Executive Summary

The Florida Department of Transportation (FDOT), District Seven, is conducting a Project Development and Environment (PD&E) Study to evaluate the need for capacity and operational improvements along 16.3 miles of Interstate 275 (I-275) (State Road (SR) 93) from south of 54th Avenue South to north of 4th Street North in Pinellas County, Florida.

The objective of this PD&E Study is to assist the FDOT and the Federal Highway Administration (FHWA) in reaching a decision on the type, location, and conceptual design of the necessary improvements for I-275 to safely and efficiently accommodate future travel demand. This study will document the need for the improvements as well as the procedures utilized to develop and evaluate various improvements including elements such as proposed typical sections, special designation of travel lanes, preliminary horizontal alignments, and interchange enhancement alternatives. The anticipated social, physical, and natural environmental effects and costs of these improvements will be identified. The alternatives will be evaluated and compared based on a variety of parameters utilizing a matrix format. This process will identify the alternative that will best balance the benefits (such as improved traffic operations and safety) with the impacts (such as environmental effects and construction costs).

The PD&E Study satisfies all applicable federal and state requirements, including the National Environmental Policy Act (NEPA), in order for this project to qualify for federal-aid funding of subsequent development phases (design, right of way acquisition, and construction). The project was evaluated through the FDOT's Efficient Transportation Decision Making (ETDM) process. This project is designated as ETDM Project #12556. An ETDM Programming Screen Summary Report was published on July 26, 2013, containing comments from the Environmental Technical Advisory Team (ETAT) on the project's effects on various natural, physical, and social resources. Based on the ETAT comments, the FHWA determined that this project qualifies as a Type 2 Categorical Exclusion.

This Cultural Resource Assessment Survey (CRAS) was prepared by Archaeological Consultants, Inc. (ACI) in association with HDR Engineering, Inc. as part of this PD&E Study. The purpose of the CRAS is to locate and identify any cultural resources within the Area of Potential Effect (APE) and to assess their significance in terms of eligibility for listing in the National Register of Historic Places (NRHP). This CRAS was conducted in accordance with the requirements set forth in the National Historic Preservation Act of 1966, as amended, and Chapter 267, *Florida Statutes* (*F.S.*). It was carried out in conformity with Part 2, Chapter 12 ("Archaeological and Historical Resources") of the FDOT*'s PD&E Manual* (FDOT 1999) and the standards contained in the Florida Division of Historical Resources' (FDHR*) Cultural Resource Management Standards and Operational Manual* (FDHR 2003). In addition, this survey meets the specifications set forth in Chapter 1A-46, *Florida Administrative Code*.

A Research Design and Survey Methodology was prepared as part of the CRAS (ACI 2014). The objective was to gain approval for the proposed CRAS methodology from the FDOT, and to inform the Federal Highway Administration (FHWA) and the State Historic Preservation Officer (SHPO) of the proposed methods prior to completing the CRAS. It identified previously recorded archaeological sites and historic resources located within the project APE and vicinity, and discussed the potential for previously unrecorded cultural resources. It also presented the methods proposed for field survey, data analysis, and documentation.

The ETDM Programming Screening Summary Report assigned a Moderate Degree of Effect for Historical and Archaeological Resources (FDOT 2013). The GIS data from the Environmental Screening Tool indicated that 67 recorded cultural resources are located within approximately 500 feet (ft) of the I-275 PD&E Study project corridor. These include five archaeological sites; one cemetery; two historic bridges; 56 historic structures; and three resource groups. These data were updated through a search of the Florida Master Site File (FMSF) digital database (July 2014 GIS update), which indicated that four archaeological sites and 17 historic resources are located adjacent to the I-275 corridor within the proposed project APE, rather than within 500 ft. These include one historic cemetery, two schools, 13 residential and commercial structures, and one historic district. The SHPO did not previously evaluate any of the four archaeological sites (8PI901, 8PI902, 8PI1212, and 8PI1258). The total 17 recorded historic resources includes the NRHP-listed Kenwood Historic District (8PI11176), which is roughly bounded by 1st Avenue North and 9th Avenue North, and contains more than 2,200 contributing resources. Of these, 10 are adjacent to the I-275 corridor. The one cemetery, 8PI12010 (Garden of Hope Cemetery) was previously evaluated by the SHPO as ineligible for listing in the NRHP. The Jordan Park School (8PI6901) was determined eligible by the SHPO in 2008 and was designated as a City of St. Petersburg Landmark. The other recorded school, the Norwood School (8PI714), has not been evaluated by the SHPO. The 13 residential and commercial buildings were constructed between 1918 and 1948 in a variety of styles, including Mediterranean Revival, Georgian Revival, Bungalow, Minimal Traditional, Industrial Vernacular, and Frame Vernacular. Eight are contributing resources to the NRHP-listed Kenwood Historic District, one was evaluated as ineligible, and four were not evaluated by the SHPO.

Archaeological field survey focused on the four previously recorded and unevaluated archaeological sites (8PI901, 8PI902, 8PI1212, and 8PI1258) located within the project APE, defined as the existing right-of-way (ROW). Systematic survey of the entire project corridor was not required since additional ROW is not being proposed, the existing ROW has been severely altered by roadway development and other impacts, and work within the ROW posed a safety issue for the field team. As a result of surface reconnaissance and limited archaeological testing, all four sites, as contained within the project APE, are presumed destroyed. The evaluation of each site, as contained outside the APE, was beyond the scope of this CRAS. There is still insufficient information to determine the potential NRHP eligibility of 8PI901 and 8PI902, since most of each site area is situated outside the project APE. Both 8PI1212 and 8PI1258, mostly contained within the project APE, are considered ineligible for listing in the NRHP due to the loss of physical integrity.

Historical/architectural field survey resulted in the identification of 325 historic resources within the I-275 project APE, defined as the properties located adjacent to the existing ROW, as contained within 200 feet of the ROW. The 325 historic resources include 19 that were previously recorded and 306 that are newly identified. This total includes 309 structures, 13 building complex resource groups, one historic district, one railroad, and one cemetery. Of these, 16 are NRHP-listed, eligible, or considered potentially eligible. The Kenwood Historic District (8PI11176), listed in the NRHP in 2003, and 10 structures (8PI6929, 8PI7256, 8PI7272, 8PI7410, 8PI7502, 8PI7837, 8PI7839, 8PI7970, 8PI11102, and 8PI11108) within the APE are contributing resources to the district. The Jordan Park Elementary School (8PI6901) was determined NRHP-eligible by the SHPO in 2005. Research and field survey indicated that four additional historic resources are potentially eligible for listing in the NRHP. These include one previously recorded resource (8PI6956) considered potentially eligible as a contributing resource to an updated/expanded Kenwood Historic District, as well as three resources newly considered individually eligible for listing in the NRHP: the Norwood School (8PI714), Papa's Dream at 1850 Central Avenue (8PI726), and the Manhattan Casino (8PI819).

There is insufficient information to determine the eligibility of two historic resources: the Mt. Moriah Primitive Baptist Church (8PI12276) and the Orange Belt Railway/CSX Railroad (8PI12273). 8PI12276 may be potentially eligible as a contributor to a potential 9th Avenue South churches thematic historic district since there are approximately nine additional historic churches along this corridor outside the project APE. However, since no such thematic district has yet been defined, and the majority of these resources are outside the APE, there is currently not enough information to evaluate the NRHP eligibility of the Mt. Moriah Primitive Baptist Church. At this time, it is not considered to individually meet the NRHP eligibility criteria. Because only a short segment is located within the project APE, there is insufficient information to determine the NRHP eligibility of the Orange Belt Railway/CSX Railroad (8PI12273). The 307 other historic structures and building complex resource groups are not considered potentially eligible for NRHP listing due to their commonality of style and lack of significant historical associations to persons or events. Field survey also revealed that 10 previously recorded historic resources are no longer extant. Pond sites were not included as part of the CRAS during the PD&E Study since they are not being located as part of the PD&E Study. However, in January 2016 a desktop analysis and field reconnaissance survey of six stormwater management facility (SMF) sites was conducted by the FDOT, and a supplemental follow-up survey was performed by ACI. A Technical Memorandum Addendum that incorporates the findings from both the reconnaissance survey and the follow-up survey was prepared in March 2016. It is provided in **Appendix D**.

1.0 Introduction

The Florida Department of Transportation (FDOT), District Seven, is conducting a Project Development and Environment (PD&E) Study to evaluate the need for capacity and operational improvements along 16.3 miles of Interstate 275 (I-275) (State Road (SR) 93) from south of 54th Avenue South to north of 4th Street North in Pinellas County, Florida.

The objective of this PD&E Study is to assist the FDOT and the Federal Highway Administration (FHWA) in reaching a decision on the type, location, and conceptual design of the necessary improvements for I-275 to safely and efficiently accommodate future travel demand. This study will document the need for the improvements as well as the procedures utilized to develop and evaluate various improvements including elements such as proposed typical sections, special designation of travel lanes, preliminary horizontal alignments, and interchange enhancement alternatives. The anticipated social, physical, and natural environmental effects and costs of these improvements will be identified. The alternatives will be evaluated and compared based on a variety of parameters utilizing a matrix format. This process will identify the alternative that will best balance the benefits (such as improved traffic operations and safety) with the impacts (such as environmental effects and construction costs).

1.1 Project Description

The I-275 (SR 93) project corridor extends from south of 54th Avenue South to north of 4th Street North in Pinellas County, Florida, a distance of approximately 16.3 miles. The study map is shown on **Figure 1-1** on the following page. To effectively describe and evaluate the unique transportation characteristics of the project, the study corridor is divided into three segments as listed below, and graphically displayed on **Figure 1-1**:

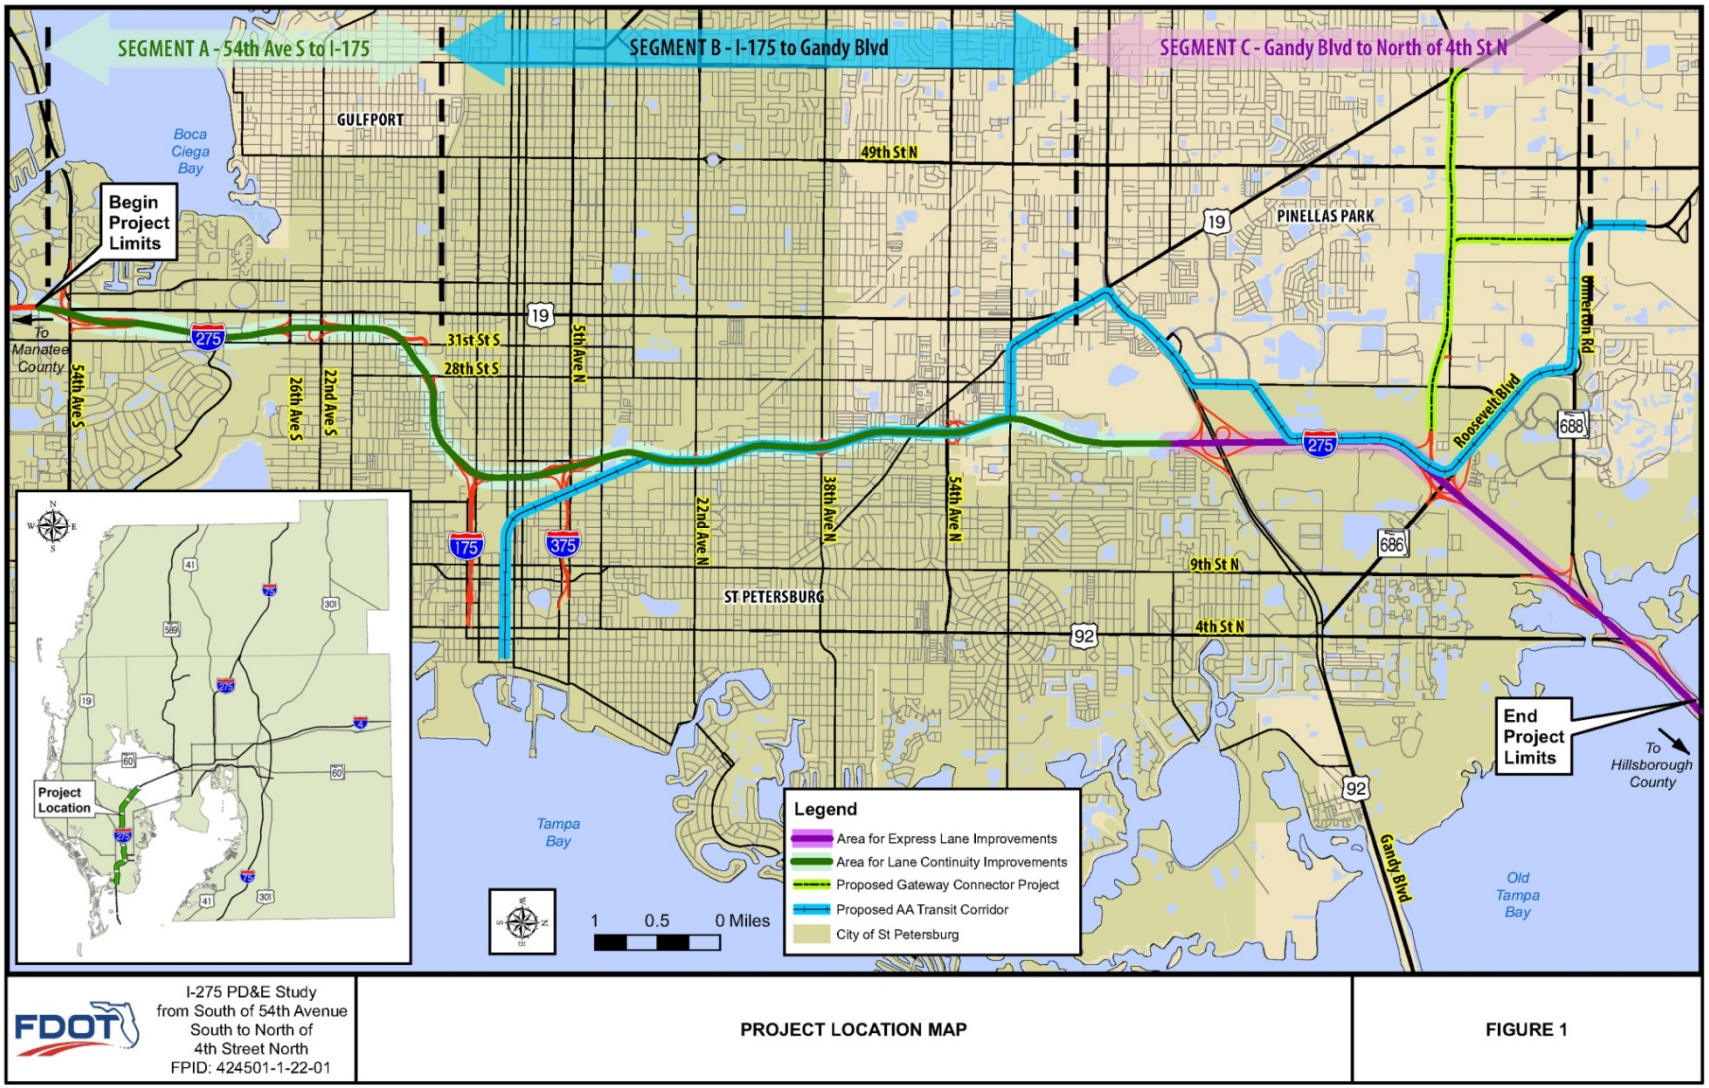
- Segment A: From south of 54th Avenue South to I-175, a distance of 4.6 miles;
- Segment B: From I-175 to south of Gandy Boulevard, a distance of 6.0 miles; and
- Segment C: From south of Gandy Boulevard to north of 4th Street North, a distance of 5.7 miles.

With respect to the PD&E study section of I-275 within Segments A and B, only lane continuity improvements are being evaluated. Segment C is the focus of express or managed lane improvements.

1.2 Project Background

The FDOT is conducting a PD&E study to evaluate the need for capacity and operational improvements along I-275 (SR 93) from 54th Avenue South to north of 4th Street North in Pinellas County, a distance of approximately 16.3 miles. The objective of the PD&E study is to provide documented environmental and engineering analyses which will assist the FDOT and the FHWA in reaching a decision on the type, conceptual design, and location of the necessary improvements within the I-275 PD&E Study limits.

Figure 1-1. Project Location Map



Several multimodal transportation planning studies for the I-275 PD&E Study Corridor within Pinellas County have been completed while others are presently underway. The findings from these studies are assisting the FDOT in identifying transportation improvements needed to adequately meet local and regional travel demands, as well as to support the on-going development of the PD&E Study's Recommended Alternative. The following sections describe the relevant multimodal planning studies prepared for the I-275 corridor in Pinellas County.

1.2.1 Tampa Bay Express (TBX) Master Plan Overview

FDOT District 7 has developed the Tampa Bay Express (TBX) Master Plan that indicates which interstate facilities, and specific freeway segments of these facilities, it would be cost feasible to implement express lanes on them. This Plan ensures that the impacts of implementing express lanes on the Tampa Bay interstate system would be evaluated on a system-wide basis in lieu of treating each corridor as its own stand-alone project. The I-275 PD&E Study incorporates the TBX Master Plan improvements proposed for the I-275 study corridor as part of the Recommended Alternative along with the lane continuity improvements which would occur generally between 54th Avenue South to south of Gandy Boulevard.

Realizing a potential shortfall in funding for implementation of the Plan's ultimate capacity improvements planned for the Tampa Bay Region, the FDOT underwent an evaluation to identify a series of lower cost express lane projects that can be funded in the FDOT's Five-Year Work Program. These initial projects could be built within a five-year or fewer time period, and then later be incorporated into the Master Plan projects at minimal additional costs. The shorter-term, lower-cost improvements are considered the "Starter Projects."

Further information regarding the development of the master plan and its proposed projects are documented in the TBX Master Plan document.

1.2.2 Pinellas Alternative Analysis (AA)

In addition to addressing highway capacity deficiencies, this PD&E Study also considers the multi-modal accommodations envisioned for the I-275 study corridor and its regional connections to the rest of Tampa Bay. The Tampa Bay Area Regional Transportation Authority (TBARTA) adopted a Transportation Master Plan for Citrus, Hernando, Hillsborough, Manatee, Pasco, Pinellas, and Sarasota Counties in May 2009. While considering all modes of transportation, the TBARTA Master Plan focused on providing the framework for an integrated transit system to serve all parts of the region. In 2009, the Hillsborough, Pinellas, Pasco, and Hernando County Metropolitan Planning Organizations (MPOs) and Citrus County all adopted the TBARTA Mid Term (2035) Networks in their 2035 Needs plans and included several key elements of the Master Plan in their 2035 Cost Affordable Long Range Transportation Plans (LRTPs).

As a first step in moving toward implementation of this plan, the Hillsborough Area Regional Transit Authority (HART) has undertaken an Alternative Analysis (AA) for a light rail transit corridor running from the University of South Florida, through downtown Tampa, to the Westshore area. This HART analysis includes a service connection to a proposed High Speed Rail station in downtown Tampa. A second AA is underway by the FDOT, TBARTA, the Pinellas County MPO, and the Pinellas Suncoast Transit Authority (PSTA) for a premium transit corridor from downtown St. Petersburg, through the Pinellas Gateway area, to downtown Clearwater. In addition, the FDOT, local transit

agencies, and MPOs have planned several Regional Transit Corridor Evaluations for other elements of the TBARTA Master Plan.

The 2012 Pinellas AA evaluated transit options connecting major residential, employment, and activity centers in Pinellas County to Hillsborough County via the Howard Frankland Bridge corridor. The study identified a 24-mile light rail Locally Preferred Alternative (LPA) for its ability to offer transportation options that are safe, sustainable, affordable, and efficient. Significant countywide local bus enhancements are recommended to support the LPA, nearly doubling the existing local bus service with portions being implemented before the light rail.

A key element of the TBARTA Master Plan is to provide a transit linkage across Upper Tampa Bay linking Hillsborough and Pinellas Counties. Specifically, both the TBARTA Master Plan and the MPO LRTPs call for the linkage to be provided across the Howard Frankland Bridge (I-275/SR 93) corridor. This linkage would run from Hillsborough County's proposed Westshore station (service connection to the proposed High Speed Rail station in downtown Tampa) to Pinellas County's proposed Gateway station. These stations would not serve as termini, but would allow uninterrupted transit movements from the St. Petersburg and Clearwater areas across the Howard Frankland Bridge to and through Tampa's Central Business District (CBD) and vice versa. However, for this linkage to be possible, the Howard Frankland Bridge corridor must be able to accommodate the appropriate transit provisions. The FDOT plans to replace the northbound Howard Frankland Bridge in the future since it is approaching the end of its useful service life. Therefore, the I-275 PD&E Study will provide recommended improvements that provide the transit accommodations envisioned by TBARTA and the needed highway improvements consistent with the planned northbound bridge replacement.

1.2.3 Lane Continuity Study

Completed in October 2008, the I-275 Lane Continuity Study evaluated operational improvements on I-275 from the Sunshine Skyway Bridge North Toll Plaza to Gandy Boulevard in Pinellas County. The study documented existing and future operational and safety conditions within the corridor for the purposes of recommending possible improvements to alleviate identified deficiencies. The study addressed both short-term traffic operational type improvements and longer-term major geometric improvements. As a long range improvement, the study recommended providing lane improvements to achieve one additional continuous lane on I-275 in each direction from 54th Avenue South to Gandy Boulevard. The I-275 Pinellas PD&E study will incorporate and update the Lane Continuity Study recommendations. Currently, I-275 from south of 54th Avenue South to 4th Street North has one continuous lane in the northbound direction and no continuous lanes in the southbound direction. According to the previous Lane Continuity Study recommendations, proposed lane additions to I-275 are anticipated to provide three continuous lanes in the northbound direction and two continuous lanes in the southbound direction between 54th Avenue South and 4th Street North. These new lane connections will improve the safety for motorists traveling the I-275 corridor by substantially reducing the number of lane changes for both directions of travel. The study also recommended modifications to certain interchanges within the study limits, allowing for a more refined analysis of those locations.

1.2.4 NEPA Process

The proposed project has been evaluated through the FDOT's Efficient Transportation Decision Making (ETDM) process. Agency coordination for this project has been initiated as part of ETDM Project Number 12556. The FDOT intends to seek Location Design and Concept Acceptance (LDCA) from FHWA for lane continuity improvements along I-275 from 54th Avenue South to south of Gandy Boulevard and express lane improvements related to the TBX Master Plan project along I-275 from south of Gandy Boulevard to north of 4th Street North.

1.3 Existing Conditions

I-275 is a limited access urban interstate highway facility that runs in a north and south direction through Pinellas County. The posted speed limit is 65 miles per hour (mph). Within the project limits, I-275 is comprised of a four-lane divided typical section with auxiliary lanes from south of 54th Avenue South to I-375. From I-375 to north of 4th Street North, I-275 is comprised of a six-lane divided typical section with auxiliary lanes.

The existing roadway typical sections, as shown on **Figure 1-2(a-e)**, are described as follows:

- Segment A (from south of 54th Avenue South to north of I-175): consists of four 12-foot general purpose travel lanes, two 12-foot auxiliary travel lanes, 12-foot inside and outside shoulders (10-foot paved) and generally open drainage with a median width that varies from 64 to 212 feet;
- Segment B (from north of I-175 to Roosevelt Boulevard): consists of six 12-foot general purpose travel lanes, two or four 12-foot auxiliary travel lanes, 12-foot inside and outside shoulders (10-foot paved) and generally open drainage with a median width that varies from 64 to 204 feet; and
- Segment C (from Roosevelt Boulevard to north of 4th Street North): There are three separate typical sections within Segment C (labeled separately as C1-C3).
    - C-1 (from Roosevelt Boulevard to 9th Street North): consists of six 12-foot general purpose travel lanes, zero to four 12-foot auxiliary travel lanes, 12-foot inside and outside shoulders (10-foot paved) and generally open drainage with a median width of 40 feet;
    - C-2 (from 9th Street North to 4th Street North): consists of six 12-foot general purpose travel lanes, two to four 12-foot auxiliary travel lanes, 12-foot inside and outside shoulders (10-foot paved) with a 26-foot wide concrete median containing a two-foot traffic barrier used to separate northbound and southbound traffic on I-275;
    - C-3 (from 4th Street North to 1.0 mile south of the Howard Frankland Bridge): the I-275 causeway consists of six 12-foot general purpose travel lanes, two 12-foot auxiliary lanes, 10-foot paved inside and outside shoulders, and a 22-foot median. The face of the outside barrier mounted on the sea walls is approximately 40 feet from the travel lanes.

No dedicated transit facilities, frontage roads or high-occupancy vehicle (HOV) lanes are currently provided within any of the I-275 mainline Segments. I-275 includes 13 interchanges within the project limits:

1. 54th Avenue South;
2. 26th Avenue South;
3. 22nd Avenue South;
4. 31st Street South;
5. I-175;
6. I-375;
7. 22nd Avenue North;
8. 38th Avenue North;
9. 54th Avenue North;
10. Gandy Boulevard;
11. Roosevelt Boulevard/118th Avenue North;
12. Ulmerton Road; and
13. 4th Street North.

1.4 Project Purpose and Need

I-275 is a vital link in the local and regional transportation network and serves as a critical evacuation route. As a major north-south corridor through Pinellas County, I-275 links the Tampa Bay region with the remainder of the state and the nation supporting commerce, trade, and tourism. I-275 is part of the Strategic Intermodal System (SIS), a statewide transportation network of highways, railways, waterways, and transportation hubs that provides for the movement of goods and people at high speeds and high traffic volumes. As an SIS facility and part of the regional roadway network, I-275 is included in the 2035 Regional Long-Range Transportation Plan (LRTP) developed by the West Central Florida Metropolitan Planning Organization's (MPO) Chairs Coordinating Committee (CCC) and the TBARTA Master Plan. Preserving the operational integrity and regional functionality of I-275 is critical to mobility and economy of the Tampa Bay region.

The purpose of this project is to provide for operational and safety improvements that maximize capacity within the I-275 corridor, improve lane continuity and connect I-275 within Pinellas County to the future network of express lanes planned for the Tampa Bay region. Improvements are needed within the I-275 corridor to help alleviate existing traffic congestion, enhance safety and better accommodate future travel demands associated with projected growth in employment and population. The addition of special use/express lanes is included in the FDOT's Approved SIS Highway Component 2035 Cost Feasible Plan

In 2012, Annual Average Daily Traffic (AADT) volumes on I-275 ranged from a low of 82,000 vehicles per day north of 54th Avenue South to a high of 142,500 vehicles per day north of 4th Street North. Under these existing traffic loadings, the I-275 mainline segment from 22nd Avenue North to Gandy Boulevard currently operates deficiently (Level of Service – LOS E) during both the morning and afternoon peak travel periods and does not meet the minimum LOS standard D for SIS highway facilities. Population and employment in Pinellas County are projected to grow with aggressive redevelopment programs and infill potential, thereby resulting in increased future traffic volumes on I-275 that range from a low of 132,000 vehicles per day north of 54th Avenue South to a high of 274,000 vehicles per day north of 4th Street North in the design year (2040). Without improvements, the operating conditions along I-275 and connecting roadways will continue to deteriorate, resulting in unacceptable levels of service throughout the entire study corridor. Capacity and operational improvements could also enhance travel safety by reducing congestion, thereby decreasing vehicle conflicts. According to the crash records for the years 2009 through 2013, obtained from the FDOT's crash database, a total of 2,082 crashes were reported along I-275 within the project limits. Eighteen crashes resulted in one or more fatalities, 976 crashes resulted in personal injuries, and 1,088 crashes resulted in property damage only.

1.5 Improvement Alternatives

A detailed *Design Traffic Technical Memorandum* (DTTM) was prepared as part of the PD&E Study. The DTTM documented the existing travel conditions along I-275, presented traffic forecasts of the opening year (2020), interim year (2030) and design year (2040) travel demand along I-275 and the crossing corridors, and summarized level of service evaluations of improvement alternatives for the I-275 mainline. The DTTM concluded that the proposed improvements should consist of providing lane continuity improvements only in Segment A (from south of 54th Avenue South to I-175), lane continuity improvements and multimodal accommodations in Segment B (from I-175 to south of Gandy Boulevard) and adding special use lanes (SULs) to the existing general use lanes (GULs) in

each direction of the I-275 mainline to form express lanes in study Segment C (from south of Gandy Boulevard to north of 4th Street North). For the express lane section, two SULs would be provided in each direction of the I-275 mainline to accommodate traffic volumes forecasted in the design year (2040) under the Master Plan scenario. Alternatively, one SUL would be provided in each direction of the I-275 mainline under the Starter Project scenario, in order to cost effectively provide mobility options and preserve acceptable levels of service for the regional travelers prior to the design year.

The widening of I-275, under both lane continuity and Starter and Master Plan express lane mainline alternatives, can be constructed within the existing right of way. Additional right of way may be required, however, for interchange enhancements, slip ramps, stormwater management facilities, and floodplain compensation sites.

1.6 Report Purpose

The purpose of this Cultural Resource Assessment Survey (CRAS) was to locate and identify any archaeological sites and historic resources located within the project Area of Potential Effect (APE) and to assess, to the extent possible, their significance as to eligibility for listing in the National Register of Historic Places (NRHP). The archaeological and historical/architectural components of the survey were conducted between July and October of 2014 by Archaeological Consultants, Inc. (ACI), in association with HDR Engineering, Inc. Background research preceded field survey.

This project was conducted in accordance with the requirements set forth in the National Historic Preservation Act of 1966, as amended, and Chapter 267, *Florida Statutes.* It was performed in conformity with Part 2, Chapter 12 (Archaeological and Historical Resources) of the FDOT's *PD&E Manual* and the standards contained in the FDHR's *Cultural Resource Management Standards and Operational Manual* (FDHR 2003; FDOT 1999). In addition, this study meets the specifications set forth in Chapter 1A-46, *Florida Administrative Code*.

A Research Design and Survey Methodology was prepared as part of the CRAS (ACI 2014). The objective was to gain approval for the proposed CRAS methodology from the FDOT, and to inform the Federal Highway Administration (FHWA) and the State Historic Preservation Officer (SHPO) of the proposed methods prior to completing the CRAS. It identified previously recorded archaeological sites and historic resources located within the project APE and vicinity, and discussed the potential for previously unrecorded cultural resources. It also presented the methods proposed for field survey, data analysis, and documentation.

1.7 Recommended Project APE

The I-275 project is planned to be mostly developed within the existing ROW. No substantial changes to the vertical profile are proposed, nor are side street improvements at the ramps anticipated. Accordingly, archaeological sites are unlikely to be affected by the project, and archaeological field survey focused only on the identification and evaluation of previously recorded sites located within the existing ROW that had not been evaluated by the SHPO, or that had insufficient information for evaluation. However, as applicable, it was planned to perform systematic archaeological field survey of any new areas of proposed ROW though none of this effort has been performed to date since the project is planned to occur within the existing ROW of I-275. For historic resources, the APE is defined as the properties adjacent to the existing ROW. As contained within these adjacent properties, only the historic resources located within 200 ft of the existing ROW were

identified and evaluated. Pond sites were not included as part of the CRAS during the PD&E Study since they are not being located as part of the PD&E Study. However, in January 2016 a desktop analysis and field reconnaissance survey of six stormwater management facility (SMF) sites was conducted by the FDOT, and a supplemental follow-up survey was performed by ACI. A Technical Memorandum Addendum that incorporates the findings from both the reconnaissance survey and the follow-up survey was prepared in March 2016. It is provided in **Appendix D**.

2.0 Environmental Setting

2.1 Location and Setting

The 16.3-mile I-275 project corridor is contained within the townships, ranges, and sections listed in **Table 2-1** (United States Geological Survey [USGS] Pass-A-Grille Beach, Fla. 1956a; Safety Harbor, Fla. 1956b; St. Petersburg, Fla. 1956d), and as depicted in **Figures 2-1 through 2-7.**

Table 2-1. Township, Range, and Section coordinates for the I-275 PD&E Study corridor in Pinellas County.

Township	Range	Sections
32 South	16 East	2, 3, 10, and 11
31 South	16 East	1, 2, 11, 12, 13, 24, 26, 27, 34, and 35
30 South	16 East	6, 12, 13, 14, 23 through 26, 35, and 36

Overall, with few exceptions, all of the land within and adjacent to the I-275 right-of-way is level to nearly level and poorly drained. Large portions of the study area have been altered by urban development. Prior to urbanization, the central portion of the study area, in Township 31 South, Range 16 East, was characterized by “very open pine lands of good quality and many ponds of freshwater” (State of Florida 1845:62). The 1848 federal surveyor’s plat (State of Florida 1848) depicts today’s Booker Creek in its present location, as well as a sizeable pond in the vicinity. Most of the ponds, streams, and other wetlands shown on the mid-19th century plats have been obliterated by development.

A comparison of the 1969 and 1987 photorevised USGS St. Petersburg quadrangle maps (USGS 1956c, 1956d) shows that prior to construction of I-275, the land in the vicinity of today’s I-275 interchange at Gandy Blvd. was undeveloped and level. From Gandy Blvd. south to 54th Avenue N., I-275 was built within a largely undeveloped strip of land between Sawgrass Lake at the west and a small residential development at the east. By 1987, residential expansion marked the area east of I-275 and north of 62nd Avenue North, including the development of a large mobile home park to the southeast of the I-275 at Gandy Blvd. interchange. South of Central Avenue, interstate construction cut through and substantially impacted the historically African-American community along the 22nd Street corridor. Aerial photographs available from the Publication of Archival, Library and Museum Materials (PALMM) from 1943 indicate that at this time most of the land near the central part of the study corridor was residentially developed; the northern and southern ends of today’s corridor were largely vacant (**Figures 2-8 through 2-10**).

2.2 Physiography and Geology

The major geologic formation in south Pinellas County is the Caloosahatchee Marl of the lower Pliocene. Of marine origin, it consists of sand, sandy clay, and marl and is from 2 to 85 percent shells. The maximum thickness is 50 feet. During the Pleistocene, this formation was covered by marine deposits that formed four terraces, the Pamlico, Talbot, Penholoway, and Wicomico. Each consists of 2 to 35 feet of sand (USDA 1972:61). The Pamlico Terrace occurs at elevations of 0-25 feet above mean sea level. In areas near St. Petersburg and Pinellas Park, the sand is only 1-4 feet thick and is underlain by Caloosahatchee Marl. The Penholoway Terrace, at 40-62 feet above mean sea level in St. Petersburg, is composed mostly of sand and overlies the Hawthorne formation.

