# Public Involvement Program Project Development and Environmental (PD&E) Study I-275/ SR93 from South of 54<sup>th</sup> Avenue South to North of 4<sup>th</sup> Street North Pinellas County, Florida

The purpose of this Public Involvement Program (PIP) is to assist in providing information to and obtaining input from concerned citizens, agencies, private groups (residential/business), and governmental entities. The overall goal of this plan is to help ensure that the study reflects the values and needs of the communities it is designed to benefit. A schedule of events and list of documentation exhibiting compliance with these procedures is included.

This program is in compliance with the Florida Department of Transportation's (FDOT) *Project Development and Environmental (PD&E) Manual, Part 1, Chapter 11*; Section 339.155, Florida Statutes; Executive Orders 11990 and 11988; Council on Environmental Quality Regulations for Implementing the Procedural Provision of the National Environmental Policy Act; and 23 Code of Federal Regulations 771.

## I Description of Proposed Improvement

Work Program Item Number: 424501-1

Federal Aid Project Number: TBD

Project Limits: I-275 (SR 93) from south of 54th Avenue South to north of 4th Street North in Pinellas County, Florida, a distance of approximately 16.3 miles. The study map is shown on **Figure 1** on the following page.

Proposed Activity: To conduct a PD&E study to evaluate the need for capacity and operational improvements along I-275 (SR 93) within the above noted limits. The objective of the study is to provide documented environmental and engineering analyses to assist the FDOT and the Federal Highway Administration (FHWA) in reaching a decision on the type, conceptual design, and location of the necessary improvements within the PD&E Study limits.

Class of Action: Categorical Exclusion 2

Project Development and Environment Study I-275 / SR93 South of 54<sup>th</sup> Avenue South to North of 4<sup>th</sup> Street North Public Involvement Program

#### II Project Background

The purpose of this project is to conduct a PD&E study is to evaluate the need for capacity and operational improvements along I-275 (SR 93) from 54th Avenue South to north of 4th Street North in Pinellas County, a distance of approximately 16.3 miles. The objective of the PD&E study is to provide documented environmental and engineering analyses which will assist the FDOT and the FHWA in reaching a decision on the type, conceptual design, and location of the necessary improvements within the I-275 PD&E study limits.

#### Tampa Bay Express (TBX) Master Plan

In response to the Moving Ahead for Progress in the 21st Century Act (MAP-21) federal transportation legislation requirements, the FDOT Secretary issued a policy directive (Topic No.: 525-030-020-a) in August 2013 requiring the use of tolling on limited access facilities on the State Highway System (SHS) when adding capacity to an existing highway or constructing a new highway facility. Since a portion of the I-275 PD&E study involves the evaluation of the need to provide additional capacity to a regional highway facility on Florida's Strategic Intermodal System (SIS), a comprehensive plan for developing an integrated system of regional express lanes is to be developed as part of the PD&E study. To create a comprehensive vision for improved mobility within the Tampa Bay Region, FDOT District 7 embarked on a master planning exercise to determine on which interstate facilities, and specific freeway segments of these facilities, would it be cost feasible to implement express lanes. The first phase of the Master Plan efforts involved a holistic approach of analyzing the future travel demand for several interstate corridors within FDOT District 7 in order to develop the Plan. The intent of this Plan was to ensure that the impacts of implementing express lanes on the Tampa Bay interstate system would be evaluated on a system-wide basis in lieu of treating each corridor as its own stand-alone project. Initially, the FDOT coordinated with the Florida Turnpike Enterprise (FTE) to generate preliminary toll and revenue forecasts for the various interstate corridors and freeway segments. The results of this initial coordination effort formed the basis for the selection of viable corridors and freeway segment limits for the implementation of express lanes as part of the TBX Master Plan.

