than 80 years but was originally designed to last about
18 50 years. Despite continual costly and disruptive
19 repairs, the bridge has deteriorated and is in need of
20 rehabilitation or replacement.

21 In recent Florida Department of Transportation
22 bridge inspection reports the bridge received a
23 "Sufficiency Rating" of 44.9 on a scale of one to a
24 hundred. This rating reflects the structural condition
25 and operational characteristics of the bridge.

1 Structural deficiencies include corrosion of the
2 steel in the concrete piles and beams which support the
3 bridge, and corrosion of the structural steel on the
4 movable portion of the bridge.

5 There are also indications that the piles
6 supporting the bridge may be settling because of unstable
7 soil conditions, caused in part by remnant sinkholes.
8 These deficiencies have resulted in weight restrictions
9 on the bridge. Large trucks, school buses and some
10 emergency fire-rescue vehicles cannot legally cross the
11 bridge.

12 Machinery that operates the movable span is in poor
13 condition and needs replacement.

14 The bridge is also considered "functionally
15 obsolete," primarily because of its narrow width. There
16 are no shoulders or bicycle lanes on the existing bridge.
17 The narrow bridge sidewalks do not meet standards
18 established by the Americans with Disabilities Act. The
19 bridge railings and guard rails do not meet current
20 roadside safety requirements.

21 The existing bridge provides about 6 feet of
22 vertical clearance and 25 feet of horizontal clearance
23 for boats traveling on the waterway. The U.S. Coast
24 Guard has no guidelines for clearances at this location.
25 They are determined on a case-by-case basis.

1 The bridge is owned, operated and maintained by
2 Pinellas County. The U.S. Coast Guard regulates the
3 bridge opening schedule which requires that it open on
4 demand if at least two hours' notice is given. According
5 to County records, the bridge opened 10 times in 2009, 20
6 times in 2010, 18 times in 2011, and 14 times in 2012.

7 The purpose of the PD&E Study is to determine the
8 best alternative for repair or replacement of the bridge.
9 The selected alternative must adequately address
10 transportation needs, and at the same time minimize
11 impacts to the community and environment. The PD&E Study
12 complies with the National Environmental Policy Act, or
13 "NEPA," which must be followed to qualify for future
14 possible federal funding.

15 The PD&E process includes engineering studies,
16 social and environmental studies, and community
17 involvement. Steps in the process include development of
18 alternative concepts, evaluation of alternatives, and
19 selection of a Preferred Alternative. The Preferred
20 Alternative will require approval by Pinellas County,
21 FDOT and the Federal Highway Administration.

22 Soliciting public input and consideration of the
23 community's concerns regarding the alternatives are key
24 elements in the decision making process.

25 In addition to this Public Hearing, opportunities

1 for public involvement during the study have included
2 numerous meetings with community groups including the
3 Chamber of Commerce, Tarpon Springs Yacht Club, the
4 Rotary Club, and the Tarpon Springs Historic Preservation
5 Society. The study team also coordinated with local
6 government staff and officials, and regulatory agencies
7 including the City of Tarpon Springs. A project website
8 was also developed to keep the community informed and
9 solicit comments.

10 Information about alternatives considered during the
11 study were presented to these groups and during the
12 Alternatives Public Workshop held in January of 2013.
13 This public hearing was advertised in the Tampa Bay Times
14 on February 2 and February 16, and in the Pinellas
15 Edition of the Suncoast News on February 6 and February
16 20th, 2014.

17 The purpose of tonight's Public Hearing is to
18 summarize the analysis and results of the PD&E study to
19 date, and to provide you with an additional opportunity
20 to comment on the location, conceptual design, social,
21 economic and environmental effects of proposed
22 improvements. Alternatives considered during the study
23 will be reviewed. The Recommended Alternative will be
24 presented in more detail. Engineering issues and
25 potential impacts of the Recommended Alternative will be

1 discussed.

2 The following alternatives have been evaluated:
3 The no-build alternative; the no-build with removal of
4 the existing bridge; the rehabilitation of the existing
5 bridge; and replacement of the existing bridge with a new
6 movable bridge with approximately 7.8 feet of vertical
7 clearance; and replacement with a new fixed bridge with
8 approximately 28 feet of vertical clearance.

9 The No-Build alternative would mean that no
10 modifications or major improvements to the existing
11 bridge would occur. Only routine maintenance and repairs
12 would be performed to keep the existing bridge operating
13 safely.

14 The remaining service life of the existing bridge is
15 estimated to be 10 years or less. Major repair or
16 replacement of the bridge may be considered at a later
17 date.

18 The advantages of the No-Build Alternative include:
19 No adverse impacts to the historic bridge, wetlands or
20 wildlife; no noise or visual impacts from construction.

21 The disadvantages of the No-Build Alternative
22 include electrical, mechanical and structural
23 deficiencies will not be corrected; the narrow lanes and
24 sidewalks would remain; no shoulders will be provided;
25 weight restrictions would continue on the bridge, large

1 trucks, school busses and some emergency fire-rescue
2 vehicles could not legally cross the bridge; replacement
3 would be needed after 10 years; and closures to traffic
4 would likely be required for extensive repairs and
5 maintenance.

6 The No-Build Alternative is not recommended for
7 further consideration.

8 A second No-Build Alternative, no-build with the
9 removal of the existing bridge, has also been evaluated.
10 As previously described, there would be no modification
11 to the existing bridge, and only routine maintenance
12 would continue until the bridge is no longer safe for
13 traffic. At that time, the bridge would be demolished.
14 A new bridge would not be constructed.

15 Advantages and disadvantages of this alternative
16 are the same as those for the No-Build Alternative while
17 the bridge is still operational. Additional advantages
18 resulting from eventual permanent removal of the bridge
19 include the following: Existing noise would be reduced
20 for adjacent properties; costs of maintenance of the
21 existing bridge and cost of a replacement bridge will be
22 eliminated; and restriction of a navigation channel will
23 be eliminated.

24 Disadvantages of permanent removal of the existing
25 bridge include: An alternate route for emergency

1 evacuation would be eliminated; emergency response time
2 could be affected; traffic on Whitcomb Drive and Meres
3 Boulevard will increase during peak hours; and an
4 important link to the Pinellas Trail would be eliminated
5 for the proposed Howard Park Trail.

6 The No-Build with Permanent Removal of the existing
7 bridge is not recommended for further consideration.

8 The Rehabilitation Alternative would consist of
9 extensive repairs to the existing bridge which would
10 extend its serviceable life for about 25 to 30 more
11 years. Extensive concrete and steel repairs would be
12 required to correct the structural deficiencies. The
13 geometry on the bridge would remain the same. The bridge
14 would not be widened. Navigational clearances would
15 remain the same.

16 The bascule, or movable span, and the bascule pier,
17 which supports the movable span, are the only remaining
18 elements of the original 1924 bridge. Rehabilitation
19 would require replacement of the bascule span.

20 Crutch bents which consist of additional piles will
21 be required to strengthen the foundations on most of the
22 existing piles.

23 Cathodic, or corrosion protection jackets will be
24 installed on all existing piles and the two piers that
25 support the removal span. This computer simulation shows

1 what the rehabilitated bridge would look like after the
2 addition of crutch bents.

3 Additional repairs for the rehabilitation
4 Alternative include: Replacement of the substandard
5 bridge railing; rehabilitation or replacement of the
6 control house; replacement of substandard approach
7 guardrails; replacement of traffic and barrier gates;
8 replacement of the fender system; replacement of
9 electrical systems and machinery.

10 In addition, a concrete overlay will be installed
11 on the bridge deck. Deck expansion joints will be
12 replaced. Concrete on the underside of the deck and pile
13 bent caps will be repaired. Concrete on piers that
14 support the movable span will be repaired.

15 Advantages of the Rehabilitation Alternative
16 include: Minimal impacts to wetlands and wildlife, and
17 no changes in access to local streets or driveways; a
18 full detour during construction will be limited to about
19 six months, which is less than other build alternatives;
20 structural, mechanical and electrical deficiencies will
21 be corrected, the bridge would no longer be
22 weight-restricted.

23 Disadvantages of the Rehabilitation Alternative
24 include the following: Existing substandard narrow lanes
25 and sidewalks will remain; shoulders will not be

1 provided; installation of additional crutch bents and
2 pile jackets would alter the appearance of the historic
3 bridge; a 6-month detour will be required; the bridge
4 will still need to be replaced in 25 to 30 years;
5 replacement of the bascule or movable span is anticipated
6 to be considered an adverse effect to the historic bridge
7 by the State Historic Preservation Officer.

8 The Rehabilitation Alternative is not recommended
9 for further study.

10 At the request of the State Historic Preservation
11 Officer and the Cultural Resource Committee established
12 for this project, two additional rehabilitation
13 alternatives were developed and evaluated. Both of these
14 alternatives would improve the pedestrian facilities on
15 the existing bridge by providing wider sidewalks on one
16 or both sides of the rehabilitated bridge.

17 Extensive engineering evaluations concluded that
18 both rehabilitation alternatives would require widening
19 the bridge replacement of the bascule or movable span and
20 replacement of the bascule pier. No elements of the
21 original bridge would remain.

22 Accordingly, neither of these rehabilitation
23 alternatives were recommended for further consideration.

24 Two fixed bridge alternatives, Option A and Option
25 B, were evaluated. Both would provide 28 feet of

1 vertical clearance and 25 feet of horizontal clearance at
2 the fenders. A new fixed bridge would be constructed on
3 approximately the same alignment as the existing bridge.
4 The anticipated service life for the new bridges is 75 to
5 100 years.