2.3 Soils and Vegetation

Two primary soils associations characterize the general I-275 PD&E Study corridor area. Soils of the Myakka-Immokalee-Pomello association are dominant in the southern portion of the project area (Segment A); this association makes up 43 percent of Pinellas County These are nearly level and gently sloping, poorly drained and moderately well drained sandy soils that have layers weakly cemented with organic matter at depths of 40 inches or less. They cover areas characterized by broad flats between sloughs, low ridges and knolls, and many small, shallow, grassed ponds. Some areas are in native vegetation, consisting of saw palmetto, scattered slash and sand pine, gallberry, runner oak, and grasses (USDA 1972:4).

The land along Segments B and C of the I-275 study corridor is mostly characterized by soils of the Wabasso-Elred-Oldsmar association. These are nearly level, poorly drained sandy soils, some of which have layers weakly cemented with organic matter. A large part is in native vegetation consisting of scattered stands of slash pine, saw palmetto, myrtle, gallberry, and grasses. Much of the land covered by this soil association has been developed for urban use, particularly within the St. Petersburg and Pinellas Park areas (USDA 1972:5).

Occurring with lesser frequency are soils of the Astatula-Adamsville association, Urban land association, and the Made land-Palm Beach association. The former characterizes the general vicinity of I-175. The Astatula-Adamsville association soils are nearly level and gently sloping, deep and sandy, and found on broad low ridges. Soils of the Urban land association characterize the corridor to the north and south of Central Avenue These are 75 percent or more covered by urban structures and are heavily modified by urban development. Similarly reflecting the human modification of the natural landscape are the local soils of the Made land-Palm Beach association, found in small areas along the corridor in Segment B. These soils are nearly level, extensively altered, and formed by diking, dredging and filling. **Table 2-2** provides a list of the specific soil types along the I-275 PD&E study corridor and their associated environmental setting (USDA 1972).

Table 2-2. Soil types, drainage, and environmental setting along the study corridor.

Soil Type and Slope	Drainage	Setting
Adamsville fine sand	Somewhat poor	Near the base of slopes on the upland ridge and in a few areas in the flatwoods
Elred fine sand	Poor	Broad low ridges in the flatwoods
Felda fine sand	Poor	Broad low ridges in the flatwoods
Felda fine sand, ponded	Poor	Depressions and grassy sloughs
Immokalee fine sand	Poor	Broad flats between sloughs
Made land	Transported, reworked, and leveled by earth-moving equipment	
Myakka fine sand	Poor	Broad flats between sloughs
Pinellas fine sand	Somewhat poor	Around sloughs and ponds in the flatwoods
Pomello fine sand	Moderately well	Upland ridges and on isolated small ridges and knolls in the flatwoods
Pompano fine sand	Poor	Near ponds and in low areas between sloughs in the flatwoods
Urban land	75% developed	
Urban land-Astatula complex	25-40% covered with houses, industrial buildings, other structures, and pavement	

2.4 Paleoenvironmental Considerations

The early environment of the region was different from that seen today. Sea levels were lower, the climate was arid, and fresh water was scarce. An understanding of human ecology during the earliest periods of human occupation in Florida cannot be based on observations of the modern environment because of changes in water availability, botanical communities, and faunal resources. Aboriginal inhabitants would have developed cultural adaptations in response to the environmental changes taking place, which were then reflected in settlement patterns, site types, artifact forms, and subsistence economies.

Due to the arid conditions between 16,500 and 12,500 years ago, the perched water aquifer and potable water supplies were absent (Dunbar 1981:95). Palynological studies conducted in Florida and Georgia suggest that between 13,000 and 5000 years ago, this area was covered with an upland vegetation community of scrub oak and prairie (Watts 1969, 1971, 1975). However, the environment was not static. Evidence recovered from the inundated Page-Ladson Site in north Florida has clearly demonstrated that there were two periods of low water tables and dry climatic

conditions and two episodes of elevated water tables and wet conditions (Dunbar 2006c).The rise of sea level reduced xeric habitats over the next several millennia

By 5000 years ago, a climatic event marking a brief return to Pleistocene climatic conditions induced a change toward more open vegetation. Southern pine forests replaced the oak savannahs. Extensive marshes and swamps developed along the coasts and subtropical hardwood forests became established along the southern tip of Florida (Delcourt and Delcourt 1981). Northern Florida saw an increase in oak species, grasses, and sedges (Carbone 1983). At Lake Annie, in south central Florida, pollen cores were dominated by wax myrtle and pine. The assemblage suggests that by this time, a forest dominated by longleaf pine along with cypress swamps and bayheads existed in the area (Watts 1971, 1975). By about 3500 BCE (Before Common Era), surface water was plentiful in karst terrains and the level of the Floridan aquifer rose to approximately five feet above present levels. After this time, modern floral, climatic, and environmental conditions began to be established.

3.0 Cultural Chronology

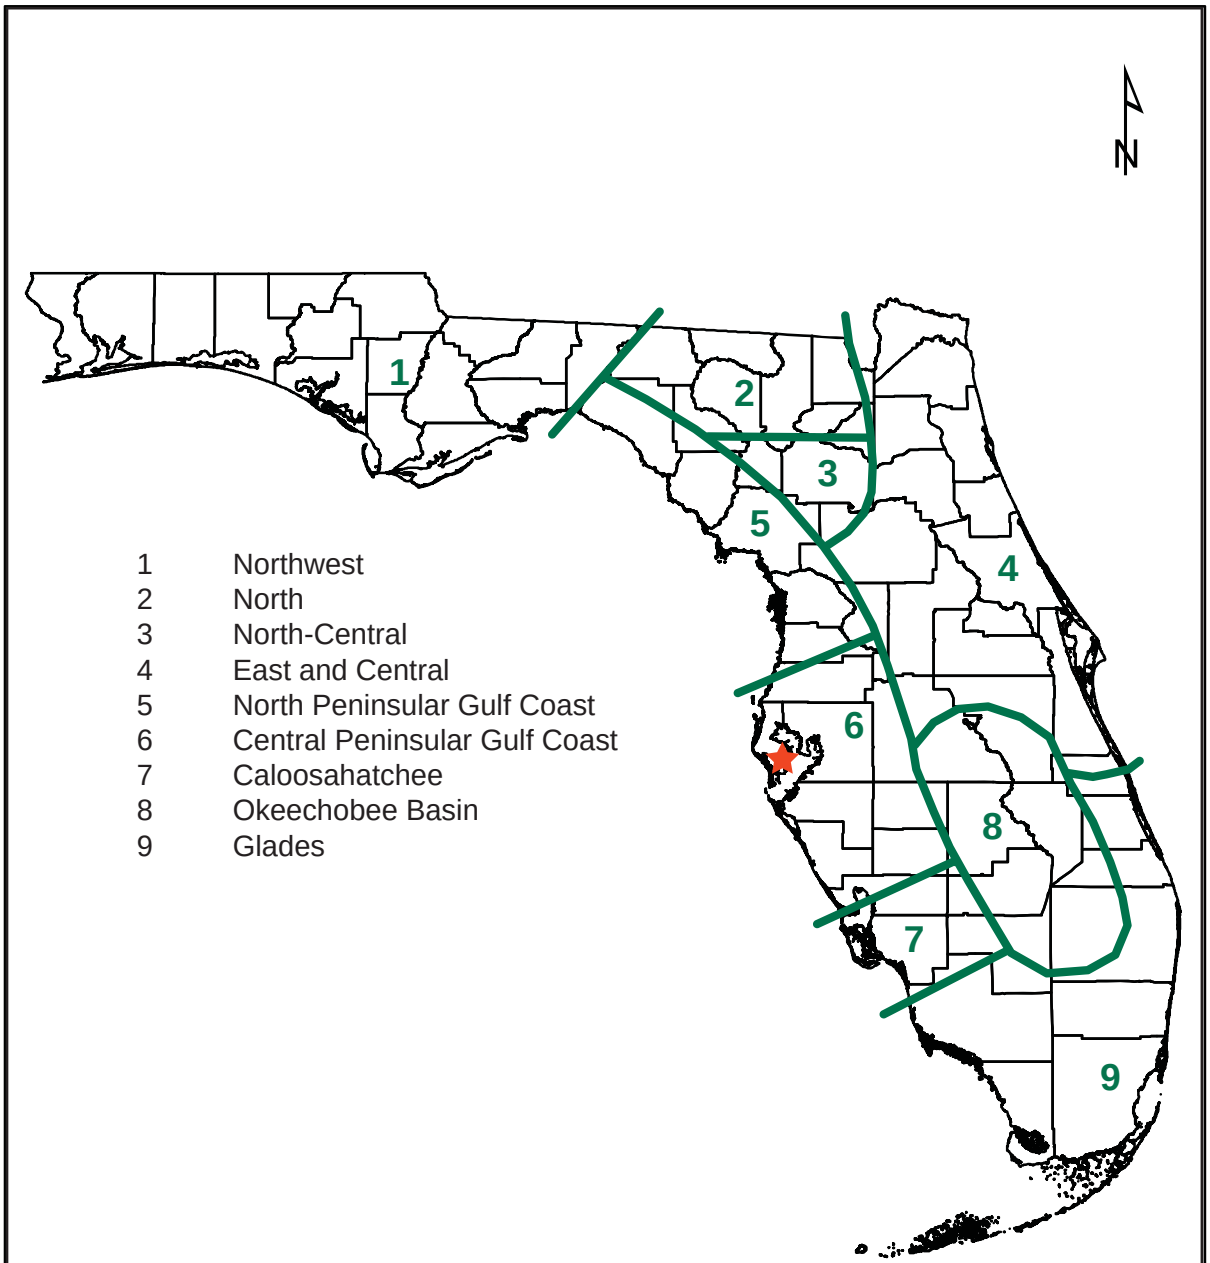
A discussion of the regional culture history is included to provide a framework within which to examine the local archaeological and historical record. Archaeological and historic sites are not individual entities, but were once part of dynamic cultural systems. As a result, individual sites cannot be adequately examined or interpreted without reference to other sites and resources in the general area. The culture history of an area (i.e., the archaeological region) outlines the sequence of archaeological and historical cultures through time. These are defined largely in geographical terms, but also reflect shared environmental and cultural traits. The I-275 PD&E Study corridor is located in the Central Peninsular Gulf Coast archaeological region (Milanich 1994; Milanich and Fairbanks 1980), which extends from just north of Tampa Bay southward to the northern portion of Charlotte Harbor (**Figure 3-1**). Within this zone, the Paleo-Indian, Archaic, Formative, and Mississippian stages have been defined based on unique sets of material culture traits such as stone tools and ceramics as well as subsistence, settlement, and burial patterns.

The local history of the region is divided into four broad periods based initially upon the major governmental powers. The first period, Colonialism, occurred during the exploration and control of Florida by the Spanish and British from around 1513 until 1821. At that time, Florida became a territory of the U.S. and 21 years later became a State (Territorial and Statehood). The Civil War and Aftermath (1861-1899) period deals with the Civil War, the period of Reconstruction following the war, and the late 1800s, when the transportation systems were dramatically increased and development throughout the state expanded. The Twentieth Century period includes subperiods defined by important historic events such as the World Wars, the Boom of the 1920s, and the Depression. Each of these periods evidenced differential development and utilization of the region, thus effecting the historic site distribution.

3.1 Paleo-Indian

The Paleo-Indian stage is the earliest known cultural manifestation in Florida, dating from roughly 12,000 to 7500 BCE [Before Common Era] (Milanich 1994). Archaeological evidence for Paleo-Indians consists primarily of scattered finds of diagnostic lanceolate-shaped projectile points. The Florida peninsula at this time was quite different than today. In general, the climate was cooler and drier with vegetation typified by xerophytic species with scrub oak, pine, open grassy prairies, and savannas (Milanich 1994:40). When human populations were arriving in Florida, the sea levels were still as much as 130-200 ft (40 to 60 m) below present levels and coastal regions of Florida extended miles beyond present-day shorelines (Faught 2004). Thus, many sites have been inundated (cf., Faught and Donoghue 1997).

The Paleo-Indian period has been sub-divided into three horizons based upon characteristic stone tool forms (Austin 2001). Traditionally, it is believed that the Clovis Horizon (10,500-9000 BCE) represents the initial occupation of Florida and is defined based upon the presence of the fluted Clovis points. These are more common in north Florida. Research suggests that Suwannee and Simpson points may be contemporary with or predate Clovis (Dunbar 2006a; Stanford 1991). The Suwannee Horizon (9000-8500 BCE) is the best known of the three Paleo-Indian horizons. The lanceolate-shaped, unfluted Simpson and Suwannee projectile points are diagnostic of this time



I-275 PD&E Study
From South of 54th Avenue
South to North of
4th Street North
WPI Seg. No.: 424501-1

Figure 3-1. Florida Archaeological Regions. The project area (★) is within the Central Peninsular Gulf Coast Region.

(Bullen 1975; Daniel and Wisenbaker 1987; Purdy 1981). The Suwannee tool kit includes a variety of scrapers, adzes, spokeshaves, unifacially retouched flakes, and blade-like flakes as well as bone and ivory foreshafts, pins, awls, daggers, anvils, and abraders (Austin 2001:23).

Following the Suwannee Horizon is the Late Paleo-Indian Horizon (8500-8000 BCE). The smaller Tallahassee, Santa Fe, and Beaver Lake projectile points have traditionally been attributed to this horizon (Milanich 1994). However, many of these points have been recovered stratigraphically from late Archaic and early Woodland period components and thus, may not date to this period at all (Austin 2001; Farr 2006). Florida notched or pseudo-notched points, including the Union, Greenbriar, and Hardaway-like points may represent late Paleo-Indian types, but these types have not been recovered from datable contexts and their temporal placement remains uncertain (Dunbar 2006a:410).

Archaeologists hypothesize that Paleo-Indians lived in migratory bands and subsisted by gathering and hunting, including the now-extinct Pleistocene megafauna. It is likely that these nomadic hunters traveled between permanent and semi-permanent sources of water, such as artesian springs, exploiting the available resources. These watering holes would have attracted the animals, thus providing food and drink. In addition to being tethered to water sources, most of the Paleo-Indian sites are close to good quality lithic resources. The settlement pattern consisted of the establishment of semi-permanent habitation areas and the movement of the resources from their sources of procurement to the residential locale by specialized task groups (Austin 2001:25).

Although the Paleo-Indian period is generally considered to have been cooler and drier, there were major variations in the inland water tables resulting from large-scale environmental fluctuations. There have been two major theories as to why most Paleo-Indian materials have been recovered from inundated sites. The Oasis theory posits that due to low water tables and scarcity of potable water, the Paleo-Indians and their associated games resources clustered around the few available water holes that were associated with sinkholes (Neill 1964). Whereas, others postulated that the Paleo-Indians gathered around river-crossings to ambush the large Pleistocene animals as they crossed the rivers (Waller 1970). This implies periods of elevated water levels. Based on the research along the Aucilla and Wacissa Rivers, it appears that both theories are correct, depending upon what the local environmental conditions were at that time (Dunbar 2006b). During the wetter periods, populations became more dispersed because the water resources were abundant and the animals they relied on could roam over a wider range.

Some of the information about this period has been derived from the underwater excavations at two inland spring sites in Sarasota County: Little Salt Spring and Warm Mineral Springs (Clausen et al. 1979). Excavation at the Harney Flats Site in Hillsborough County has provided a rich body of data concerning Paleo-Indian life ways. Analysis indicates that this site was used as a quarry-related base camp with special use activity areas (Daniel and Wisenbaker 1987). It has been suggested that Paleo-Indian settlement may not have been related as much to seasonal changes as generally postulated for the succeeding Archaic period, but instead movement was perhaps related to the scheduling of tool-kit replacement, social needs, and the availability of water, among other factors (Daniel and Wisenbaker 1987:175). Investigations along the Aucilla and Wacissa Rivers, as well as other sites within the north Florida rivers, have provided important information on the Paleo-Indian period and how the aboriginals adapted to their environmental setting (Webb 2006). Studies of the Pleistocene faunal remains from these sites clearly demonstrate the importance of these animals not for food alone, but as the raw material for their bone tool industry (Dunbar and Webb 1996).

3.2 Archaic

Climatic changes occurred, resulting in the disappearance of the Pleistocene megafauna and the demise of the Paleo-Indian culture. The disappearance of the mammoths and mastodons resulted in a reduction of open grazing lands, and thus, the subsequent disappearance of grazers such as horse, bison, and camels. With the reduction of open habitat, the herd animals were replaced by the more solitary, woodland browser: the white-tailed deer (Dunbar 2006a:426). The intertwined data of megafauna' extinction and cultural change suggests a rapid and significant disruption in both faunal and floral assemblages. The Bolen people represent the first culture adapted to the Holocene environment (Carter and Dunbar 2006). This included a more specialized toolkit and the introduction of chipped-stone woodworking implements.

Due to a lack of excavated collections and the poor preservation of bone and other organic materials in the upland sites, our knowledge of the Early Archaic artifact assemblage is limited (Carter and Dunbar 2006; Milanich 1994). Discoveries at the Page-Ladson, Little Salt Spring, and Windover sites indicate that bone and wood tools were used (Clausen et al. 1979; Doran 2002; Webb 2006). The archaeological record suggests a diffuse, yet well-scheduled, pattern of exploiting both coastal and interior resources. Because water sources were much more numerous and larger than previously, the Early Archaic peoples could sustain larger populations, occupy sites for longer periods, and perform activities requiring longer occupations at a specific locale (Milanich 1994:67).

Marked environmental changes, which occurred some 6500 years ago, had a profound influence upon human settlement and subsistence practices. Among the landscape alterations were rises in sea and water table levels that resulted in the creation of more available surface water. In addition to changed hydrological conditions, this period is characterized by the spread of mesic forests and the beginnings of modern vegetation communities including pine forests and cypress swamps. Humans adapted to this changing environment and regional and local differences are reflected in the archaeological record (Russo 1994a, 1994b; Sassaman 2008).

The Middle Archaic archaeological record is better understood than the Early Archaic. The material culture inventory included several stemmed, broad blade projectile point types including the Newnan, Levy, Marion, and Putnam types (Bullen 1975). Population growth, as evidenced by the increased number of Middle Archaic sites and accompanied by increased socio-cultural complexity, is assumed for this time (Milanich and Fairbanks 1980). Site types included large base camps, smaller special-use campsites, quarries, and burial areas. The most common sites are the smaller campsites, which were most likely used for hunting or served as special-use extractive sites for such activities as gathering nuts or other botanical materials. At quarry sites, aboriginal populations mined stone for their tools. They usually roughly shaped the stone prior to transporting it to another locale for finishing. Base camps are identified by their larger artifact assemblages and wider variety of tools.

During the Late Archaic period, population increased and became more sedentary. The broad-bladed, stemmed projectile styles of the Middle Archaic continued to be made with the addition of Culbreath, Lafayette, Clay, and Westo point types (Bullen 1975). A greater reliance on marine resources is indicated in coastal areas. Subsistence strategies and technologies reflect the beginnings of an adaptation to these resources. Around 4000 years ago, evidence of fired clay pottery appears in Florida. The first ceramic types, tempered with fibers (Spanish moss or palmetto), are referred to as the Orange series. Initially, it was thought that they lacked decoration until about 1700 BCE, when they were decorated with geometric designs and punctations. Research has called

this ceramic chronology into question; AMS dates from a series of incised Orange sherds from the middle St. Johns River Valley have produced dates contemporaneous with the plain varieties (Sassaman 2003).

Milanich (1994:86-87) suggests that while there may be little difference between Middle and Late Archaic populations, there are more Late Archaic sites and they were primarily located near wetlands. The abundant wetland resources allowed larger settlements to be maintained. It is likely that the change in settlement patterns was related to the environmental changes. By the end of the Middle Archaic, the climate closely resembled that of today; vegetation changed from those species that preferred moist conditions to pines and mixed forests (Watts and Hansen 1988). Sea levels rose, inundating many sites located along the shoreline. The adaptation to this environment allowed for a wider variety of resources to be exploited and a wider variation in settlement patterns. No longer were the scarce waterholes dictating the location of sites. Shellfish, fish, and other food sources were now available from coastal and freshwater wetlands resulting in an increased population size.

The Late Archaic Transitional stage refers to that portion of the ceramic Archaic when sand was mixed with the fibers as a tempering agent. The same settlement and subsistence patterns were being followed. During this period, there was a diffusion of cultural traits because of the movement of small groups (Bullen 1959, 1965), which resulted in the appearance of several different ceramic and lithic tool traditions, and the beginning of cultural regionalism.

3.3 Formative

The Formative stage is comprised of the Manasota and Weeden Island-related cultures (ca. 500 BCE to 800 CE [Common Era]). Settlement patterns consisted of permanent villages located along the coast with seasonal forays into the interior to hunt, gather, and collect those resources unavailable along the coast. Most Manasota sites are shell middens found on or near the shore where aboriginal villagers had easiest access to fish and shellfish (Milanich 1994). The subsistence economy focused on the coastal exploitation of maritime resources, supplemented by the hunting and gathering of inland resources (Luer and Almy 1982). Investigations at the Shaw's Point, Fort Brooke Midden, Yat Kitischee, and Myakkahatchee sites have provided a wealth of information on site formation, subsistence economies, and technology and their changes over time (Austin 1995; Austin et al. 1992; Luer et al. 1987; Schwadron 2002). The major villages were located along the shore with smaller sites being located up to 19-29 km (12-18 mi) inland. These inland sites, which probably served as seasonal villages or special-use campsites, were often located in the pine flatwoods on elevated lands proximate to a source of freshwater where a variety of resources could be exploited (Austin and Russo 1989; Luer and Almy 1982). Hardin and Piper (1984) suggest that some of the larger inland sites may actually be permanent or semi-permanent settlements as opposed to seasonal campsites.

Manasota is characterized by a wide range of material cultural traits such as a well-developed shell and bone tool technology, sand tempered plain ceramics, and burials within shell middens (Luer and Almy 1982). Much of the shell and bone technology evolved out of the preceding Archaic period. Through time, the burial patterns became more elaborate, with burials being placed within sand burial mounds located near the villages and middens. The early burial patterns consisted of primary flexed burials in the shell middens, while later sites contained secondary burials within sand mounds.

Temporal placement within the Manasota period can be determined based upon diagnostic ceramic rim and vessel forms (Luer and Almy 1982). The early forms (ca. 500 BCE to 400 CE) are flattened globular bowls with incurving rims and chamfered lips. Pot forms with rounded lips and inward curving rims were utilized from about 200 BCE until 700 CE. Deeper pot forms with straight sides and rounded lips were developed around 400 CE and continued into the Safety Harbor period. Simple bowls with outward curving rims and flattened lips were used from the end of the Late Weeden Island period (ca. 800 CE) into the Safety Harbor period. Vessel wall thickness decreased over time.

The lithic assemblage of the Manasota culture was scarce along the coast especially in the more southern portions of the region where stone suitable for tool manufacture was absent. Projectile point types associated with the Manasota period include the Sarasota, Hernando, and Westo varieties (Luer and Almy 1982).

Influences from the Weeden Island “heartland,” located in north-central Florida, probably resulted in the changes in burial practices. These influences can also be seen in the increased variety of ceremonial ceramic types through time. The secular, sand tempered ware continued to be the dominant ceramic type. Manasota evolved into what is referred to as a Weeden Island-related culture. The subsistence and settlement patterns remained consistent. Hunting and gathering of the inland and coastal resources continued. Evidence of a widespread trade network is seen by the ceramic types and other exotic artifacts present within the burial mounds.

Ceremonialism and its expressions, such as the construction of complex burial mounds containing exotic and elaborate grave offerings, reached their greatest development during this period. Similarly, the subsistence economy, divided between maritime and terrestrial animals and perhaps horticultural products, represents the maximum effective adjustment to the environment. Many Weeden Island-related sites consist of villages with associated mounds, as well as ceremonial/burial mound sites. The artifact assemblage is distinguished by the presence of Weeden Island ceramic types. These are among some of the finest ceramics in the Southeast; they are often thin, well-fired, burnished, and decorated with incising, punctation, complicated stamping, and animal effigies (Milanich 1994:211). Coastal sites are marked by the presence of shell middens, indicating a continued pattern of exploitation of marine and estuarine resources. Interaction between the inland farmer-gatherers and coastal hunter-gatherers may have developed into mutually beneficial exchange systems (Kohler 1991:98). This could account for the presence of non-locally made ceramics at some of the Weeden Island-related period sites. There is no definitive evidence for horticulture in the coastal area (Milanich 1994:215).

3.4 Mississippian

The final aboriginal cultural manifestation in the Central Peninsular Gulf Coast region is Safety Harbor, named for the type-site in Pinellas County. The presence of datable European artifacts (largely Spanish) in sites, along with radiocarbon dates from early Safety Harbor contexts associated with Englewood ceramics, provide the basis for dividing the Safety Harbor period into two pre-Columbian phases: Englewood (900-1000 CE) and Pinellas (1000-1500 CE) and two colonial period phases: Tatham (1500-1567 CE) and Bayview (1567-1725 CE) (Mitchem 1989). The Safety Harbor variant in Hillsborough, northern Manatee, Pinellas, and southern Pasco counties is identified as the Circum-Tampa Bay regional variant.

Although inland sites do occur, the Safety Harbor culture was primarily a coastal phenomenon (Mitchem 1989, 2012). Large coastal towns or villages often had a temple mound, plaza, midden, and a burial mound associated with them. Although some maize agriculture may have been practiced by the Safety Harbor peoples, the coastal environment was not suitable for intensive maize agriculture (Luer and Almy 1981; Mitchem 2012). Away from the coastal plain, a more dispersed pattern of smaller settlements was evident and the burial mounds appear to have been located away from the habitation areas (Mitchem 1988, 1989).

Influences from the north led to the incorporation of some Mississippian traits by the late Manasota peoples, which became the Safety Harbor culture. Most Safety Harbor components are located on top of the earlier Manasota deposits and there is evidence of significant continuity from Manasota into Safety Harbor. However, in some areas, Manasota continued later than previously thought, while in other areas Englewood did not appear to have occurred at all (Austin et al. 2008). The lack of the diagnostic Englewood ceramics at many sites may indicate that the Englewood phase was skipped in the developmental sequence from Manasota to Safety Harbor (Mitchem 2012).

The primary difference between Manasota and Safety Harbor is the ceramic assemblage. The utilitarian ceramics include the Pasco (limestone tempered), Pinellas (laminated paste), and sand tempered plain varieties. The decorated ceramics, primarily recovered from burial mounds, include Englewood Incised, Sarasota Incised, Lemon Bay Incised, St. Johns Check Stamped, Safety Harbor, Incised, and Pinellas Incised (Willey 1949). The adoption of Mississippian traits such as jar and bottle forms, and the guilloche or loop design, are indicative of this period. However, unlike most Mississippi period ceramics, the use of mussel shell as the aplastic is not present (Mitchem 2012).

Trade between the Safety Harbor people and other Southeastern Mississippian cultures took place. It is likely that marine whelks and conchs were traded with groups in the Southeast and Midwest. In turn, items such as copper and ground-stone artifacts made their way south. Based on Spanish accounts, the Safety Harbor culture had evolved into a chiefdom form of government, albeit minus the maize agriculture of other Mississippian period groups in the Southeast. This lack of agriculture was likely due to the extremely successful adaptation to the local environment and the lack of suitable soils for the production of maize. Mitchem notes that although contact with Mississippian people may have led to political and religious changes, there was not a compelling reason to change their lifestyle completely (Mitchem 2012:185).

3.5 Colonialism

The Timucuan Indians are the historic counterparts of the Safety Harbor people. In the Tampa Bay area they are referred to as the Tocobaga, extending from roughly Tarpon Springs southward to the Sarasota area (Bullen 1978). The Tocobaga consisted of a number of small chiefdoms whose leaders frequently waged war against each other. The most powerful chiefdom was Tocobaga, located at the head of Old Tampa Bay at the Safety Harbor site; other major chiefdoms included the Mocoço (at the mouth of the Alafia River) and Ucita (at the mouth of the Little Manatee River) (Hann 2003).

The cultural traditions of the native Floridians ended with the advent of European expeditions to the New World. The initial events, authorized by the Spanish Crown in the 1500s, ushered in devastating European contact. After Ponce de Leon's landing near St. Augustine in 1513, Spanish explorations were confined to the west coast of Florida; Narvaéz is thought to have made shore in 1528 in St. Petersburg and de Soto's 1539 landing is commemorated at De Soto Point on the south

bank of the Manatee River. The Spaniards briefly established a fort and garrison at Tocobaga in the 1560s. In 1568, the Tocobaga killed all of the soldiers and when a Spanish supply ship arrived, the Tocobaga left and the Spanish burned the village (Hann 2003).

The area that now constitutes the State of Florida was ceded to England in 1763 after two centuries of Spanish possession. England governed Florida until 1783 when the Treaty of Paris returned Florida to Spain; however, Spanish influence was nominal during this second period of ownership. Prior to the American colonial settlement of Florida, portions of the Muskogean Creek, Yamassee and Oconee Native American populations moved into Florida and repopulated the demographic vacuum created by the decimation of the original aboriginal inhabitants. These Native American groups became known to English speakers as Seminoles. They had an agriculturally based society, focusing upon cultivation of crops and the raising of horses and cattle. The material culture of the Seminoles remained similar to the Creeks, the dominant aboriginal pottery type being Chattahoochee Brushed. European trade goods, especially British, were common. Their settlement pattern included large villages located near rich agricultural fields and grazing lands.

Their early history can be divided into two basic periods: *colonization* (1716-1767) when the initial movement of Creek towns into Florida occurred, and *enterprise* (1767-1821) which was an era of prosperity under the British and Spanish rule prior to the American presence (Mahon and Weisman 1996). The Seminoles formed at various times loose confederacies for mutual protection against the new American Nation to the north (Tebeau 1980:72). The Seminoles crossed back and forth into Georgia and Alabama conducting raids and welcoming escaped slaves. This resulted in General Andrew Jackson's invasion of Florida in 1818, which became known as the First Seminole War.

3.6 Territorial and Statehood

Florida became a United States territory in 1821 due to the war and the Adams-Onis Treaty of 1819. Settlement was slow and scattered at that time. Andrew Jackson, named provisional governor, divided the territory into St. Johns and Escambia Counties. At that time, St. Johns County encompassed all of Florida lying east of the Suwannee River, and Escambia County included the land lying to the west. In the first territorial census in 1825, 317 persons reportedly lived in South Florida; by 1830 that number had risen to 517 (Tebeau 1980:134).

Even though the First Seminole War was fought in north Florida, the Treaty of Moultrie Creek in 1823, at the end of the war, was to affect the settlement of all of south Florida. The Seminoles relinquished their claim to the whole peninsula in return for an approximately four million acre reservation south of Ocala and north of Charlotte Harbor (Covington 1958; Mahon 1985:50). The treaty satisfied neither the Indians nor the settlers. The inadequacy of the reservation, the desperate situation of the Seminoles, and the mounting demand of the settlers for their removal, produced another conflict.

In 1823, Gadsden County was created from St. John's County, and the following year Mosquito County was created out of Gadsden. This new county included all of the Tampa Bay area and reached south to Charlotte Harbor (HT/HCPB 1980:7). In 1824, Cantonment (later Fort) Brooke was established on the south side of the mouth of the Hillsborough River in what is now downtown Tampa by Colonel George Mercer Brooke. The fort also served as a haven for settlers who left their farms to seek protection from the Seminoles. Small Army garrisons were maintained on Mullet Key and on Egmont Key during the Second Seminole War.

By the early 1830s, governmental policy shifted in terms of relocating the Seminoles to lands west of the Mississippi River. Outrage at this policy of forced relocation resulted in the Second Seminole War (1835-1842). Although most of the fighting occurred around the Kissimmee River and Everglades regions, sporadic outbreaks of violence erupted throughout central and south Florida. In 1837, Fort Brooke was designated the headquarters for the Army of the South and the main garrison for the Seminole wars. The fort also served as a haven for settlers who left their farms to seek protection from the Seminoles. Small Army garrisons were maintained on Mullet Key and on Egmont Key during the Second Seminole War.

Near Clearwater, the army established Fort Harrison in April 1841 to serve as a recuperation center for sick and wounded soldiers from the Sixth Infantry; it was abandoned in November that same year. In 1842, the federal government ended the conflict by withdrawing troops from Florida (Dunn 1973). Some of the battle-weary Seminoles were persuaded to migrate west where the federal government had set aside land for the Native Americans. However, those who wished to remain were allowed to do so, but were pushed further south into the Everglades and Big Cypress Swamp. This area became the last stronghold for the Seminoles (Tebeau 1980). The surveys, military trails, and forts resulting from the war provided invaluable assistance in the settlement of Florida.

Encouraged by the passage of the Armed Occupation Act in 1842, which was designed to promote settlement and protect the Florida frontier, pioneer families moved south through Florida. The Act made available 200,000 acres outside the already developed regions south of Gainesville to the Peace River, barring coastal lands and those within a two-mile radius of a fort. The Armed Occupation Act stipulated that any family or single man over 18 years of age able to bear arms could earn title to 160 acres by erecting a habitable dwelling, cultivating at least five acres of land, and living on it for five years. During the nine-month period the law was in effect, 1184 permits were issued totaling some 189,440 acres (Covington 1961a:48). Twenty-four individuals filed claims under this act in the territory that would become Pinellas County (Dunn 1973:15).

At this time, today's Pinellas County fell under the jurisdiction of Hillsborough County, which had been established in 1834. The Pinellas peninsula was then known as West Hillsborough. In 1845, the Union admitted the State of Florida with Tallahassee as the capital, and by 1850, the population on the Pinellas peninsula numbered 178 individuals from 35 families (Dunn 1973:22). Most of the settlement concentrated around the top of Old Tampa Bay near the homestead of Dr. Odet Philippe, who established a plantation known as Saint Helena. Philippe, a titled Frenchman who served as a surgeon under Napoleon, is also credited with introducing the technique of planting citrus in rows (Sanders 1983:12; Straub 1929:33).