#### **TBX Master Plan Project**

For the I-275 Pinellas Study corridor, limits of the TBX Master Plan project are from south of SR 694 (Gandy Boulevard) to north of 4th Street North. The Master Plan project would include one express lane in each direction from south of Gandy Boulevard to 118th Avenue North/Roosevelt Boulevard and two lanes in each direction from north of 118th Avenue North to north of 4th Street North. It will provide for a direct connection from the proposed118th Avenue North express lanes that are to be located west of I-275 to the I-275 mainline. The express lanes proposed for I-275 from south of Gandy Boulevard to north of 4th Street North will also transition into the express lanes that are already planned for the Howard Frankland Bridge. These additional express lanes are

needed to accommodate future travel demand in the design year (2040). The I-275 typical section would include four general purpose lanes (GULs) that are separated from the proposed two express lanes by a 4-foot (ft) painted buffer. The TBX Master Plan established a system-wide framework for implementation of express lanes within the Tampa Bay Region. The Master Plan project also preserves the transit corridor in the median of I-275 from 5th Avenue North to south of Gandy Boulevard.

#### **TBX Starter Projects**

Realizing a potential shortfall in funding for implementation of the ultimate capacity improvements planned for the Tampa Bay Region, the FDOT underwent an evaluation to identify a series of lower cost express lane projects that can be funded in the FDOT's Five-Year Work Program. These initial projects could be built within a five year or less horizon and then later be incorporated into the Master Plan project at minimal costs. The shorter-term, lower-cost improvements are considered the, "Starter Projects." The proposed express lane Starter Project for the I-275 Pinellas corridor consists of one express lane in each direction from 118th Avenue North to north of 4th Street North. Selecting 118th Avenue North as the southern terminus connects the newly-constructed 118th Avenue North interchange to the express lanes and provides options for express lane travel for drivers traveling to/from the west and to/from the south on I-275. In the future, a new elevated facility designated as SR 690 representing the 118th Avenue North corridor will provide a direct connection to US 19. This terminus is also consistent with the Pinellas Alternatives Analysis (AA) study.

#### **Pinellas Alternative Analysis (AA)**

In addition to addressing highway capacity deficiencies, this PD&E study also considers the multi-modal accommodations envisioned for the I-275 study corridor and its regional connections to the rest of Tampa Bay. The Tampa Bay Area Regional Transportation Authority (TBARTA) adopted a Transportation Master Plan for Citrus, Hernando, Hillsborough, Manatee, Pasco, Pinellas, and Sarasota Counties in May 2009. While considering all modes of transportation, the TBARTA Master Plan focused on providing the framework for an integrated transit system to serve all parts of the region. In 2009, the Hillsborough, Pinellas, Pasco, and Hernando County Metropolitan Planning Organizations (MPOs) and Citrus County all adopted the TBARTA Mid Term (2035) Networks in their 2035 Needs plans and included several key elements of the Master Plan in their 2035 Cost Affordable Long Range Transportation Plans (LRTPs).

As a first step in moving toward implementation of this plan, the Hillsborough Area Regional Transit Authority (HART) has undertaken an AA for a light rail transit corridor running from the University of South Florida, through downtown Tampa, to the Westshore area. This HART analysis includes a service connection to a proposed High Speed Rail station in downtown Tampa. A second AA is underway by the Department, TBARTA, the Pinellas County MPO, and the Pinellas Suncoast Transit Authority (PSTA) for a premium transit corridor from downtown St. Petersburg, through the Pinellas Gateway area, to downtown Clearwater. In addition, the FDOT, local transit agencies, and MPOs have planned several Regional Transit Corridor Evaluations for other elements of the TBARTA Master Plan.

The 2012 Pinellas AA evaluated transit options connecting major residential, employment, and activity centers in Pinellas County to Hillsborough County via the Howard Frankland Bridge corridor. The study identified a 24-mile light rail Locally Preferred Alternative (LPA) for its ability to offer transportation options that are safe, sustainable, affordable, and efficient. Significant countywide local bus enhancements are recommended to support the LPA, nearly doubling the existing local bus service with portions being implemented before the light rail. Pinellas County is considering a countywide referendum for the November 2014 ballot, proposing up to a one-penny sales tax to fund a variety of transportation improvements. Greenlight Pinellas was recently launched as an awareness and education campaign to facilitate a conversation about transportation in anticipation of residents being given an opportunity to vote on this referendum.