6 The advantages of the Fixed Bridge - Option A
7 Alternative include: Structural, mechanical, electrical
8 and geometric deficiencies would be corrected; shoulders
9 will provide an "undesignated bicycle lane"; bridge
10 openings that disrupt vehicular traffic will be
11 eliminated; initial and long-term maintenance will be
12 reduced; construction cost is less than the cost of a new
13 movable bridge.

14 Disadvantages of the Fixed Bridge - Option A
15 Alternative include: Retaining walls approaching the
16 bring would vary from 1 to 19 feet high within the
17 project limits, and would result in substantial visual
18 impacts to some residents; the bridge would impact about
19 two acres outside of existing right-of-way; the existing
20 intersection of Pampas Avenue and Venetian Court with
21 Riverside Drive will be eliminated; construction of a
22 connector road will impact the Tarpon Springs Yacht Club
23 property; five residential relocations will be required;
24 the existing bridge, which is eligible for listing in the
25 National Register of Historic Places will be removed;

1 sidewalks will only be provided on the north side of the
2 bridge; boats requiring more than 28 feet of vertical
3 clearance will not be able to navigate through the
4 channel; some private docks on the south side of
5 Riverside Drive will be inaccessible from the roadway;
6 the bridge will be closed to traffic for approximately
7 two years.

8 The advantages of the Fixed Bridge - Option B
9 Alternative are the same as those described for Option A.

10 Disadvantages of the Fixed Bridge - Option B
11 Alternative are the same as Option A except that three
12 residential relocations compared to five will be required
13 and that construction of a connector road will impact the
14 Tarpon Springs Yacht Club property and a vacant
15 residential parcel on the south side of Riverside Drive.

16 Fixed Bridge Alternatives - Options A and B are not
17 recommended for further consideration.

18 The Movable Bridge Alternative would provide a
19 minimum of 7.8 feet of vertical clearance and 25 feet of
20 horizontal clearance. The new movable bridge would also
21 be constructed on approximately the same alignment as the
22 existing bridge. The anticipated service life for the
23 new bridge is 75 to 100 years.

24 The advantages of the Movable Bridge Alternative
25 include: Electrical, mechanical and structural

1 deficiencies will be corrected; shoulders will provide an
2 "undesignated bicycle lane; 6-foot wide sidewalks will be
3 provided on both sides of the bridge; construction will
4 not require acquisition of any adjacent property, it can
5 be constructed within the existing County right-of-way;
6 no impacts to existing intersections with Riverside Drive
7 will occur; no impacts to existing driveways will occur;
8 the new bridge would provide slightly more vertical
9 clearance than the existing bridge; unlimited clearance
10 through the channel will be provided in the open
11 position; visual impacts will be minimal to adjacent
12 properties; the bridge will be closed for only one year
13 for construction compared to two years for a fixed
14 bridge.

15 Disadvantages of the movable bridge include: The
16 existing bridge, which is eligible for listing in the
17 National Register of Historic Places, will be removed;
18 construction costs are higher for a movable bridge than a
19 fixed bridge; costs for operation and maintenance over
20 the life the movable bridge are higher than for a fixed
21 bridge; the bridge will be closed to traffic for about
22 one year and a detour will be required.

23 A table which compares the alternatives, referred
24 to as an Alternatives Evaluation Matrix, was prepared.
25 Many factors, including impacts to the community and the

1 environment, costs and engineering issues were evaluated.
2 The matrix is on display here tonight. Project
3 representatives are available to answer your questions
4 about the matrix.

5 Draft engineering and environmental reports which
6 evaluate and discuss these alternatives were also
7 prepared and are on display here tonight.

8 After careful consideration of many engineering,
9 environmental and social factors, input from local
10 governments, project costs and consideration of all
11 public comments received, replacement of the existing
12 bridge with a new movable bridge was selected as the
13 Recommended Alternative.

14 The next portion of this presentation will focus on
15 describing the Recommended Alternative and potential
16 impacts from the construction of this alternative.

17 The proposed bridge typical section for the movable
18 bridge consists of two 11-foot lanes, one in each
19 direction, 5 and a half foot outside shoulders, and
20 six-foot wide sidewalks on both sides of the bridge. The
21 total width of the new bridge will be 47.2 feet,
22 approximately 19 feet wider than the existing bridge.

23 The proposed roadway east of the bridge would
24 provide two 11-foot wide travel lanes. Five and a half
25 foot wide shoulders and 6-foot wide sidewalks are

1 proposed on both sides of the roadway.

2 To avoid property impacts on the west of the bridge,
3 the proposed travel lanes are only 10 feet wide and a six
4 foot sidewalk is proposed only on the north side of the
5 roadway.

6 No additional right-of-way will be required to
7 construct the movable bridge alternative. No impacts to
8 existing residential driveways will occur. The entrances
9 to the Tarpon Springs Yacht Club and Bayshore Mobile Home
10 Park will not be impacted. No business or residential
11 relocations are necessary.

12 The proposed new bridge will be approximately eight
13 feet closer to the docks at yacht club than the existing
14 bridge. Measures to minimize impacts to access of these
15 docks will be considered, including possible elimination
16 of the fender on the south side and installation of
17 plastic timber bumpers on the piles or piers to prevent
18 boat damage.

19 The Beckett Bridge will be closed and traffic will
20 be detoured for about one year during construction.
21 Total construction time is expected to be about two
22 years.

23 Three detoured routes are available. The shortest
24 detour is Whitcomb Boulevard around Whitcomb Bayou.
25 Traffic can also be diverted from Alternate US 19 to

1 Florida Avenue using Meres Boulevard. Traffic from
2 further south can use Klosterman Road, Carlton Road, and
3 Curlew Road to reach Florida Avenue.

4 The Recommended Alternative will provide 7.8 feet of
5 vertical clearance at the fenders, which is slightly more
6 than six feet provided by the existing bridge.

7 Twenty-five feet of horizontal at the fenders will be
8 provide. The channel will remain open for boats
9 throughout construction. Only temporary brief closures
10 of the channel may be needed.

11 Replacement of the existing bridge with the
12 Recommended Alternative is consistent with local
13 government planning documents. The project is also
14 consistent with the State's Coastal Zone Management
15 Program.

16 We will now discuss the potential environmental,
17 social and physical impacts that will result from
18 construction of the Recommended Alternative.

19 Environmental reports that provide additional
20 information about the studies that were conducted and
21 possible impacts are also available for your review here
22 tonight. They are also on display at the Tarpon Springs
23 Public Library and the City of Tarpon Springs Clerk's
24 office until March 8, 2014.

25 In accordance with Executive Order Number 11988,

1 "Floodplain Management," the project has been evaluated
2 to determine possible impacts to floodplains. The bridge
3 is located within the 100-year floodplain; however, it
4 has been determined that there would be no significant
5 floodplain impacts associated with construction of the
6 Recommended Alternative.

7 Natural environmental impacts from construction of a
8 new movable bridge are anticipated to be minimal. In
9 accordance with Executive Order 11990, "Protection of
10 Wetlands," impacts to wetlands were evaluated. It is
11 anticipated that the proposed project will impact
12 approximately three-hundredths of an acre of wetlands
13 along the shoreline. All reasonable measures to avoid or
14 minimize impacts to wetlands were considered during
15 development of the design concept. Additional efforts to
16 reduce impacts to wetlands will be evaluated during final
17 design. Construction techniques which minimize possible
18 impacts will also be recommended. If required by
19 regulatory agencies, mitigation will be proposed to
20 offset unavoidable impacts. Coordination concerning
21 wetland impacts will continue during the design phase.

22 Portions of the project area are considered to be
23 "Essential Fish Habitat" by the National Marine Fisheries
24 Service. These areas consist of valuable marine
25 habitats. In accordance with the Magnuson-Stevens

1 Fishery Conservation and Management Act, an assessment of
2 potential impacts to Essential Fish Habitat has been
3 conducted. Because the project will minimally impact
4 some of these habitats, mitigation may be required.

5 A Water Quality Impact Evaluation was conducted.
6 The proposed stormwater treatment design will include
7 measures to assure that no adverse water quality impacts
8 result from construction of the proposed replacement
9 bridge. The design will comply with all water quality
10 requirements of the Southwest Florida Water Management
11 District.

12 Threatened and endangered species and marine mammals
13 are afforded special protection under the Endangered
14 Species Act and the Marine Mammal Protection Act. An
15 assessment of possible impacts to these species was
16 conducted.

17 A number of protected wildlife species, including
18 wading birds, the Florida manatee, sea turtles and the
19 gulf sturgeon occur in the vicinity of the bridge. All
20 of the proposed alternatives are anticipated to result in
21 minimal impacts to wildlife and wildlife habitat.

22 Special provisions required by the State and federal
23 regulations will be implemented to protect these species
24 during construction. Precautions will be required to
25 avoid impacts to the large number of manatees that are

1 known to travel through the channel. To assure that all
2 measures are taken to avoid and minimize impacts to
3 protected species, coordination with the US Fish and
4 Wildlife Service and Florida Wildlife Conservation
5 Commission will continue during design.

6 Public parks, recreation areas, wildlife and
7 waterfowl refuges and historic sites are afforded special
8 protection by the federal government under Section 4(f)
9 the 1966 US Department Transportation Act, as amended.
10 Impacts to these areas are allowed only if there are no
11 prudent and feasible alternatives.

12 The *Guide to Pinellas County Blueways* identifies an
13 unmarked paddling trail that begins just south of the
14 Beckett Bridge and continues to the Anclote River. The
15 proposed project will not adversely impact this existing
16 trail.