The three townships within which the current I-275 project corridor is located were originally surveyed by federal surveyor George Watson, Jr. in 1848. The plats for Townships 30 and 31 South, Range 16 East show no man-made features. The homestead of Maximo Hernandez is illustrated at the waterfront in Section 10 of Township 32 South, Range 16 East, to the west of the today's project corridor. The tract book records indicate that hernandez' widow purchased the eastern half of the northeast quarter of Section 10 on August 2, 1852 (State of Florida n.d.). (This property was later conveyed to the Florida Land and Improvement Company, the largest owner of land in the area.) No military trails, roads, Indian camps, or homesteads other than the Hernandez grant are illustrated in the three plats (State of Florida 1848a, 1848b, 1848c).

In December of 1855, the Third Seminole War, also known as the Billy Bowlegs War, started due to pressure placed on the Indians remaining in Florida to migrate west. The war originated in what is now Collier County when Seminole Chief Billy Bowlegs and 30 warriors attacked an army camp killing four soldiers and wounding four others. The attack was in retaliation for damage done by several artillerymen to property belonging to Bowlegs. This hostile action renewed state and federal interest in the final elimination of the Seminoles from Florida (Covington 1982). Military action was not decisive in the Third Seminole War; therefore, in 1858, the U.S. Government resorted to monetary persuasion to induce the remaining Seminoles to migrate west. Chief Billy Bowlegs accepted $5,000 for himself and $2,500 for his lost cattle, each warrior received $500, and $100 was given to each woman and child. On May 4, 1858, the ship *Grey Cloud* set sail from Fort Myers with 123 Seminoles; stopping at Egmont Key, 41 captives and a Seminole woman guide were added to the group. On May 8, 1858, the Third Seminole War was declared over (Covington 1982).

Clear Water Harbor (now Clearwater) was the first community established on the Pinellas peninsula. Prior to the establishment of a post office in the area in August 1859, mail arrived either by foot from Tampa or by steamer from Cedar Keys once a week (Bradbury and Hallock 1962:17). Supplies also arrived from Cedar Keys, where Florida's first railroad ended from Fernandina, on the east coast (Sanders 1983). Before the Civil War, approximately 52 deeds were issued for lands on the Pinellas peninsula (Dunn 1973:15; Sanders 1983:12). At the time, the peninsula contained 381 people from 82 families. Twenty-two houses were vacant at the time the census was taken (Dunn 1973:22). The first orange grove was planted in the 1840s by Samuel Stevenson, but most of the trees were destroyed during the "Gale of '48." If taken to market at all, citrus was shipped by boat to Cedar Keys to be shipped north. Citrus did not develop into a major industry until the railroad arrived, which could transport fruit to market quickly and economically. Prior to the railroad, Sea Island cotton, fishing, and cattle, which brought high returns on the Cuban market, remained the primary industries. Most pioneers managed small, self-sufficient farms with perhaps enough surplus produce to send to market (Sanders 1983:13; Woman's Club 1917).

3.7 Civil War and Aftermath

In 1861, Florida followed South Carolina's lead and seceded from the Union in a prelude to the American Civil War. Florida had much at stake in this war as evidenced in a report released from Tallahassee in June of 1861. It listed the value of land in Florida as $35,127,721 and the value of the slaves at $29,024,513 (Dunn 1989:59). Even though the coast of Florida experienced a naval blockade during the war, the interior of the state saw very little military action (Robinson 1928:43). Many male residents abandoned their farms and settlements to join the Union army at one of the coastal areas retained by the United States government or joined the Confederate cow cavalry. The cow cavalry provided one of the major contributions of the state to the Confederate war effort by supplying and protecting the transportation of beef to the government (Akerman 1976). Salt works along the Gulf Coast also functioned as a major contributor to the efforts of the Confederacy (Lonn 1965). During the war, Union gunboats raided Clearwater, taking provisions and supplies from area residents. James McMullen organized the Confederate Home Guards in 1861 and served as its captain. The company disbanded within a few months, with the men joining other companies (Woman's Club 1917). The war lasted until 1865.

Immediately following the war, the South underwent a period of "Reconstruction" to prepare the Confederate states for readmission to the Union. The program was administered by the U.S. Congress, and on July 25, 1868, Florida officially returned to the Union (Tebeau 1980:251). Civilian

activity slowly resumed a normal pace after recovery from wartime depression, and the population continued to expand. The 1866 Homestead Act was passed to encourage settlement. The Act allowed freedmen and loyal United States citizens to receive 80-acre tracts in Florida and the other four public land states of the South. Former Confederates were not eligible to receive homesteads under the Act until 1876 when the lands were open to unrestricted sale (Tebeau 1980:266, 294). The Homestead Act encouraged growth and settlement throughout the Reconstruction era. Between 1860 and 1870, the population of the Pinellas peninsula had doubled from 164 families to 781 individuals (Dunn 1973:22). The southern portion of the peninsula was slow to develop. The 1880 U.S. Census shows a population of 160 people divided into 39 families in Township 31 South, Ranges 16 and 17 East (Piper Archaeological Research and ACI 1978:28-29). The fertile land north of Lake Maggiore (then called Salt Lake) was first settled by farmers (Grismer 1948). Among the early settlers in this area were John A. Bethell, who purchased 40 acres in 1862 for 75 cents per acre; Bethel's property was in Sections 34 and 36 of Township 31 South, Range 16 East (State of Florida n.d.). Bethell and Alex and Vincent Leonardy began farming in this area in 1867. Another early settler was Louis Bell, who arrived in 1868. John Donaldson, the first African-American to settle in the lower Pinellas peninsula, bought 40 acres in Section 26 of Township 31 South, Range 16 East in 1882 (Bethell 1914:20; Wells 1968; and Fuller 1972:88-90 in Piper Archaeological Research and ACI 1978:28). Most of the land within the sections that comprise the study area were deeded to individuals or corporations in the late 1870s and early 1880s (State of Florida n.d.). All sections were originally purchased, at least in part, by Hamilton Disston's Florida Land and Improvement Company on January 5, 1883.

The State of Florida faced a financial crisis involving title to public lands in the early 1880s. By Act of Congress in 1850, the federal government turned over to the states for drainage and reclamation all "swamp and overflow land." Florida received approximately ten million acres. To manage that land and the five million acres the state had received on entering the Union, the Florida legislature created the Board of Trustees of the Internal Improvement Fund in 1851. In 1855, the legislature set up the trust fund in which state lands were to be held. The Fund became mired in debt after the Civil War, and under state law, no land could be sold until the debt was cleared. In 1881, the Trustees started searching for someone to buy enough state land to pay off the Fund's debt to permit sale of the remaining millions of acres that it controlled.

By 1881, Hamilton Disston, a member of a prominent Pennsylvania saw manufacturing family and friend of then Governor William Bloxham, had entered into agreement with the State to purchase four million acres of swamp and overflowed land for one million dollars. In exchange for this, he promised to drain and improve the land. Disston's land holding company was the Florida Land and Improvement Company. He and his associates also formed the Atlantic and Gulf Coast Canal and Okeechobee Land Company in 1881 as part of the drainage contract established with the State (Davis 1939:205). This contract provided one-half of the acreage that they could drain, reclaim, and make fit for cultivation south of Orlando and east of the Peace River. The Disston Purchase enabled the distribution of large land subsidies to railroad companies, inducing them to begin extensive construction. Disston and the railroad companies in turn sold smaller parcels of land to developers and private investors (Tebeau and Carson 1965:252). Disston's Florida Land and Improvement Company purchased an estimated 150,000 acres in Pinellas County (Grismer 1948:48), including land in today's I-275 corridor study area. The majority of Disston's purchases became the center of Disston City, now Gulfport.

By 1880, the Pinellas peninsula boasted 1,111 people and 240 houses (Dunn 1973:22). The largest concentration of people living on the Pinellas peninsula resided in the Clearwater area. After the Civil War, Southerners sought new homes to escape the unrest in the neighboring ex-Confederate states. In addition, the war brought prosperity to a large number of Northerners who sought vacation homes in warmer climates (Shofner 1995:83). The beginning of the local tourism industry can be dated to April 1885; Dr. W.C. Van Bibber of Baltimore praised the Pinellas peninsula as the healthiest spot on earth at the American Medical Society Convention. His report from New Orleans prompted a flood of tourists and emigrants advised by their doctors to settle in Florida (PCPD 1995:22).

Frank Allen Davis moved to Florida after hearing of Van Bibber's health claims of the Pinellas peninsula. After an apparent miraculous recovery during the winter of 1888 and 1889, Davis was one of the many entrepreneurs who purchased lands from Disston. He had a significant impact in the area by establishing the St. Petersburg Electric and Utilities Company, which furnished the community with electricity, a trolley, a telephone company, a freight ferry, and an "Electric Pier" (Everett 1994).

Improvements in transportation systems played a major role in establishing cities in Florida and fostering growth. The railroad era saw increased tourism as well as a growing permanent population (Pettengill 1952). The Orange Belt Railroad Company, organized by Peter A. Demens, was the first railroad to service the Pinellas peninsula. Demens constructed a narrow gauge railway line from Sanford to St. Petersburg, a town he named after his native city of St. Petersburg, Russia. The Orange Belt arrived on the Pinellas peninsula in 1888; its construction helped spur development in the area, and St. Petersburg became a population, shipping and trading center for the lower Pinellas peninsula.

At the same time as the construction of the Orange Belt, Henry Bradley Plant, a prominent railroad operator in Georgia and South Carolina, wanted to expand his railway lines into Florida, a place he considered the only isolated area remaining in the south. In 1883, he purchased a charter from Alfred M. Parslow to build a railroad from Kissimmee to Tampa. Because the charter had only a seven-month life remaining, Plant constructed the railroad from both ends to meet in the middle. With this segment complete, there was a cross-state railroad connecting Tampa with Sanford and Jacksonville to the north (Bruton and Bailey 1984:72). The Plant System acquired the Orange Belt Railway in 1895 due its many financial difficulties. Thereafter, the Orange Belt operated under the names of the Sanford & St. Petersburg Railroad and the Florida Central & Peninsular Railroad. In 1902, it became the Atlantic Coast Line, which served the area until it merged with the Seaboard Air Line in 1967, becoming the Seaboard Coast Line (Covington 1957:182; Horgan et al. 1992:129, 156-157).

During the winter of 1894-95, the "Great Freeze" devastated ninety percent of Florida's emerging citrus industry. In the year prior to the freeze, groves produced 5,550,367 boxes of fruit; in the year after, only 150,000 boxes were picked (Hatton 1987:29). After the freeze, some growers, whose crops were destroyed, turned to truck farming tobacco, cotton, and strawberries, which were faster crops to grow.

3.8 Twentieth Century

During the first two decades of the new century, the Pinellas peninsula witnessed the introduction of electricity, telephone service, modern utilities, and automobile transportation. It was not until the early 1900s that the Pinellas County beaches became a focal point for development (PCPD 1995:9).

Prior to this time, inaccessibility was the main reason for the slow pace of development. In 1910, Congress appropriated $29,000 to dredge Clearwater and Boca Ciega Bays to Tampa Bay. This project was completed in 1915, providing a five-foot channel at low tide from the Cleveland Street dock to Tampa Bay (Dunn 1973).

After a long battle, the Florida Legislature approved the separation of Pinellas County from Hillsborough County on May 23, 1911. The division was prompted by the need for roads on the Pinellas peninsula and the refusal of the Hillsborough County government to provide them (PCPD 1995:28). In 1912, the county approved a bond issue for hard-surfaced roads, and again, four years later for brick roads. A second railroad, the Tampa and Gulf Coast, was added to the peninsula's transportation system in 1914, connecting Clearwater, Largo, and St. Petersburg with Tampa (PCPD 1995:28; Sanders 1983:49). This line eventually became part of the Seaboard Coastline Railroad. In 1917, construction of a two-mile bridge from Clearwater to Clearwater Beach provided the first automobile access to this barrier island (PCPD 1995:35). In the next decade, this wooden bridge was replaced by a "million dollar causeway" (PCPD 1995:47).

The great Florida land boom of the 1920s saw widespread development due to the mild winters, the growing number of tourists, the larger use of the automobile, the completion of roads, and the promise by the Florida Legislature never to pass state income or inheritance taxes. As part of the new growth, motels, public buildings, and subdivisions, many with a Spanish theme and Mediterranean Revival architecture, were built throughout the Pinellas peninsula. One of the most spectacular examples of development in Pinellas County was the Don Ce-Sar Hotel, constructed from September 1925 through January 1928 at a cost of approximately $1.5 million. The ten-story hotel boasted 312 rooms and 312 bathrooms with 382 feet of beach frontage (Hurley 1989:143-145).

The Kenwood neighborhood, which is within the APE. was formed in 1913 when Charles R. Hall built 10 houses along Central Avenue. Development of Kenwood increased dramatically during the 1920s when thousands of houses, many of them Craftsman style, were built in the neighborhood. In 1926, St. Petersburg High School was completed in the north-central part of Kenwood. Construction continued in Kenwood through the 1960s (Uguccioni and Stewart 2002).

The plans for a trans-Tampa Bay bridge were first envisioned by George Gandy in 1910. Gandy collaborated with H. Walter Fuller, who controlled the streetcar system in St. Petersburg, and construction of the Gandy Bridge was started in September 1922. Two years later, the Gandy Bridge opened between Tampa and St. Petersburg, shortening the trip from 43 to 19 miles (Arsenault 1988). By 1926, a network of paved highways connected Clearwater with Tampa, St. Petersburg and other cities in the County. The 9.5 mile Courtney Campbell Causeway, connecting Clearwater to Tampa, was constructed by Captain Ben T. Davis between 1927 and 1934 (Sanders 1983:83-84).

The 22nd Street South community, nicknamed the Deuces, developed in the 1920s when black residents in Jim Crow era St. Petersburg were violently pressured to move farther from downtown. They formed their own middle-class community in what was then wilderness. Many of the black newcomers who relocated to St. Petersburg during the Florida Land Boom settled in the neighborhood, and it became the center of African-American life in St. Petersburg during segregation. A number of enterprises, many owned by African-Americans, were built along 22nd Street South that included stores, restaurants, professional services, and entertainment venues, such as the Manhattan Casino (8PI819). Elder Jordan, Sr., was a notable entrepreneur in the neighborhood. In addition to building the Manhattan Casino with his son, Elder Jordan, Jr., the older Jordan started a bus line to Tampa and funded the construction of many houses in the

neighborhood. Jordan Academy, later named Jordan Park Elementary School (8PI6901), was named after him when it opened in 1925. The Jordan Park Housing Complex was also named for Jordan, Sr. The 446-unit project, completed in 1941, was funded by the U.S. Housing Authority (City of St. Petersburg 2014).

In 1926, the bottom fell out of the Florida real estate market. Massive freight car congestion from hundreds of loaded cars sitting in railroad yards caused the Florida East Coast Railway to embargo all but perishable goods in August of 1925 (Curl 1986). The embargo spread to other railroads throughout the state, and, as a result, most construction halted. The 1926 real estate economy in Florida was based upon such wild land speculations that banks could not keep track of loans or property values (Eriksen 1994). By October, rumors were rampant in northern newspapers concerning fraudulent practices in the real estate market in south Florida. Confidence in the Florida real estate market quickly diminished, investors could not sell lots, and depression hit Florida earlier than the rest of the nation. Development virtually halted for a decade. To make the situation worse, two hurricanes hit south Florida in 1926 and 1928. The hurricanes destroyed confidence in Florida as a tropical paradise and created a flood of refugees fleeing northward. The collapse of the Florida Land Boom, the 1929 stock market crash, and the onset of the Great Depression left the area in a state of stagnation.

Depression hit the citrus industry as well. In 1930, the census revealed that citrus and construction industries each employed approximately eight percent of the Pinellas County population. In that year, the Mediterranean fruit fly invaded and paralyzed the citrus industry creating quarantines and inspections, which further slowed an already sluggish industry. Tourism still played a major role in the local economy but to a lesser extent than in the 1920s. Most winter visitors were wealthy northerners who did not lose their money in the stock market crash, but who now spent their money cautiously**.**

By the mid-1930s, the New Deal programs implemented by the Franklin D. Roosevelt administration started employing large numbers of workers, helping to revive the economy of the state. The programs, aimed at pulling the nation out of the Depression, were instrumental in the construction of parks, bridges, and public buildings. The late 1930s were marked by interest in further development of the Gulf beaches. While beach development had been minimal during the 1920s, largely due to limited access, inadequate utilities (especially water), and “clouds of mosquitoes” (PCPD 1995:51), the 1930s witnessed the construction of many new facilities and the provision of new services. These improvements were aided by the federal Public Works Administration program.

The population of Pinellas County grew 120% between 1920 and 1930, and 48% from 1930 to 1940. Less than 10% of the county’s total land was developed at this time. By 1940, the increasing proportion of employment in the retail trade (22%) and service (39%) sectors indicated the County’s growing dependence on tourists and seasonal residents (PCPD 1995:52). In 1932, construction of the Bay Pines Veterans Hospital was begun (FMSF).

By 1940, recovery from the Great Depression was imminent. The incoming service personnel renewed the area’s economy. The U.S. entered World War II in 1941. Overall, the war years dramatically slowed the County’s population growth, and the tourist trade was reduced by travel restrictions and the rationing of gasoline and tires (PCPD 1995:60). However, federal roads, channel building, and airfield construction for the wartime defense effort brought numerous people into the area. In early 1942, the Army took over most of the Pass-a-Grille community, uprooting its residents in the process. Occupation by the military lasted until June of 1945 (Hurley 1989).

In the spring of 1942, the Army Air Force selected St. Petersburg as a basic training center. Trainees occupied more than 50 hotels in the St. Petersburg area. On Sundays and days off, the GIs "swarmed over the beaches" (Hurley 1989:176). Also in 1942, the Army condemned and purchased the Don Ce-Sar. The former luxury hotel was used as a hospital for the St. Petersburg basic training center. Later, in 1943, the Don Ce-Sar became a sub base hospital for Mac Dill Air Force Base. Between February 1944 and June 1945, it functioned as the Army Air Force Convalescent Hospital. Also during World War II, isolated stretches of the Gulf beaches became aircraft gunnery and bombing ranges (Hurley 1989).

The government forced the sale of the Gandy Bridge and Davis Causeway. Formerly toll facilities, the government lifted the tolls so that soldiers who trained in Tampa and resided in Pinellas County would not have to pay the tolls at each crossing (Sanders 1983:84). Among the hallmarks of the 1940s and 1950s were the improvements to the existing road systems. Initially undertaken to improve the transport of military vehicles during World War II, civilians continued to benefit from the improvements after the war ended. In Pinellas County, the last segment of the Gulf Coast Highway, which is now known as US Highway 19, opened for traffic in St. Petersburg. This provided a direct route between St. Petersburg and Tallahassee, and the areas bordering this road developed almost immediately (PCPD 1995:4).

The inexpensive automobile meant cheaper and easier vacations available to the average American. After the war, car ownership increased making the American public more mobile. Many who had served at Florida's military bases during World War II returned with their families to live. As veterans returned, the trend in new housing focused on the development of small tract homes in new subdivisions. By the late 1950s, increasing numbers of tourists and retirees made retail and the service industries the dominant employers in Pinellas County (PCPD 1995:4). During the 1950s, the population of Pinellas County increased by more than 135% (Hurley 1989:182). The last segment of the Gulf Coast Highway (now US 19) opened to traffic in St. Petersburg in July 1955, providing a direct route between Pinellas County and Tallahassee. Commercial and residential development along the route soon followed (New South Associates 2008:23).

The African-American 22nd Street South neighborhood continued to grow, and the neighborhood peaked with 111 businesses in 1960. But a number of residents moved away in the 1960s as segregation came to an end. The Manhattan Casino closed in 1968. Crime increased in the following decades (Peck and Wilson 2006).

Citrus, once the mainstay of Pinellas County, did not rebound after the 1962 freeze ruined the crop. Land in the county was too valuable thereafter to replant with citrus trees. Subdivisions, commercial centers, and roads replaced former groves (Sanders 1983:189). By the early 1960s, Pinellas County contained more mobile homes than any other county in Florida (New South Associates 2008:23). Many roads were widened and bridges were replaced during the 1950s and 1960s. The State Road Department widened and improved the Davis Causeway, renaming it the Courtney Campbell Parkway. In addition, the original Sunshine Skyway, a modern engineering feat, opened in 1954, providing access to Manatee County and points south from the Pinellas Peninsula (Dunn 1973). In 1967, the Pinellas Expressway Authority was created by the legislature to develop a plan for a north-south road between St. Petersburg and Clearwater to augment US 19. This 23-mile road was to run roughly parallel to Alt. US 19. However, strong local opposition led to the termination of these plans, and the dismantling of the Expressway Authority.

Beginning in the 1970s, I-275 was built in segments through Pinellas County (Ringwald 2012). The completion of the Howard Frankland Bridge over Tampa Bay in 1960 was the first step in the interstate's construction (PCPD 1995:5). The bridge later became part of I-275. The segment from Roosevelt Boulevard south to 38th Avenue North began in the early 1970s. The interstate continued southward and reached 22nd Avenue North in 1974 and then 5th Avenue North in 1975. North Bay Drive, now I-375, was completed in downtown St. Petersburg in 1977. Also that year, the elevated portion of I-275 that extends from I-375 to I-175 was completed. I-175, or South Bay Drive, followed in 1978. The interstate cut through the 22nd Street South neighborhood in the late 1970s (**Photo 3-1**), and reached 26th Street South in 1981, and 54th Avenue South in 1983. The last section was finished in 1987, the same year the current Sunshine Skyway opened (Ringwald 2012). I-275's exit numbers were originally in sequential order, but they were changed in 2001 to a mile marker system, as were all other interstates within Florida.

Currently, the key business sectors in Pinellas County are tourism, manufacturing, and financial (Pinellas County 2007). The U.S. Census Bureau (USCB) designated along with Hillsborough, Hernando, and Pasco Counties as the Tampa-St. Petersburg-Clearwater Metropolitan Area. Currently, Pinellas County is the sixth most populous county, with 916,542 residents (USCB 2011).

4.0 Research Considerations and Methods

4.1 Background Research and Literature Review

ACI conducted a comprehensive review of archaeological and historical literature, records, and other documents and data pertaining to the project area. The focus of this research was to ascertain the types of cultural resources known in the I-275 PD&E Study project corridor and vicinity, their temporal/cultural affiliations, site location information, and other relevant data. This included a review of the sites listed in the NRHP, the FMSF (July 2014 GIS update), the ETDM Programming Screen Summary Report for Project #12556 (FDOT 2013), and materials on file at the City of St. Petersburg Planning Department. Also examined were the U.S. Department of Agriculture (USDA) soil survey data for Pinellas County, USGS quadrangle maps, relevant CRAS reports, 19th century federal surveyors' plats and field notes, tract book records, Pinellas County property appraiser's office records, historical maps, Sanborn maps, and other documents pertaining to archaeological sites and historic resources in the vicinity.

Prior to field survey, a Research Design and Survey Methodology was prepared. The objective of this study was to gain approval for the proposed CRAS methodology from the FDOT, and to inform the FHWA and the SHPO of the proposed methods prior to completing the CRAS. It identified project objectives and methods, and summarized the available information regarding previously recorded archaeological sites and historic resources in the vicinity (ACI 2014). Such knowledge provides both an informed set of expectations concerning the kinds of sites expected to occur within the project APE, as well as a basis for evaluating all newly identified resources.

The ETDM Program Screening Summary Report assigned a Moderate Degree of Effect for Historical and Archaeological Resources (FDOT 2013). The GIS data from the Environmental Screening Tool indicated that 67 recorded cultural resources are located within the 500-foot buffer. These include five archaeological sites; one cemetery; two historic bridges; 56 historic structures; and three resource groups. Of these, four archaeological sites; 15 historic structures; one historic cemetery; and one historic district are located adjacent to I-275 corridor. All four of these archaeological sites and six of the historic structures have not been evaluated by the SHPO.

Previous Cultural Resource Assessment Surveys: Between 1978 and 2012, several archaeological and historical/architectural surveys were conducted within 500 feet of the I-275 project corridor (**Table 4-1**). These include a number of historic structures surveys focused on neighborhoods or defined geographical areas such as the City of St. Petersburg (City of St. Petersburg Community Development 1981); Pinellas Park (Pinellas Park Planning Division 1993); Kenwood (Kitchen 1995); Crescent Heights and Crescent Lake (Stevenson Architects, Inc. 1996); the 22nd Street Corridor (Stevenson Architects, Inc. 2000); and the Dome Industrial Park Redevelopment Area (The Urban Group, Inc. 2008). Other surveys were carried out as part of FDOT projects along SR 686 (Browning 1988), SR 688 (Jackson 1991), SR 694 (Janus Research 1995; ACI 2002, 2012a), and the northbound Howard Frankland Bridge (I-275/SR 93) (ACI 2012b), as well as for private development (Janus Research 2001), for proposed cellular tower sites (Spriggs 2002; Ambrosino 2003), and during countywide (New South Associates 2008) or City of St. Petersburg-sponsored archaeological studies (Piper Archaeological Research and ACI 1978; Piper Archaeological Research 1987), among others.

Among these previous archeological studies, two City of St. Petersburg surveys included land abutting the I-275 corridor. These are the 1978 archaeological survey of three urban redevelopment program areas (Piper Archaeological Research and ACI 1978) and the 1987 City of St. Petersburg survey (Piper Archaeological Research 1987). The former project entailed reconnaissance-level survey of about 5400 acres in three tracts. The scope of services specified that no evaluation of site significance be conducted. Two of the three urban redevelopment program areas were situated adjacent to the I-275 corridor. Specifically, the northern area included the land between 22nd Avenue North to 54th Avenue North, to both the east and west of I-275; the southern area covered the zone between approximately 26th Avenue South and 1st Avenue South, to both sides of I-275. As a result, 10 archaeological sites were identified. However, none is located near the I-275 project APE. All the inland sites are situated within 1000 ft (305 m) of fresh water, and on somewhat elevated terrain characterized by well drained soils (Piper Archaeological Research and ACI 1978:95). Subsequent archaeological survey of the City of St. Petersburg resulted in the identification of four sites within the I-275 project APE. These archaeological sites are noted in the following Section 4.1.1.

4.1.1 Archaeological Considerations

Previously Recorded Archaeological Sites: The FMSF search indicated that five previously recorded archaeological sites are located within 500 feet of the I-275 PD&E Study project corridor (**Table 4-2**). Of these, all but 8PI1198 are located within the project archaeological APE (**Figure 4-1**). With the exception of 8PI902, all were identified in 1987 during an archaeological survey of the City of St. Petersburg (Piper Archaeological Research 1987). Each was documented on the basis of informant information, and none has been evaluated by the SHPO. Therefore, the sites located within the project ROW will require field survey to assess their existing condition, evaluation as per the NRHP criteria, and preparation of an updated FMSF form.

Table 4-2. Previously recorded archaeological sites within 500 feet of the I-275 study corridor

Site No.	Site Name	Site Type	Culture	SHPO Evaluation	Segment		
					A	B	C
8PI1198	Whitehall Gardens	Shell midden	Prehistoric	Not evaluated	x

8PI902	Sawgrass Lake #2	Artifact scatter	Archaic	Not evaluated		x	
8PI1212	Turner's Creek	Lithic scatter	Archaic	Not evaluated		x	
8PI1258	Gandy Exit	Lithic scatter	Archaic	Not evaluated		x	

4.1.2 Historical Considerations

Recorded Historic Resources: Twenty-nine previously recorded historic resources (**Table 4-3; Figures 4-2 and 4-3**) are located within approximately 200 feet of the I-275 study corridor. These include 27 buildings, one cemetery, and one resource group, the NRHP-listed Kenwood Historic District (8PI11176). The Kenwood Historic District abuts I-275 to the west and is roughly bounded by 1st Avenue North and 9th Avenue North. It contains more than 2,200 contributing resources, of which

10 are adjacent to the I-275 corridor. The NRHP-eligible Jordan Park Elementary School (8PI6901) is also within the APE.

The 27 buildings include 23 residences, two schools, and two commercial buildings. Most of the residential and commercial buildings are of the Frame and Masonry Vernacular styles. Other styles represented are Minimal Traditional, Mediterranean Revival, Colonial Revival, and Bungalow. The majority of historic resources were recorded as part of an Architectural/Historical Survey of the 22nd Street Corridor (Stevenson Architects, Inc., 2000); the Dome Industrial Park Project II Redevelopment Area Historic Structure Study (The Urban Group, Inc., 2008); and the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen 1995). Windshield survey of the project corridor indicated that 10 of the previously recorded historic resources, denoted by green shading in **Table 4-3**, are no longer extant.

4.2 Field Methodology

Archaeological: The I-275 project is planned to be mostly developed within the existing ROW. No substantial changes to the vertical profile are proposed, nor are side street improvements at the ramps anticipated. Accordingly, archaeological sites are unlikely to be affected by the project, and archaeological field survey focused only on the identification and evaluation of previously recorded and unevaluated sites located within the existing ROW. Since additional ROW is not being proposed during this study, a systematic archaeological field survey is not planned to be undertaken at this

time. Initial reconnaissance indicated that the APE has been severely altered by roadway development and other impacts. Accordingly, and in consideration of personnel safety, archaeological testing was limited in scope and intensity.

Formulation of an archaeological site location predictive model was not needed for this study, given the limited focus of investigation. However, in general, regional models (e.g., Austin et al. 1991; Burger 1982; de Montmollin 1983; Deming 1980; Janus Research 1992, 2004; Weisman and Collins 2004) suggest that relatively elevated areas, on well drained soils, and within approximately 100 meters (m) (330 ft) of a freshwater source have the highest probability for site occurrence. Elevated areas of better drained soils within about 100 to 300 m (330 to 990 ft) of fresh water are typically considered to have a moderate probability. This model would likely be applied during the survey of any new ROW if it is determined after the PD&E study is completed that additional ROW will be needed. Accordingly, if appropriate, archaeological testing would be conducted in the future at 25 m (82 ft) and 50 m (164 ft) intervals within the areas of new ROW considered to have a high and moderate site probability, respectively. Low probability areas would be archaeologically sampled on a judgmental basis. The four previously recorded sites were tested at a maximum 25 m (82 ft) interval, as allowable given the existing conditions. All soil removed from the shovel tests was screened through 6.4 mm (0.25 in) mesh hardware cloth to maximize the recovery of artifacts. The locations of all shovel tests was plotted on the project aerial maps, and, following the recording of relevant data such as stratigraphic profile and artifact finds, all test pits will be refilled.

Historical/architectural: For historic resources, the project APE is defined as the properties adjacent to the existing ROW. All previously recorded historic resources located within the project APE were located and assessed, and those found to be no longer extant were noted, and the information provided to the FMSF office. Where noteworthy changes to the previously evaluated historic resources were observed, descriptive information was collected and photographs were taken sufficient for preparation of an updated FMSF form. A FMSF form was prepared for each previously recorded historic resource that was not evaluated by the SHPO. In addition, all unrecorded buildings, structures, cemeteries, bridges, linear resources, resource groups, and potential historic districts with features indicative of 1965 or earlier construction materials, building methods, or architectural styles were identified, photographed, described, and plotted on the project maps. Each historic resource was reviewed to assess style, historic context, and condition. Pinellas County Property Appraiser's records were used to obtain site-specific information such as building construction dates and/or possible association with individuals or events significant to local or regional history. When available, residents or other knowledgeable sources were interviewed to obtain pertinent information.

4.3 Unexpected Discoveries

It was anticipated that if human burial sites such as Indian mounds, lost historic and prehistoric cemeteries, or other unmarked burials or associated artifacts were found, then the provisions and guidelines set forth in Chapter 872.05, F.S. (Florida's Unmarked Burial Law) would be followed.

4.4 Laboratory Methods and Curation

No cultural materials were recovered, and therefore, no laboratory analysis was necessary. All project-related records, including field notes, maps, and photographs will be maintained by ACI in Sarasota, until arrangements can be made for curation by the FDOT.

5.0 Survey Results

5.1 Archaeological Survey Results

Based upon the results of the background research, there are four previously recorded archaeological sites, 8PI901, 8PI902, 8PI1212, and 8PI1258, located, at least in part, within the I-275 project APE; all are contained within study Segment B. None was evaluated by the SHPO. All four sites were recorded more than 25 years ago based on informant information only. The local avocational archaeologists who reported the sites made surface collections of artifacts and conducted no systematic subsurface archaeological testing. They described each site as having undergone “major” disturbance/destruction.

Given the highly altered conditions of the site areas today, as well as the presence of utility lines, field survey by ACI included only limited subsurface testing, plus photographic documentation; a total of 11 shovel tests were excavated with all but one placed within the recorded site area. As a result, no evidence of any of the sites was found, and the portion of each site contained within the I-275 right-of-way is presumed destroyed by ground altering activities. Evaluation of the site areas contained outside the project APE was beyond the scope of this CRAS. Thus, there is insufficient information to determine the potential NRHP eligibility of 8PI901 and 8PI902 since most of each recorded site area lies outside the current project APE. Both 8PI1212 and 8PI1258, mostly located within the project APE, are considered ineligible for listing in the NRHP due to the loss of physical integrity. Brief site descriptions follow, as excerpted from the FMSF forms. Photos depicting the current conditions accompany the site summaries, and updated FMSF forms are contained in **Appendix A**.

8PI901: The Sawgrass Lake #1 Site is a lithic scatter located in Sections 26 and 35 of Township 30 South, Range 16 East, to the west of I-275 in study corridor Segment B. Avocational archaeologist Brian Evensen discovered the site on a partially destroyed sand hill slope located east of Sawgrass Lake. He collected Levy and Marion type projectile points, and estimated the site size as less than one acre, or approximately 600 square meters. The reported degree of site destruction was major. Evensen reported this information to Paul Swofford, who originally recorded 8PI901 in August 1985. In March 1987, Bob Austin of Piper Archaeological Research, Inc. updated the FMSF information during the City of St. Petersburg Survey (Piper Archaeological Research 1987). In addition to Evensen, Austin interviewed avocational archaeologist John Lovett, who also had collected artifacts from the site. As a result, Austin recorded an expanded site area extending into Section 35 and measuring approximately 40 acres, or 163,504 square meters.