A key element of the TBARTA Master Plan is to provide a transit linkage across Upper Tampa Bay linking Hillsborough and Pinellas Counties. Specifically, both the TBARTA Master Plan and the MPO LRTPs call for the linkage to be provided across the Howard Frankland Bridge (I-275/SR 93) corridor. This linkage would run from Hillsborough County's proposed Westshore station (service connection to the proposed High Speed Rail station in downtown Tampa) to Pinellas County's proposed Gateway station. These stations would not serve as termini, but would allow uninterrupted transit movements from the St. Petersburg and Clearwater areas across the Howard Frankland Bridge to and through Tampa's Central Business District (CBD) and vice versa. However, for this linkage to be possible, the Howard Frankland Bridge corridor must be able to accommodate the appropriate transit provisions. The FDOT plans to replace the northbound Howard Frankland Bridge in the future since it is approaching the end of its useful service life. Therefore, the I-275 PD&E study will provide recommended improvements that provide the transit accommodations envisioned by TBARTA and the needed highway improvements consistent with the planned northbound bridge replacement.

#### **Lane Continuity Study**

Completed in October 2008, the I-275 Lane Continuity Study evaluated operational improvements on I-275 from the Sunshine Skyway Bridge North Toll Plaza to Gandy Boulevard in Pinellas County. The study documented existing and future operational and safety conditions within the corridor for the purposes of recommending possible improvements to alleviate identified deficiencies. The study addressed both short-term traffic operational type improvements and longer-term major geometric improvements. As a long range improvement, the study recommended providing lane improvements to achieve one additional continuous lane on I-275 in each direction from 54th Avenue South to Gandy Boulevard. The I-275 Pinellas PD&E study will incorporate and update the Lane Continuity Study recommendations. Currently, I-275 from south of 54th Avenue South to 4th Street North has one continuous lane in the northbound direction and no continuous lanes in the southbound direction. According to the previous Lane Continuity Study recommendations, proposed lane additions to I-275 are anticipated to provide three continuous lanes in the northbound direction and two continuous lanes in the southbound direction between 54th Avenue South and 4th Street North. These new lane

connections will improve the safety for motorists traveling the I-275 corridor by substantially reducing the number of lane changes for both directions of travel. The study also recommended modifications to certain interchanges within the study limits, allowing for a more refined analysis of those locations.

#### **NEPA Process**

The proposed project has been evaluated through the FDOT's Efficient Transportation Decision Making (ETDM) process. Agency coordination for this project has been initiated as part of ETDM Project Number 12556. The FDOT intends to seek Location Design and Concept Acceptance (LDCA) from FHWA for lane continuity improvements along I-275 from 54th Avenue South to south of Gandy Boulevard and express lane improvements related to the TBX Master Plan project along I-275 from south of Gandy Boulevard to north of 4th Street North.

## III Project Goals

The following goals and objectives have been defined for this study:

- Undertake the necessary PD&E study evaluation and documentation efforts to meet federal environmental evaluation and documentation requirements in order to obtain LDCA from FHWA for the planned capacity and operational improvements along I-275 from 54th Avenue South to North of 4th Street North in Pinellas County.
- Accommodate, to the extent practical, the transit provisions identified in the approved LPA for the Pinellas AA.
- Provide coordination with key stakeholders and engage the concerned public.

## IV Identification of Agencies and Affected Public

The following local, regional, state, or federal agencies with concern about this project due to jurisdictional review or expressed interest have been identified and have been contacted directly by the FDOT through the Advance Notification (AN) process in accordance with the PD&E Manual, Part 1, Chapter 3, Advance Notification. As other concerned public agencies are identified throughout the study, they will also be listed and contacted. For a complete list of contact information, please refer to Appendix A.

#### V Outreach Activities

The following techniques will be used to notify the public of the proposed transportation improvement and to solicit public input into the project development process.

To ensure that the TBX brand speaks with consistency and planned efficiency, consultants are requested to coordinate closely with the communications firm to improve public awareness as measured by use of tools and visits, posts and interactions to electronic and social channels. See Appendix B.