17 Beckett Bridge is located in the Pinellas County
18 Aquatic Preserve. The proposed movable bridge will not
19 impair or diminish the function and benefits of the
20 aquatic preserve. Accordingly, no Section 4(f)
21 recreation or wildlife refuge areas will be adversely
22 impacted by the Recommended Alternative.

23 A study was conducted to evaluate potential impacts
24 to cultural resources within the project corridor in
25 accordance with procedures contained in Section 36, Code

1 of Federal Regulations, Part 800. The State Historic
2 Preservation Officer, or SHPO, determined that 15
3 historic buildings located in the study area, including
4 the Tarpon Springs Yacht Club and 14 residences, are not
5 eligible for listing in the National Register of Historic
6 Places.

7 The SHPO and the Federal Highway Administration
8 determined that the Beckett Bridge is eligible for
9 listing in the National Register of Historic Places. The
10 bridge is a Scherzer rolling-lift bridge, and is one of a
11 few remaining bascule bridges of similar design remaining
12 in Florida. Its eligibility is based on its contribution
13 to the patterns of development and transportation in the
14 state and for its distinct engineering design. No
15 archaeological sites were found within the project
16 corridor.

17 Coordination in accordance with Section 106 of
18 Historic Preservation Act with the SHPO and the Federal
19 Highway Administration is ongoing and will be completed
20 after the Public Hearing. The study team has determined
21 that the removal of the Beckett Bridge will result in an
22 "adverse effect" under Section 106 and that removal of
23 the bridge will likely be considered a "taking" under
24 Section 4(f) of the U.S. Transportation Act of 1966, as
25 amended. It is anticipated that the SHPO and the Federal

1 Highway Administration will concur with this
2 determination. Coordination under both of these laws
3 will include completion of a Section 106 Case Study
4 Report and a Programmatic Section 4(f) document after the
5 Public Hearing and a determination of a "Preferred
6 Alternative."

7 If SHPO and the Federal Highway Administration
8 determine that the Preferred Alternative will have an
9 adverse effect, mitigation for the impacts for the bridge
10 will be required. Required mitigation will consist of
11 documenting the bridge with photographs and documents for
12 the Historic American Engineering Record.

13 Other options for mitigation could include:
14 Choosing an open bridge rail to preserve the viewshed
15 from the bridge; installation of a educational kiosk or
16 monument in a public space; incorporation of a monument
17 into a second control house; and incorporation of parts
18 or a portion of the existing bridge into the new bridge.

19 This option was used successfully for the South Park
20 Bridge in Seattle, Washington. Some of the bridge
21 machinery was incorporated into the bridge rail on the
22 replacement bridge. Your input on possible mitigation is
23 welcome.

24 Meetings were held with a Cultural Resources
25 Committee comprised of affected stakeholders, including

1 agencies, local governments, community representatives
2 and special interest groups to discuss Section 106 issues
3 and solicit input. If mitigation is required, the study
4 team will meet with this committee again to discuss
5 options.

6 A Contamination Screening Evaluation was conducted
7 to identify potential hazardous materials and petroleum
8 contamination involvement in accordance with the FDOT
9 PD&E Manual. Properties located within or near the
10 proposed project limits were evaluated. Eight sites with
11 the potential for contamination were identified. Two
12 sites were assigned a low contamination risk and only one
13 site was determined to have a medium potential. If
14 appropriate, additional investigation of these sites will
15 occur during the design phase of the project. No
16 asbestos-containing materials or lead paint were
17 identified on the bridge.

18 An air quality assessment was conducted to determine
19 potential impacts resulting from the proposed
20 improvements. No long-term air quality impacts are
21 anticipated. Construction activities may cause minor
22 short-term air quality impacts; however, these impacts
23 will be minimized by adherence to all state and local
24 regulations and the FDOT standard specifications for road
25 and bridge construction.

1 A noise study was conducted in accordance with
2 Federal Highway Administration approved procedures to
3 evaluate potential noise impacts from the Recommended
4 Alternative. The study concluded that traffic on the
5 proposed bridge will not result in noticeable changes in
6 noise levels for nearby residents, including residents of
7 the Bayshore Mobile Home Park, single-family residents,
8 and the Tarpon Springs Yacht Club. The noise analysis
9 indicated that noise levels at these locations did not
10 approach, meet or exceed the Federal Highway
11 Administration noise abatement criteria.

12 Temporary impacts during construction may occur.
13 If you have additional questions about noise impacts, a
14 noise specialist is here tonight to address your
15 individual questions and concerns.

16 Construction of the new movable bridge will have
17 minimal visual impacts to views from adjacent properties.
18 We will now review computer-generated graphics that have
19 been prepared to help you visualize what the Recommended
20 Alternative would look like from various viewpoints.

21 Here is a view of the replacement alternatives from
22 the Tarpon Springs Yacht Club entrance. Existing bridge.
23 Recommended Alternative.

24 View from a boat dock located southeast of the
25 bridge. Existing bridge. Recommended Alternative.

1 View from boat dock northwest of the bridge.

2 Existing bridge. Recommended Alternative.

3 View from the driveway entrance to the Bayshore

4 Mobile Home Park. Existing bridge. Recommended

5 Alternative.

6 View from the Bayshore Mobile Home Park waterfront.

7 Existing bridge. Recommended Alternative.

8 A computer-generated dynamic animation of the

9 Recommended Alternative was developed. We will view this

10 animation now.

11 Construction of the Preferred Alternative will cost

12 approximately \$15.8 million. This estimate includes

13 construction, design, post design and construction

14 engineering inspection services. About \$800,000 is

15 allocated for aesthetic enhancements. The County will

16 coordinate with the local community concerning the

17 details of how the bridge will look and other aesthetic

18 enhancements during the design phase of the project.

19 What happens next? Following this Public Hearing

20 and a 10-day comment period, all public comments will be

21 considered. Coordination with federal and state agencies

22 will continue. Engineering and environmental documents

23 will be finalized.

24 A presentation which summarizes the results of the

25 Public Hearing will be made to the Board of the County

1 Commissioners at their April 15th, 2014, meeting,
2 beginning at 6:00 p.m. The Commission will design
3 whether to confirm their approval of the Recommended
4 Alternative to move forward as the Preferred Alternative.
5 The public is invited to attend and provide comments at
6 this meeting.

7 After selection of a Preferred Alternative,
8 Section 106 coordination will be completed. The
9 Preferred Alternative will be forwarded with final
10 documents to the Federal Highway Administration for
11 approval.

12 Funds for design are programmed. Design is schedule
13 to begin in early 2016. Construction is anticipated to
14 begin in 2019, but the construction schedule is
15 contingent on funding availability.

16 The County invites your comments, which will become
17 part of the official public hearing record. Please
18 complete one of the comment forms provided tonight. You
19 can leave it in the box provided or mail it to Mr. Tony
20 Horrnick, P.E., S.I., Project Manager, Pinellas County.
21 Environment and Infrastructure, 14 S, Fort Harrison
22 Avenue, Sixth floor, Clearwater, Florida, 33756.

23 You can also provide your comments on our project
24 website: www.pinellascounty.org/beckettbridge. Please
25 provide your comments by March 8, 2014. These addresses

1 are also listed in the handout you received at the
2 registration desk and the comment forms provided tonight.

3 You may also provide an oral statement, which will
4 be recorded by a court reporter during the public comment
5 portion of the hearing, immediately following this
6 presentation.

7 After the public comment period, you can review the
8 exhibits provided here tonight. The study team will be
9 available to address your questions and concerns and
10 receive your input.

11 Thank you for your interest and participation in
12 this important project. We hope you find tonight's
13 Public Hearing informative. We look forward to your
14 comments.

15 (End of Presentation.)

16 MR. CLOSTERMAN: All right. Anyone desiring to make
17 a statement or present written views and/or exhibits
18 regarding the location, conceptual design, social,
19 economic and environmental effects of improvements will
20 now have an opportunity to do so.

21 If you're holding a speaker's card, please give it
22 to the project staff members. If you have not received a
23 speaker's card and wish to speak, please raise your hand
24 so you can receive a card to fill out.

25 Written statements and exhibits may be presented in

1 lieu of or in addition to oral statements. All written
2 material received at this Public Hearing and at the
3 Pinellas County office located at 14 South Fort Harrison,
4 Clearwater, Florida, 33756, and postmarked no later than
5 10 days following the date of the Public Hearing will
6 become a part of the Public Hearing Record for this
7 hearing.

8 All written comments shall be addressed to Tony
9 Horrnik, Project Manager, Pinellas County Department of
10 Environment and Infrastructure. Comments may also be
11 emailed to thornik@pinellascounty.org. The mailing
12 address and email address will be provided in the project
13 handouts and on comment forms available here this
14 evening. Additional comment forms are available.
15 Comment forms can also be completed tonight and dropped
16 in the box provided.

17 If you do not wish to speak at the microphone, you
18 can provide comments directly to the court reporter after
19 the formal portion of the hearing. In addition, you may
20 submit written documents to the court reporter for
21 inclusion in the official record.

22 I will now call the first speaker. Because of
23 limited time and to give everyone a chance to speak, I
24 ask that you please limit your comments to three minutes.
25 Please state your name and address when you come to the

1 microphone for the record, please.

2 Our first speaker is Bill Joyce.

3 MR. JOYCE: Good evening. My name is Bill Joyce.
4 I'm a retired engineer. I live at 656 Bayshore Drive,
5 which is on the west side of the Beckett Bridge.

6 I have two concerns: Number one -- well, first of
7 all, I'd like to compliment the selection of the
8 replacement inside of the single-leaf bascule bridge. I
9 believe that will have the least impact on the
10 neighborhood and the final appearance.