ACI excavated three shovel tests at judgmentally determined locations along the eastern boundary of the recorded site area, as contained within the project APE (**Figure 5-1**). Most of the site area is located within Sawgrass Lake Park, and thus, was not tested and evaluated. Improvement plans include the addition of both a southbound outside lane from the Gandy Blvd. westbound on ramp, as well as a southbound median inside lane. Limited archeological testing yielded negative results. The shovel test profiles showed a disturbed stratigraphy consisting of an upper zone of dark gray colored fill from 0-45 centimeters below surface (cmbs) (0-18 inches [in]), underlain by light gray sand between 45-85 cmbs (18-34 in), and brown sand between 85-100 cmbs (34-40 in). The adjacent part

of the site area, outside the project APE, has been impacted by development of a retention pond and land altering activities associated with Sawgrass Lake Park and I-275 improvements. As contained within the I-275 project APE, 8PI901 appears to be destroyed. **Photo 5-1** shows the existing conditions. There is insufficient information to evaluate the NRHP eligibility of 8PI901.

Photo 5-1. Looking northeast at 8PI901 within the I-275 ROW

8PI902: The Sawgrass Lake #2 Site is a lithic scatter located in Sections 25 and 26 of Township 30 South, Range 16 East, to the east and west of I-275 in study corridor Segment B. Also discovered by Brian Evensen, the site occurred on a partially destroyed upland area adjacent to Sawgrass Lake. Evensen collected Levy, Marion, Sarasota, Columbia, and Pinellas type projectile points, estimated the site size as approximately 500 square meters, and considered the degree of site destruction as major. Paul Swofford recorded 8PI901 in August 1985 based on Evensen's information.

ACI excavated a total of three shovel tests within the recorded site area at 25 m (82 ft) intervals at the outer edge of the existing ROW, adjacent to Sawgrass Lake Park (**Figure 5-1**). Improvement plans include the addition of a southbound outside lane from the Gandy Blvd. westbound on ramp, and the addition of northbound outside lanes. Testing yielded negative results. The shovel tests revealed an upper strata of dark gray colored fill from 0 to 50-60 cmbs (0 to 20-24 in), underlain by light gray sand to 100 cmbs (40 in). The major part of the site area, located outside the project APE, has been impacted by development of a retention pond and land altering activities associated with the Garden of Peace (Royal Palm) Cemetery. As contained within the I-275 project APE, 8PI902 appears to be destroyed. **Photo 5-2** shows the existing conditions. There is insufficient information to evaluate the NRHP eligibility of 8PI902.

Photo 5-2. Looking northeast at 8PI902 within the I-275 ROW

8PI1212: The Turner's Creek Site is a lithic scatter located in Section 25 of Township 30 South, Range 16 East, to the east of I-275 in study corridor Segment B. Brian Evensen, the site discoverer and reporter, collected Florida Archaic Stemmed projectile points and noted site disturbance by dredging and ditching. Bob Austin recorded 8PI1212 in January 1987 during the City of St. Petersburg Survey (Piper Archaeological Research 1987), based on Evensen's information. Estimated site size was not recorded.

ACI excavated one shovel test within the recorded site area, at the outer edge of the existing ROW (**Figure 5-1**). Improvement plans include the addition of a second lane to the northbound off ramp to Gandy Boulevard. ACI recovered no cultural materials. Shovel testing revealed dark gray colored fill to a depth of 100 cmbs (40 in). This small site appears to be destroyed as the result of ditching. Therefore, it is not considered potentially eligible for listing in the NRHP. **Photo 5-3** shows the existing conditions.

Photo 5-3. Looking east/southeast at 8PI1212 within the I-275 ROW

8PI1258: The Gandy Exit Site is a lithic scatter located in Sections 25 and 26 of Township 30 South, Range 16 East, to the east of I-275 in study corridor Segment B. It was discovered by Frank Bushnell of St. Petersburg Junior College who collected Florida Archaic Stemmed projectile points from a dune ridge that had been cleared for the development of a trailer park and an exit ramp off I-275. Bushnell assessed the site condition as severely disturbed/destroyed, and did not provide an estimate of site size. Bob Austin recorded 8PI1258 in August 1987 during the City of St. Petersburg Survey (Piper Archaeological Research 1987), based on Bushnell's information.

ACI excavated three shovel tests at 25 m (82 ft) intervals within the recorded site area, at the outer edge of the existing ROW (**Figure 5-1**). Improvement plans include the addition of a second lane to the northbound off ramp to Gandy Boulevard. No cultural materials were recovered. Shovel testing revealed dark gray colored fill to a depth of 100 cmbs (40 in). The adjacent land to the east, outside the ROW, is developed with a mobile home park. Thus, 8PI1258 is presumed to be destroyed as the result of highway construction and residential development. Therefore, it is not considered potentially eligible for listing in the NRHP. **Photo 5-4** shows the existing conditions.

Photo 5-4. Looking south at 8PI1258 within the I-275 ROW

5.2 Historical/Architectural Survey Results

5.2.1 Summary of Results

Historical/architectural field survey resulted in the identification of 325 extant historic resources within the project APE, including 19 previously recorded and 306 newly identified. The locations of these historic resources are depicted in **Figures 5-2 through 5-23**. This total includes 309 structures, 13 building complex resource groups, one historic district, one railroad, and one cemetery. Of these, 16 are listed, eligible, or considered potentially eligible for listing in the NRHP (**Table 5-2**). The Kenwood Historic District (8PI11176) was listed in the NRHP in 2003. Ten previously identified contributing resources within the historic district are contained within the I-275 project APE (8PI6929, 8PI7256, 8PI7272, 8PI7410, 8PI7502, 8PI7837, 8PI7839, 8PI7970, 8PI11102, and 8PI11108) (**Figure 5-23**). The Jordan Park Elementary School (8PI6901) previously was determined NRHP-eligible by the SHPO. In addition to these listed and eligible historic resources, archival research, informant information, and field survey resulted in the identification of four other historic resources that are considered potentially eligible for listing the NRHP. These include one previously recorded structure (8PI6956), situated adjacent to the boundaries of the Kenwood Historic District, but not originally included. This building meets the period of significance and designation criteria established for this district, and if the boundary is expanded to include this parcel, it could potentially be considered a contributing structure in the district. It is not, however, considered individually NRHP-eligible. Three other structures are considered potentially eligible for NRHP listing: the Norwood School (8PI714), 1850 Central Ave. (8PI726), and the Manhattan Casino (8PI819).

Figure 5-23. Location of the newly and previously recorded historic resources within the Kenwood Historic District.

Two newly identified historic resources have insufficient information to make an assessment of NRHP eligibility: the Mt. Moriah Primitive Baptist Church (8PI12276) and a short segment of the Orange Belt Railway/CSX Railroad (8PI12273). The other 289 newly identified historic structures, 13 newly identified building complex resource groups, plus one previously recorded cemetery (8PI12010), are not considered potentially eligible for NRHP listing; the cemetery was previously determined ineligible. New and updated FMSF forms are contained in **Appendix A**.

Field survey also revealed that 10 recorded historic resources are no longer extant within the project APE (**Table 5-1**). A letter to the FMSF noting their changed status is contained in **Appendix B**.

5.2.2 NRHP-Listed, Eligible, or Potentially Eligible Historic Resources

Sixteen NRHP-listed, eligible, or potentially eligible historic resources are located within the I-275 PD&E Study APE (**Table 5-2**). All but two are located within Segment B. The other two are located in Segment A. A description of each follows.

8PI11176: The Kenwood Historic District (8PI11176) was initially surveyed in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen 1995). A second survey was completed in 2002 as part of the Kenwood Historic District National Register of Historic Places Registration Form (Uguccioni and Stewart 2003). 8PI11176 was listed in the NRHP in 2003 under Criterion A for Community Planning and Development and under Criterion C for Architecture. It is a largely intact collection of early 20th century architecture in one of the first suburban areas of St. Petersburg to be developed. The period of significance is 1913 to 1953. When listed, the district had 2,204 contributing resources and 178 noncontributing resources within its boundaries, which extended from about I-275 to the east, 1st Avenue North to the south, 34th Street North to the west, and 9th Avenue South to the north. The 375-acre district includes examples of the Frame Vernacular, Masonry Vernacular, Craftsman Bungalow, Minimal Traditional, Tudor Revival, Mediterranean Revival, Colonial Revival, Ranch, Prairie, American Foursquare, Dutch Colonial Revival, Mission, and International styles. The mostly residential historic district also contains five churches, 29 commercial buildings, a school, and a park (FMSF).

Table 5-2. NRHP-Listed, Eligible, or Potentially Eligible Historic Resources within the APE

FMSF No.	Name/Address	Build Date	Style	NRHP Status
8PI11176	Kenwood Historic District	N/A	N/A	Listed (2003)
8PI6929	1905 2nd Ave. N.	ca. 1936	Minimal Traditional	Contributing to Kenwood H.D.; not individually eligible
8PI7256	2001 Dartmouth Ave. N.	ca. 1940	Frame Vernacular	Contributing to Kenwood H.D.; not individually eligible
8PI7272	1911 Burlington Ave. N.	ca. 1925	Craftsman	Contributing to Kenwood H.D.; not individually eligible
8PI7410	7105 7th Ave. N.	ca. 1932	Bungalow	Contributing to Kenwood H.D.; not individually eligible
8PI7502	2101 8th Ave. N.	ca. 1938	Bungalow	Contributing to Kenwood H.D.; not individually eligible
8PI7837	1936 3rd Ave. N.	ca.1925	Craftsman	Contributing to Kenwood H.D.; not individually eligible
8PI7839	1931 3rd Ave. N.	ca. 1925	Frame Vernacular	Contributing to Kenwood H.D.; not individually eligible
8PI7970	1960 4th Ave. N.	ca. 1925	Frame Vernacular	Contributing to Kenwood H.D.; not individually eligible
8PI11102	230 19th St. N.	ca. 1948	Masonry Vernacular	Contributing to Kenwood H.D.; not individually eligible
8PI11108	430 20th St. N.	ca. 1945	Frame Vernacular	Contributing to Kenwood H.D.; not individually eligible
8PI6956	1846 2nd Ave. N.	ca. 1921	Frame Vernacular	Potentially eligible as contributor to updated Kenwood H.D.; not individually eligible
8PI6901	Jordan Park Elementary School / 2390 9th Ave. S.	1925	Masonry Vernacular	SHPO determined eligible under Criterion A: Ethnic Heritage
8PI714	Norwood School / 2154 27th Ave. N.	1925	Mediterranean Revival	Potentially individually eligible under Criteria A (Education; Community Planning and Development) and C (Architecture)
8PI726	Papa's Dream/1850 Central Ave.	1925	Mediterranean Revival	Potentially individually eligible under Criteria A (Entertainment/Recreation) and C (Architecture)
8PI819	Manhattan Casino / 642 22nd St. S.	ca. 1925	Masonry Vernacular	Potentially individually eligible under Criterion A (Ethnic Heritage)

As a result of the I-275 survey, one previously recorded building located at 1846 2nd Avenue N. (8PI6956) was found to be potentially contributing to the NRHP-listed Kenwood Historic District. This ca. 1921 two-story residential building with an associated two-story garage meets the period of significance and designation criteria for this district, yet it was excluded from the original designation. It is located on a parcel directly east of the district's eastern boundary along 19th Street. An expansion of the historic district's boundary is proposed that would only include this parcel and the two structures on it. The proposed revision to the district's eastern boundary is based on the identification of this previously recorded building that meets the district's designation criteria and its location, contiguous to the existing district boundary as listed (**Figure 5-23**). The district's period of significance would not be revised, and remains from 1913 to 1953. It was beyond the scope of this CRAS to update the entire district, and only historic structures within the current project APE were evaluated.

Seventeen extant historic buildings, including 11 contributing and six noncontributing, are located within the district's current boundary, as contained within the I-275 APE. Ten buildings (8PI6929, 8PI7256, 8PI7272, 8PI7410, 8PI7502, 8PI7837, 8PI7839, 8PI7970, 8PI11102, and 8PI11108) within the original district boundary, as contained within the I-275 APE, were previously recorded as contributors to the NRHP-listed Kenwood Historic District. The aforementioned previously recorded building (8PI6956) located directly east of the district's eastern boundary as listed, is considered potentially eligible for the NRHP as a contributing structure within the revised Kenwood Historic District boundary. Six previously and newly recorded buildings (8PI11113, 8PI12300 through 8PI12302, 8PI12304, and 8PI12305) are located on adjacent parcels to the district's eastern boundary and within the current project APE. However, they either post-date the district's period of significance, or do not meet the district's designation criteria as primarily "single-family residences on single-lot parcels" (FMSF). Thus, none is considered to potentially contribute to the district, and none is considered individually eligible for the NRHP.

Photo 5-5. The residence at 1905 2nd Ave. N. (8PI6929), facing north

8PI6929: The Minimal Traditional style residence at 1905 2nd Ave. N. was built ca. 1936 (Dubov 2014) (**Photo 5-5; Figure 5-23**). The irregularly-shaped, one-story building rests on concrete block piers. The wood frame walls are covered with wood siding and drop siding. The gable roof is covered with composition shingles, and the flat roof addition is covered with built-up materials. Fenestration includes a fanlight (addition); 1/1 single-hung sash (SHS) metal (addition); and 6/6 double-hung sash (DHS) wood windows. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen 1995). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176); it is not considered individually eligible.

Photo 5-6. The residence at 2001 Dartmouth Ave. N. (8PI7256), facing northwest

8PI7256: The Frame Vernacular style residence at 2001 Dartmouth Ave. N. was built ca. 1940 (Dubov 2014) (**Photo 5-6; Figure 5-23**). The irregularly-shaped, one-story building rests on a continuous concrete block foundation. The wood frame walls are covered with vinyl siding. The cross-gabled roof is covered with composition shingles. Fenestration includes 1/1 SHS vinyl and one-light fixed vinyl windows. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen 1995). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176); it is not considered individually eligible.

Photo 5-7. The residence at 1911 Burlington Ave. N. (8PI7272), facing northeast

8PI7272: The Craftsman style residence at 1911 Burlington Ave. N. was constructed ca. 1925 (Dubov 2014) (**Photo 5-7; Figure 5-23**). The rectangular, one-story building rests on a concrete block pier foundation, which supports the wood frame walls, covered with wood siding, wood, and stucco. The cross-gabled roof is covered with composition shingles. Fenestration includes 1/1 DHS wood; 6/1 DHS wood; nine-light casement wood; and three-light awning hopper windows. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen 1995). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176). It is not considered individually eligible.

8PI7837: The Craftsman style residence at 1936 3rd Ave. N. was built ca. 1925 (Dubov 2014) (**Photo 5-10; Figure 5-23**). The one-story, rectangular building rests on a concrete block pier foundation, which supports the wood frame walls covered with asbestos shingles, wood, and stucco. The gable roof is covered with composition shingles. Fenestration includes three-light awning metal and 1/1 DHS wood windows. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen 1995). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176). It is not considered individually NRHP-eligible.

Photo 5-11. The residence at 1931 3rd Ave. N. (8PI7839), facing northwest

8PI7839: The Frame Vernacular style residence at 1931 3rd Ave. N. was built ca. 1925 (Dubov 2014) (**Photo 5-11; Figure 5-23**). The rectangular, two-story building rests on a poured concrete slab foundation, which supports the wood frame walls covered with brick and asbestos shingles. The gable roof is covered with composition shingles. Fenestration includes three-light awning metal (replacement) and four-light casement metal (replacement) windows. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen 1995). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176). It is not considered individually NRHP-eligible.

Photo 5-12. The apartment building at 1960 4th Ave. N. (8PI7970), facing southeast

8PI7970: The Frame Vernacular style apartment building at 1960 4th Ave. N. was built ca. 1925 (Dubov 2014) (**Photo 5-12; Figure 5-23**). The rectangular, two-story building rests on a brick pier foundation, which supports the wood frame walls covered with asbestos shingles. The flat roof is covered with built-up materials. Fenestration includes 4/1 DHS wood and 1/1 SHS vinyl (replacement) windows. Ancillary features include a ca. 1925, two-story garage apartment at 331 20th St. N. with gable roof and wood drop siding walls. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen 1995). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176). It is not considered individually eligible for NRHP listing.

Photo 5-13. The residence at 230 19th St. N. (8PI11102), facing southwest

8PI11102: The Masonry Vernacular style residence at 230 19th St. N. was built ca. 1948 (Dubov 2014) (**Photo 5-13; Figure 5-23**). The irregularly-shaped, one-story building rests on a continuous concrete block foundation, which supports the concrete block walls, portions of which are covered with artbrick and stucco. The cross-gabled roof is covered with composition shingles. Fenestration includes 1/1 SHS vinyl (replacement); one-light fixed metal; and four-light casement metal windows. This building originally was recorded in 2002 as part of the Kenwood Historic District National Register of Historic Places Registration Form (Uguccioni and Stewart 2003). The FMSF form was updated as part of this survey. This building is contributing to the NRHP- listed Kenwood Historic District (8PI11176). It is not considered individually NRHP-eligible.

8PI11108: The Frame Vernacular style duplex at 430 20th St. N. was built ca. 1945 (Dubov 2014) (**Photo 5-14; Figure 5-23**). The continuous concrete block foundation supports the wood frame walls, which are covered with wood siding and wood. The cross-gabled roof is covered with composition shingles. Fenestration includes 1/1 DHS wood windows. Ancillary features include a two-story garage with apartment to the south that matches the main house in design and materials. The ancillary building has a gable roof and wood siding walls with wood trim in the gables. This building originally was recorded in 2002 as part of the Kenwood Historic District National Register of Historic Places Registration Form (Uguccioni and Stewart 2003). The FMSF form was updated as part of this survey. This building is contributing to the NRHP-listed Kenwood Historic District (8PI11176); it is not considered individually eligible.

Photo 5-14. The duplex at 430 20th St. N. (8PI11108), facing southeast

Photo 5-15. The residence at 1846 2nd Ave. N. (8PI6956), facing south

8PI6956: The Frame Vernacular style residence at 1846 2nd Ave. N. was built ca. 1921 (Dubov 2014) (**Photo 5-15; Figure 5-23**). The irregularly-shaped, two-story building rests on a concrete block and brick foundation. Composition shingles cover the gable roof. Fenestration includes 1/1 DHS wood and 1/1 SHS vinyl (replacement) windows. Ancillary features include a two-story garage/apartment with drop siding, a gable roof with composition shingles, a brick chimney, and exposed eaves. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen 1995). This building, excluded from the NRHP-listed Kenwood Historic District has retained its integrity and is newly considered a potential

contributing resource to the NRHP-listed Kenwood Historic District (8PI11176) should the district's boundaries be adjusted eastward. It is not individually eligible for NRHP listing.

Photo 5-16. The Norwood School (8PI714) at 2154 27th Ave. N., facing southeast

Photo 5-17. The Norwood School (8PI714) at 2154 27th Ave. N., facing south

Photo 5-18. The Norwood School (8PI714) at 2154 27th Ave. N., facing southwest

Photo 5-19. The Norwood School (8PI714) at 2154 27th Ave. N., facing north

8PI714: The Norwood School (8PI714) is a two-story, irregularly-shaped, Mediterranean Revival style building originally constructed in 1925 (**Photos 5-16 through 5-19; Figure 5-14**). Located at 2154 27th Ave. N., it was recorded in 1978 by Doug Davies and Margaret Nuccio of the City of St. Petersburg. Neither the recorders nor the SHPO evaluated the school's significance in terms of the NRHP eligibility criteria (FMSF 2014). Therefore, 8PI714 was updated and assessed as part of the current survey.

The Norwood School was built in several stages. Following its original construction in 1925, a wing was added in 1927, and additions were made in ca. 1955 and ca. 1965. The concrete spread footing and concrete slab foundations support the brick walls. The dark brown bricks are laid in a garden wall bond with a header and stretcher alternating in one row and three stretchers and a header in the next row. The bricks are laid in a soldier bond both above windows and below arched openings. The gable roof on the original building and the shed roof of the porch on the 1927 wing are covered in replacement composition shingles. Built-up materials cover the gable roof on the 1927 wing, the gable roof on the ca. 1955 addition, and all the flat roof additions. The main entrance is on the north elevation of the original portion. Three arched openings are decorated with columns, Corinthian capitals, and concrete quoining, which mimics stone. An incised, one-story entry porch is located past the arches. Entry into the building is gained through a pair of wood doors, each of which includes a rectangular light covered with metal screens. The doors are flanked by side lights and a 24-light fixed window above. The perimeter of the entryway is decorated by concrete quoining, also meant to look like stone. Three-light fixed vinyl windows and air conditioning units are located to either side of the entryway. The walls within the open entry porch are covered with stucco.

The south elevation of the original portion and the west elevation of the 1927 wing include a two-story incised open porch. The first floor contains arched openings that have been screened. The second story has arched openings with columns. The classroom entrances are located within. Brick chimneys are on the south and west elevations. A decorative tower is located on the north elevation and includes a gable roof and arched openings. Other ornamentation includes eyebrow vents, exposed rafter tails, parapet roofs, arched windows, a concrete water table, and concrete window sills. The original windows were replaced ca. 2000. Window types include 3/3 DHS vinyl; 6/6 DHS vinyl; one-light fixed vinyl; two-light fixed vinyl; 2/2 DHS vinyl; one-light hopper vinyl; and 5/5 DHS metal. Some window spaces have been filled, and others have been boarded up.

The school and grounds encompass an entire block bounded by 27th Avenue North to the north, I-275 to the west, 26th Avenue North to the south, and 22nd Street North to the west. A grass lawn is on the north elevation, and to the south is an asphalt parking lot, which includes the painted lines of an oval track. A pedestrian overpass across I-275 is to the northeast.

In 1885, the Ward School was the first school built in what is today St. Petersburg. The following year, a school was built in Disston City (today's Gulfport). English immigrant Arthur Norwood was a teacher here. St. Petersburg grew slowly in the following decades, and reached a pinnacle in the 1920s during the Florida Land Boom. The boom period resulted in the construction of a number of residences, infrastructure projects, and new businesses. Moreover, 19 public schools were built in St. Petersburg during this period; approximately half remain today.

The Norwood School was a product of this critical period in St. Petersburg's development. The Norwood School was preceded in 1922 by the Pine City School, a one-room wooden building at 29th Avenue North and Union Street, which educated the children of the Pine City Tourist Camp. The school's name was retained when the new brick school was built two blocks south in 1925 to replace the small wood structure. The new four room brick school was built for $38,000 by the Eric Clauson Construction Company. The school, which had kindergarten through sixth-grade students, only had 24 pupils when it opened, but the student body increased quickly thereafter (PCSBPI 1962). Sete Reiss was the first teacher (SBPC 1987).

In 1927, the Louis Fleisher Construction Company of St. Petersburg added six rooms, a chimney, an auditorium, and a cafeteria for $31,950. The expanded school was renamed for Norwood, a longtime

St. Petersburg teacher, merchant, and civic leader who was chairman of the school board at the time (St. Petersburg Times 1927; PCSBPI 1962). Other additions were completed ca. 1955 to the west and northeast, and another to the southwest was completed ca. 1965 (PALMM 1952; PALMM 1957; PALMM 1970).

The school was a focal point of the neighborhood, and the Norwood Parent-Teacher Association was active. Immediately after World War II, students bought stamps that could be exchanged for savings bonds. Events included a Halloween carnival and May Day celebration. (SBPC 1987).

I-275 was rerouted to avoid the school in the early 1970s, and a pedestrian overpass was built across the interstate to provide access to the school area. Yet, the Norwood School was slated for demolition in the mid-1970s because of its poor condition and lack of air conditioning (The Evening Independent 1973a; Phelps 1974). The school eventually was renovated in the mid-1980s (Norton 1989). Norwood closed in May 1997, because it was too small and lacked the land necessary to expand. The property temporarily housed the students and staff of Lakewood Elementary until November 1998. After that, the Norwood School served as an alternative high school to educate students suspended from regular Pinellas County high schools (Oppel 1998). The building closed ca. 2008 and is now vacant.

The setting near the Norwood School has been affected by the construction of the elevated I-275, which is approximately 150 feet to the east. Still, the school has retained much of its integrity from its historic period of significance, 1925-1965. It is in the same location, and the additions and alterations are historic and compatible with the original Mediterranean Revival style design and utilize similar materials and workmanship. For example, the original brick bond was matched on the additions, and the replacement windows and roof are similar to those they replaced. Though vacant, the building also still conveys the feeling of a Florida Land Boom era school and is one of approximately 10 surviving examples in St. Petersburg from the period. It also was important to the surrounding residential neighborhood during its years as an elementary school.

Thus, based on its significance and historic integrity, the Norwood School is potentially eligible for individual listing in the NRHP under Criterion A in the areas of Education and Community Planning and Development for its role in the Florida Land Boom and subsequent significance to neighborhood life in north St. Petersburg. It is also potentially eligible under Criterion C in the area of Architecture as a good example of a Mediterranean Revival style school building. It is not significant as part of a historic district.

Photo 5-20. The building at 1850 Central Ave. (8PI726), facing southeast

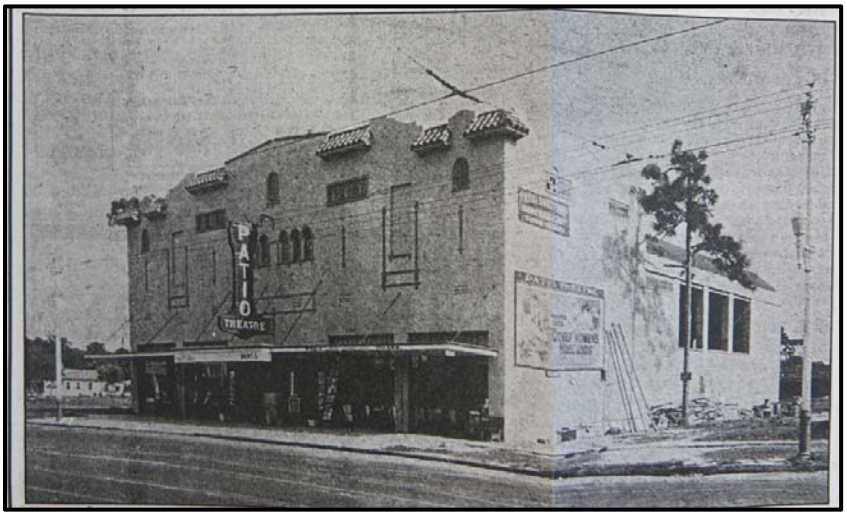

Photo 5-21. The building at 1850 Central Ave. (8PI726) in 1928 when it was the Patio Theater

(Source: St. Petersburg Museum of Natural History)

8PI726: The two-story, Mediterranean Revival style building at 1850 Central Ave., recorded as "Papa's Dream," was built in 1925 (**Photos 5-20 and 5-21; Figure 5-10**). The rectangular building rests on a slab foundation. The brick walls are predominately covered with stucco. The dome roof is covered with composition shingles and composition roll. A one-light fixed arched window is present, but most windows have been blocked in. Ornamentation includes a parapet roof, circular vents, and brick geometric patterns and window surrounds. A flat awning extends the length of the north elevation. The original marquee and tile-covered parapets have been removed, and the ticket window has been enclosed. The building is in fair condition. 8PI726 was first recorded in 1978 by Doug Davies and Margaret Nuccio of the City of St. Petersburg. The recorders did not evaluate its eligibility for listing in the NRHP, and it was not evaluated by the SHPO (FMSF 2014). The FMSF form was updated as part of the current survey.

The building originated as the Patio Theater, a roofless movie house built by Southern Theaters (*St. Petersburg Times* 1928). Work on the Patio began on May 20, 1925, and the theater opened July 13. Southern Theaters President Anthony Shimko paid about $30,000 to build the Patio (*The Evening Independent* 1926).

The Patio Theatre was constructed during the height of the Florida Land Boom. During this time, a number of recreational and entertainment venues were built in St. Petersburg to meet the growing demand for leisure activities for both tourists and residents. This theatre was a product of the movie palace movement. Thomas Edison created the modern motion picture in 1896 with his Vitascope machine. These soundless, moving pictures often played in makeshift theaters with piano accompaniment. Businessmen recognized the marketability of these shows to the middle class and began to build theaters exclusively to play movies. Beginning with New York's Regent Theatre in 1913, palatial theaters were designed to suspend reality for moviegoers by evoking a romantic foreign setting. European villages, Egyptian tombs, and Mayan temples were among the themes for theaters constructed during this period. The extravagant facades were often colorful and grand in scale. Brightly lit marquees and signs beckoned above the glass-box ticket window at the entrance. The design theme continued past the doors into the lobby and plush seating area beyond. From 1915 to 1945, about 4,000 movie theaters were constructed on Main Streets throughout the United States. The movie palace trend began to wane in the late 1920s as movie production values suffered, and new theaters constructed thereafter often were much less grandiose. The birth of the drive-in theater in the 1930s effectively ended the movie palace era (Margolies and Gwathmey 1991).

8PI726 was built in the Mediterranean Revival style, the most popular architectural theme during the Florida Land Boom. The style was inspired by Italian, Spanish, and Moorish architecture and featured arches, parapets, tile roofs, and stucco walls. The Patio featured a ravenswood screen. The perimeter walls were decorated in a Spanish motif and included a balcony. The 1,250 wood seats were varnished to rebuff rainwater. The theater was built of brick, hollow tile, and stucco and was claimed to be fireproof (*The Evening Independent* 1926; Ormsby 1981).

City boosters in the 1920s bragged about St. Petersburg's climate and many leisure activities, and the Patio aligned with their message. The Patio was the third open-air theater to open in the city, after the Airdome and Capitol theaters. Today, 8PI726 is one of only three still in existence. But the open-air theater concept was short-lived in St. Petersburg. Moviegoers found the insects and rain uncomfortable (Hartzell 2002). After a devastating hurricane in 1926, the Patio was enclosed by a domed steel roof. Also at that time, the walls were plastered, seating was increased, and a stage with orchestra pit was added to attract staged shows (*St. Petersburg Times* 1928).

The theater's new ceiling was described in a 1928 *St. Petersburg Times* article as follows:

> The great domed ceiling is perforated with myriads of tiny lights arranged to give the effect of the sky on a starry night. Across the stars clouds move slowly and the effect is something that must be seen to be appreciated.

The interior was cooled by a ventilating system (*The Evening Independent* 1928). Manager A.C. Thornton played comedies, cartoons, newsreels, and serials. Attendees could see two movies for 25 cents during the 1930s (Hartzell 2002).

The building was redecorated in 1935 and became the Playhouse Theatre. The first play shown in the newly branded space, headed by theater producer Raymond Moore, was Noel Coward's *Hay*

Fever (*The Evening Independent* 1935). The independent theater also showed second-run movies and held amateur contests (*St. Petersburg Times* 1947). Only white people were allowed to patronize the theater until September 1963 when it was among the first theaters in St. Petersburg to be desegregated (*St. Petersburg Times* 1963). The Playhouse began to show exclusively pornography films in 1969 before it closed in June 1973 (*The Evening Independent* 1973b).

In September 1973, the building became Papa's Dream, a Christian nightclub for teens opened by Fred Langston (Wasel 1979). In the 1980s, it was home to the Golden Apple Dinner Theatre and then the Encore Dinner Theatre. In more recent years, the building has been the Extra Innings Café and Concert Central. Currently, it is vacant and for sale. Despite a fire on the roof ca. 2007, the building retains most of its interior integrity, and includes balconies and a painted ceiling (Danner 2014). 8PI726 is the oldest extant building in St. Petersburg originally designed as a movie theater.

8PI726 was built during an important time in St. Petersburg and Florida's history in a style that defined the Florida Land Boom. While the building undoubtedly attracted winter visitors who could travel by trolley from downtown, the theater was patronized primarily by year-round residents who lived in the neighborhoods near the Grand Central District to the west of downtown. It is the only surviving former open-air theater in St. Petersburg and the oldest surviving building originally designed as a movie theater in the city. The building has undergone alterations, but has retained its integrity of location, design, materials, and workmanship. The interior also has retained some of its historic appearance from its period of significance, 1926-1965.

8PI726 appears to be potentially eligible for listing in the NRHP under Criterion A for its importance to St. Petersburg's history on the area of Entertainment/Recreation. The building is also potentially eligible for NRHP listing under Criterion C in the area of Architecture as an example of a Mediterranean Revival style atmospheric movie theater. It is not potentially eligible as a contributor to a historic district.

Photo 5-22. The Manhattan Casino (8PI819) at 642 22nd St. S., facing northeast

8PI819: The Manhattan Casino (8PI819) was constructed ca. 1925 at 642 22nd St. S. and renovated ca. 2005 (**Photo 5-22; Figure 5-8**). The two-story, Masonry Vernacular style rectangular building measures 12,658 square feet (Dubov 2014). It rests on a concrete slab foundation. The concrete block walls are covered with stucco. The six-bay building is distinguished by its pilasters and raised rectangular decorative patterns on the south elevation below the parapet roof. The roof is covered with built-up materials. There are six entrances on the ground floor of the west elevation. All have metal framed glass swing doors (ca. 2005), one-light fixed metal framed windows (ca. 2005), and one-light fixed glass transoms (ca. 2005). Many units also possess metal-framed sidelights (ca. 2005). A flat-roofed canopy (ca. 2005) extends the length of the west elevation. Paired 1/1 DHS metal windows (ca. 2005) are on the second floor. A two-story addition was built to the north ca. 2005.

In 1978, 8PI819 was recorded by Doug Davies and Margaret Nuccio of the City of St. Petersburg. They did not evaluate its NRHP eligibility, and it was not evaluated by the SHPO (FMSF 2014). 8PI819 was updated in 2000 during the Architectural/Historical Survey of the 22nd Street South Corridor by Stevenson Architects (Stevenson Architects, Inc. 2000). At this time, it was evaluated as not individually eligible but potentially eligible for NRHP listing as part of a district. The SHPO determined the building ineligible for NRHP listing in 2001 (FMSF 2014). The FMSF form was updated as part of the current survey.

The Manhattan Casino was the centerpiece of African-American social life during the period of segregation in St. Petersburg's 22nd Street South neighborhood. The first influx of African-Americans in St. Petersburg occurred during construction of the Orange Belt Railway (8PI12273) in the late 1880s. They formed the Pepper Town, Methodist Town, and Gas Plant settlements near downtown (Peck and Wilson 2006). The 22nd Street South community developed in the 1920s when black residents in segregated St. Petersburg were violently pressured to move farther from downtown. They formed the 22nd Street South residential area in what was then wilderness. Many of the black newcomers who relocated to St. Petersburg during the Florida Land Boom settled in the neighborhood. A number of businesses, many owned by African-Americans, were built along 22nd Street South. These included stores, restaurants, professional services, and entertainment venues, such as the Manhattan Casino (City of St. Petersburg 2014). In 1960, the neighborhood peaked with 111 businesses (Peck and Wilson 2006).