11 My two concerns are: One, the closure of the
12 bridge. I live on the west side of the bridge and we
13 really can't live with a one-year closure or more if they
14 have problems of that bridge. And I'm suggesting a
15 temporary bridge, either one lane or two lanes on the
16 north side of the project, so that we will have
17 continuous travel between the west side of town and the
18 east side of town.

19 The second concern is construction technique.
20 All of the papers are presenting selection of a design of
21 bridge which I agree with.

22 The next thing is the contract documents. You've
23 got to think of a way -- I see you show -- is it 12
24 months I think for the construction? There are ways to
25 expedite a project, you know, 24/7, prefabricated. I

1 mean the technology today is fantastic. I think you have
2 to either put in a temporary bridge or reduce the
3 construction time, cut it in half from what's proposed
4 right now. Thank you.

5 MR. CLOSTERMAN: Thank you very much. Our next
6 speaker is Wendy Crosato. And I apologize if I
7 mispronounced your name.

8 MS. CROSATO: My name is Wendy Crosato, 616 Palm
9 Avenue, Tarpon Springs, and I'm for it. I know that a
10 lot of -- there will be a lot of different opinions here.
11 I'm for it because I've experienced exercising, trying to
12 ride my bike as my husband's running around the bridge,
13 and it's impossible to ride my bike over that bridge. I
14 can't do it. I can't even sit on it and do this with my
15 foot. I can't do that. And it's so unsafe trying to
16 cross with vehicles going up over it, especially at the
17 same time, and I've observed as I'm driving people trying
18 to ride their bikes over the road and people flying up
19 behind them not even knowing that they're on the road on
20 the opposite side of the bridge.

21 So, to me, I don't want to see one life lost and
22 people will forever be exercising, and it's nice to be
23 able to go over that bridge and run and bike and walk and
24 there's families with little kids that I see, and I just
25 don't want to ever want to see one person die or get hurt

1 from an accident.

2 So I think it needs to be replaced, and I do like
3 the alternative movable bridge that I saw here tonight.
4 I thought that was a good idea. Thank you.

5 MR. CLOSTERMAN: Thank you very much. Our next
6 speaker is Michelle Gates.

7 MS. GATES: Good evening. My question has to do
8 with the -- first of all, I want to say I approve and
9 support the option that was chosen as well, but my
10 question has to do with the chronic puddling and drainage
11 issues that we have on either side of the bridge and if
12 the County is going to consider looking into working with
13 that as well. That's my question.

14 MR. CLOSTERMAN: Thanks. Our next speaker -- and I
15 apologize if I mispronounce your last name -- Steven
16 Katsarelus.

17 MR. KATSARELUS: Thank you. I grew up on Venetian
18 Court and I own two homes. One of them is most effected
19 because it's directly adjacent to the bridge and I guess
20 I have a number of concerns I just want to raise.

21 Most importantly, when I saw the simulation I'm
22 concerned about privacy, because currently I have a wall
23 on the side of my property, and I'm concerned that the
24 bridge, with it being higher at the end of the bridge,
25 that people are going to basically drive over the bridge

1 and look down on you in your pool or your hot tub. So
2 that's one of my major concerns. Perhaps I could get a
3 bigger wall built on the side of my property or some type
4 of privacy wall that mitigates that concern.

5 I'm also concerned about safety. And I agree with
6 the other folks who said they support the current
7 proposal, but I grew up on the street. My parents moved
8 there in 1978. So, to my knowledge, there hasn't been
9 any safety issues to date, and I think the new bridge
10 will be better, but one thing that I'm concerned about is
11 living there and watching cars pass the bridge sometimes
12 at 40, 50 or 60 miles an hour or more, I've seen a number
13 of accidents over the years. We've had cars flip into
14 our property, across the street. I would like to see
15 something done to mitigate the speed across the bridge,
16 because when you build a bridge bigger and wider people
17 are going to drive much faster. That's a fact.

18 So also I'd like to see them perhaps think about
19 making more effective speed humps in the area that would
20 slow down traffic a little bit.

21 We're also concerned about noise. The existing
22 bridge has a lot of joints, makes a lot of noise when the
23 cars go over. We hope that the new bridge will be
24 constructed in such a way that there's less noise from
25 the bridge.

1 Another concern I have that was raised in the video
2 was contamination risks. It mentioned that there were
3 eight sites that possibly were identified in the study as
4 far as being contaminated, or possibly being contaminated
5 from the bridge. I'd like to know what those eight sites
6 are and what the contamination risk will be.

7 And then also I'm concerned about the harming of my
8 property, my privacy wall, my hedge that's taken ten
9 years to build and grow to provide a little extra
10 privacy. And so I'm concerned about those things as well
11 and I hope that someone at some point will address these
12 issues with me. Thank you.

13 MR. CLOSTERMAN: Thank you very much. The last
14 speaker's card that I have is Donald Goodrich.

15 MR. GOODRICH: I just moved down from Rhode Island
16 three weeks ago. We went through a very similar
17 situation in the area in which I lived in Rhode Island.
18 And instead of elevating or putting any sort of movable
19 bridge in, the existing fixed bridge was replaced. And
20 I'm wondering why that we have not heard anything at all
21 about a fixed bridge for this location.

22 If I remember right, the statistics show no more
23 than 20 down to 10 openings in any given year. It would
24 be unfortunate for those up river or up bayou not to be
25 able to bring their boats out, but it would seem to me a

1 lot less expensive to put a fixed bridge in, maybe
2 elevate it a little bit so you can get power boats over,
3 but not to put a movable span bridge in this location.

4 Thank you.

5 MR. CLOSTERMAN: Thank you, sir. Our next speaker
6 is Dan Cullu.

7 MR. CULLU: Hey, fellow neighbors and residents.
8 Dan Cullu, 426 Inness Drive, Tarpon Springs.

9 I appreciate what you've done. You have a very good
10 presentation, and I support the presentation of the
11 selection that you all have made.

12 One of my concerns is, and I think mine and
13 everybody's concern in Tarpon Springs, is the egress and
14 ingress to the bridge.

15 Riverside Drive was a County-maintained road that's
16 been neglected for decades. It needs to go from Tarpon
17 Avenue to be redone and come all the way underneath the
18 bridge and in front of the bridge to be redone all the
19 way out to at least the high school where the buses go
20 and let the City maintain it and have the responsibility
21 for that. You can't have a very wide bridge and no
22 sidewalks that will feed that bridge.

23 So I really hope that you all will address Riverside
24 Drive from Tarpon Avenue to the high school as well.
25 Thank you very much.

1 MR. CLOSTERMAN: Thank you, Mr. Cullu.

2 Anyone else desire to speak?

3 MR. KATSARELUS: I want to add one more thing, if
4 possible.

5 MR. CLOSTERMAN: You want to add one more thing?

6 MR. KATSARELUS: Can I do that.

7 MR. CLOSTERMAN: Sure.

8 MR. KATSARELUS: Another concern I failed to address
9 that I jotted down was the noise during construction and
10 demolition as far as, like, what would the hours be when
11 they're able to work and will they be working seven days
12 a week, six days a week, five days a week, that type of
13 thing. I think that would be good to maybe put on the
14 website so that people that live in the area that are
15 affected by the noise will be able to understand when
16 they can expect some noise.

17 MR. CLOSTERMAN: Thank you.

18 Anyone else desire to speak?

19 If you have completed the speaker's card, please
20 repeat your name and address. If not, state your name
21 and address when you complete the speaker's card after
22 you've given your statement for the public record.

23 The verbatim transcript of the hearing, the oral
24 proceedings, together with all written material received
25 as part of the hearing record, and all studies, displays

1 and informational material provided at the hearing will
2 be made a part of the project decision making process and
3 will be available at the County office for public review
4 upon request. The display and informational materials
5 are also posted on the project website
6 www.pinellascounty.org/Beckett Bridge.

7 I want to thank you for attending the Public Hearing
8 and for providing your input into this project.

9 It is now 7:00 p.m. I hereby officially close the
10 Public Hearing for the Beckett Bridge PD&E study. Thank
11 you again and have a good evening.

12 And I'd also, just before we conclude, I want to
13 recognize Commissioner Norm Roach who joined us this
14 evening so welcome to Mr. Roach.

15 Thank you very much.

16 (The Public Hearing concluded at 7:01 p.m.)

OFFICE OF THE COUNTY ADMINISTRATOR

M E M O R A N D U M

TO: The Honorable Chairman and Members of the Board of County Commissioners

FROM: Robert S. LaSala, County Administrator

SUBJECT: Beckett Bridge – Public Hearing on February 26, 2014

DIST: David E. Scott, Executive Director, DEI
Jorge M. Quintas, P.E., DEI Director, Engineering & Technical Support Division
Tim Closterman, Director of Communications

DATE: January 16, 2014

Attached for your information is the letter with attachments that will be mailed to property owners in the vicinity of the Beckett Bridge and to all interested parties who have contacted the project team and requested to be included on the mailing list. The attached map indicates the extent of the property owners' mailing list. Also attached is the advertisement that will appear in the *Tampa Bay Times* and *Suncoast News*.

The purpose of this mailing and advertisement is to invite the public to the NEPA Public Hearing to provide community residents, business owners, property owners and other interested stakeholders an opportunity to comment concerning the proposed alternatives for Beckett Bridge. The BCC concurred that the Recommended Alternative, replacement of the existing two-lane, bascule bridge with a new two-lane bascule bridge, could be presented at the public hearing. Information about all alternatives considered, including rehabilitation, will be available at the hearing.

The hearing will be held on Wednesday, February 26, 2014 from 5:00 pm to 7:30 pm at the Tarpon Springs Yacht Club located at 350 N. Spring Boulevard, Tarpon Springs, Florida, 34689.

The open house portion of the hearing will begin at 5:00 pm. Information about the conceptual design and potential impacts of alternatives under consideration will be on display. Representatives from the project team will be available to answer questions. A court reporter will be available to receive comments in a one-on-one setting. The formal portion of the hearing will begin at 6:00 p.m. which includes a presentation followed by public comments. This portion of the hearing will be recorded by a court reporter and comment forms will be available.

Selected draft project documents will be available for public review 21 days prior to, and ten days after, the public hearing at the Tarpon Springs Public Library and the City of Tarpon Springs Clerk's Office. All comments postmarked by March 8, 2014 will be included in the official Public Hearing record. The public will also be informed of the follow-up BCC meeting on April 15, 2014 at 2:00 pm.

January 29, 2014

SUBJECT: Public Hearing
Beckett Bridge Project Development and Environment (PD&E) Study
from Chesapeake Drive to Forest Avenue
Tarpon Springs, Pinellas County, Florida
County Project Number: PID 2161
FDOT Financial Project No.: 424385-1

Dear Property Owner/Interested Individual:

Pinellas County will conduct a Public Hearing in coordination with the Florida Department of Transportation for the above referenced project on Wednesday, February 26, 2013 from 5:00 pm to 7:30 pm at the Tarpon Springs Yacht Club, located at 350 N. Spring Boulevard, Tarpon Springs, Florida, 34689. An open house will be conducted from 5:00 pm until 6:00 pm. A formal presentation will be made at 6:00 pm, followed by a public comment period. A copy of the Public Hearing Notice is enclosed which includes a map showing the location of the hearing, project location and other information. This letter is being sent to all property owners located within approximately 1,000 feet of the proposed alignment, others who have expressed an interest in being informed, and other public officials and agencies.

Information about the Recommended Alternative and other alternatives considered during the study will be presented. Representatives from the project team will be available to take comments and answer questions. A comment form is enclosed. Comment forms will also be available at the hearing. Additional information is provided in the attached Project Fact Sheet. The public is also invited to attend the follow up Board of County Commissioners meeting, which will be held on April 15, 2014 at 2:00 pm in the Commission Chambers.

Mr. Tony Horrnik, P.E., Project Manager, may be contacted for additional information at (727) 464-3640 or at thornik@co.pinellas.fl.us. Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. If you need special accommodations under the Americans with Disabilities Act, or require translation services (free of charge), please contact Mr. Tony Horrnik at least seven days before the meeting.

Thank you for your interest in this project.

Sincerely,

David E. Scott, P.E.
Executive Director

Project Fact Sheet

BECKETT BRIDGE

Project Development and Environment (PD&E) Study
Riverside Drive from Chesapeake Drive to Forest Avenue
Tarpon Springs, Pinellas County, FL

County Project Number: PID 2161

FDOT FPN: 424385-1 ETDM Number: 13040

Project Description

The Recommended Alternative consists of replacing the existing two-lane movable bridge with a new two-lane movable bridge on approximately the same alignment within existing County right-of-way. No additional property will be acquired. The proposed bridge will have 7.8 feet of vertical clearance, about two feet more than the existing bridge. The proposed typical section is shown below.

Project Schedule

April 15, 2014 – Board of County Commissioners (BCC) Meeting

(Meeting begins at 2:00 pm in the County Commission Chambers)

The BCC will decide whether to ratify and confirm their approval of the Recommended Alternative based on the results of the Public Hearing.

March-July 2014 – Finalize Project Documents

September- October 2014 – Obtain Federal Highway Administration Approval

Early 2015 – Begin Design

2019 - Begin Construction*

**Construction Schedule Contingent on Funding Availability*

Project Costs

The cost for design and construction of the Recommended Alternative is approximately \$15.8 M.

PUBLIC HEARING

BECKETT BRIDGE

**Project Development and Environment (PD&E) Study
Riverside Drive from Chesapeake Drive to Forest Avenue
Tarpon Springs, Pinellas County, FL**

County Project Number: PID 2161

FDOT FPN: 424385-1

ETDM Number: 13040

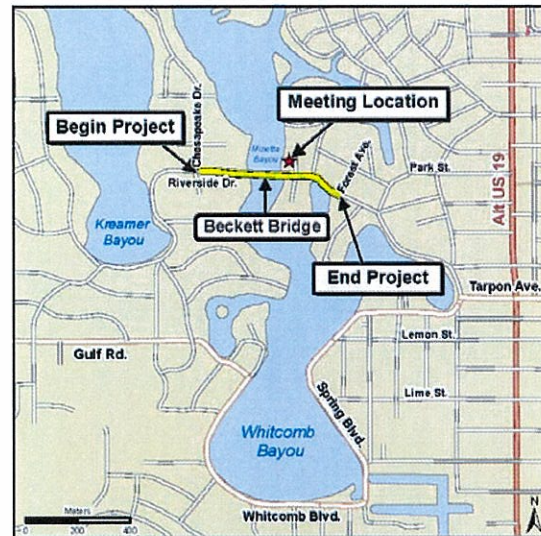

Date: Wednesday, February 26, 2014

**Place: Tarpon Springs Yacht Club
350 N. Spring Blvd.**

Tarpon Springs, FL 34689

**Time: 5:00 -7:30 p.m. - Open House
6:00 p.m. – Formal Presentation**

Pinellas County, in cooperation with the Florida Department of Transportation (FDOT) and the Federal Highway Administration (FHWA), has scheduled a Public Hearing regarding the replacement of the Beckett Bridge in Tarpon Springs. This hearing is being held to give the public an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements. The improvements consist of replacing the existing bridge with a new, two-lane movable bridge. Information about all alternatives considered will be available for review. Members of the project team will be available to answer questions. A court reporter will be available to receive comments in a one-on-one setting. At 6:00 pm, the formal portion of the hearing will begin. A formal presentation will be made, followed by a public comment period.

Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or they can be mailed to Tony Horrnik, P.E., S.I., Project Manager, Pinellas County, Dept. of Environment and Infrastructure, 14 S. Fort Harrison Ave., Clearwater, FL 33756. All exhibits or statements postmarked on or before March 8, 2014 will become of the public hearing record. Persons may also make comments to Pinellas County Commissioners at the April 15, 2014 Board of County Commissioners meeting which begins at 2:00 pm in the County Commission Chambers.

Draft project documents will be available for public viewing from February 5 until March 8 at the following locations:

Tarpon Springs Public Library

138 Lemon Street

Tarpon Springs, FL 34689

Mon- Wed 10:00 am – 9:00 pm

Thurs-Fri 10:00 am – 6:00 pm

Sat 10:00 am – 5:00 pm

Tarpon Springs City Clerk

410 North Ring Avenue

Tarpon Springs, FL 34689

Mon-Fri 8:00am – 5:00 pm

All interested parties are encouraged to attend the Public Hearing. For further information, please contact Mr. Tony Horrnik, P.E., S.I., Project Manager, at 727.464.3640, or visit the project website <http://www.pinellascounty.org/beckettbridge>. Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons with disabilities requiring reasonable accommodations under the American with Disabilities Act or persons who require translation service (free of charge) should call Mr. Horrnik or the Office of Human Rights at 727.464.4062 (VOICE/TDD) at least seven days prior to the hearing.

COMMENTS: THE ABSOLUTELY ONLY CHOICE HERE IS THE MOVABLE
NEW BRIDGE. ANYTHING ELSE IS A DISASTER. IN THE PAST
DURING HURRICANES (WHEN THE ARMY CORPS DREDGED) THE BAYOU
AREA WAS A SANDWATY FOR LARGER VESSELS. THAT COULD BE
NECESSARY IN THE FUTURE. IT WOULD BE FOOLISH TO CLOSE ACCESS.
BUT TO DESTROY THE AREA AND TAKE OUT SO MANY HOMES TO
BUILD THIS RIDICULOUSLY HIGH ALTERNATIVE BRIDGE IS CRAZY
AND COMPLETELY UNFAIR TO EVERYONE WHO LIVES IN THE AREA
AND THE YACHT CLUB. A MINI-SKYWAY IN A RESIDENTIAL
AREA: NUTS!!! EITHER FIX THE OLD BRIDGE OR PUT IN
A NEW MOVABLE ONE. DURING HURRICANES THERE HAS TO BE
ACCESS FROM THAT PART OF TOWN BECAUSE IT IS VERY VERY
CONGESTED AT OTHER ROUTES. I KNOW THIS BECAUSE I LIVE
AROUND THE BAYOU. AND WHEN THIS BRIDGE WAS CLOSED TRAFFIC
WAS RE-ROUTED IN FRONT OF MY HOUSE FOR MONTHS. WOW!
SO MUCH TRAFFIC, BUMPER TO BUMPER ALMOST STEADY
ALL DAYS. SO ITS A KEY ROUTE AND MUST BE MAINTAINED.

THANK YOU FOR LISTENING TO THE PEOPLE AND ADJUSTING.
YOU'VE DONE A GREAT JOB W/ THIS!!

- COMMENTS: I like the recommended alternative
movable bridge.
- ① The new bridge will be similar in
size and style so as not to impact the
historical appeal.
 - ② The new bridge will be wider, Much
more safe for pedestrians and bikers.
 - ③ By choosing the movable over fixed
there is not such an impact on neighbors
near the bridge.
 - ④ I appreciate the fact that you have
involved the neighbors with your planning.
- ⑤ One caution on detour route from Kramer ~~to~~
to Whitecomb Bayou. Left turn on road ~~from~~ off
of Kramer is very difficult when heavy school
traffic.