In about 1925, Elder Jordan, Sr., a black developer, paid $125,000 to construct the Manhattan Casino, located on the neighborhood's main thoroughfare. The bottom floor spaces contained over the years a post office, barber shop, grocery store, and drugstore (Champlain et. al. 1978). The building took its place as the social center for the community beginning in 1931 when the Jordan Dance Hall opened on the second floor. The venue later was renamed the Manhattan Casino. It was nicknamed "Home of the Happy Feet" and "Gem of 22nd Street." To enter the ballroom, patrons purchased tickets at the ticket window on the first floor before climbing up wood steps that led to the open room at the top. The dance floor was made of oak, and a stage and backstage were located at the south end of the room. The ceiling was low, and benches lined the wall (Peck and Wilson 2008).

The Manhattan Casino regularly hosted both local and national musical acts who played jazz, big band, gospel, and rhythm and blues. It was a stop on the Chitlin Circuit, an informal collection of nightclubs frequented by black musicians, and a number of internationally acclaimed performers graced the stage, including Louis Armstrong (**Photo 5-23**), Ella Fitzgerald, Duke Ellington, B.B. King, Cab Calloway, Ray Charles, Fats Domino, and Little Richard (**Photo 5-24**). Also, a young James Brown performed in residency every Thursday and Saturday before he went on to stardom.

Residents of all ages attended the events, and those who could not get in often stood outside to hear what was going on upstairs. In addition to live music, the room also hosted dances, teas, and proms for nearby Gibbs High School. Locals associated with the Manhattan Casino included promoters such as teacher George Grogan and radio personality Goldie Thompson, who brought gospel singers to the Manhattan (Peck and Wilson 2008).

Photo 5-23. Louis Armstrong attracted a white audience when he played at the Manhattan Casino (8PI819) in 1957
(Source: *Tampa Bay Times*)

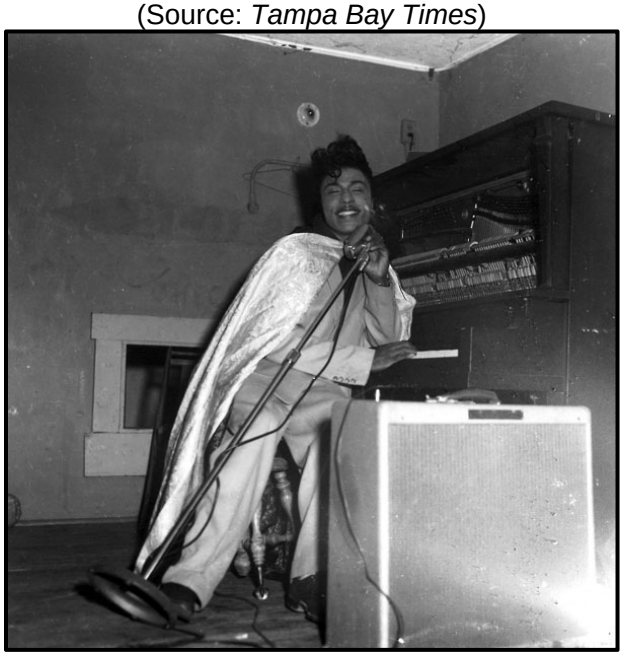

Photo 5-24. Little Richard at the Manhattan Casino (8PI819)
(Source: City of St. Petersburg)

The 22nd Street South community declined precipitously in the 1960s as residents moved away, and businesses closed. The neighborhood suffered further setbacks after construction of I-275 in the 1970s. The Manhattan Casino closed in 1968, but the first floor of the building was used as shops into the 1990s (Peck and Wilson 2008). The City of St. Petersburg designated the building in the local register in 1994, later purchased the Manhattan Casino, and had it renovated in 2005 (City of St. Petersburg n.d.). The renovation removed much historic fabric; however, the Manhattan Casino has retained its integrity of location and design and retains the essential physical features that convey its historic use. Reopened in 2011, the building's second floor is once again an events venue. Today, it is one of the few buildings that remain from the community's heyday.

The Manhattan Casino is eligible for individual listing in the NRHP under Criterion A in the areas of Black Ethnic Heritage and Entertainment/Recreation. It served for 40 years as the focal point of the African-American community in segregated St. Petersburg, and was significant for the renowned musicians who played at the venue. While the SHPO determined the building ineligible for NRHP listing in 2001, the Manhattan Casino has gained increased importance as among the best surviving physical examples of the history and culture of the 22nd Street South African-American community. The Manhattan Casino is not NRHP-eligible as part of a potential historic district. The construction of I-275 cut off the building from the core of the 22nd Street South business district, and vacant lots and new development surround the building.

Photo 5-25. Jordan Park Elementary School (8PI6901) at 2390 9th Ave. S., facing southeast

8PI6901: Jordan Park Elementary School at 2390 9th Ave. S. was built in 1925 to serve the traditionally African-American 22nd Street South community (**Photo 5-25; Figure 5-8**). The two-story, Masonry Vernacular style building is U-shaped. The 1925 portion of the building features a hollow clay tile structural system, a brick façade, and 12/12 DHS windows. The 1948 addition has a steel structural system, brick walls, and 4/4 DHS windows. An open-air arched arcade is on the north

elevation. The original building had 12 classrooms. Twelve more classrooms were added in 1948, and a cafeteria followed in 1952.

Jordan Park Elementary School was the second school built in St. Petersburg exclusively for blacks and is the oldest surviving example. Community education activist George Perkins was the first principal. An estimated 75 percent of the City's African Americans had matriculated at the school before it closed in 1975. It was used as a Head Start Center in the 1990s and was sold to the City of St. Petersburg in 2007. Following renovations, the school is currently a Head Start Program Center.

8PI6901 was first recorded in 1995 by Paryiz Moosavi of the City of St. Petersburg's Planning Department. In 2005, the SHPO determined 8PI6901 individually eligible for NRHP listing under Criterion A in the area of Black Ethnic Heritage. 8PI6901 was updated in 2008 by Renker Eich Park Architects. 8PI6901 has not experienced major exterior changes since it was last recorded, so it was not updated as part of this survey.

5.2.3 Ineligible Resources

There are 293 ineligible historic structures located within the I-275 PD&E Study project APE (**Figures 5-2 through 5-22; Table 5-3)**. Two were previously recorded (8PI10191 and 8PI11113) and not evaluated by the SHPO. The other 291 buildings are newly identified. The architectural styles represented are Frame Vernacular (115), Masonry Vernacular (116), Ranch (30), Industrial Vernacular (11), Craftsman (6), Mid-Century Modern (5), International (3), Tudor Revival (2), Mission (2), Bungalow (1), Colonial Revival (1), and American Foursquare (1). In general, the historic resources are associated with the residential and commercial development of Pinellas County from the 1920s through the mid-1960s. All buildings are typical examples of their respective styles and construction and lack known ties to significant events or people. Instead of descriptive paragraphs for each of the ineligible resources, relevant resource-specific information is summarized in **Table 5-3.** Completed FMSF forms are contained in **Appendix A**. General descriptions and selected examples of the architectural styles represented within the project APE follow.

In addition to these structures, one previously recorded cemetery, the Garden of Peace Cemetery (8PI12010), is located within the project APE. The SHPO determined the cemetery ineligible for listing in the NRHP in 2012. The cemetery has not experienced major changes since it was recorded, and thus, an updated FMSF form was not prepared.

Photo 5-26. The Frame Vernacular style residential building at 3100 22nd St. N. (8PI12365), facing northwest

Photo 5-27. The Frame Vernacular style office building at 14 18th St. S. (8PI12293), facing northeast

Frame Vernacular: A total of 115 historic resources within the project APE are of the Frame Vernacular style **(Photos 5-26 and 5-27)**, and have construction dates that range from the 1920s through the mid-1960s (see **Table 5-3**). Most of these resources are residential buildings. Frame Vernacular buildings reflect the local customs, environment, and building materials, and do not rely

on academic architectural vocabulary for their design and ornament. They are often built by developers, contractors, master carpenters, or the building's occupants. These buildings are decidedly practical structures. Within the APE, this building type has pier, continuous, or slab foundations. Gable roofs are most common, and the majority of the roofs are clad with composition shingles. The majority of these buildings are clad in wood siding or asbestos shingles. Fenestration typically includes SHS windows, but DHS, casements, awning and fixed windows are also present. Exterior ornamentation is minimal, and typically consists of wood window and door surrounds, corner boards, gable vents, and exposed rafter tails. The majority display alterations or additions, such as replacement siding and windows and living-space additions.

Photo 5-28. The Masonry Vernacular style residence at 3159 17th Ave. S (8PI12223), facing north

Photo 5-29. The Masonry Vernacular style nightclub at 1833 1st Ave. S, facing northeast

Photo 5-30. The Masonry Vernacular style church at 1300 Fargo St. S. (8PI12241), facing southeast

Masonry Vernacular: A total of 113 historic resources within the project APE are of the Masonry Vernacular style **(Photos 5-28 through 5-30)**. The majority of these resources are residential buildings with construction dates that range from the 1940s through the 1960s (see **Table 5-3**). Like Frame Vernacular style buildings, Masonry Vernacular style structures are simple structures built with available local materials and boasting little ornamentation. Within the APE, this building type generally has concrete slab foundations and concrete block walls. Roof types consist of gable, flat,

and hip, most of which are clad with composition shingles. The exterior cladding often consists of stucco. Windows typically are awning or SHS. Exterior ornamentation consists mostly of concrete window sills, gable vents, and shutters. Most display replacement windows and roofs, and additions are common.

Photo 5-31. The Ranch style building at 6233 25th St. N. (8PI12474), facing northeast

Ranch: Thirty historic resources within the project APE are of the Ranch style (**Photo 5-31**), and have construction dates from the 1950s through the mid-1960s (see **Table 5-3**). The majority are residential buildings. The style, which gained popularity after World War II, features low-slung buildings and a low-pitched roof with large windows (McAlester and McAlester 1998). Within the APE, this building type has pier, continuous, or slab foundations. Hip and gable roofs are most common, and the majority of the roofs are clad with composition shingles. The majority of these buildings are clad in stucco and brick. Fenestration typically includes awning and SHS windows. Exterior ornamentation is minimal, and typically consists of gable vents and wide roof overhangs. Most display alterations or additions, such as replacement roofs and windows and living-space additions.

Photo 5-32. The Industrial Vernacular style building at 401 19th St. S. (8PI12283), facing southeast

Industrial Vernacular: Eleven historic resources within the project APE are of the Industrial Vernacular style **(Photo 5-32)**, and have construction dates that range from 1946 to 1965 (see **Table 5-3**). The majority are industrial or storage buildings. Similar to Masonry Vernacular and Frame Vernacular style buildings, Industrial Vernacular style structures are simply built with available local materials and display little ornamentation. Within the APE, this building type usually has slab foundations, and gable is the most represented roof type. Most of the building exteriors, as well as the roofs, are clad with metal. Awning metal windows are most common, and exterior ornamentation is minimal. The majority display alterations or additions.

Photo 5-33. The Craftsman style building at 217 18th St. N. (8PI12298), facing northeast

Craftsman: Six historic resources within the project APE are of the Craftsman style (**Photo 5-33**), and have construction dates that range from the 1920s through the 1940s (see **Table 5-3**). The majority of these resources are residential buildings. The Craftsman style gained popularity in the first three decades of the 20th century, and was inspired by both the English Arts and Craft Movement and Asian architecture (McAlester and McAlester 1998). It features low pitched roofs, prominent porches, and wood ornamentation. Within the APE, this building type has pier foundations. Gable roofs are most common, and the majority of the roofs are clad with composition shingles. The majority of these buildings are clad in wood siding. Fenestration typically includes wood DHS windows. Exterior ornamentation features exposed rafter tails, wood braces, and porch supports and columns. The majority display alterations or additions, such as replacement roofs and windows, enclosed porches, and living-space additions.

Photo 5-34. The Mid-Century Modern style building at 3227 16th Ave. S. (8Pl12225), facing northwest

Mid-Century Modern: Four historic resources within the project APE are of the Mid-Century Modern style **(Photo 5-34)**, and have construction dates that range from 1950 through 1962 (see **Table 5-3**). Three of the resources are residential buildings, and one is a dentist's office. Mid-Century Modern buildings are inspired by the International style and feature flat roofs, multiple windows, and minimal ornamentation (McAlester and McAlester 1998). Within the APE, the buildings typically feature slab foundations, flat roofs covered with built-up materials, exterior masonry cladding, and fixed and awning type windows. Exterior ornamentation is minimal, and typically consists of beanpole columns. Most of these buildings display alterations or additions, such as replacement siding and windows and living-space additions.

Photo 5-35. The International style Wildwood Service Center, Building A / 955 26th St. S. (8PI12256), facing southwest

International: Three historic resources, all at Wildwood Service Center (8PI12174), are of the International style **(Photo 5-35)**, and were built ca. 1956 (see **Table 5-3**). The International style was formed after World War I in Europe, and is distinguished by clean lines with unadorned walls (McAlester and McAlester 1998). The International style buildings within the project APE have slab foundations, flat roofs covered with built-up materials, masonry walls, and fixed and grouped windows. Exterior ornamentation includes wide roof overhangs.

Tudor Revival: Two historic resources within the project APE are of the Tudor Revival style **(Photo 5-36).** Both are residential buildings constructed in ca. 1938 and ca. 1940 **(**see **Table 5-3**). The Tudor Revival style was inspired by Medieval architecture and was a popular style for houses in the early 20th century (McAlester and McAlester 1998). The two residences have continuous foundations and gabled roofs clad with composition shingles. They are clad in asbestos and wood shingles, and the windows are DHS. Exterior ornamentation includes faux timber frame and wood window surrounds. Each has a replacement front door.

Photo 5-36. The Tudor Revival style building at 2100 21st Ave. N (8PI12322), facing south

Photo 5-37. The Mission style building at 3155 Oakley Ave. S. (8PI12228), facing northwest

Mission: Two historic resources within the project APE are of the Mission style **(Photo 5-37).** They are both residential buildings constructed ca. 1925 and ca. 1926 (see **Table 5-3**). The Mission style was inspired by Spanish architecture and was particularly popular in Florida in the 1920s (McAlester and McAlester 1998). The two residences are covered with stucco and have continuous foundations and flat roofs clad with built-up materials. Exterior ornamentation features parapet roofs. Both exhibit alterations such as replacement windows, or additions.

Photo 5-38. The Bungalow style building at 2511A 55th Ave. N. (8PI12465), facing north

Bungalow: One historic resource (8PI12465) within the project APE is of the Bungalow style **(Photo 5-38).** This residential building was constructed ca. 1920 (see **Table 5-3**). The Bungalow style is a simpler version of the Craftsman style. This building type has a pier foundation and a poured concrete slab foundation for the garage addition. The gable and shed roofs are clad with composition shingles. The walls are covered with wood and wood siding. Exterior ornamentation includes Doric columns, fixed shutters, a wood door, and window surrounds. Alterations include a new roof, and additions consist of a garage to the east, a room to the west, and a front porch.

Photo 5-39. The Colonial Revival style building at 3150 22nd St. N. (8PI12371), facing southwest

Colonial Revival: One historic resource (8PI12371) within the project APE is of the Colonial Revival style **(Photo 5-39)**. This residence was built ca. 1932 (see **Table 5-3**). The Colonial Revival style was formed in the 1880s when there was a renewed interest in Dutch and Colonial American architecture. The style continues to be built today, and examples often include gable roofs, paired windows, and cupolas (McAlester and McAlester 1998). This building has a concrete block pier foundation. The cross-gabled and shed roofs are clad with composition shingles, and the walls are covered with vinyl siding. Exterior ornamentation includes a cupola on top of the garage, vents in the gable peak, fixed shutters, and a rusticated stone foundation. Alterations include replacement siding, windows, and a new roof; additions include a shed-roofed carport.

Photo 5-40. The American Foursquare style building at 2440 9th Ave. S. (8PI12265), facing southeast

American Foursquare: One historic resource (8PI12265) within the project APE is of the American Foursquare style **(Photo 5-40).** This residence was built ca. 1925 (see **Table 5-3**). The American Foursquare style is distinguished by its boxy design, hip roof, and Craftsman or Prairie style architectural elements (McAlester and McAlester 1998). The example within the APE features a pier foundation, a hip roof clad with composition shingles, and walls are covered with wood siding. Exterior ornamentation includes security bars over some windows, Craftsman style tapered wood columns and brick piers, and exposed rafter tails. Alterations include a replacement windows, a new roof, and a screened porch. A two-story addition with a shed roof is on the south elevation.

Table 5-3. Previously and newly identified historic resources within the APE that are ineligible for NRHP listing

FMSF	Name / Address	Build Date	Style*	Roof type(s)	Alterations	Additions	Exterior fabric	Stories	Windows	Use
8PI10191	833A 22nd St. S	ca. 1940	Masonry Vernacular	Flat	Awning removed	None	Stucco	1	1-light glass fixed	Commercial
8PI11113	625 21st St. N	ca. 1952	Masonry Vernacular	Gable; flat	Front porch enclosed	2nd story; garage to S	Stucco; asbestos shingles	2	4-light fixed metal paired with 4-light casement metal to either side; jalousie metal	Residence
8PI12176	The Wave / 3315 58th Ave. S	ca. 1962	Mid-century Modern	Flat	None	None	Metal	6	3-light awning metal (independent, paired, 3)	Residential
8PI12177	3031 35th Terrace S.	ca. 1956	Ranch	Hip	exterior renovated; roof replaced	None	Stucco	1	1-light fixed metal; 3-light awning metal	Residence
8PI12178	3510 31st St. S	ca. 1956	Ranch	Hip	Windows, roof replaced	Expansion to NE	Concrete block; artbrick, artstone	1	1/1 SHS vinyl	Residence
8PI12179	3096 35th Ave. S	ca. 1956	Ranch	Hip; flat	Roof, some windows replaced	Enclosed porch to E	Concrete block; brick	1	Jalousie metal; 1-light fixed metal; 1/1 SHS vinyl	Residence
8PI12180	3360 31st St. S	ca. 1957	Ranch	Gable	Windows, roof, front door replaced	Unknown	Stucco	1	1/1 sliding vinyl	Residence
8PI12181	2900 Erie St. S	ca. 1958	Masonry Vernacular	Gable; hip	Roof replaced	Porch at S, E elevations; addition to N	Stucco; brick; wood siding	2	Unknown	Residence
8PI12182	2851 31st St. S	ca. 1952	Masonry Vernacular	Cross-gabled	Roof replaced	expansion to N	Concrete block	1	3-light awning metal	Residence
8PI12183	2520 33rd St. S	ca. 1956	Frame Vernacular	Gable	Windows replaced	None	Shingles-asbestos	1	1/1 SHS vinyl (replacement)	Residence

FMSF	Name / Address	Build Date	Style*	Roof type(s)	Alterations	Additions	Exterior fabric	Stories	Windows	Use
8PI12184	2510 33rd St. S	ca. 1956	Ranch	Gable	Windows, roof; hurricane shutters	Room to E	Artbrick, artstone; stucco	1	1/1 sliding vinyl (replacement)	Residence
8PI12185	2500 33rd St. S	ca. 1925	Frame Vernacular	Gable	Windows, roof replaced; porch enclosed	Unknown	Drop siding	1	1/1 SHS vinyl (replacement0	Residence
8PI12186	2501 Erie St. S	ca. 1956	Masonry Vernacular	Hip	Windows, roof replaced	None	Concrete; concrete block	1	6/6 SHS vinyl; 8/8 SHS vinyl	Residence
8PI12187	2444 33rd St. S	ca. 1925	Frame Vernacular	Gable	Roof, siding, windows; porch enclosed	Porch to E	Aluminum	1	1/1 SHS metal (replacement)	Residence

5.2.4 Ineligible Building Complex Resource Groups

There are 13 newly identified ineligible historic building complex resource groups within the I-275 project APE (8PI12172 through 8PI12175; 8PI12269 through 8PI12272; 8PI12274; 8PI12275; and 8PI12354 through 8PI12356) (**Figures 5-2 through 5-22**; **Table 5-4**). These include five residences, and six commercial building complexes, plus one church complex and one school complex. The historic buildings that contribute to the resource groups are associated with the residential and commercial development of Pinellas County from the 1920s through the mid-1960s. All contributing buildings listed below are typical examples of their respective styles and construction. Descriptions of each of the 28 contributing buildings is summarized in **Table 5-3**.

Table 5-4. Ineligible historic building complex resource groups within the APE

FMSF	Name / Address	No. Contrib. Buildings	Build Dates	Style(s)
8PI12172	2424 33rd St. S.	2 (8PI12191 and 8PI12192)	ca. 1940 (8PI12191) ca. 1955 (8PI12192)	Masonry Vernacular (8PI12191 and 8PI12192)
8PI12173	1000 30th St. S.	3 (8PI12250, 8PI12251, 8PI12252)	ca. 1957 (8PI12250); ca. 1953 (8PI12251) ca. 1957 (8PI12252)	Industrial Vernacular (8PI12250, 8PI12251, 8PI12252)
8PI12174	Wildwood Service Center / 955 26th St. S.	4 (8PI12256 through 8PI12259)	ca. 1956 (8PI12256 through 8PI12259)	International (8PI12256, 8PI12257, 8PI12259); Masonry Vernacular (8PI12258)
8PI12175	Word of Life Fellowship Church / 2540 9th Ave. S.	2 (8PI12261 and 8PI12262)	ca. 1946 (8PI12261); ca. 1965 (8PI12262)	Masonry Vernacular (8PI12261 and 8PI12262)
8PI12269	833 22n d St. S.	2 (8PI10191 and 8PI12268)	ca. 1940 (8PI10191); ca. 1947(8PI12268)	Masonry Vernacular (8PI10191 and 8PI12268)
8PI12270	230 19th St. S.	2 (8PI12285 and 8PI12286)	ca. 1953 (8PI12285 and 8PI12286)	Masonry Vernacular (8PI12285); Industrial Vernacular (8PI12286)

8PI12272	1756 Central Ave.	2 (8PI12293 and 8PI12294)	ca. 1923 (8PI12293 and 8PI12294)	Masonry Vernacular (8PI12293 and 8PI12294)
8PI12274	2100 20th Ave. N.	2 (8PI12317 and 8PI12318)	ca. 1957 (8PI12317); ca. 1940 (8PI12318)	Masonry Vernacular (8PI12317); Frame Vernacular (8PI12318);
8PI12275	19th Street South Building Complex	3 (8PI12280 through 8PI12282)	ca. 1924 (8PI12280); ca. 1955 (8PI12281); ca. 1957 (8PI12282)	Masonry Vernacular (8PI12280 through 8PI12282)

FMSF	Name / Address	No. Contrib. Buildings	Build Dates	Style(s)
8PI12354	Silver Lake Mobile Home Resort	None	Not applicable	Not applicable
8PI12355	2222 45th Ave. N.	2 (8PI12247 and 8PI12248)	ca. 1948 (8PI12247); ca. 1959 (8PI12248)	Frame Vernacular (8PI12247); Ranch (8PI12248)
8PI12356	5211 55th Ave. N.	2 (8PI12465 and 8PI12466)	ca. 1920 (8PI12465); ca. 1952 (8PI12466)	Bungalow (8PI12465); Masonry Vernacular (8PI12466)

5.2.5 Insufficient Information

Two newly identified historic resources have insufficient information for an evaluation of NRHP eligibility: the Mt. Moriah Primitive Baptist Church (8PI12276) and a segment of the Orange Belt Railway/CSX Railroad (8PI12273). A description of each follows, and FMSF forms are contained in **Appendix A**.

Photo 5-41. The Mt. Moriah Primitive Baptist Church (8PI12276) at 809 Union St. S., facing northeast

8PI12276: The Mt. Moriah Primitive Baptist Church (8PI12276) is a Masonry Vernacular style building that was constructed ca. 1940 at 809 Union St. S. in the 22nd Street South neighborhood (Dubov 2014) (**Photo 5-41; Figure 5-8**). It is one block north of 9th Avenue South. The building has been used by the same congregation since its construction.

The rectangular, one-story building rests on a continuous concrete block foundation. The addition to the west is on a concrete slab foundation. The concrete block walls are covered with stucco. The gable roofs are covered with composition shingles and built-up materials. Fenestration includes four-

light awning metal, three-light awning metal (addition), and 1/1 SHS metal (replacement) windows. Ornamentation includes wood window surrounds and a stucco cross on the east elevation.

The first influx of African-Americans in St. Petersburg occurred during construction of the Orange Belt Railway (8PI12273) in the late 1880s. They formed the Pepper Town, Methodist Town, and Gas Plant settlements near downtown (Peck and Wilson 2006). The 22nd Street South community developed in the 1920s when black residents in segregated St. Petersburg were violently pressured to move farther from downtown. They formed their own community in what was then wilderness. Many of the black newcomers who relocated to St. Petersburg during the Florida Land Boom settled in the neighborhood. The 22nd Street South neighborhood gradually became the center of African-American life in St. Petersburg during segregation. A number of enterprises, many owned by African-Americans, were built along 22nd Street South that included stores, restaurants, professional services, and entertainment venues (City of St. Petersburg 2014). In 1960, the neighborhood peaked with 111 businesses (Peck and Wilson 2006).

The community's churches were located on 9th Avenue South in a variety of structures, ranging from small storefronts to large worship spaces. Seven major black denominations were represented in the neighborhood. In 1951, nearly 20 percent of the churches in St. Petersburg were located in the 22nd Street South neighborhood. The churches played a large part in the "moral and social development of the neighborhood" (City of St. Petersburg 2014). Schools, civic groups, and social clubs were also located along the avenue. The community thrived into the early 1960s when many residents, no longer bound by segregation, moved elsewhere. A number of the buildings along 9th Avenue South, west of 22nd Street South, were razed during I-275 construction in the 1970s. Today, approximately 10 historic church buildings are located along the 9th Avenue South corridor. They include Stewart Memorial Christian Methodist Episcopal Church, Elim Seventh Day Adventist Church, Mount Zion Primitive Baptist Church, 20th Street Church of Christ, Queen Street Church of God in Christ, Greater Mount Zion African Methodist Episcopal Church, and Mount Zion Progressive Missionary Baptist (City of St. Petersburg 2014). 8PI12276, built ca. 1940, is one of the oldest. Efforts to reach out to the church, including a visit to the Dr. Carter G. Woodson African American Museum in St. Petersburg, were unsuccessful.

Mt. Moriah Primitive Baptist Church is an important component of the 22nd Street South neighborhood. The neighborhood was the center of St. Petersburg's black population during segregation, and its churches were a large part of African-American life. Despite two additions, the construction of I-275 nearby, and the demolition of many surrounding buildings, 8PI12276 has retained its integrity of location, design, materials, workmanship, and association. It is still used as a worship space by the same congregation that constructed the building ca. 1940.

8PI12276 appears to lack individual distinction in terms of its eligibility for listing in the NRHP for its significant associations with persons or events, or for its architectural style. However, it may be considered potentially eligible for listing in the NRHP as a contributing resource to a potential 9th Avenue South corridor churches thematic historic district significant under Criterion A in the area of Black Ethnic Heritage for its important role in the 22nd Street South community. However, since such a thematic historic district has not yet been defined, there is insufficient information to make an NRHP eligibility determination for the Mt. Moriah Primitive Baptist Church within its appropriate historic context.

Photo 5-42. The Orange Belt Railway/CSX Railroad (8PI12273) where it crosses underneath I-275 within the APE

8PI12273: An approximately 700-foot-long segment of the Orange Belt Railway/CSX Railroad is located within the I-275 project APE (**Photo 5-42**). The triple track is standard gauge and includes replacement metal rails, wood ties, and rock bed. It passes beneath the elevated I-275 and is still in use today.

The Orange Belt Railway (8PI12273) was critical to the development of St. Petersburg. The community was a backwater before the arrival of the railroad in 1888 when the narrow gauge railroad, which was the longest of its kind in the United States, was extended from Central Florida in a collaborative venture between Florida developer Hamilton Disston and the Orange Belt's syndicate, led by Peter Demens. The railroad led to the development of a number of towns along its route, including Tarpon Springs, Dunedin, and Clearwater. St. Petersburg, where the railroad terminated on a wharf, also benefited from the Orange Belt's arrival as shipping firms and other businesses relocated there from Disston City, now known as Gulfport. The railroad also brought passengers to St. Petersburg, which had fewer than 50 residents before the Orange Belt's arrival. That number quintupled by 1890 (Arsenault 1996).

Plagued by financial difficulties, Demens sold the Orange Belt one year after it reached St. Petersburg. The railroad went into receivership in 1893, and was renamed the Sanford and St. Petersburg Railroad. Henry Plant assumed control of the line in 1895, and the track became part of the Savannah, Florida, and Western (Hensley 1999). The Atlantic Coast Line (ACL) purchased the former Orange Belt in 1902 and converted the tracks to standard gauge from St. Petersburg north to Trilby in Pasco County (Turner 2008). The ACL also built new facilities and provided better service in St. Petersburg (Turner 2008).

The first Pullman car from New York City arrived in St. Petersburg in 1909, and the first train carrying tourists from the Midwest arrived in St. Petersburg on January 13, 1913. The ACL carried many more visitors to St. Petersburg in the decades that followed (Deese 2006). The railroad was the only track to reach St. Petersburg until the Tampa and Gulf Coast Railroad was completed in 1914

(Prince 2000). The ACL and the Seaboard Air Line Railroad united in 1967 to create the Seaboard Air Coast Line. That company became the CSX Corporation after a 1986 merger (Turner 2008).

The Orange Belt Railway played a crucial role in St. Petersburg's development. However, only a short segment of the railroad is within the project APE, so there is insufficient information to determine the NRHP eligibility of the entire railroad.

5.3 Conclusions and Recommendations

Background research indicated that four previously recorded archaeological sites, 8PI901, 8PI902, 8PI1212, and 8PI1258, are located, at least in part, within the I-275 project APE; all are within Segment B. All were recorded as having undergone major disturbance/destruction. No evidence of these sites was found as the result of field survey, and all are presumed destroyed, as contained within the existing I-275 ROW. The evaluation of each site, as contained outside the APE, was beyond the scope of this project. Therefore, there is insufficient information to determine the potential NRHP eligibility of 8PI901 and 8PI902, since most of each site area is situated outside the project APE. Both 8PI1212 and 8PI1258, mostly contained within the project APE, are considered ineligible for listing in the NRHP due to the loss of physical integrity.

Historical/architectural field survey resulted in the identification of 325 extant historic resources within the project APE, including 19 previously recorded and 306 newly identified. This total includes 309 structures, 13 building complex resource groups, one historic district, one railroad, and one cemetery. Of these, 16 are listed, eligible, or considered potentially eligible for listing in the NRHP. Field survey also revealed that 10 previously recorded historic resources are no longer extant.

Among the significant historic resources located within the I-275 project APE is the Kenwood Historic District (8PI11176), which was listed in the NRHP in 2003. It is considered significant under Criterion A in the area of Community Planning and Development and under Criterion C in the area of Architecture. Ten previously identified contributing resources (8PI6929, 8PI7256, 8PI7272, 8PI7410, 8PI7502, 8PI7837, 8PI7839, 8PI7970, 8PI11102, and 8PI11108) are located within the I-275 project APE. Field survey indicated that one previously recorded historic resource (8PI6956) situated adjacent to the boundaries of the Kenwood Historic District, but not originally included, appears to be potentially eligible as a contributing resource to a revised Kenwood Historic District. This building meets the period of significance and designation criteria established for this district, and if the boundary is expanded to include this parcel, it could potentially be considered a contributing structure in the district. It is not, however, considered individually NRHP-eligible.

The Jordan Park Elementary School (8PI6901) at 2390 9th Avenue South was determined NRHP-eligible by the SHPO in 2005. This Masonry Vernacular style building, constructed in 1925, is considered significant under Criterion A in the area of Ethnic Heritage.

Finally, three historic resources are considered potentially eligible for listing in the NRHP. The Norwood School (8PI714) at 2154 27th Avenue North is a Mediterranean Revival style building constructed in 1925. It is considered significant under Criterion A in the areas of Education and Community Planning and Development, and under Criterion C in the area of Architecture. Papa's Dream (8PI726) at 1850 Central Avenue is a Mediterranean Revival style building constructed in 1925. It is considered potentially eligible under Criterion A in the area of Entertainment/Recreation and under Criterion C in the area of Architecture. The Manhattan Casino (8PI819) at 642 22nd

Street South is a Masonry Vernacular style building constructed in 1925. It is considered significant under Criterion A in the area of Black Ethnic Heritage.

There is insufficient information to determine the eligibility of two historic resources: the Mt. Moriah Primitive Baptist Church (8PI12276) and the Orange Belt Railway/CSX Railroad (8PI12273). 8PI12276 may be potentially eligible as a contributor to a potential 9th Avenue South churches thematic historic district since there are approximately nine additional historic churches along this corridor outside the project APE. However, since no such thematic district has yet been defined and the majority of these resources are outside the APE, there is currently not enough information to evaluate the NRHP eligibility of the Mt. Moriah Primitive Baptist Church. At this time, it is not considered individually eligible. Because only a short segment is located within the project APE, there is insufficient information to determine the NRHP eligibility of the Orange Belt Railway/CSX Railroad (8PI12273).

The 307 other historic structures and building complex resource groups are not considered potentially eligible for NRHP listing due to their commonality of style and lack of significant historical associations to persons or events.

CONTINUATION SHEET

Narrative Description

The Norwood School (8PI714) is a two-story, irregularly-shaped building at 2154 27th Ave. N. The Mediterranean Revival style building was constructed in 1925. It was first recorded in 1978 by Doug Davies and Margaret Nuccio of the City of St. Petersburg. The recorders did not evaluate its eligibility for listing in the NRHP and it was not evaluated by the SHPO (FMSF 2014). The FMSF form was updated as part of the current survey.

In 1885, the Ward School was the first to be constructed in what is now known as St. Petersburg. The sparsely populated area was little more than a backwater before the Orange Belt Railroad arrived in 1888. In 1886, a school was built in Disston City, now known as Gulfport where English immigrant Arthur Norwood was a teacher. St. Petersburg grew slowly in the following decades, and schools were built periodically.