COMMENTS: Old bridge SIB removed w/ all pylons.
New bridge SIB more "boat friendly" w/ Bumpers
that do not obstruct the slips @ TSYC
Right of way SIB available for Kayaking &
wildlife throughout construction
Company awarded contract SIB ~~is~~ ^{finest} significantly
for each day project is overdue. Projects in Tampa
have been possibly awarded.
TSYC SIB given the equivalent space taken
on the other side, & the pylon to right SIB removed
by city & dredged.
THE road is terrible + lack of sidewalks + SIB
fund as part of this.

COMMENTS: *The recommended alternative design appears to be the best and least disruptive choice.*

Please consider repairing the extremely poor drainage along the western approach on Riverview Drive. Drainage on the eastern approach is also poor.

There is an Osprey nest with an active nesting pair situated on an old utility pole on the south east side of the bridge. The female Osprey is currently sitting on eggs.

Thank you for your excellent work on this project.

COMMENTS: A NUMBER FOR BOMBS TO CALL FOR REMOTE OPENING OF BRIDGE SHOULD BE PART OF THE REPLACEMENT OR REPAIR OF BRIDGE. BOMBS SHOULD HAVE A CODE TO OPEN BRIDGE TO PREVENT HOAX CALLS.

CAN FUTURE COUNTY COMMISSIONERS CHANGE THE STATUS IF IT TAKES SEVERAL YEARS TO DESIGN?

IS THERE FUNDING GUARANTEED FOR ANY OF THIS?

SUGGEST ~~WHAT~~ PRIOR TO CLOSING BRIDGE ALTERNATIVE ROUTES SHOULD BE REQUIRED. LIKE M.R. FROM A1 TO THE BRIDGE NEEDS REPAIR.

WORK WITH I.S. HISTORICAL SOCIETY TO PRESERVE REMOVED PARTS AND PHOTO HISTORY.

COMMENT FORM
Beckett Bridge PD&E Study
Public Hearing, February 26, 2014

Thank you for your interest in this project. We encourage you to submit your written opinions and comments concerning this study. If more space is needed, please use an additional sheet of paper. Drop your comments into the comment box provided at this meeting or mail them to the address on the bottom of this form. **Please mail your comments by March 8, 2014. All comments postmarked by this date will be included in the official public hearing record.**

COMMENTS: CURRENT BRIDGE PLANS, IF
INCORPORATED WITH SOME EFFORT TO
INCLUDE PARTS OF THE EXISTING
STRUCTURE, I.E. GEAR WHEELS, ETC., WILL BE
AN ASSET TO OUR CITY.

WE CANNOT WAIT YEARS FOR THE COUNTY
AND THE CITY TO MAKE REPAIRS TO THE
ROAD. WHY CAN'T TWO GOVERNMENT ENTITIES
GET TOGETHER AND FIX THE WORST ROAD
IN TARPON SPRINGS.

THE CURRENT SPEED BUMPS ARE NOT
NECESSARY. THE EXCUSE OF SLOWING
TRAFFIC IS BOGUS. IF PINELLAS CO.
HAS A PROBLEM WITH SPEEDING THEN
CONTACT THE POLICE DEPT. FOR RESOLUTION.
WHEN YOU CLOSED THE SPACE, WHICH ARE
USED FOR TWO WHEEL VEHICLES TO USE,
YOU CREATED A SIGNIFICANT SAFETY
PROBLEM. I HAVE NEVER ENCOUNTERED
THIS CLOSURE IN THE APPROACH TO OTHER
BRIDGES IN PINELLAS COUNTY.

COMMENTS: *The new movable bridge is a good plan and alternative to replace our Historic Bridge. I urge you now to come forward with plans and incorporating historic elements into the bridge design. Some ideas presented at the public hearing are feasible, especially those that are on or part of the bridge itself.*

Visitors come to Tarpon Springs because of its rich cultural history & historic part. Residents love their city and its history and care deeply about preserving those elements.

I look forward to seeing plans on how historic parts of the old bridge can be incorporated into the new movable bridge, along with placards relating the Historic Bridge's part importance.

COMMENTS: ^① What is the estimated time for length of construction once project begins in 2019?

^② Favorable for project as long as there is no additional purchases needed for right-of-way of the project.

^③ Are any provisions made to deepen or restore the channel?

COMMENTS: MY CONCERNS WITH THE UPCOMING CONSTRUCTION
OF THE BECKETT BRIDGE IS TRAFFIC RE-DIRECTION. THE LAST FEW
TIMES THE BRIDGE HAS BEEN CLOSED, THE ROAD BLOCKS &
DETOUR SIGNS HAVE BEEN CONFUSING CAUSING MANY CARS PASSING
THROUGH VENETIAN COURT. I THINK THE DETOUR SIGNS SHOULD
INCLUDE - "DETOUR TO RIVERSIDE DRIVE AND FRED HOWARD PARK",
ALSO THE SIGNS TO FRED HOWARD PARK SHOULD BE COVERED SO
THEY CAN'T BE SEEN THUS LESS CONFUSION. THE BARRICADE NEAR
THE BRIDGE SHOULD BE AT PAMPAS. THIS SHOULD HAVE SIGNAGE THAT
LEAVES NO DOUBT THERE IS NO THRU TRAFFIC AND TO DETOUR THEM TO
PAMPAS → HIGH → CANAL → SPRING BLVD → BANANA → MLK → SOUTH
SPRING → BEACHES OR RIVERSIDE DRIVE. WITH ARROWS.

BARRICADES SHOULD ALSO BE AT THE ENTRANCE OF SPRING BOULEVARD
AT THE INTERSECTION OF GRAND & ORANGE. "DETOUR TO RIVER SIDE & HOWARD
PARK" SHOULD BE AT TARPON AVE / SPRING BLVD INTERSECTION AND
THE SPRING BLVD / ORANGE AVE WITH ARROWS POINTING SOUTH ONTO
BANANA ETC.

THANK YOU FOR YOUR ATTENTION - Scott Moorhead

COMMENTS: We have a business on Pampas Ave.
And a fixed span would interfere with
transporting boats to and from the boat plant.
We like the thought of a new bridge
but with a moveable span and stay in the
current footprint.

COMMENTS: SPRING BLVD. NEEDS TO BE
SLIGHTLY ELEVATED BOTH WEST AND EAST
OF THE BRIDGE AS THIS IS AN EVACUATION
ROUTE AND FLOODS EASILY FROM BOTH RAIN
AND HIGH TIDE. HURRICANES QUICKLY CAUSE
THIS ROUTE TO BECOME IMPASSABLE, SO
EVEN INCHES WOULD MAKE A DIFFERENCE.

Summary of Comments Received During the Official Public Hearing Comment Period for the Beckett Bridge PD&E Study (January 29, 2014 to March 8, 2014)

An invitation letter, project fact sheet and public notice were mailed to approximately 1,200 property owners and other stakeholders three weeks prior to the Public Hearing. The Public Hearing was held at the Tarpon Springs Yacht Club on February 26, 2014.

100 individuals signed in at the Public Hearing

6 individuals spoke at the Public Hearing

The Official Public Hearing Comment Period began the date that notifications/invitations for the Public Hearing were mailed to the public (January 29, 2014) and extended until 10 days after the Public Hearing (March 8, 2014) Comments received during the Official Public Hearing Comment Period included:

21 comment forms

1-email to Tony Horrnik from Mr. Faison

1 letter from Ms. Tarapani

Summary of Comments

19 – Supported Recommended Alternative

1 – Requested a new low-level fixed bridge

1 - Requested preservation of existing bridge

1 – Requested consideration of a fixed bridge or repair of existing bridge with the elimination of the “drawbridge functionality”.

Speakers at Public Hearing:

Five of the six speakers specifically stated that they supported the Recommended Alternative.

One objected and expressed desire for a low-level fixed bridge.

Comment Forms, Letters and Emails Received

14 individuals specifically supported Recommended Alternative

1 individual expanded on comments made at public hearing

2 individuals (Ms. Cyndi Tarapani and Mr. Robert Faison) objected to the Recommended Alternative

- Ms. Tarapani requested preservation of the existing bridge
- Mr. Faison requested consideration of a fixed bridge or repair of the existing bridge but eliminate the functionality of the drawbridge

4 individuals did not specifically state support for the Recommended Alternatives, but stated concerns or raised questions associated with the proposed replacement of the existing bridge.

Comments and Concerns Included:

Comments related to the Proposed Detour

- Is it possible to construct a temporary pedestrian bridge or provide a “ferry” for pedestrians during construction?
- Requested a temporary bridge during construction for vehicles and for emergency evacuation
- Suggested that construction techniques exist that could reduce detour time in half
- Requested detour signage that was clear to travelers, provided a specific detour signage plan
- Requested that roadways on the detour routes be repaired prior to closing the bridge

Comments related to the design/looks of the Recommended Alternative

- Requested design similar to existing, but wider with sidewalks and bike lanes as proposed.
- Requested that the new bridge be designed similar to existing historic bridge

Comments Related to Roadway and Drainage

- Spring Boulevard needs to be elevated because it floods during high tides during storms, preventing access to the bridge for evacuation.
- Requested that drainage improvements be made to the approach roadways.

Funding and Cost

- How will the bridge be funded?
- Will my property taxes be raised to pay for the bridge?

Other Comments

- Can future Commissioners change the status of the project since it will take several years to design?
- Boat access to the Bayou is needed for sanctuary during hurricanes.
- The new bridge should be “boat friendly” with bumpers that don’t obstruct the slips at the Tarpon Springs Yacht Club.
- A number of individuals expressed support for incorporating parts of the existing bridge into the new bridge.
- The existing speed bumps are not necessary. The speed bumps cause safety problems for two-wheel vehicles. Local police should enforce the speed limits.
- Are there plans to deepen or restore the channel?
- There is an active osprey nest near the site.
- Requested that boat owners be able to operate the movable span remotely to eliminate the need for County staff to open the bridge

Two individuals who own property immediately adjacent to the bridge expressed concerns about how the proposed project could affect their property.

Stephen Katsarelis, owner of the single family residence in the southeast corner of the bridge, across from the Yacht Club **supported the recommended alternative** but expressed the following concerns:

- Concerned about privacy of his pool and hot tub from the raised bridge
- Concerned about impacts to his privacy fence and hedge

- Concerned about safety – specifically speeding on wider bridge, stated that more effective speed bumps should be considered
- Requested additional information about contaminated sites mentioned in the public hearing presentation

Robert Faison, resident at 408 Riverside Drive, immediately adjacent to the bridge in the northwest quadrant, across from Bayshore Mobile Home Park, **objected to the Recommended Alternative.** Mr. Faison recommended that the County consider a fixed bridge or repair the existing bridge but eliminate “the draw bridge functionality”. He also expressed the following concerns about impacts from the Recommended Alternative:

Impacts from traffic noise from additional traffic

Impacts to view

Safety exiting residential driveway

Increase in traffic accidents

Impacts of Construction noise

Impacts to wood privacy fence

Impacts to his current access to the sidewalk on Riverside Drive

Ms. Tarapani , president of the Tarpon Springs Preservation Society, requested that the existing bridge be restored.

Subject: Beckett Bridge PD&E Study - Notification of Public Hearing - February 26, 2014
Date: Friday, January 24, 2014 2:27:00 PM
Attachments: [Public Hearing and Fact Sheet.pdf](#)

Dear Interested Party:

Pinellas County will conduct a Public Hearing in coordination with the Florida Department of Transportation for the above referenced project on Wednesday, February 26, 2014 from 5:00 pm to 7:30 pm at the Tarpon Springs Yacht Club, located at 350 N. Spring Boulevard, Tarpon Springs, Florida, 34689. An open house will be conducted from 5:00 pm until 6:00 pm. A formal presentation will be made at 6:00 pm, followed by a public comment period. A copy of the Public Hearing Notice is enclosed which includes a map showing the location of the hearing, project location and other information. This letter is being sent to all property owners located within approximately 1,000 feet of the proposed alignment, others who have expressed an interest in being informed, and other public officials and agencies.

Information about the Recommended Alternative and other alternatives considered during the study will be presented. Representatives from the project team will be available to take comments and answer questions. Comment forms will also be available at the hearing. Additional information is provided in the attached Project Fact Sheet. The public is also invited to attend the follow up Board of County Commissioners meeting, which will be held on April 15, 2014 at 2:00 pm in the Commission Chambers.

Mr. Tony Horndick, P.E., Project Manager, may be contacted for additional information at (727) 464-3640 or at thorndick@co.pinellas.fl.us. Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. If you need special accommodations under the Americans with Disabilities Act, or require translation services (free of charge), please contact Mr. Tony Horndick at least seven days before the meeting.

Thank you for your interest in this project.

Sincerely,

Spring Boulevard, Tarpon Springs, Florida, 34689. An open house will be conducted from 5:00 pm until 6:00 pm. A formal presentation will be made at 6:00 pm, followed by a public comment period. A copy of the Public Hearing Notice is enclosed which includes a map showing the location of the hearing, project location and other information. This letter is being sent to all property owners located within approximately 1,000 feet of the proposed alignment, others who have expressed an interest in being informed, and other public officials and agencies.

Information about the Recommended Alternative and other alternatives considered during the study will be presented. Representatives from the project team will be available to take comments and answer questions. Comment forms will also be available at the hearing. Additional information is provided in the attached Project Fact Sheet. The public is also invited to attend the follow up Board of County Commissioners meeting, which will be held on April 15, 2014 at 2:00 pm in the Commission Chambers.

Mr. Tony Hornnik, P.E., Project Manager, may be contacted for additional information at (727) 464-3640 or at thornnik@co.pinellas.fl.us. Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. If you need special accommodations under the Americans with Disabilities Act, or require translation services (free of charge), please contact Mr. Tony Hornnik at least seven days before the meeting.

Thank you for your interest in this project.

Robin and Lori,

Hard copy Public Notification letters were mailed today to Elected Officials, Local Government Staff, Indian Tribes and Agencies. We did not send any hard copy letters to FDOT. Does FDOT need a hardcopy notice/invite?

If not, please forward the email previously sent with the notification to anyone at FDOT that may need to receive it.

Thank you.

PUBLIC HEARING

BECKETT BRIDGE

Project Development and Environment (PD&E) Study
Riverside Drive from Chesapeake Drive to Forest Avenue

Tarpon Springs, Pinellas County, FL

County Project Number: PID 2161

FDOT FPN: 424385-1

ETDM Number: 13040

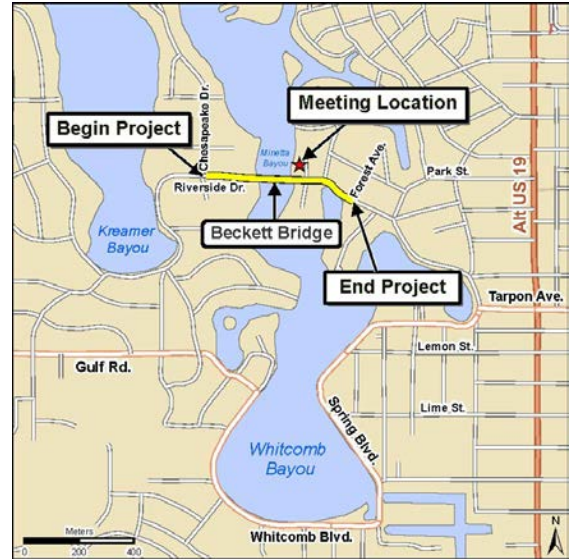

Date: Wednesday, February 26, 2014

**Place: Tarpon Springs Yacht Club
350 N. Spring Blvd.**

Tarpon Springs, FL 34689

**Time: 5:00-7:30 p.m. - Open House
6:00 p.m. – Formal Presentation**

Pinellas County, in cooperation with the Florida Department of Transportation (FDOT) and the Federal Highway Administration (FHWA), has scheduled a Public Hearing regarding the replacement of the Beckett Bridge in Tarpon Springs. This hearing is being held to give the public an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements. The improvements consist of replacing the existing bridge with a new, two-lane movable bridge. Information about all alternatives considered will be available for review. Members of the project team will be available to answer questions. A court reporter will be available to receive comments in a one-on-one setting. At 6:00 p.m., the formal portion of the hearing will begin. A formal presentation will be made, followed by a public comment period.

Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or they can be mailed to Tony Hornik, P.E., S.I., Project Manager, Pinellas County, Dept. of Environment and Infrastructure, 14 S. Fort Harrison Ave., Clearwater, FL 33756. All exhibits or statements postmarked on or before March 8, 2014 will become part of the public hearing record. Persons may also make comments to Pinellas County Commissioners at the April 15, 2014 Board of County Commissioners meeting which begins at 2:00 pm in the County Commission Chambers.

Draft project documents will be available for public viewing from February 5 until March 8 at the following locations:

Tarpon Springs Public Library
138 Lemon Street
Tarpon Springs, FL 34689
Mon-Wed 10:00 a.m. – 9:00 p.m.
Thurs-Fri 10:00 a.m. – 6:00 p.m.
Sat 10:00 a.m. – 5:00 p.m.

Tarpon Springs City Clerk
410 North Ring Avenue
Tarpon Springs, FL 34689
Mon-Fri 8:00 a.m. – 5:00 p.m.

All interested parties are encouraged to attend the Public Hearing. For further information, please contact Mr. Tony Hornik, P.E., S.I., Project Manager, at 727.464.3640, or visit the project website <http://www.pinellascounty.org/beckettbridge>. Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. Persons with disabilities requiring reasonable accommodations under the *American with Disabilities Act* or persons who require translation service (free of charge) should call Mr. Hornik or the Office of Human Rights at 727.464.4062 (VOICE/TDD) at least seven days prior to the hearing.

PROJECT FACT SHEET

BECKETT BRIDGE

Project Development and Environment (PD&E) Study
Riverside Drive from Chesapeake Drive to Forest Avenue
Tarpon Springs, Pinellas County, FL

County Project Number: PID 2161

FDOT FPN: 424385-1 ETDM Number: 13040

Project Description

The Recommended Alternative consists of replacing the existing two-lane movable bridge with a new two-lane movable bridge on approximately the same alignment within existing County right-of-way. No additional property will be acquired. The proposed bridge will have 7.8 feet of vertical clearance, about 2 feet more than the existing bridge. The proposed typical section is shown below.

Project Schedule

April 15, 2014 – Board of County Commissioners (BCC) Meeting

(Meeting begins at 2:00 pm in the County Commission Chambers)

The BCC will decide whether to ratify and confirm their approval of the Recommended Alternative based on the results of the Public Hearing.

March-July 2014 – Finalize Project Documents

September-October 2014 – Obtain Federal Highway Administration Approval

Early 2015 – Begin Design

2019 – Begin Construction*

***Construction Schedule Contingent on Funding Availability**

Project Costs

The cost for design and construction of the Recommended Alternative is approximately \$15.8 M.