St. Petersburg's development began to uptick in the 1910s. After a brief drop off during World War I, the city's growth reached a pinnacle in the 1920s during the Florida Land Boom. St. Petersburg's population went from 4,127 people in 1910 to more than 30,000 by 1926. The influx of new residents and tourists often arrived by automobile, recently made affordable to the masses, and lived in the tent city campgrounds that sprung up throughout the city. They were nicknamed tin can tourists because they often ate canned food cooked over campfires (Arsenault 1996). The boom period resulted in the construction of a number of residences, infrastructure projects, and new businesses. Moreover, 19 public schools were built in St. Petersburg alone during this period. Approximately half of the original school buildings remain.

The Norwood School was a product of this critical period in St. Petersburg's development. The school was preceded in 1922 by the Pine City School. That school was a one-room wooden building built at 29th Avenue North and Union Street to serve the children of the Pine City Tourist Camp, a tin can tourist community of vehicles and tents. The school's name was retained when the existing replacement was built two blocks south in 1925. The new four room brick school was built for $38,000 by the Eric Clauson Construction Company. The school, which had kindergarten through sixth-grade students, only had 24 pupils when it opened, but the student body increased quickly thereafter (PCSBPI 1962). Sete Reiss was the first teacher (SBPC 1987).

In 1927, The Louis Fleisher Construction Company of St. Petersburg added six rooms, a chimney, an auditorium, and a cafeteria for $31,950. The expanded school was renamed for Norwood, a longtime St. Petersburg teacher, merchant, and civic leader who was chairman of the school board at the time (*St. Petersburg Times* 1927; PCSBPI 1962). Other additions were completed ca. 1955 to the west and northeast, and another to the southwest was completed ca. 1965 (PALMM 1951; PALMM 1957; PALMM 1970).

The school was a focal point of the neighborhood, and the Norwood Parent-Teacher Association was active. Immediately after World War II, students bought stamps that could be exchanged for savings bonds. Events included a Halloween carnival and May Day celebration. (SBPC 1987).

I-275 was rerouted to avoid the school in the early 1970s, and an overpass was built across the interstate. Yet Norwood was still slated for demolition in the mid-1970s because of its poor condition and lack of air conditioning (*The Evening Independent* 1973a; Phelps 1974). The school eventually was renovated in the mid-1980s (Norton 1989). Norwood closed in May 1997, because it was too small and lacked the land necessary to expand. The property temporarily housed the students and staff of Lakewood Elementary until November 1998. After that, Norwood was used as an alternative high school to educate students suspended from regular Pinellas County high schools (Oppel 1998). The building closed ca. 2008 and is now vacant.

The concrete spread footing and concrete slab foundations support the brick walls. The dark brown bricks are laid in a garden wall bond with a header and stretcher alternating in one row and three stretchers and a header in the next row. The bricks are laid in a soldier bond both above windows and below arched openings. The gable roof on the original building and the shed roof of the porch on the 1927 wing are covered in replacement composition shingles. Built-up materials cover the gable roof on the 1927 wing, the gable roof on the ca. 1955 addition, and all the flat roof additions.

The original windows were replaced ca. 2000. Window types include 3/3 double-hung sash (DHS) vinyl; 6/6 DHS vinyl; one-light fixed vinyl; two-light fixed vinyl; 2/2 DHS vinyl; one-light hopper vinyl; and 5/5 DHS metal. Further, some window spaces have been completely and partially filled, and others have been boarded up.

The main entrance is on the north elevation of the original portion. Three arched openings are decorated with columns, Corinthian capitals, and concrete quoining, which mimics stone. An incised, one-story entry porch is located past the arches. Entry into the building is gained through a pair of wood doors, each of which includes a rectangular light covered with metal screens. The doors are flanked by side lights and a 24-light fixed window above. The perimeter of the entryway is decorated by concrete quoining, also meant to look like stone. Three-light fixed vinyl windows and air conditioning units are located to either side of the entryway. The walls within the open entry porch are covered with stucco.

The south elevation of the original portion and the west elevation of the 1927 wing include a two-story incised open porch. The first floor contains arched openings that have been screened. The second story has arched openings with columns. The classroom entrances are located within.

Brick chimneys are on the south and west elevations. A decorative tower is located on the north elevation and includes a gable roof and arched openings. Other ornamentation includes eyebrow vents, exposed rafter tails, parapet roofs, arched windows, a concrete water table, and concrete window sills.

The school and grounds encompass an entire block bounded by 27th Avenue North to the north, I-275 to the west, 26th Avenue North to the south, and 22nd Street North to the west. A grass lawn is on the north elevation, and to the south is an asphalt parking lot, which includes the painted lines of an oval track. An overpass across I-275 is to the northeast.

Explanation of Evaluation

The setting near the Norwood School has been affected by the construction of the elevated I-275, which is approximately 150 feet to the east. Still, the school has retained much of its integrity from its historic period of significance, 1925-1965. It is in the same location, and the additions and alterations are compatible with the original Mediterranean Revival style design and utilize similar materials and workmanship. For example, the original brick bond was matched on the additions, and the replacement windows and roof are similar to those they replaced. Though vacant, the building also still conveys the feeling of a Florida Land Boom era school and is one of approximately 10 surviving examples in St. Petersburg from the period. It also was important to the surrounding residential neighborhood during its years as an elementary school.

Thus, based on its significance and historic integrity, the Norwood School is potentially eligible for individual listing in the NRHP under Criterion A in the areas of education and community planning and development for its role in the Florida Land Boom and subsequent significance to neighborhood life in north St. Petersburg. It is also potentially eligible under Criterion C in the area of architecture as a good example of a Mediterranean Revival style school building. It is not potentially eligible as part of a historic district.

CONTINUATION SHEET

Narrative Description

The two-story, Mediterranean Revival style building at 1850 Central Ave. was built in 1925. The rectangular building rests on a slab foundation. The brick walls are predominately covered with stucco. The dome roof is covered with composition shingles and composition roll. A one-light fixed arched window is present, but most windows have been blocked in. Ornamentation includes a parapet roof, circular vents, and brick geometric patterns and window surrounds. A flat awning extends the length of the north elevation. The original marquee, tile-covered parapets, and ticket window have been removed or enclosed. The building is in fair condition. 8PI726 was first recorded in 1978 by Doug Davies and Margaret Nuccio of the City of St. Petersburg. The recorders did not evaluate its eligibility for listing in the NRHP, and it was not evaluated by the SHPO (FMSF 2014). The FMSF form was updated as part of the current survey.

8PI726 was built in 1925 during the height of the Florida Land Boom. St. Petersburg, like many areas of Florida, experienced a period of rapid development after World War I. A number of recreational and entertainment venues were built in the city during the 1920s to meet the growing demand for leisure activities for both tourists and residents. It is located in the Grand Central District, a commercial district of St. Petersburg west of downtown that catered to the year-round population in Kenwood and other nearby neighborhoods. The area began to be developed shortly before World War I, and a trolley track extended down Central Avenue to reach the residential area to the west (Danner 2014).

The building originated as the Patio Theater, a roofless movie house built by Southern Theaters (*St. Petersburg Times* 1928). Work on the Patio began on May 20, 1925, and the theater opened July 13. Southern Theaters President Anthony Shimko paid about $30,000 to build the Patio (*The Evening Independent* 1926).

8PI726 was a product of the movie palace movement. Thomas Edison created the modern motion picture in 1896 with his Vitascope machine. These soundless, moving pictures often played in makeshift theaters with piano accompaniment. Businessmen recognized the marketability of these shows to the middle class and began to build theaters exclusively to play movies. Beginning with New York's Regent Theatre in 1913, palatial theaters were designed to suspend reality for moviegoers by evoking a romantic foreign setting. European villages, Egyptian tombs, and Mayan temples were among the themes for theaters constructed during this period. The extravagant facades were often colorful and grand in scale. Brightly lit marquees and signs beckoned above the glass-box ticket window at the entrance. The design theme continued past the doors into the lobby and plush seating area beyond. From 1915 to 1945, about 4,000 movie theaters were constructed on Main Streets throughout the United States. The movie palace trend began to wane in the late 1920s as movie production values suffered, and new theaters constructed thereafter often were much less grandiose. The birth of the drive-in theater in the 1930s effectively ended the movie palace era (Margolies and Gwathmey 1991).

8PI726 was built in the Mediterranean Revival style, the most popular architectural theme during the Florida Land Boom. The whimsical style was inspired by Italian, Spanish, and Moorish architecture and featured arches, parapets, tile roofs, and stucco walls. The Patio featured a ravenswood screen. The perimeter walls were decorated in a Spanish motif and included a balcony. The 1,250 wood seats were varnished to rebuff rainwater. The theater was built of brick, hollow tile, and stucco and was claimed to be fireproof (*The Evening Independent* 1926; Ormsby 1981).

City boosters in the 1920s bragged about St. Petersburg's climate and many leisure activities, and the Patio aligned with their message. The Patio was the third open-air theater to open in the city, after the Airdome and Capitol theaters. 8PI726 is the only of the three still in existence. But the open-air theater concept was short-lived in St. Petersburg. Moviegoers found the insects and rain uncomfortable (Hartzell 2002). After a devastating hurricane in 1926, the Patio was enclosed by a domed steel roof. Also at that

time, the walls were plastered; seating was increased; and a stage with orchestra pit were added to attract staged shows (*St. Petersburg Times* 1928).

The theater's new ceiling was described in a 1928 *St. Petersburg Times* article:

> The great domed ceiling is perforated with myriads of tiny lights arranged to give the effect of the sky on a starry night. Across the stars clouds move slowly and the effect is something that must be seen to be appreciated.

The interior was cooled by a ventilating system (*The Evening Independent* 1928). Manager A.C. Thornton played comedies, cartoons, newsreels, and serials. Attendees could see two movies for 25 cents during the 1930s (Hartzell 2002).

The building was redecorated in 1935 and became the Playhouse Theatre. The first play shown in the newly branded space, headed by theater producer Raymond Moore, was Noel Coward's *Hay Fever* (*The Evening Independent* 1935). The independent theater also showed second-run movies and held amateur contests (*St. Petersburg Times* 1947). Only white people were allowed to patronize the theater until September 1963 when it was among the first theaters in St. Petersburg to be desegregated (*St. Petersburg Times* 1963). The Playhouse began to show exclusively pornography films in 1969 before it closed in June 1973 (*The Evening Independent* 1973b).

In September 1973, the building became Papa's Dream, a Christian nightclub for teens opened by Fred Langston (Wasel 1979). In the 1980s, 8PI726 was home to the Golden Apple Dinner Theatre and then the Encore Dinner Theatre. In more recent years, the building has been the Extra Innings Café and Concert Central. As of this writing, the building is vacant and for sale. The building has retained its interior integrity and includes balconies and a painted ceiling, despite a fire on the roof ca. 2007 (Danner 2014). 8PI726 is the oldest extant building in St. Petersburg originally designed as a movie theater.

Explanation of Evaluation

8PI726 was built during an important time in St. Petersburg and Florida's history in a style that defined the Florida Land Boom. While the building undoubtedly attracted winter visitors who could travel by trolley from downtown, the theater was patronized primarily by year-round residents who lived in the neighborhoods near the Grand Central District. It is the only surviving former open-air theater in St. Petersburg and the oldest surviving building originally designed as a movie theater in the city. The building has undergone alterations, but has retained its integrity of location, design, materials, workmanship. The interior also has retained some of its historic appearance from its period of significance, 1926-1965.

8PI726 appears to be potentially eligible for listing on the National Register of Historic Places (NRHP) under Criterion A for its importance to St. Petersburg's entertainment history. The building is also potentially eligible for NRHP listing under Criterion C for its architecture as an example of a Mediterranean Revival style atmospheric movie theater. It is not potentially eligible as a contributor to a historic district.

CONTINUATION SHEET

Narrative Description

The Manhattan Casino (8PI819) was constructed ca. 1925 at 642 22nd St. S. and renovated ca. 2005. The two-story, Masonry Vernacular style rectangular building measures 12,658 square feet (Dubov 2014). It rests on a concrete slab foundation. The concrete block walls are covered with stucco. The six-bay building is distinguished by its pilasters and raised rectangular decorative patterns on the south elevation below the parapet roof. The roof is covered with built-up materials. There are six entrances on the ground floor of the west elevation. All have metal framed glass swing doors (ca. 2005), one-light fixed metal framed windows (ca. 2005), and one-light fixed glass transoms (ca. 2005). Many units also possess metal-framed sidelights (ca. 2005). A flat-roofed canopy (ca. 2005) extends the length of the west elevation. Paired 1/1 DHS metal windows (ca. 2005) are on the second floor. A two-story addition was built to the north ca. 2005.

8PI819 was first recorded in 1978 by Doug Davies and Margaret Nuccio of the City of St. Petersburg. The recorders did not evaluate its eligibility for listing in the NRHP, and it was not evaluated by the SHPO (FMSF 2014). The FMSF form for 8PI819 was updated in 2000 as part of the Architectural / Historical Survey of the 22nd Street South Corridor for the City of St. Petersburg by Stevenson Architects. The recorders denoted the building was not eligible for listing individually but was potentially eligible for NRHP listing as part of a district. SHPO determined the building ineligible for NRHP listing in 2001 (FMSF 2014). The FMSF form was updated as part of the current survey.

The Manhattan Casino was the centerpiece of African-American social life during segregation in St. Petersburg's 22nd Street South neighborhood. The first influx of African Africans in St. Petersburg occurred during construction of the Orange Belt Railway (8PI12273) in the late 1880s. They formed the Pepper Town, Methodist Town, and Gas Plant settlements near downtown (Peck and Wilson 2006). The 22nd Street South community developed in the 1920s when black residents in segregated St. Petersburg were violently pressured to move farther from downtown. They formed their 22nd Street South residential area in what was then wilderness. Many of the black newcomers who relocated to St. Petersburg during the Florida Land Boom settled in the neighborhood. A number of enterprises, many owned by African-Americans, were built along 22nd Street South that included stores, restaurants, professional services, and entertainment venues, such as the Manhattan Casino (City of St. Petersburg 2014). In 1960, the neighborhood peaked with 111 businesses (Peck and Wilson 2006).

In about 1925, Elder Jordan Sr., a black developer, paid $125,000 to construct the Manhattan Casino, located on the neighborhood's main thoroughfare. The bottom floor spaces contained over the years a post office, barber shop, grocery store, and drugstore (Champlain et. al. 1978). The building took its place as the social center for the community beginning in 1931 when the Jordan Dance Hall opened on the second floor. The venue later was renamed the Manhattan Casino. It was nicknamed "Home of the Happy Feet" and "Gem of 22nd Street." To enter the ballroom, patrons purchased tickets at the ticket window on the first floor before climbing up wood steps that led to the open room at the top. The dance floor was made of oak, and a stage and backstage were located at the south end of the room. The ceiling was low, and benches lined the wall (Peck and Wilson 2008).

The Manhattan Casino regularly hosted both local and national musical acts who played jazz, big band, gospel, and rhythm and blues. It was a stop on the Chitlin Circuit, an informal collection of nightclubs frequented by black musicians, and a number of internationally acclaimed performers graced the stage, including Louis Armstrong, Ella Fitzgerald, Duke Ellington, B.B. King, Cab Calloway, Ray Charles, Fats Domino, and Little Richard. Also, a young James Brown performed in residency every Thursday and Saturday before he went on to stardom. Residents of all ages attended the events, and those who could not get in often stood outside to hear what was going on upstairs. In addition to live music, the room also hosted dances, teas, and proms for nearby Gibbs High School. Locals associated with the Manhattan

included promoters such as teacher George Grogan and radio personality Goldie Thompson, who brought gospel singers to the Manhattan (Peck and Wilson 2008).

The 22nd Street South community declined precipitously in the 1960s as a number of residents moved away, and businesses closed. The neighborhood suffered further setbacks after construction of I-275 in the 1970s. The Manhattan Casino closed in 1968, but the first floor of the building was used as shops into the 1990s (Peck and Wilson 2008). Today it is one of the few buildings that remain from the community's heyday. The City of St. Petersburg locally designated the building in 1994 and later purchased the Manhattan Casino and had it renovated (City of St. Petersburg n.d.). Reopened in 2011, the building's second floor is once again an events venue.

Explanation of Evaluation

The city long ago recognized the Manhattan Casino's importance and in 1995 listed the building in the local register and had the building renovated in 2005. The renovation removed much historic fabric; however, the Manhattan Casino has retained its integrity of location and design.

The Manhattan Casino is eligible for individual listing in the National Register of Historic Places (NRHP) under Criterion A in the area of black ethnic heritage African American history as the focal point of the African American community in segregated St. Petersburg. It is also significant under entertainment for the renowned musicians who played at the venue. While the SHPO determined the building ineligible for NRHP listing in 2001, the Manhattan Casino has gained increased importance as more research has been completed. It is one of the few buildings in its proximity to survive. Though important for its historic significance, the Manhattan Casino lacks the integrity to be listed in the NRHP for its architecture. The Manhattan Casino is not eligible for listing as part of a potential historic district. The construction of I-275 cut off the building from the core of the 22nd Street South business district, and vacant lots and new development surround the building.

CONTINUATION SHEET

Narrative Description

8PI10191 at 833A 22nd St. S. was constructed ca. 1940 along the main thoroughfare in the traditionally African-American 22nd Street South community. It housed 22nd Street Package, a liquor store, from ca. 1940 to ca. 1975.

The first influx of African Africans in St. Petersburg occurred during construction of the Orange Belt Railway (8PI12273) in the late 1880s. They formed the Pepper Town, Methodist Town, and Gas Plant settlements near downtown (Peck and Wilson 2006). The 22nd Street South community developed in the 1920s when black residents in segregated St. Petersburg were violently pressured to move farther from downtown. They formed their own community in what was then wilderness. Many of the black newcomers who relocated to St. Petersburg during the Florida Land Boom settled in the neighborhood. The 22nd Street South neighborhood became the center of African-American life in St. Petersburg during segregation. A number of enterprises, many owned by African-Americans, were built along 22nd Street South that included stores, restaurants, professional services, and entertainment venues, such as the Manhattan Casino (8PI819) (City of St. Petersburg 2014). In 1960, the neighborhood peaked with 111 businesses. A number of residents moved away in the 1960s as segregation came to an end. Crime increased in the following decades, further exacerbated by the construction of I-275 in the 1970s when a number of buildings were demolished and residents were displaced (Peck and Wilson 2006).

8PI10191 was previously recorded in 2000 as part of the Architectural / Historical Survey of the 22nd Street South Corridor for the City of St. Petersburg by Stevenson Architects. The recorder denoted that the building was ineligible for NRHP listing, both individually and as part of a district, and wrote: "Structure has been substantially altered storefront closed in, altering character defining features of the building." 8PI10191 was not evaluated by SHPO.

Explanation of Evaluation

8PI10191 served as a business in the 22nd Street South neighborhood during segregation. However, the building served a utilitarian purpose and is of a common design and construction. Alterations, the construction of I-275, and the demolitions of nearby structures have destroyed the building's integrity of setting, design, materials, workmanship, and feeling. Thus, 8PI10191 does not appear to be eligible for NRHP listing, either individually or as part a district.

RESOURCE GROUP FORM
FLORIDA MASTER SITE FILE
Version 4.0 1/07

Site # PI11176
Field Date 9-3-2014
Form Date 10-22-2014
Recorder# _____

NOTE: Use this form to document districts, landscapes, building complexes and linear resources as described in the box below. Cultural resources contributing to the Resource Group should also be documented individually at the Site File. **Do not use this form for National Register multiple property submissions** (MPSs). National Register MPSs are treated as Site File manuscripts and are associated to the individual resources included under the MPS cover using the Site File manuscript number.

Check ONE box that best describes the Resource Group:

- ☒ **Historic district** (NR category "district"): buildings and NR structures only: NO archaeological sites
- ☐ **Archaeological district** (NR category "district"): archaeological sites only: NO buildings or NR structures
- ☐ **Mixed district** (NR category "district"): includes more than one type of cultural resource (example: archaeological sites and buildings)
- ☐ **Building complex** (NR category usually "building(s)"): multiple buildings in close spatial and functional association
- ☐ **Designed historic landscape** (NR category usually "district" or "site"): can include multiple resources (see *National Register Bulletin #18*, page 2 for more detailed definition and examples: e.g. parks, golf courses, campuses, resorts, etc.)
- ☐ **Rural historic landscape** (NR category usually "district" or "site"): can include multiple resources and resources not formally designed (see *National Register Bulletin #30, Guidelines for Evaluating and Documenting Rural Historic Landscapes* for more detailed definition and examples: e.g. farmsteads, fish camps, lumber camps, traditional ceremonial sites, etc.)
- ☐ **Linear resource** (NR category usually "structure"): Linear resources are a special type of rural historic landscape and can include canals, railways, roads, etc.

CONTINUATION SHEET

Narrative Description

The Kenwood Historic District (8PI11176) was initially surveyed in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen). A second survey was completed in 2002 as part of the Kenwood Historic District National Register of Historic Places Registration Form (Uguccioni and Stewart 2003). 8PI11176 was listed in the NRHP in 2003 under Criterion A for Community Planning and Development and under Criterion C for Architecture. It is a largely intact collection of early 20th century architecture in one of the first suburban areas of St. Petersburg to be developed. The period of significance was 1913 to 1953. When listed, the district had 2,204 contributing resources and 178 noncontributing resources within its boundaries, which extended from about I-275 to the east, 1st Avenue North to the south, 34th Street North to the west, and 9th Avenue South to the north. The 375-acre district includes examples of the Frame Vernacular, Masonry Vernacular, Craftsman Bungalow, Minimal Traditional, Tudor Revival, Mediterranean Revival, Colonial Revival, Ranch, Prairie, American Foursquare, Dutch Colonial Revival, Mission, and International styles. The district is mostly residential and also has five churches, 29 commercial buildings, a school, and a park (FMSF).

The proposed expanded boundary for the updated Kenwood Historic District (8PI11176) includes the addition of one building adjacent to the district's eastern boundary along 19th Street between 1st and 2nd Avenues N., and west of I-275 (8PI06956). The proposed expansion to the district's eastern boundary is based on the identification of this previously recorded building that meets the district's designation criteria and owing to its location, contiguous to the existing district boundary as listed. The district's period of significance would not be revised, and remains from 1913 to 1953. It was beyond the scope of this CRAS to update the entire district, and only historic structures within the current project APE were evaluated.

Ten buildings (8PI6929, 8PI7256, 8PI7272, 8PI7410, 8PI7502, 8PI7837, 8PI7839, 8PI7970, 8PI11102, 8PI11108) within this boundary, as contained within the I-275 Managed Lanes APE, are previously recorded and are contributors to the NRHP-listed Kenwood Historic District.

8PI6929: The Minimal Traditional style residence at 1905 2nd Ave. N. was built ca. 1936 (Dubov 2014). The irregularly shaped, one story building rests on concrete block piers. The wood frame walls are covered with wood siding and drop siding. The gable roof is covered with composition shingles, and the flat roof addition is covered with built-up materials. Fenestration includes a fanlight (addition); 1/1 SHS metal (addition); and 6/6 DHS wood windows. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176). It is not considered individually eligible for NRHP listing.

8PI6956: The Frame Vernacular style residence at 1846 2nd Ave. N. was built ca. 1921 (Dubov 2014). The irregularly shaped, two-story building rests on concrete block and brick foundation. The gable roof is covered with composition shingles. Fenestration includes 1/1 DHS wood and 1/1 SHS vinyl (replacement) windows. Ancillary features include a two-story garage/apartment with drop siding, gable roof with composition shingles, brick chimney, and exposed eaves. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen). The FMSF form was updated as part of the current survey. This building has retained its integrity and could be considered a potential contributing resource to the NRHP-listed Kenwood Historic District (8PI11176) should the district's boundaries be expanded to include this parcel. It is not individually eligible for NRHP listing.

8PI7256: The Frame Vernacular style residence at 2001 Dartmouth Ave. N. was built ca. 1940 (Dubov 2014). The irregularly shaped, one-story building rests on a continuous concrete block foundation. The wood frame walls are covered with vinyl siding. The cross-gabled roof is covered with composition shingles. Fenestration includes 1/1 SHS vinyl and one-light fixed vinyl windows. This building was

originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176). It is not considered individually eligible for NRHP listing.

8PI7272: The Craftsman style residence at 1911 Burlington Ave. N. was constructed ca. 1925 (Dubov 2014). The rectangular, one-story building rests on a concrete block pier foundation, which supports the wood frame walls, covered with wood siding, wood, and stucco. The cross-gabled roof is covered with composition shingles. Fenestration includes 1/1 DHS wood; 6/1 DHS wood; nine-light casement wood; and three-light awning hopper windows. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176). It is not considered individually eligible for NRHP listing.

8PI7410: The Bungalow style building at 7105 7th Ave. N. was constructed ca. 1932 (Dubov 2014). The irregularly shaped, one-story building rests on concrete block pier foundations, which supports the wood frame walls covered with asbestos shingles. The cross-gabled, flat, and shed roofs are covered with composition shingles. Fenestration includes 3/1 DHS vinyl (replacement) windows. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176). It is not considered individually eligible for NRHP listing.

8PI7502: The Bungalow style building at 2101 8th Ave. N. was built ca. 1938 (Dubov 2014). The rectangular, one-story building rests on a concrete block pier foundation, which supports the wood frame walls covered with asbestos shingles. The gable roof is covered with composition shingles. Fenestration includes three-light awning metal windows. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176). It is not considered individually eligible for NRHP listing.

8PI7837: The Craftsman style residence at 1936 3rd Ave. N. was built ca. 1925 (Dubov 2014). The one-story, rectangular building rests on a concrete block pier foundation, which supports the wood frame walls covered with asbestos shingles, wood, and stucco. The gable roof is covered with composition shingles. Fenestration includes three-light awning metal and 1/1 DHS wood windows. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176). It is not considered individually eligible for NRHP listing.

8PI7839: The Frame Vernacular style residence at 1931 3rd Ave. N. was built ca. 1925 (Dubov 2014). The rectangular, two-story building rests on a poured concrete slab foundation, which supports the wood frame walls covered with brick and asbestos shingles. The gable roof is covered with composition shingles. Fenestration includes three-light awning metal (replacement) and four-light casement metal (replacement) windows. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen). The FMSF form was updated as part of the current survey. This building is a contributing resource to the NRHP-listed Kenwood Historic District (8PI11176). It is not considered individually eligible for NRHP listing.

8PI7970: The Frame Vernacular style apartments at 1960 4th Ave. N. was built ca. 1925 (Dubov 2014). The rectangular, two-story building rests on a brick pier foundation, which supports the wood frame walls covered with asbestos shingles. The flat roof is covered with built-up materials. Fenestration includes 4/1 DHS wood and 1/1 SHS vinyl (replacement) windows. Ancillary features include a ca. 1925, two-story garage apartment at 331 20th St. N. with gable roof and wood drop siding walls. This building was originally recorded in 1995 as part of the St. Petersburg Neighborhood Survey, Phase III, Kenwood (Kitchen). The FMSF form was updated as part of the current survey. This building is a contributing

resource to the NRHP-listed Kenwood Historic District (8PI11176). It is not considered individually eligible for NRHP listing.

8PI11102: The Masonry Vernacular style residence at 230 19th St. N. was built ca. 1948 (Dubov 2014). The irregularly shaped, one-story building rests on a continuous concrete block foundation, which supports the concrete block walls portions of which are covered with artbrick and stucco. The cross-gabled roof is covered with composition shingles. Fenestration includes 1/1 SHS vinyl (replacement); one-light fixed metal; and four-light casement metal windows. This building originally was recorded in 2002 as part of the Kenwood Historic District National Register of Historic Places Registration Form (Uguccioni and Stewart 2003). Its FMSF form was updated as part of this survey. This building is contributing to the NRHP- listed Kenwood Historic District (8PI11176). It is not considered individually eligible for NRHP listing.

8PI11108: The Frame Vernacular style duplex at 430 20th St. N. was built ca. 1945 (Dubov 2014). The continuous concrete block foundation supports the wood frame walls, which are covered with wood siding and wood. The cross-gabled roof is covered with composition shingles. Fenestration includes 1/1 DHS wood windows. Ancillary features include a two-story garage with apartment to the south that matches the main house in design and materials. The ancillary building has a gable roof and wood siding walls with wood trim in gables. This building originally was recorded in 2002 as part of the Kenwood Historic District National Register of Historic Places Registration Form (Uguccioni and Stewart 2003). Its FMSF form was updated as part of this survey. This building is contributing to the NRHP- listed Kenwood Historic District (8PI11176). It is not considered individually eligible for NRHP listing.

Form Date 9-11-2014
Recorder# _____

NOTE: Use this form to document districts, landscapes, building complexes and linear resources as described in the box below. Cultural resources contributing to the Resource Group should also be documented individually at the Site File. **Do not use this form for National Register multiple property submissions** (MPSs). National Register MPSs are treated as Site File manuscripts and are associated to the individual resources included under the MPS cover using the Site File manuscript number.

Check ONE box that best describes the Resource Group:

- ☐ **Historic district** (NR category "district"): buildings and NR structures only: NO archaeological sites
- ☐ **Archaeological district** (NR category "district"): archaeological sites only: NO buildings or NR structures
- ☐ **Mixed district** (NR category "district"): includes more than one type of cultural resource (example: archaeological sites and buildings)
- ☒ **Building complex** (NR category usually "building(s)"): multiple buildings in close spatial and functional association
- ☐ **Designed historic landscape** (NR category usually "district" or "site"): can include multiple resources (see *National Register Bulletin #18*, page 2 for more detailed definition and examples: e.g. parks, golf courses, campuses, resorts, etc.)
- ☐ **Rural historic landscape** (NR category usually "district" or "site"): can include multiple resources and resources not formally designed (see *National Register Bulletin #30, Guidelines for Evaluating and Documenting Rural Historic Landscapes* for more detailed definition and examples: e.g. farmsteads, fish camps, lumber camps, traditional ceremonial sites, etc.)
- ☐ **Linear resource** (NR category usually "structure"): Linear resources are a special type of rural historic landscape and can include canals, railways, roads, etc.

CONTINUATION SHEET

Narrative Description

The 2424 33rd St. S. building complex resource group includes two Masonry Vernacular style buildings, 8PI12191 and 8PI12192.

Building A (8PI12191) was constructed ca. 1940 (Dubov 2014). It is a vacant residence. The one story, irregularly shaped building is on a continuous brick foundation, which supports the brick walls. The cross gabled roofs are covered with composition shingles, and the flat roofs are covered with built-up materials. The windows are boarded up. Ornamentation includes decorative security bars over windows; decorative porch supports; vents in gables; and a metal awning over front porch. The main entrance is located on the west elevation and includes a wood paneled door within the open entry porch. The porch has a flat roof and metal awning and decorative porch supports. The building is in fair condition.

Building B (8PI12192) was constructed ca. 1955 (Dubov 2014). It is a vacant residence. The one story, rectangular building is on a continuous brick foundation, which supports the brick walls. The gable roof is covered with composition shingles. Fenestration includes two-light awning metal and 1/1 SHS metal. One window has been boarded up. Ornamentation includes decorative security bars over windows; decorative metalwork shutters; and a wide roof overhang. The main entrance is located on the east elevation and includes a wood paneled door. The building is in good condition.

CONTINUATION SHEET

Narrative Description

The 1000 30th St. S. building complex resource group includes Industrial Vernacular style three buildings, 8PI12250 through 8PI12252.

Building A (8PI12250) was constructed ca. 1957 (Dubov 2014). The one story, irregularly shaped warehouse building is on a continuous concrete block foundation. The frame is a steel skeleton, covered with metal. The gabled roofs are covered with corrugated metal. Ornamentation includes large downspout between gables and vents. The main entrance is located on the north elevation and includes a sliding metal door.

Building B (8PI12251) was constructed ca. 1955 (Dubov 2014). The one story, irregularly shaped warehouse and commercial building is on a continuous concrete block foundation. The frame is a steel skeleton, covered with metal. An addition has a concrete slab foundation and concrete block walls. The gabled and shed roofs are covered with corrugated metal. The flat roofs are covered with built-up materials. Ornamentation includes large downspout between gables, vents, and concrete window sills. The main entrance is located on the west elevation and includes double wood doors with lights covered by a concrete canopy. Fenestration includes 1/1 single-hung sash metal windows.

Building C (8PI12252) was constructed ca. 1957 (Dubov 2014). The one story, rectangular storage building is on a concrete slab foundation. The wood frame is covered with metal. The shed roof is covered with corrugated metal. The main entrance is located on the west elevation and includes a sliding metal door.

CONTINUATION SHEET

Narrative Description

The Wildwood Service Center originated as the Wildwood Elementary School when it opened in 1956 (*St. Petersburg Times* 1956b). Four buildings (8PI12256 through 8PI12259) contribute to the Wildwood Service Center building complex resource group at 955 26th St. S. Building E., a ca. 1966 building on the parcel, is noncontributing.

The school is located in the 22nd Street South neighborhood. The first influx of African Africans in St. Petersburg occurred during construction of the Orange Belt Railway (8PI12273) in the late 1880s. They formed the Pepper Town, Methodist Town, and Gas Plant settlements near downtown (Peck and Wilson 2006). The 22nd Street South community developed in the 1920s when black residents in segregated St. Petersburg were violently pressured to move farther from downtown. They formed their own community in what was then wilderness. Many of the black newcomers who relocated to St. Petersburg during the Florida Land Boom settled in the neighborhood. The 22nd Street South neighborhood became the center of African-American life in St. Petersburg during segregation. A number of enterprises, many owned by African-Americans, were built along 22nd Street South that included stores, restaurants, professional services, and entertainment venues, such as the Manhattan Casino (8PI819) (City of St. Petersburg 2014). Children matriculated at Wildwood and Jordan elementaries and Gibbs High School. A number of residents moved away in the 1960s as segregation came to an end. Crime increased in the following decades, further exacerbated by the construction of I-275 in the 1970s when a number of buildings were demolished, including a wing of Wildwood, and residents were displaced (Peck and Wilson 2006).

Wildwood Elementary was designed by Pinellas County schools architect Dale Dykema using the same design as Azalea Elementary School (Rogers 1954). Louis Brown served as the first principal at the school, which had 12 classrooms, a library, a cafeteria, and offices (*St. Petersburg Times* 1956a). The segregated school was entirely comprised of African American students until at least 1967 (*The Evening Independent* 1967). Pinellas County schools integrated in 1971 (Michaels 2012). The school's northernmost wing was demolished ca. 1977 to build an I-275 ramp, and the school closed that year (Mullane 1977; PAIRS 1979). The complex reopened in 1984 as a Florida Health and Rehabilitative Services center (*The Evening Independent* 1984). Today it is utilized by the Florida Department of Juvenile Justice as a probation and community corrections facility.