Project Contact

RE: **Public Hearing**
Beckett Bridge Project Development and Environment (PD&E) Study
from Chesapeake Drive to Forest Avenue
Tarpon Springs, Pinellas County, Florida
County Project Number: PID 2161
FDOT Financial Project No.: 424385-1

Dear Ms. DeTizio:

Pinellas County will conduct a Public Hearing in coordination with the Florida Department of Transportation for the above referenced project on Wednesday, February 26, 2014 from 5:00 pm to 7:30 pm at the Tarpon Springs Yacht Club, located at 350 N. Spring Boulevard, Tarpon Springs, Florida, 34689. An open house will be conducted from 5:00 pm until 6:00 pm. A formal presentation will be made at 6:00 pm, followed by a public comment period. A copy of the Public Hearing Notice is enclosed which includes a map showing the location of the hearing, project location and other information. This letter is being sent to all property owners located within approximately 1,000 feet of the proposed alignment, others who have expressed an interest in being informed, and other public officials and agencies.

Information about the Recommended Alternative and other alternatives considered during the study will be presented. Representatives from the project team will be available to take comments and answer questions. A comment form is enclosed. Comment forms will also be available at the hearing. Additional information is provided in the attached Project Fact Sheet. The public is also invited to attend the follow up Board of County Commissioners meeting, which will be held on April 15, 2014 at 2:00 pm in the Commission Chambers.

Mr. Tony Hornik, P.E., Project Manager, may be contacted for additional information at (727) 464-3640 or at thornik@co.pinellas.fl.us. Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. If you need special accommodations under the Americans with Disabilities Act, or require translation services (free of charge), please contact Mr. Tony Hornik at least seven days before the meeting.

Thank you for your interest in this project.

Sincerely,

David E. Scott, P.E.
Executive Director

RE: Public Hearing
Beckett Bridge Project Development and Environment (PD&E) Study
from Chesapeake Drive to Forest Avenue
Tarpon Springs, Pinellas County, Florida
County Project Number: PID 2161
FDOT Financial Project No.: 424385-1

Dear Mr. Plumb:

Pinellas County will conduct a Public Hearing in coordination with the Florida Department of Transportation for the above referenced project on Wednesday, February 26, 2014 from 5:00 pm to 7:30 pm at the Tarpon Springs Yacht Club, located at 350 N. Spring Boulevard, Tarpon Springs, Florida, 34689. An open house will be conducted from 5:00 pm until 6:00 pm. A formal presentation will be made at 6:00 pm, followed by a public comment period. A copy of the Public Hearing Notice is enclosed which includes a map showing the location of the hearing, project location and other information. This letter is being sent to all property owners located within approximately 1,000 feet of the proposed alignment, others who have expressed an interest in being informed, and other public officials and agencies.

Information about the Recommended Alternative and other alternatives considered during the study will be presented. Representatives from the project team will be available to take comments and answer questions. A comment form is enclosed. Comment forms will also be available at the hearing. Additional information is provided in the attached Project Fact Sheet. The public is also invited to attend the follow up Board of County Commissioners meeting, which will be held on April 15, 2014 at 2:00 pm in the Commission Chambers.

Mr. Tony Horrnik, P.E., Project Manager, may be contacted for additional information at (727) 464-3640 or at thornik@co.pinellas.fl.us. Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. If you need special accommodations under the Americans with Disabilities Act, or require translation services (free of charge), please contact Mr. Tony Horrnik at least seven days before the meeting.

Thank you for your interest in this project.

Sincerely,

David E. Scott, P.E.
Executive Director

Notice of Meeting/Workshop Hearing

OTHER AGENCIES AND ORGANIZATIONS

Pinellas County Department of Environment & Infrastructure (DEI)

The Pinellas County Department of Environment and Infrastructure announces a public meeting to which all persons are invited.

DATE AND TIME: February 26, 2014, Open House from 5:00 p.m. – 7:30 pm; Formal Presentation 6:00 pm, followed by public comments.

PLACE: Tarpon Springs Yacht Club, 350 N. Spring Boulevard, Tarpon Springs, Florida, 34689

GENERAL SUBJECT MATTER TO BE CONSIDERED: Pinellas County, in cooperation with the Florida Department of Transportation (FDOT) and the Federal Highway Administration, has scheduled a Public Hearing regarding the replacement of the Beckett Bridge in Tarpon Springs, Florida, FDOT FPN: 424385-1, ETDM Number: 13040, Pinellas County PID 2161. This hearing is being held to give the public an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements. The improvements consist of replacing the existing bridge with a new, two-lane movable bridge. No right-of-way will be acquired for this project. Potential encroachments on wetlands and floodplains may be given special consideration under Executive Orders 11990 and 11988. Draft project documents and conceptual plans for the proposed improvements will be available for public review at the hearing location on the night of the hearing. Information about all alternatives considered will be available for review. Members of the project team will be available to answer questions. A court reporter will be available to receive comments in a one-on-one setting. At 6:00 pm, the formal portion of the hearing will begin. A formal presentation will be made, followed by a public comment period.

A copy of the agenda may be obtained by contacting: Tony Hornik, P.E., S.I., Project Manager, Environment and Infrastructure, 14 S. Ft. Harrison Avenue, 6th Floor, Clearwater, FL 33756, or at (727) 464-3640 or at thornik@co.pinellas.fl.us.

More information can be viewed on the project website at www.pinellascounty.org/beckettbridge.

Pursuant to the provisions of the Americans with Disabilities Act, any person requiring special accommodations to participate in this workshop/meeting is asked to advise the agency at least 7 days before the workshop/meeting by contacting: (727) 464-4062 (VOICE/TDD). Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. If you are hearing or speech impaired, please contact the agency using the Florida Relay Service, 1(800)955-8771 (TDD) or 1(800)955-8770 (Voice).

ing Arts Center is located at 324 Pine Street.

For additional details or more ticket information, call (727) 942-5605 or go to www.TarponArts.org.

Tarpon local biz group meeting

TARPON SPRINGS — The Tarpon Springs Council of Organization's next meeting is 8:30-9:30 a.m. Friday at Freedom Inn.

Guest speaker Melissa Seixas of Duke Energy will discuss how to write sponsorship proposals for events.

Admission to the meeting is \$1, and a hot breakfast will be served.

Freedom Inn, the council's new permanent home, is at 1651 S. Pinellas Ave.

Call (727) 946-0963 for

additional information.

Beckett Bridge public hearing set

TARPON SPRINGS — A public hearing is scheduled for 5 p.m. on Wednesday at the Tarpon Springs Yacht Club detailing the closure of Beckett Bridge.

The evening begins with an open house at 5 and the formal presentation will be given at 6.

Officials from Pinellas County, the Florida Department of Transportation and the Federal Highway Administration scheduled this public hearing regarding the future replacement of Beckett Bridge.

Members of the public wishing to submit written statements or questions prior to the hearing can do so by mailing them to: Tony Hornik, P.E., S.I., Project Manager, Pinellas County, Dept. of Environment and Infrastructure,

14 S. Fort Harrison Ave., Clearwater FL 33756.

Hospital offers driving courses

TARPON SPRINGS — Florida Hospital North Pinellas is inviting the community's older residents to participate in an AARP Certified Driver Safety Program at 9 a.m. on Friday.

Participation costs \$15 per AARP members or \$20 for nonmembers. Payments must be made by check or money order, payable to AARP.

Valid driver's licenses are required.

Course completion helps mature drivers refine existing skills and develop safe driving strategies in today's roadway environment.

Call the hospital at (727) 943-3698 for more information on its schedule of events and informative discussions.

People in the News

Air Force Airman Grant W. Spalding graduated from basic military training at Joint Base San Antonio-Lackland, San Antonio.

Spalding, the son of Julia and Greg Spalding of Tarpon Springs, is a 2013 graduate of East Lake High School.

Post to our website, www.suncoastnews.com; mail to 8609 Regency Park Blvd., Port Richey FL 34668; fax to (813) 579-9210; or email to community@suncoastnews.com.

Barbecue

From Page 1

to have some high-quality events.”

A variety of primarily local breweries and barbecue restaurants are expected to have their products either on tap or ready to dish out, Jenkin said.

The Dunedin Smokehouse, Costas Restaurant and Bill's Real Deal Barbecue are a few of the 10-plus restaurants that will be setting up trailers.

Helping to complement and wash down the saucy fare will be beers from Dunedin Brewery, 7venth Sun Brewery, Green Bench Brewing Co., Cigar City Brewing, Swamp Head

Brewery and more.

The festival's epicenter will be the parking lot at N. Safford Avenue and E. Orange Street, though some beer tents and barbecue trailers will be set up along both aforementioned roadways.

The evening event is scheduled for 5-11 p.m. and will feature musical performances.

Application

From Page 1

high school students.

Tarpon Springs Middle just created its Leadership Conservatory for the Arts for students to prepare before advancing to the high school program.

At the K-5 level, parents can apply for their child to be enrolled at Tarpon Springs Fundamental Elementary School.

Issues that cannot be

completed while accessing the reservation system online can be directed to the Student Assignment Office at (727) 588-6210.

In addition, the school district has announced its operating free driver's education courses this summer in two sessions.

The courses are for public and private school students aged 15 and older. Students must have earned a learner's permit

operator's license when the sessions begin.

Both sessions, which run from early June into mid-July, will take place from 7:30 a.m. until 2 p.m.

There are 11 sites where the courses will take place, including three in North Pinellas: Clearwater High, Countryside High, Dunedin High and East Lake High.

Registration began this past Monday. Call (727) 588-6000 for information.