Building A (8PI12256) was constructed ca. 1956. The one story International style school building is irregularly shaped. The concrete slab foundation supports the concrete block walls, some of which are covered with brick and stucco. The flat roof is covered with built-up materials and features a parapet. Fenestration includes one-light fixed metal (banded) windows. Other ornamentation includes wide roof overhangs and partition walls. The main entrance contains two metal-framed glass swing doors on the east elevation with one-light fixed metal sidelights and transoms. The entrance is within an open entry porch covered by a wide roof overhang. A second open entry porch is on the south elevation and also is covered by a wide roof overhang. Some windows have been blocked in.

Building B (8PI12257) was constructed ca. 1956. The one story International style school building is irregularly shaped. The concrete slab foundation supports the concrete block walls, covered with brick and stucco. The flat roof is covered with built-up materials and features a parapet. Fenestration includes one-light fixed metal (banded) and four-light awning metal windows placed at approximately 45-degree angles and recessed. Other ornamentation includes wide roof overhangs and beanpole supports. The main entrance is on the west elevation within an open entry porch. Some windows have been blocked in.

Building C (8PI12258) was constructed ca. 1956. The one story Masonry Vernacular style school building is rectangular shaped. The concrete slab foundation supports the concrete block walls, some of with care covered with brick and concrete. The flat roof is covered with built-up materials. Fenestration includes one-light fixed metal (banded) windows. Ornamentation includes metal partition screen walls on

the north elevation; wing walls; wide roof overhangs. There are multiple main entrances on the south elevation within the open entry porch. Some windows have been blocked in.

Building D (8PI12259) was constructed ca. 1956. The one story International style school building is rectangular shaped. The concrete slab foundation supports the concrete block walls, some of with care covered with brick and stucco. The flat roof is covered with built-up materials. Fenestration includes one-light fixed metal windows, both independent and banded. Ornamentation includes a decorative metal screen wall on the north elevation; wing walls; wide roof overhangs; and concrete window sills. There are multiple main entrances on the north elevation. An open entry porch is also on the north elevation, covered by a wide roof overhang. Some windows have been blocked in, and a addition was built the length of the south elevation.

Explanation of Evaluation

The buildings contained within the resource group are of a common design and construction. They were constructed for and initially utilized exclusively by African Americans in the segregated 22nd Street South neighborhood. However, the school has lost its historic integrity from that period. Each building has undergone alterations, and an entire wing of the original school was demolished in the mid-1970s to construct an I-275 on-ramp. Thus, 8PI12174 is not eligible for NRHP listing, individually or as part of a district. The Jordan Park Elementary (8PI6901), an older example of a formerly segregated school located two blocks to the east, is listed on both the St. Petersburg and National Register of Historic Places.

CONTINUATION SHEET

Narrative Description

The Word of Life Fellowship Church building complex resource group at 2540 9th Ave. S. includes two Masonry Vernacular style buildings, 8PI12261 and 8PI12262.

The first influx of African Africans in St. Petersburg occurred during construction of the Orange Belt Railway (8PI12273) in the late 1880s. They formed the Pepper Town, Methodist Town, and Gas Plant settlements near downtown (Peck and Wilson 2006). The 22nd Street South community developed in the 1920s when black residents in segregated St. Petersburg were violently pressured to move farther from downtown. They formed their own community in what was then wilderness. Many of the black newcomers who relocated to St. Petersburg during the Florida Land Boom settled in the neighborhood. The 22nd Street South neighborhood gradually became the center of African-American life in St. Petersburg during segregation. A number of enterprises, many owned by African-Americans, were built along 22nd Street South that included stores, restaurants, professional services, and entertainment venues (City of St. Petersburg 2014). In 1960, the neighborhood peaked with 111 businesses (Peck and Wilson 2006).

Meanwhile, the community's churches were located on 9th Avenue South. In 1939, nearly 20 percent of the churches in St. Petersburg were located in the 22nd Street South neighborhood. The churches played a large part in the "moral and social development of the neighborhood" (City of St. Petersburg 2014). Schools, civic groups, and social clubs were also located along the avenue. The community thrived into the early 1960s when many residents, no longer bound by segregation, moved elsewhere. A number of the buildings on the north side of 9th Avenue South west of 22nd Street South were razed during I-275 construction in the 1970s. Today, approximately 10 historic church buildings, including 8PI12175, are located along the 9th Avenue South corridor (City of St. Petersburg 2014).

Building A (8PI12261) was constructed ca. 1946 (Dubov 2014). It likely originated as a residence before it was expanded and converted into the Pleasant Grove M.B. Church ca. 1971. It became the Word of Life Fellowship Church at an unknown date. The one story, Masonry Vernacular style building is rectangular shaped. The continuous concrete foundation supports the wood frame walls, which are clad with brick. The gable and hip roofs are covered with replacement composition shingles, and the flat roof is covered with built-up materials. Fenestration includes one-light fixed wood windows. The main entrance is located on the north elevation and includes paired metal-framed glass swing doors. A covered drive addition is located on the east elevation and has a flat roof. Ornamentation includes vents in the gables; decorative security bars over windows; a three-story steeple; stucco quoining; and concrete sills.

Building B (8PI12262) was constructed ca. 1965 (Dubov 2014). The one story, Masonry Vernacular style church building is irregularly shaped. The concrete slab foundation supports the concrete block walls, portions of which are coved with brick. The flat roof is covered with built-up materials. Fenestration includes three-light awning metal windows. There are multiple entrances on the north, south, and west elevations. Each includes a metal-framed glass door. Some are covered by flat extensions, while the others are covered by fabric awnings. Other ornamentation includes concrete window sills; decorative metalwork security bars; and wide roof overhangs. A door has been enclosed, an addition was completed to the east ca. 1976.

Explanation of Evaluation

This building complex resource group contains buildings that either did not exist (8PI12262) or were not used in their current capacity (8PI12261) when the 22nd Street South neighborhood was at its peak before the end of segregation. Further, the buildings are of a common design and construction. Thus, 8PI12175 is not considered potentially eligible for NRHP listing, either individually or as part of potential historic district.

CONTINUATION SHEET

Narrative Description

The Wave originated as the 130-unit Southgate Towers when it opened in 1962. It is distinguished by its curvilinear design. Southgate Towers were a product of the high rise residential building boom St. Petersburg experienced beginning in the 1960s. In 1950, apartments comprised 10 percent of new residential construction in the city. By 1969, 60 percent of new housing in the city was apartments.

The boom was aided by the proliferation of air conditioning; the increased price of land; and advantageous mortgage default guarantees for developers that allowed them to borrow up to 90 percent of a project's value without financial risk. Like Southgate Towers, the apartments were often built in locations that lacked stores and other services nearby (Fuller 1972).

Southgate Towers was originally a cooperative. This meant that purchasers only had to pay a small down payment and monthly fee rather than the full price for a unit. The mortgages were backed by Section 213 of the National Housing Act. The P.J. Callaghan Co. built the residences. The project was sponsored by Callaghan, Abe Goldman, Joe Putnam, and J.R. Elliot, collectively known as the Southgate Towers, Inc. The Southgate Towers were supposed to be comprised of two towers that mirrored each other in appearance and were separated by a swimming pool and courtyard in the middle (*The Evening Independent* 1961). Only the south tower was constructed.

The co-op failed to attract enough buyers, and the federal government took ownership of the Southgate Towers in 1964 and converted the building into rental apartments. The government had to assume about $2 million in overdue mortgages (Cox 1964). Other failed St. Petersburg developments built with federal mortgage support include Sky Harbour, Plaza Fifth Avenue, Paradise Island Towers, and Pasadena Co-Op. All still exist (Fuller 1972).

Southgate Towers was renamed Skyview Point ca. 1990. In 2004, the building converted into condos and is now known as The Wave (Bond 2004).

Explanation of Evaluation

8PI12176 was a product of a high rise residential building boom in St. Petersburg. A number of projects were built during this period, and 8PI12176 was not the first. At least four other developments took advantage of federal co-op mortgage backing and failed. All appear to remain in existence under a different form of occupancy. Thus, 8PI12176 lacks the significance to local history to be listed in the National Register of Historic Places (NRHP). It is also not associated with people of historic importance. Finally, while 8PI12176 has a unique exterior plan, it lacks the architectural significance for listing in the NRHP. It is also of a common construction.

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

1. Community planning & development 3. _____ 5. _____

2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

1. Community planning & development 3. _____ 5. _____

2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.
Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

Structural System(s): 1. Concrete block 2. _____ 3. _____
Foundation Type(s): 1. Continuous 2. _____
Foundation Material(s): 1. Concrete Block 2. _____
Main Entrance (stylistic details) 2 wood doors with fanlights on W elevation under gable extension

Porch Descriptions (types, locations, roof types, etc.) _____

Condition (overall resource condition): ☐excellent ☒good ☐fair ☐deteriorated ☐ruinous
Narrative Description of Resource _____

Archaeological Remains _____ ☐Check if Archaeological Form Completed

RESEARCH METHODS (check all that apply)

☒FMSF record search (sites/surveys)	☐library research	☐building permits	☐Sanborn maps
☐FL State Archives/photo collection	☐city directory	☐occupant/owner interview	☐plat maps
☒property appraiser / tax records	☐newspaper files	☐neighbor interview	☐Public Lands Survey (DEP)
☒cultural resource survey (CRAS)	☐historic photos	☐interior inspection	☐HABS/HAER record search

☐other methods (describe) _____
Bibliographic References (give FMSF manuscript # if relevant, use continuation sheet if needed) _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

1. Community planning & development 3. _____ 5. _____

2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and and lacks historic distinction. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

CONTINUATION SHEET

Narrative Description

8PI12268 at 833B 22nd St. S. was constructed ca. 1947 along the main thoroughfare in the traditionally African-American 22nd Street South community. It likely originated as an expansion of the 22nd Street Package, a liquor store open from ca. 1940 to ca. 1975, before it became its own unit. The building likely housed Hargrow's Shoe Repair in 1962 (*St. Petersburg Times* 2002).

The first influx of African Africans in St. Petersburg occurred during construction of the Orange Belt Railway (8PI12273) in the late 1880s. They formed the Pepper Town, Methodist Town, and Gas Plant settlements near downtown (Peck and Wilson 2006). The 22nd Street South community developed in the 1920s when black residents in segregated St. Petersburg were violently pressured to move farther from downtown. They formed their own community in what was then wilderness. Many of the black newcomers who relocated to St. Petersburg during the Florida Land Boom settled in the neighborhood. The 22nd Street South neighborhood became the center of African-American life in St. Petersburg during segregation. A number of enterprises, many owned by African-Americans, were built along 22nd Street South that included stores, restaurants, professional services, and entertainment venues, such as the Manhattan Casino (8PI819) (City of St. Petersburg 2014). In 1960, the neighborhood peaked with 111 businesses. A number of residents moved away in the 1960s as segregation came to an end. Crime increased in the following decades, further exacerbated by the construction of I-275 in the 1970s when a number of buildings were demolished and residents were displaced (Peck and Wilson 2006).

Explanation of Evaluation

8PI12268 served as a business in the 22nd Street South neighborhood during segregation. However, the building served a utilitarian purpose and is of a common design and construction. Alterations, the construction of I-275, and the demolitions of nearby structures have destroyed the building's integrity of setting, design, materials, workmanship, and feeling. Thus, 8PI12268 does not appear to be eligible for NRHP listing, either individually or as part a district.

CONTINUATION SHEET

Narrative Description

The 833 22nd St. S. building complex resource group includes 8PI10191 and 8PI12268. The Masonry Vernacular style buildings are located in the traditionally black 22nd Street South neighborhood.

The first influx of African Africans in St. Petersburg occurred during construction of the Orange Belt Railway (8PI12273) in the late 1880s. They formed the Pepper Town, Methodist Town, and Gas Plant settlements near downtown (Peck and Wilson 2006). The 22nd Street South community developed in the 1920s when black residents in segregated St. Petersburg were violently pressured to move farther from downtown. They formed their own community in what was then wilderness. Many of the black newcomers who relocated to St. Petersburg during the Florida Land Boom settled in the neighborhood. The 22nd Street South neighborhood became the center of African-American life in St. Petersburg during segregation. A number of enterprises, many owned by African-Americans, were built along 22nd Street South that included stores, restaurants, professional services, and entertainment venues, such as the Manhattan Casino (8PI819) (City of St. Petersburg 2014). In 1960, the neighborhood peaked with 111 businesses. A number of residents moved away in the 1960s as segregation came to an end. Crime increased in the following decades, further exacerbated by the construction of I-275 in the 1970s when a number of buildings were demolished and residents were displaced (Peck and Wilson 2006).

833A 22nd St. S. (8PI10191) was constructed ca. 1940 (Dubov 2014). It served as a liquor store known as the 22nd Street Package Store from ca. 1945 to ca. 1975 (Martin 2010). The one-story, rectangular commercial building rests on a concrete slab foundation. The masonry walls are covered with stucco. The flat roof is covered with built-up materials. Fenestration includes one-light fixed metal windows. Ornamentation includes stucco banding, keystones, and window, door surrounds; parapet roof; vents below roof line; pilasters; and bars inside of windows and door. The main entrance consists of a metal-framed glass door at the southeast corner.

833B 22nd St. S. (8PI12268) was constructed ca. 1947 (Dubov 2014). It was Hargrow's Shoe Repair ca. 1962 (*St. Petersburg Times* 2002). The one-story, rectangular commercial building rests on a concrete slab foundation. The masonry walls are covered with stucco. The flat roof is covered with built-up materials. Fenestration includes one-light fixed metal windows. Ornamentation includes stucco banding; parapet roof; and pilasters. The main entrance consists of a metal-framed glass door on the east elevation.

Explanation of Evaluation

8PI10191 and 8PI12268 at 833 22nd St. S. housed businesses that served the 22nd Street South neighborhood, the prime business district that catered to African Americans during St. Petersburg's period of racial segregation. However, the buildings served a utilitarian purpose and are of a common design and construction. Alterations, the construction of I-275, and the demolitions of nearby structures have destroyed the buildings' integrity of setting, design, materials, workmanship, and feeling. Thus, 8PI12269 does not appear to be eligible for NRHP listing, either individually or as part a district.

CONTINUATION SHEET

Narrative Description

The 230 19th St. S. building complex resource group includes two buildings, 8PI12285 and 8PI12286.

Building A (8PI12285) was constructed ca. 1953 (Dubov 2014). The one-story, Masonry Vernacular style storage and office building is L-shaped. The concrete slab foundation supports the concrete block walls, some of which was clad with stucco ca. 2012. The flat roof is covered in built-up materials. Fenestration includes replacement one-light fixed metal windows. The main entrance includes a glass door with sidelight on the south elevation with awning. Ornamentation includes a wide roof overhang; an awning over main entrance; and a parapet roof.

Building B (8PI12286) was constructed ca. 1953 (Dubov 2014). The one story, Industrial Vernacular style storage building is rectangular shaped. The continuous concrete block foundation supports the concrete walls with metal panel infill. The flat roof is covered with built-up materials. A ca. 2000 is attached to the north.

Recorder# _____

NOTE: Use this form to document districts, landscapes, building complexes and linear resources as described in the box below. Cultural resources contributing to the Resource Group should also be documented individually at the Site File. **Do not use this form for National Register multiple property submissions** (MPSs). National Register MPSs are treated as Site File manuscripts and are associated to the individual resources included under the MPS cover using the Site File manuscript number.

Check ONE box that best describes the Resource Group:

- ☐ **Historic district** (NR category "district"): buildings and NR structures only: NO archaeological sites
- ☐ **Archaeological district** (NR category "district"): archaeological sites only: NO buildings or NR structures
- ☐ **Mixed district** (NR category "district"): includes more than one type of cultural resource (example: archaeological sites and buildings)
- ☒ **Building complex** (NR category usually "building(s)"): multiple buildings in close spatial and functional association
- ☐ **Designed historic landscape** (NR category usually "district" or "site"): can include multiple resources (see *National Register Bulletin #18*, page 2 for more detailed definition and examples: e.g. parks, golf courses, campuses, resorts, etc.)
- ☐ **Rural historic landscape** (NR category usually "district" or "site"): can include multiple resources and resources not formally designed (see *National Register Bulletin #30, Guidelines for Evaluating and Documenting Rural Historic Landscapes* for more detailed definition and examples: e.g. farmsteads, fish camps, lumber camps, traditional ceremonial sites, etc.)
- ☐ **Linear resource** (NR category usually "structure"): Linear resources are a special type of rural historic landscape and can include canals, railways, roads, etc.

CONTINUATION SHEET

Narrative Description

The 20 18th St. S. building complex resource group includes two buildings, 8PI12291 and 8PI12292.

20A 18th St. S. (8PI12291) was constructed ca. 1920 (Dubov 2014). It originated as a residence before it was converted into apartments and commercial. The two-story, Frame Vernacular style building is irregularly shaped. The concrete block pier foundation supports the wood frame walls, which are clad with wood siding. The gable, flat, and shed roofs are covered with replacement metal shingles. Fenestration includes one-light fixed metal; four-light metal awning; and 1/1 single-hung vinyl (replacement) windows. The main entrance is located on the west elevation and is covered by a shed roof. Ornamentation includes exposed rafter tails; window surrounds; and vents in gable peaks. Additions include one-story to the south and rooms to north and south.

20B 18th St. S. (8PI12292) was constructed ca. 1920 (Dubov 2014). The one story, Frame Vernacular style storage building is irregularly shaped. It originated as a residence. The pier foundation supports the wood-frame walls, which are covered with drop siding and plywood. The gable roofs are covered with replacement corrugated metal. Fenestration includes one-light fixed wood and two-light fixed wood windows. The main entrance is on the north elevation and includes an outer screen door. Ornamentation includes wood window surrounds and cornerboards and vents in gable peaks. The roof has been replaced, and a porch to the northwest has been enclosed. Additions include a garage to the west and a shed roof to the south.

CONTINUATION SHEET

Narrative Description

The 1756 Central Ave. building complex resource group includes two buildings, 8PI12293 and 8PI12294.

The building at 14 18th St. S. (8PI12293) was constructed ca. 1923 (Dubov 2014). The two-story, Masonry Vernacular style commercial and office building is irregularly shaped. It likely originally included offices. The concrete slab foundation supports the masonry walls, which are covered with replacement stucco. The gable roof is covered with replacement composition shingles. Fenestration includes one-light fixed metal (replacement); 1/1 SHS metal; 1/1 sliding metal (replacement); and glass block (replacement) windows. There are three main entrances on the west elevation within the open entry porch, which is covered by a flat awning on the west elevation. Ornamentation includes concrete window sills; vents in gable; and a flat awning on the west elevation. An additions was constructed to the northeast.

The building at 1756 Central Ave. (8PI12294) was constructed ca. 1923 (Dubov 2014). The one-story, Masonry Vernacular style building is rectangular shaped. It contains two business spaces. The concrete slab foundation supports the masonry walls, covered in stucco. The flat roof is covered in built-up materials. Fenestration includes one-light fixed metal (replacement) and three-light fixed metal (replacement) windows. The main entrance includes a metal-framed glass door on the north elevation and paired metal-framed glass doors on north elevations. Ornamentation includes a decorative parapet on the north elevation and decorative geometric stucco patterns under roofline.

CONTINUATION SHEET

Narrative Description

An approximately 700-foot-long segment of the Orange Belt Railway/CSX Railroad is located within the APE. The triple track is standard gauge and includes replacement metal rails, wood ties, and rock bed. It passes beneath the elevated I-275 and is still used by freight cars.

The Orange Belt Railway (8PI12273) was critical to the development of St. Petersburg. The community was a backwater before the arrival of the railroad in 1888 when the narrow gauge railroad, which was the longest of its kind in the United States, was extended from Central Florida in a collaborative venture between Florida developer Hamilton Disston and the Orange Belt's syndicate, led by Peter Demens.

The railroad led to the development of a number of towns along its route, including Tarpon Springs, Dunedin, and Clearwater. St. Petersburg, where the railroad terminated on a wharf, also benefited from the Orange Belt's arrival as shipping firms and other businesses relocated there from Disston City, now known as Gulfport. The railroad also brought passengers to the by then booming outpost, named after Demens' Russian city of birth. St. Petersburg had fewer than 50 residents before the Orange Belt's arrival, and that number quintupled by 1890 (Arsenault 1996).

The Orange Belt was plagued by financial issues, and Demens sold it a year after it reached St. Petersburg. It went into receivership in 1893 and was renamed the Sanford and St. Petersburg Railroad. Railroad magnate Henry Plant assumed control of the railroad in 1895 and the track became part of the Savannah, Florida, and Western (Hensley 1999). The Atlantic Coast Line (ACL) purchased the former Orange Belt in 1902 and converted the tracks to standard gauge from St. Petersburg north to Trilby in Pasco County (Turner 2008). The ACL also built new facilities and provided better service in St. Petersburg (Turner 2008).

The first Pullman car from New York City arrived in St. Petersburg in 1909, and the first train carrying tourists from the Midwest arrived in St. Petersburg on January 13, 1913. The ACL carried many more visitors to St. Petersburg in the decades that followed (Deese 2006).

The railroad was the only track to reach St. Petersburg until the Tampa and Gulf Coast Railroad was completed in 1914 (Prince 2000). The ACL and the Seaboard Air Line Railroad united in 1967 to create the Seaboard Air Coast Line. That company became the CSX Corporation after a 1986 merger (Turner 2008).

Explanation of Evaluation

The Orange Belt Railway played a crucial role in St. Petersburg's development. But only a short segment of the railroad is within the APE, so there is insufficient information to determine the NRHP eligibility of the entire railroad. Project improvements will be no direct impacts on the railroad, so there will be no adverse effect on this resource.

CONTINUATION SHEET

Narrative Description

The building complex resource group at 2100 20th Ave. N. includes two buildings, 8PI12317 and 8PI12318.

The building at 1850 21st Ave. N. (8PI12317) was constructed ca. 1959 (Dubov 2014). The one story, Masonry Vernacular style residential building is irregularly shaped. The continuous concrete block foundation supports the concrete block walls with plywood in the gables. The gable roof is covered with composition shingles. The flat roofed shed additions on the east elevation are covered with corrugated metal. Ornamentation includes concrete window sills. The main entrance is a wood door located within the open entry porch on the east elevation.

The building at 2100 20th Ave. N. (8PI12318) was constructed ca. 1940 (Dubov 2014). The one-story, Frame Vernacular style residential building is irregularly shaped. The continuous concrete block foundation supports the wood-frame walls, which are clad in asbestos shingles. The gable roofs are covered with composition shingles. Windows include 2/2 single-hung sash metal. Ornamentation includes vents in the gables. The main entrance includes a wood door with a decorative metalwork outer door within the open entry porch on the north elevation. The porch has a shed roof. A nonhistoric shed is to south.

NOTE: Use this form to document districts, landscapes, building complexes and linear resources as described in the box below. Cultural resources contributing to the Resource Group should also be documented individually at the Site File. **Do not use this form for National Register multiple property submissions** (MPSs). National Register MPSs are treated as Site File manuscripts and are associated to the individual resources included under the MPS cover using the Site File manuscript number.

Check ONE box that best describes the Resource Group:

- ☐ **Historic district** (NR category "district"): buildings and NR structures only: NO archaeological sites
- ☐ **Archaeological district** (NR category "district"): archaeological sites only: NO buildings or NR structures
- ☐ **Mixed district** (NR category "district"): includes more than one type of cultural resource (example: archaeological sites and buildings)
- ☒ **Building complex** (NR category usually "building(s)"): multiple buildings in close spatial and functional association
- ☐ **Designed historic landscape** (NR category usually "district" or "site"): can include multiple resources (see *National Register Bulletin #18*, page 2 for more detailed definition and examples: e.g. parks, golf courses, campuses, resorts, etc.)
- ☐ **Rural historic landscape** (NR category usually "district" or "site"): can include multiple resources and resources not formally designed (see *National Register Bulletin #30, Guidelines for Evaluating and Documenting Rural Historic Landscapes* for more detailed definition and examples: e.g. farmsteads, fish camps, lumber camps, traditional ceremonial sites, etc.)
- ☐ **Linear resource** (NR category usually "structure"): Linear resources are a special type of rural historic landscape and can include canals, railways, roads, etc.

CONTINUATION SHEET

Narrative Description

The 19th Street South building complex resource group includes three buildings, 8PI12280 through 8PI12282.

The building at 1911 5th Avenue South (8PI12280) was constructed ca. 1924 (Dubov 2014). The two story, Masonry Vernacular style warehouse building is rectangular shaped. The concrete slab foundation supports the concrete structural system with concrete block and brick walls. The flat roof is covered with built-up materials. A gable roof addition portion is covered with built-up materials. Fenestration includes 1/1 SHS vinyl (replacement) windows. The main entrance consists of a metal door with light covered by a fabric awning addition. Ornamentation includes concrete window sills; parapet roof; and the fabric awning over the main entrance. Other alterations include the enclosure of loading bays.

The building at 439 19th St. S. (8PI12281) was constructed ca. 1955 (Dubov 2014). The one story, Masonry Vernacular style warehouse building is rectangular shaped. The concrete slab foundation supports the concrete block walls. The flat roof is covered with built-up materials. The main entrance consists of a nine-light wood door with decorative metalwork security outer door on the east elevation covered by a shed awning addition. Ornamentation includes vents and a parapet roof.

The building at 411 19th St. S. (8PI12282) was constructed ca. 1957 (Dubov 2014). The one story, Masonry Vernacular style commercial building is irregular shaped. The concrete slab foundation supports the masonry walls, portions of which are covered with stucco. The flat roof is covered with built-up materials. Fenestration includes one-light fixed metal. Alterations include the exterior fabric and entrance. Additions include an expansion to the north. Ornamentation includes rolling doors over windows and a wide roof overhang.

CONTINUATION SHEET

Narrative Description

The Mt. Moriah Primitive Baptist Church (8PI12276) is a Masonry Vernacular style building that was constructed ca. 1940 at 809 Union St. S. in the 22nd Street South neighborhood (Dubov 2014). It is one block north of 9th Avenue South. The building has been used by the same congregation since its construction.

The rectangular, one-story building rests on a continuous concrete block foundation. The addition to the west is on a concrete slab foundation. The concrete block walls are covered with stucco. The gable roofs are covered with composition shingles and built-up materials. Fenestration includes four-light awning metal; three-light awning metal (addition); and 1/1 SHS metal (replacement) windows. Ornamentation includes wood window surrounds and a stucco cross on the east elevation.

The first influx of African-Americans in St. Petersburg occurred during construction of the Orange Belt Railway (8PI12273) in the late 1880s. They formed the Pepper Town, Methodist Town, and Gas Plant settlements near downtown (Peck and Wilson 2006). The 22nd Street South community developed in the 1920s when black residents in segregated St. Petersburg were violently pressured to move farther from downtown. They formed their own community in what was then wilderness. Many of the black newcomers who relocated to St. Petersburg during the Florida Land Boom settled in the neighborhood. The 22nd Street South neighborhood gradually became the center of African-American life in St. Petersburg during segregation. A number of enterprises, many owned by African-Americans, were built along 22nd Street South that included stores, restaurants, professional services, and entertainment venues (City of St. Petersburg 2014). In 1960, the neighborhood peaked with 111 businesses (Peck and Wilson 2006).

Meanwhile, the community's churches were located on 9th Avenue South in a variety of structures, ranging from small storefronts to large worship spaces. Seven major black denominations were represented in the neighborhood. In 1951, nearly 20 percent of the churches in St. Petersburg were located in the 22nd Street South neighborhood. The churches played a large part in the "moral and social development of the neighborhood" (City of St. Petersburg 2014). Schools, civic groups, and social clubs were also located along the avenue. The community thrived into the early 1960s when many residents, no longer bound by segregation, moved elsewhere. A number of the buildings along 9th Avenue South west of 22nd Street South were razed during I-275 construction in the 1970s. Today, approximately 10 historic church buildings are located along the 9th Avenue South corridor. They include Stewart Memorial Christian Methodist Episcopal Church, Elim Seventh Day Adventist Church, Mount Zion Primitive Baptist Church, 20th Street Church of Christ, Queen Street Church of God in Christ, Greater Mount Zion African Methodist Episcopal Church, and Mount Zion Progressive Missionary Baptist (City of St. Petersburg 2014). 8PI12276, built ca. 1940, is one of the oldest. Efforts to reach out to the church, including a visit to the Dr. Carter G. Woodson African American Museum in St. Petersburg, proved futile.

Explanation of Evaluation

Mt. Moriah Primitive Baptist Church is an important component of the 22nd Street South neighborhood. The neighborhood was the seat of St. Petersburg's black population during segregation, and its churches were a large part of African-American life. Despite two additions, the construction of I-275 nearby, and the demolition of many surrounding buildings, 8PI12276 has retained its integrity of location, design, materials, workmanship, and association. It is still used as a worship space by the same congregation that constructed the building ca. 1940.

8PI12276 lacks the significance to be individually listed in the NRHP. However, it is potentially eligible for listing in the NRHP as a contributing resource in a proposed 9th Avenue South corridor churches

thematic historic district. The proposed district is potentially eligible under Criterion A in the area of Black Ethnic Heritage for its important role in the 22nd Street South community. The period of significance for the proposed district is ca. 1925 to ca. 1965. It was beyond the scope of this project to determine the boundaries and other contributing resources in the proposed district.

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

UTM Coordinates: Zone ☐16 ☒17 Easting 336663 Northing 3072906
Other Coordinates: X: Y: Coordinate System & Datum
Name of Public Tract (e.g., park)

HISTORY

Construction Year: 1920 ☒approximately ☐year listed or earlier ☐year listed or later
Original Use Private Residence (House/Cottage/Cabin) From (year): 1920 To (year): unk
Current Use Apartment From (year): unk To (year): pres
Other Use Commercial From (year): unk To (year): pres
Moves: ☐yes ☐no ☒unknown Date: Original address
Alterations: ☒yes ☐no ☐unknown Date: Nature Windows; reroof
Additions: ☒yes ☐no ☐unknown Date: Nature 1-story to S; rooms to N, S
Architect (last name first): Builder (last name first):
Ownership History (especially original owner, dates, profession, etc.)

Is the Resource Affected by a Local Preservation Ordinance? ☐yes ☒no ☐unknown Describe

DESCRIPTION

Style Frame Vernacular Exterior Plan Irregular Number of Stories 2
Exterior Fabric(s) 1. Wood siding 2. 3.
Roof Type(s) 1. Gable 2. Flat 3. Shed
Roof Material(s) 1. Metal shingles 2. 3.
Roof secondary strucs. (dormers etc.) 1. 2.
Windows (types, materials, etc.) 1-light fixed metal (addition); 4-light metal awning (addition); 1/1 SHS vinyl (replacement)
Distinguishing Architectural Features (exterior or interior ornaments) exposed rafter tails; window surrounds; vents in gable peaks

Ancillary Features / Outbuildings (record outbuildings, major landscape features; use continuation sheet if needed.)

DHR USE ONLY	OFFICIAL EVALUATION	DHR USE ONLY
NR List Date ☐Owner Objection	SHPO – Appears to meet criteria for NR listing: ☐yes ☐no ☐insufficient info Date Init. KEEPER – Determined eligible: ☐yes ☐no Date NR Criteria for Evaluation: ☐a ☐b ☐c ☐d (see *National Register Bulletin 15*, p. 2)

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.
Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐ yes ☒ no ☐ insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐ yes ☒ no ☐ insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

1. Community planning & development 3. _____ 5. _____

2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This is a typical example of the Mid-Century Modern style found throughout Pinellas County without any significant historical associations, and does not contribute to the Kenwood HD. Therefore, 8PI12300 does not appear eligible for listing in the NRHP.
Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is within the Kenwood Historic District (8PI11176) boundaries, but it has undergone additions and alterations. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This is a typical example of the Masonry Vernacular style found throughout Pinellas County without any significant historical associations, and does not contribute to the Kenwood HD. Therefore, 8PI12305 does not appear eligible for listing in the NRHP.

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

1. Community planning & development 3. _____ 5. _____

2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.
Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

RESOURCE GROUP FORM
FLORIDA MASTER SITE FILE
Version 4.0 1/07

Site # 8 PI12354
Field Date 8-14-2014
Form Date 8-25-2014
Recorder# _____

NOTE: Use this form to document districts, landscapes, building complexes and linear resources as described in the box below. Cultural resources contributing to the Resource Group should also be documented individually at the Site File. **Do not use this form for National Register multiple property submissions** (MPSs). National Register MPSs are treated as Site File manuscripts and are associated to the individual resources included under the MPS cover using the Site File manuscript number.

Check ONE box that best describes the Resource Group:

- ☐ **Historic district** (NR category "district"): buildings and NR structures only: NO archaeological sites
- ☐ **Archaeological district** (NR category "district"): archaeological sites only: NO buildings or NR structures
- ☐ **Mixed district** (NR category "district"): includes more than one type of cultural resource (example: archaeological sites and buildings)
- ☒ **Building complex** (NR category usually "building(s)"): multiple buildings in close spatial and functional association
- ☐ **Designed historic landscape** (NR category usually "district" or "site"): can include multiple resources (see *National Register Bulletin #18*, page 2 for more detailed definition and examples: e.g. parks, golf courses, campuses, resorts, etc.)
- ☐ **Rural historic landscape** (NR category usually "district" or "site"): can include multiple resources and resources not formally designed (see *National Register Bulletin #30, Guidelines for Evaluating and Documenting Rural Historic Landscapes* for more detailed definition and examples: e.g. farmsteads, fish camps, lumber camps, traditional ceremonial sites, etc.)
- ☐ **Linear resource** (NR category usually "structure"): Linear resources are a special type of rural historic landscape and can include canals, railways, roads, etc.

CONTINUATION SHEET

Narrative Description

The 2222 45th Ave. N. building complex resource group includes two buildings, 8PI12247 and 8PI12248.

2222A 45th Ave. N. (8PI12247) was constructed ca. 1948 (Dubov 2014). The two-story Frame Vernacular style apartment building is rectangular shaped. The continuous concrete block foundation supports the wood-frame walls, which are covered with replacement vinyl. The gable and shed roofs are covered with composition shingles. Fenestration includes three-light awning metal; 1/1 SHS vinyl (replacement); two-light awning metal (replacement); 6/6 sliding vinyl (replacement); and 1/1 DHS wood windows. Ornamentation includes cornerboards and vents in the gables. A two-story screened porch addition is on the north elevation and includes a stucco wall.

2222B 45th Ave. N. (8PI12248) was constructed ca. 1959 (Dubov 2014). The one story, Ranch style residence is rectangular shaped. The concrete slab foundation supports the concrete block walls. The cross-gabled roof is covered with replacement composition shingles. Fenestration includes three-light awning metal; two-light awning metal (replacement); and jalousie metal windows. Ornamentation includes concrete window sills; vents; and decorative porch supports. The main entrance consists of a wood door on the north elevation with a porch consisting of a gable extension with metalwork supports.

CONTINUATION SHEET

Narrative Description

The building complex resource group at 2511 55th Ave. N. includes two buildings, 8PI12465 and 8PI12466.

2511A 55th Ave. N. (8PI12465) was constructed ca. 1920 (Dubov 2014). The two story Bungalow style residential building is irregularly shaped. The pier and concrete slab foundations support the wood frame walls, which are clad with wood siding and plywood. The gable and shed roofs are covered with replacement composition shingles. Fenestration includes 3/1 DHS wood (3); 7-light fixed wood; 6/6 DHS wood. The main entrance is located within an open entry porch addition on the south elevation with Doric columns and a shed roof. A stone chimney is located at the west elevation. Other ornamentation includes fixed shutters.

2511B 55th Ave. N. (8PI12466) was constructed ca. 1952 (Dubov 2014). The two story Masonry Vernacular style residential building is shaped like a rectangle. The concrete slab foundation supports the concrete block walls. The block on the first floor is covered with stucco and asbestos shingles on the second floor. The flat roof is covered with built-up materials. The main entrance is on the second floor and is accessed by stairs with metal railing. Fenestration includes 1/1 SHS vinyl (replacement) and 2/2 SHS metal windows. The balustrade is also made of metal. A porch is on the south elevation covered by a flat roof extension.

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

1. Community planning & development 3. _____ 5. _____

2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

1. Community planning & development 3. _____ 5. _____

2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

1. Community planning & development 3. _____ 5. _____

2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

1. Community planning & development 3. _____ 5. _____

2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

1. Community planning & development 3. _____ 5. _____

2. Architecture 4. _____ 6. _____

☐FL State Archives/photo collection	☐city directory	☐occupant/owner interview	☐plat maps
☒property appraiser / tax records	☐newspaper files	☐neighbor interview	☐Public Lands Survey (DEP)
☒cultural resource survey (CRAS)	☐historic photos	☐interior inspection	☐HABS/HAER record search

☐other methods (describe) _____
Bibliographic References (give FMSF manuscript # if relevant, use continuation sheet if needed) _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

1. Community planning & development 3. _____ 5. _____

2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

DESCRIPTION (continued)

Chimney: No.____ Chimney Material(s): 1. _____ 2. _____
Structural System(s): 1. Concrete block 2. _____ 3. _____
Foundation Type(s): 1. Continuous 2. _____
Foundation Material(s): 1. Concrete Block 2. _____
Main Entrance (stylistic details) replacement wood door with oval light on E elevation under metal hood

Porch Descriptions (types, locations, roof types, etc.) _____

Condition (overall resource condition): ☐excellent ☒good ☐fair ☐deteriorated ☐ruinous
Narrative Description of Resource _____

Archaeological Remains _____ ☐Check if Archaeological Form Completed

RESEARCH METHODS (check all that apply)

☒FMSF record search (sites/surveys)	☐library research	☐building permits	☐Sanborn maps
☐FL State Archives/photo collection	☐city directory	☐occupant/owner interview	☐plat maps
☒property appraiser / tax records	☐newspaper files	☐neighbor interview	☐Public Lands Survey (DEP)
☒cultural resource survey (CRAS)	☐historic photos	☐interior inspection	☐HABS/HAER record search

☐other methods (describe) _____
Bibliographic References (give FMSF manuscript # if relevant, use continuation sheet if needed) _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.
Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information

Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information

Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)

1. Community planning & development 3. _____ 5. _____

2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

Appendix B
Demolished Building Letter

Florida's First Choice in Cultural Resource Management

October 21, 2014

Mr. Vincent Birdsong
Florida Master Site File
Division of Historic Resources
R.A. Gray Building
500 South Bronough Street
Tallahassee, FL 32399-0250

RE: Historic Resource Status

Dear Mr. Birdsong:

This letter is to inform you that background research and a recent field reconnaissance survey conducted from June to October 2014, has discovered that the following 10 properties are no longer extant since they were last recorded:

8PI7605	611 21st St. N.
8PI11656	2357 8th Ave. S.
8PI11657	2341 8th Ave. S.
8PI11658	2331 8th Ave. S.
8PI11659	2321 8th Ave. S.
8PI11660	2253 8th Ave. S.
8PI11661	2396 8th Ave. S.
8PI11662	2376 8th Ave. S.
8PI11465	5950 34th St. S. (boat storage)
8PI11466	5950 34th St. S.(office)

Sincerely,

Chris Berger

Chris Berger, MHP
Architectural Historian

8110 Blaikie Court, Suite A, Sarasota, FL 34240 - Telephone 941.379.6206 - Fax 877.351.2501

Survey Log Sheet

Florida Master Site File
Version 4.1 1/07

Survey # (FMSF only) _____

Consult *Guide to the Survey Log Sheet* for detailed instructions.

Identification and Bibliographic Information

Survey Project (name and project phase) I-275 PD&E, S of 54th Ave S to N of 4th St N

Report Title (exactly as on title page) Cultural Resource Assessment Survey, I-275 Project Development and Environment (PD&E) Study from South of 54th Avenue South to North of 4th Street North, Pinellas County, Florida (WPI Segment No. 424501-1

Report Authors (as on title page, last names first) 1. ACI 3. _____ 2. _____ 4. _____

Publication Date (year) 2015 **Total Number of Pages in Report** (count text, figures, tables, not site forms) _____

Publication Information (Give series, number in series, publisher and city. For article or chapter, cite page numbers. Use the style of *American Antiquity*.)
P14058, ACI, Sarasota

Supervisors of Fieldwork (even if same as author) Names Joan Deming

Affiliation of Fieldworkers: Organization Archaeological Consultants Inc City Sarasota

Key Words/Phrases (Don't use county name, or common words like *archaeology*, *structure*, *survey, architecture, etc.*)

1. I-275 3. _____ 5. _____ 7. _____
2. _____ 4. _____ 6. _____ 8. _____

Survey Sponsors (corporation, government unit, organization or person directly funding fieldwork)

Name FDOT District Seven Organization _____

Address/Phone/E-mail 11201 N. McKinley Dr., Tampa, FL 33612-6456

Recorder of Log Sheet Joan Deming **Date Log Sheet Completed** 12-15-2014

Is this survey or project a continuation of a previous project? ☒ No ☐ Yes: **Previous survey #s (FMSF only)** _____

Mapping

Counties (List each one in which field survey was done; attach additional sheet if necessary)

1. Pinellas 3. _____ 5. _____
2. _____ 4. _____ 6. _____

USGS 1:24,000 Map Names/Year of Latest Revision (attach additional sheet if necessary)

1. Name PASS-A-GRILLE BEACH Year 1981
2. Name SAFETY HARBOR Year 1987
3. Name ST. PETERSBURG Year 1987
4. Name _____ Year _____
5. Name _____ Year _____
6. Name _____ Year _____

Description of Survey Area

Dates for Fieldwork: Start 7-2014 End 10-2014 **Total Area Surveyed** (fill in one) _____ hectares 395 acres

Number of Distinct Tracts or Areas Surveyed 1

If Corridor (fill in one for each) **Width:** _____ meters 200 feet **Length:** _____ kilometers 16.3 miles

1. INTRODUCTION

The Florida Department of Transportation (FDOT), District Seven, is conducting a Project Development and Environment (PD&E) Study to evaluate the need for capacity and operational improvements along 16.3 miles of Interstate 275 (I-275) (State Road (SR) 93) from south of 54th Avenue South to north of 4th Street North in Pinellas County, Florida. A Cultural Resource Assessment Survey (CRAS) was performed in 2015 as part of the PD&E Study (ACI 2015), and coordinated with the Federal Highway Administration (FHWA) and the State Historic Preservation Officer (SHPO). Both the FHWA and the SHPO concurred with the CRAS results on May 6, 2015 and June 2, 2015, respectively (**Attachment 1**). Since this time, six stormwater management facility (SMF) site locations (SMF 2, SMF 7, SMF 12, SMF 13, SMF 18, and SMF 20) (**Figures 1-3**) have been identified during the project's PD&E Study in order to determine right of way (ROW) cost estimates. These SMF locations may change during later project implementation phases. If so, they will be reevaluated.

Todd Bogner, District Seven Cultural Resource Coordinator, conducted a reconnaissance survey of the six SMF site locations on January 4, 2016 (Bogner et al. 2016). The survey included a desktop analysis and field survey of the properties located within the proposed SMF sites. Background research included an examination of Florida Master Site File (FMSF) GIS data, the CRAS report for the I-275 PD&E Study (ACI 2015), and the Pinellas County Property Appraiser's website. Only the proposed SMFs located outside the existing FDOT ROW were evaluated; the proposed SMF sites located inside the ROW were not included in this analysis. As a result, the Department staff determined that there will be a low potential for archaeological involvement, and no potential for historic resources involvement for all SMF sites except SMFs 12 and 13, which are associated with previously recorded and newly identified historic resources.

In March 2016, a supplemental follow-up survey was conducted by Archaeological Consultants, Inc. (ACI). The purpose of this additional effort was to prepare FMSF forms for two historic resources associated with SMFs 12 and 13, and to evaluate their significance in terms of the criteria of eligibility for listing in the National Register of Historic Places (NRHP). ACI also reviewed the results of the archaeological site probability assessment prepared during the reconnaissance survey. This Technical Memorandum, prepared as an addendum to the 2015 PD&E Study CRAS, incorporates the findings from both the January 2016 reconnaissance survey and the March 2016 follow-up survey.

2. HISTORIC RESOURCES

Based on the January 2016 reconnaissance survey and the current field survey, four SMF sites (SMFs 2, 7, 18, and 20) have no involvement with historic resources; SMFs 12 and 13 have several historic resources within them.

The January 2016 reconnaissance survey resulted in the identification of three historic resources within proposed SMF 12. These include previously recorded historic residences at 2014 26th Avenue North (8PI12337) and 2058 27th Avenue North (8PI12339), plus an unrecorded historic building at 2048 27th Avenue North (**Figure 4**). The SHPO concurred with the finding that 8PI12337 and 8PI12339 are ineligible for listing in the NRHP, both individually and as part of a historic district. The historic resource at 2048 27th Avenue North, a Frame Vernacular style residence built in 1925, has been newly recorded as 8PI12710. It is not considered to meet the criteria of eligibility for listing in the NRHP, either individually or as part of a historic district.

Two historic resources were identified within proposed SMF 13 during the reconnaissance survey. These include a 1932 residence at 2178 28th Avenue North, previously recorded as 8PI12343, and an unrecorded historic building at 2168 28th Avenue North (**Figure 4**). The SHPO evaluated 8PI12343 as ineligible for the NRHP. The unrecorded resource, a Frame Vernacular style residence constructed in 1932, was newly recorded as 8PI12723. It has been evaluated as ineligible for the NRHP, both individually and as part of a historic district. Because there are multiple resources within a single property, a new Resource Group FMSF form (8PI12724) also was prepared.

Descriptions of the newly recorded historic resources follow, and FMSF forms for the previously and newly recorded historic resources are contained in **Attachments 2 and 3**, respectively**.**

Photo 1. 2048 27th Ave. North (8PI12710), looking southwest.

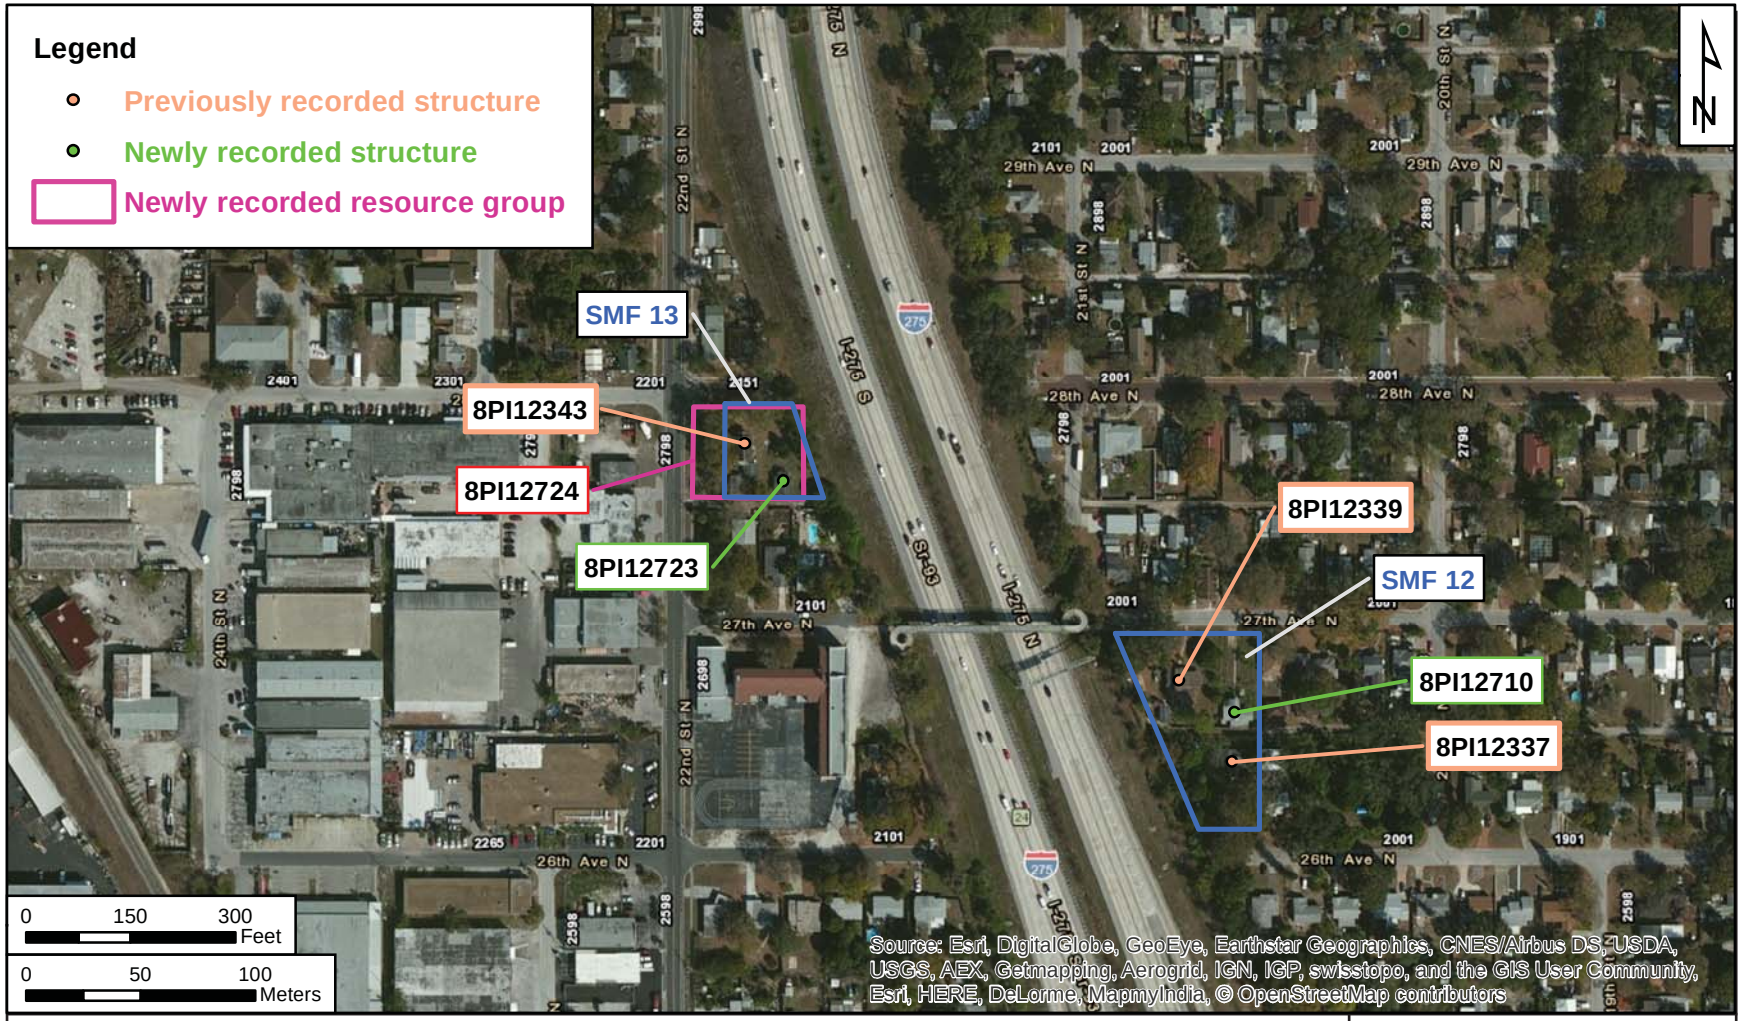

Figure 4. Location of previously and newly recorded historic resources within proposed SMF 12 and SMF 13.

CRAS of SMF Sites
I-275/S.R. 93 from
S of 54th Ave South
to N of 4th St North,
Pinellas County, Florida
WPI Segment No.: 424501-1

8PI12710: The Frame Vernacular style building at 2048 27th Avenue North, located within proposed SMF 12, was constructed circa 1925 (**Photo 1)**. The one-story, irregular plan dwelling sits on concrete block piers and has a wood frame structural system clad in a combination of stucco and vinyl siding. The cross-gabled and shed roofs are covered with composition shingles. The main entryway is on the north elevation through a single door atop a stoop that opens on to a partial-width enclosed front porch. Windows are a mixture of independent aluminum double-hung sash, aluminum jalousie, and stacked vinyl awning units. The building was outfitted with a metal awning and new windows circa 1970, and it was reroofed and restuccoed circa 1995. The room on the western elevation beneath a shed roof seems to be a later addition circa 1960. Structural and decorative features include extended eaves, concrete window sills, decorative latticework, and a metal awning over the front door. There is a small storage shed slightly southeast of the dwelling. The building is in fair condition and retains little historic exterior fabric. Overall, it is a typical example of a Frame Vernacular style building found throughout Pinellas County, and research revealed no significant historic associations. As a result, 8PI12710 does not appear eligible for listing in the NRHP, either individually or as part of a historic district.

Photo 2. View of the resource group at 2178 28th Ave. North (8PI12724), looking south.

8PI12724: The resource group located at 2178 28th Avenue North, within proposed SMF 13, consists of a Frame Vernacular style residence (8PI12343) and a smaller Frame Vernacular cottage (8PI12723) (**Photo 2)**. As these buildings share a style, were constructed at the same time, and are located on the same property parcel, they merit classification as a resource group. This resource group is a typical example of Frame Vernacular style residences found throughout the older neighborhoods of Pinellas County, and research revealed no significant historic associations or information about

how the structures are related. In addition, the structures are in fair condition but both have been modified, and neither retains integrity to convey significance. 8PI12343 was previously determined ineligible by the SHPO. As a result, 8PI12724 does not appear potentially eligible for listing in the NRHP, either individually or as part of a historic district.

Photo 3. 2168 28th Ave. North (8PI12723), looking south.

8PI12723: The Frame Vernacular style building at 2168 28th Avenue North, within proposed SMF 13, was constructed circa 1932 (**Photo 3)**. The one-story, rectangular plan dwelling sits on a continuous concrete foundation and has a wood frame structural system clad in a combination of stucco and wood siding. The gable and flat roofs are covered with composition shingles. The main entryway is on the north elevation through a single door within a partial-width open front porch beneath a flat roof overhang supported by simple wood posts. Windows are a mixture of independent and paired 6-lite casement units; some are original wood and some are made of modern materials with snap-in muntins. The building was outfitted with new doors and windows circa 1990, and the upper portion of a brick chimney on the eastern elevation was removed circa 1980. Structural and decorative features include extended eaves, exposed rafter tails, and wood window frames. There is a partial chimney along the east elevation. The building is in fair condition and retains little historic exterior fabric. Overall, it is a typical example of a Frame Vernacular style building found throughout Pinellas County, and research revealed no significant historic associations. As a result, 8PI12723 does not appear potentially eligible for listing in the NRHP, either individually or as part of a historic district.

3. ARCHAEOLOGICAL SITE POTENTIAL

ACI reviewed the results of the pedestrian archaeological survey conducted by Todd Bogner on January 4th, and concurs with the determination that all six proposed SMF locations have a generally low potential for archaeological sites. While proposed SMF 18 contains, in part, a previously recorded site (8PI01212) (**Figure 5**), this resource is recorded as destroyed by dredging and ditching. All the proposed SMF sites lack the environmental conditions correlated with prehistoric site location (i.e., relatively elevated and better drained soils proximate to a freshwater source). Proposed SMF 7 was considered to have a slight potential for historic period archaeological sites associated with "the Deuces" neighborhood. However, SMF 7, as well as the other five proposed SMF sites, have been disturbed by land-altering activities associated with urban development, including impacts associated with the construction of the interstate highway. **Table 1** provides a summary of existing conditions documented during the reconnaissance survey (Bogner et al. 2016:5-7) and the potential for archaeological site occurrence; selected photographs follow.

Table 1. Summary of archaeological site potential for the proposed SMF sites.

SMF NO.	RECORDED ARCHAEO. SITE	ARCHAEO. POTENTIAL	EXISTING CONDITIONS/COMMENTS
SMF 2	None	Low	Entirely paved and highly disturbed (**Photo 4**)
SMF 7	None	Low	Urbanized area directly adjacent to a mechanically stabilized earth wall supporting the overpass of I-275 over 22nd Street South. Formerly developed with residences. Now vacant; highly disturbed (**Photo 5**). Low potential for prehistoric archaeological sites; slight potential for historic period archaeological site associated with "the Deuces" neighborhood (historic refuse/ artifact scatter).
SMF 12	None	Low	Residentially developed and directly adjacent to the I-275 northbound lanes; highly disturbed (**Photo 1**)
SMF 13	None	Low	Residentially developed and directly adjacent to the I-275 southbound lanes; highly disturbed (**Photo 2**)
SMF 18	8PI01212	Low	Previously recorded site 8PI01212 is contained, in part, within SMF 18. It was reported in 1987 as destroyed by dredging and ditching. One shovel test was excavated at the edge of the I-275 right of way during the CRAS (**Figure 5; Photo 6**) No cultural materials were found, and testing revealed fill material to a depth of 1 meter (3.3. feet). Directly adjacent to the northbound lanes of I-275. A man-made canal marks the southern border, a gas transmission line is along the western boundary, and an existing SMF is to the north.
SMF 20	None	Low	Adjacent to the southbound lanes of I-275; comprised of fill material; highly disturbed.

Figure 5. Location of 8PI01212 and negative shovel test relative to proposed SMF 18.

Photo 5. Existing conditions within proposed SMF 7, looking south.

Photo 6. Looking east/southeast at 8PI01212 site area within the I-275 right of way (from ACI 2015, Photo 5-3)

4. CONCLUSIONS

Three historic resources (8PI12337, 8PI12339 and 8PI12710) are located within proposed SMF 12 and three historic resources (8PI12343, 8PI12723, and 8PI12724) are associated with SMF 13. Of these, the SHPO determined the previously recorded 8PI12337, 8PI12339, and 8PI12343 ineligible for listing in the NRHP, either individually or as part of a district. The two newly recorded historic resources, 8PI12710 within SMF 12 and 8PI12723 within SMF 13, are considered undistinguished examples of their type in terms of style and method of construction. Also, both lack significant historic associations to persons or events. Therefore, 8PI12710 and 8PI12723 are not considered potentially eligible for listing in the NRHP, either individually or as part of a historic district. No historic resources are located within any of the other proposed SMF sites. The six proposed SMFs all have a low archaeological site location potential. In conclusion, at this PD&E Study stage, given the results of the desktop review, field reconnaissance, and historical/architectural field survey, the six proposed SMF sites will have no involvement with significant cultural resources, and none need to be avoided due to cultural resource issues.

If the SMF sites change during the design phase, a CRAS Update, including archaeological and historic resource fieldwork, will be prepared for any SMF sites that are planned to be located outside of the existing I-275 ROW. The CRAS Update will be submitted to the FHWA and SHPO for review and concurrence.

RE: Cultural Resource Assessment Survey
I-275/SR 93 from South of 54th Avenue South to North of 4th Street North
Financial Project ID No.: 424501-1
FAP No.: TBD
Pinellas County, Florida

Dear Ms. Kendall:

The Florida Department of Transportation (FDOT), District Seven, is conducting a Project Development and Environment (PD&E) Study to evaluate the need for capacity and operational improvements along 16.3 miles of Interstate 275 (I-275) (State Road (SR) 93) from south of 54th Avenue South to north of 4th Street North in Pinellas County, Florida. This study will document the need for the improvements as well as the procedures utilized to develop and evaluate various improvements including elements such as proposed typical sections, special designation of travel lanes, preliminary horizontal alignments, and interchange enhancement alternatives.

Enclosed are two copies of the Cultural Resource Assessment Survey (CRAS) (March 2015) that was prepared for the above referenced project. Also enclosed are 327 Florida Master Site File (FMSF) forms (8PI901, 8PI902, 8PI1212, 8PI1258, 8PI714, 8PI726, 8PI819, 8PI6956, 8PI7256, 8PI7272, 8PI7410, 8PI7502, 8PI7837, 8PI7839, 8PI7970, 8PI10191, 8PI11102, 8PI11108, 8PI11113, 8PI11176, 8PI12172 through 8PI12477); a CD containing the FMSF photographs and pdf files of the FMSF forms and CRAS (for the State Historic Preservation Officer [SHPO]); a CD containing a pdf file of the CRAS and FMSF forms (for FHWA); and a Survey Log Sheet. As agreed, the FMSF forms for FHWA are all contained on the CD and not provided as hard copies since there are so many forms.

The CRAS included background research and a field survey. The purpose was to locate and identify any archaeological sites and historic resources located within the

project area of potential effect (APE) and to assess their significance in terms of eligibility for listing in the National Register of Historic Places (NRHP). The archaeological Area of Potential Effect (APE) was defined as the existing right of way; the historical APE includes the existing right of way as well as immediately adjacent properties within 200 feet. Proposed pond and floodplain compensation sites were not identified in the PD&E Study and will be evaluated later during design.

The background research suggested a Moderate Degree of Effect for archaeological resources. Background research indicated that five previously recorded archaeological sites are located within a 500 foot buffer, four of which are adjacent to the I-275 corridor within the proposed project APE (8PI901, 8P902, 8PI1212, 8PI1258). As a result of surface reconnaissance and limited archaeological testing, all four sites, as contained within the project APE, are presumed destroyed. There is insufficient information to determine the potential NRHP eligibility of 8PI901 and 8PI902, since most of each site area is situated outside the project APE. Both 8PI1212 and 8PI1258, mostly contained within the project APE, are considered ineligible for listing in the NRHP due to the loss of physical integrity. Systematic survey of the entire project corridor was not required since additional ROW is not being proposed, the existing ROW has been severely altered by roadway development and other impacts, and work within the ROW posed a safety issue for the field team.

The background research suggested a Moderate Degree of Effect for historical resources. Historical/architectural field survey resulted in the identification and evaluation of 325 historic resources within the I-275 project APE. This includes 19 that were previously recorded and 306 that are newly identified. This total includes 309 structures, 13 building complex resource groups, one historic district, one railroad, and one cemetery. Of these, 16 are listed, eligible, or considered potentially eligible for listing in the NRHP. Field survey also revealed that 10 previously recorded historic resources are no longer extant.

Based on the results of background research and field surveys, the significant historic resources located within the I-275 project APE include the Kenwood Historic District (8PI11176), which was listed in the NRHP in 2003, and some contributing resources. Ten previously identified contributing resources (8PI6929, 8PI7256, 8PI7272, 8PI7410, 8PI7502, 8PI7837, 8PI7839, 8PI7970, 8PI11102, and 8PI11108) are located within the I-275 project APE. Field survey indicated that one previously recorded historic resource (8PI6956) situated adjacent to the boundaries of the Kenwood Historic District, but not originally included, appears to be potentially eligible as a contributing resource to a revised Kenwood Historic District. It is not, however, considered individually NRHP-eligible. The Jordan Park Elementary School (8PI6901) at 2390 9th Avenue South was determined NRHP eligible by the SHPO in 2005. Finally, three historic resources are considered potentially eligible for listing in the NRHP: the Norwood School (8PI714) at 2154 27th Avenue North, Papa's Dream (8PI726) at 1850 Central Avenue, and The Manhattan Casino (8PI819) at 642 22nd Street. There is insufficient information to

determine the eligibility of two historic resources: the Mt. Moriah Primitive Baptist Church (8PI12276) and the Orange Belt Railway/CSX Railroad (8PI12273).

This information is being provided in accordance with the provisions of the National Historic Preservation Act of 1966 (as amended), which are implemented by the procedures contained in 36 CFR, Part 800, as well as the provisions contained in the revised Chapter 267, Florida Statutes.

Provided you approve the recommendations and findings in the enclosed cultural resource document, please coordinate with the SHPO for concurrence. The unbound copy of the document; the original FMSF forms; CD with FMSF photos, forms, and CRAS; and Survey Log Sheet are for the SHPO. The bound copy of the document and the CD with the CRAS and FMSF pdf file is for your files.

If you have any questions, please contact me at (813) 975-6456 or todd.bogner@dot.state.fl.us or Rebecca Spain Schwarz at (813) 281- 8308 or rebecca.spain-schwarz@atkinsglobal.com.

Sincerely,

Todd L. Bogner

OPINION OF RESOURCE SIGNIFICANCE

Appears to meet the criteria for National Register listing individually? ☐yes ☒no ☐insufficient information
Appears to meet the criteria for National Register listing as part of a district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (**required**, whether significant or not; use separate sheet if needed) This building is of a common design and construction and is not associated with historic events or people. Thus, it is not considered potentially eligible for NRHP listing, either individually or as part of a district.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____

RESOURCE GROUP FORM
FLORIDA MASTER SITE FILE
Version 4.0 1/07

Site # 8 PI12724
Field Date 2-23-2016
Form Date 2-24-2016
Recorder# 1

NOTE: Use this form to document districts, landscapes, building complexes and linear resources as described in the box below. Cultural resources contributing to the Resource Group should also be documented individually at the Site File. **Do not use this form for National Register multiple property submissions** (MPSs). National Register MPSs are treated as Site File manuscripts and are associated to the individual resources included under the MPS cover using the Site File manuscript number.

Check ONE box that best describes the Resource Group:

- ☐ **Historic district** (NR category "district"): buildings and NR structures only: NO archaeological sites
- ☐ **Archaeological district** (NR category "district"): archaeological sites only: NO buildings or NR structures
- ☐ **Mixed district** (NR category "district"): includes more than one type of cultural resource (example: archaeological sites and buildings)
- ☒ **Building complex** (NR category usually "building(s)"): multiple buildings in close spatial and functional association
- ☐ **Designed historic landscape** (NR category usually "district" or "site"): can include multiple resources (see *National Register Bulletin #18*, page 2 for more detailed definition and examples: e.g. parks, golf courses, campuses, resorts, etc.)
- ☐ **Rural historic landscape** (NR category usually "district" or "site"): can include multiple resources and resources not formally designed (see *National Register Bulletin #30, Guidelines for Evaluating and Documenting Rural Historic Landscapes* for more detailed definition and examples: e.g. farmsteads, fish camps, lumber camps, traditional ceremonial sites, etc.)
- ☐ **Linear resource** (NR category usually "structure"): Linear resources are a special type of rural historic landscape and can include canals, railways, roads, etc.

HISTORY & DESCRIPTION

Construction Year: 1932 ☒approximately ☐year listed or earlier ☐year listed or later
Architect/Designer(last name first): _____ Builder(last name first): _____
Total number of individual resources included in this Resource Group: # of contributing 2 # of non-contributing _____
Time period(s) of significance (choose a period from the list or type in date range(s), e.g. *1895-1925*)
1. Depression/New Deal 1930-1940 3. _____
2. Twentieth C American 4. _____
Narrative Description (*National Register Bulletin 16A* pp. 33-34; fit a summary into 3 lines or attach supplementary sheets if needed) This building complex resource group is comprised of two c.1932 dwellings recorded as 8PI12343 & 8PI12723. Both buildings have been altered/modified and are common examples of the Frame Vernacular style.

RESEARCH METHODS (check all that apply)

☒FMSF record search (sites/surveys)	☐library research	☐building permits	☐Sanborn maps
☐FL State Archives/photo collection	☐city directory	☐occupant/owner interview	☐plat maps
☒property appraiser / tax records	☐newspaper files	☐neighbor interview	☐Public Lands Survey (DEP)
☒cultural resource survey	☐historic photos	☐interior inspection	☐HABS/HAER record search

☒other methods (specify) USDA historic aerial photographs (Access
Bibliographic References (give FMSF Manuscript # if relevant) Publication of Archival Library & Museum Materials (PALMM), accessible online at: http://susdl.fcla.edu/

OPINION OF RESOURCE SIGNIFICANCE

Potentially eligible individually for National Register of Historic Places? ☐yes ☒no ☐insufficient information
Potentially eligible as contributor to a National Register district? ☐yes ☒no ☐insufficient information
Explanation of Evaluation (required, see *National Register Bulletin 16A* p. 48-49. Attach longer statement, if needed, on separate sheet.) This building complex resource group contains buildings with a common design and method of construction, and research revealed no associations with historic events or people. Therefore, 8PI12724 is not eligible for the NRHP.

Area(s) of Historical Significance (see *National Register Bulletin 15*, p. 8 for categories: e.g. "architecture", "ethnic heritage", "community planning & development", etc.)
1. Community planning & development 3. _____ 5. _____
2. Architecture 4. _____ 6. _____