In addition to working with the media, a number of different notification techniques will be used throughout the project development process. A brief description of these techniques is listed below.

**Letters/ Newsletters**: Invitational and informational letters and newsletters will be distributed to elected and appointed officials, property owners/tenants, business owners/operators, and interested parties as feasible. It is anticipated that three newsletters will be distributed for this study.

- Newsletter 1 Study Kickoff after the TBX Master Plan Workshop
- Newsletter 2 Invitation to the public hearing
- Newsletter 3 Notice of the LDCA at the completion of the study

**News/ Press Releases**: News/press releases will be submitted to the FDOT seven days prior to the public hearing.

**Public Notices/Legal Display Ads**: Two legal/display newspaper advertisements will be published in the Tampa Bay Times Full Edition. The first advertisement will be published 21 days, but no more than 30 days, prior to the hearing and the second advertisement will appear seven to 12 days before the hearing. These advertisements will be used to announce the date, time, and location of the public hearing for the I-275 (SR93) PD&E study. All advertisements to local newspapers will be sent via e-mail or by registered mail, return receipt requested.

**Public Announcements:** In order to distribute PD&E study information, fliers will be made available to organizations such as neighborhood/civic groups, the FDOT, and Pinellas County, to publish in existing newsletters and web sites. Any such correspondence will be coordinated through the District's Public Information Officer.

**Direct Mail List for Public Hearings:** The following groups will be contacted by direct mail in order to obtain input throughout the PD&E process and/or to provide information on the project:

- Those people whose property lies in whole or in part within 300 feet on either side of
  the ROW line of any alternative for the proposed project will be notified, as required
  by Section 339.155, F.S., as well as other local citizens who may be impacted by the
  construction of this project. This list will be compiled utilizing current Geographical
  Information System (GIS) data obtained from the Pinellas County Property
  Appraiser's Office.
- Local elected and appointed officials or individuals who request to be placed on the mailing list for this project.
- Public and private groups, organizations, agencies, or businesses that request to be placed on the mailing list for this project.

Techniques: Citizens Advisory Committee (CAC)/Project Advisory Group (PAG): A CAC or PAG will be selected with the assistance of local governments. The group will be composed of local citizens who have an active role in the community, such as those representatives from impacted/interested cities, Pinellas County, regional agencies, the Pinellas County MPO and its various committees, and neighborhood associations or other groups within the project area. This CAC/PAG will be organized at the beginning of the project to involve local participants for advisory purposes, especially on highly controversial or sensitive projects (See PD&E Manual, Part 1, Chapter 11, Section 11-2-5).

**Presentations to Local Officials**: Presentations will be given to local officials and agencies such as the Pinellas County MPO prior to the public hearing to apprise local officials of the project status, specific location and design concepts, and to receive their comments

**Public Hearing**: In compliance with the PD&E Manual, 23 CFR 771, and Section 339.155, F.S., a formal public hearing will be held for this PD&E study. See Section VIII for further details.

**Informal Meetings:** In addition to scheduled meetings, participation in other meetings with the public, elected officials, special interest groups, or public agencies is expected to occur. The purpose of these meetings will be to apprise the attendees of the project status, specific location and design concepts, and to receive input.

#### **Public Outreach Activity Schedule:**

[Placeholder – schedule will be provided at a later date]

#### VI Coordination with Pinellas County

Copies of aerial maps depicting all alignment and design concepts under consideration, along with draft copies of engineering and environmental study documentation, will be furnished to the County staff for their review. Updated information will also be forwarded to the County prior to the scheduled public hearing for review and comment.

## VII Analysis and Summary of Public Comments

A Comments and Coordination Report will be developed to summarize the public hearing results and recommendations. The report will contain the overall input provided through the other public involvement techniques utilized in the project development process. The report will be forwarded to the District Environmental Management Engineer. See Section IX, Comments and Coordination Report.

## VIII Public Hearing

In compliance with the "Project Development and Environmental Manual," 23 CFR 771 and Section 339.155, F.S., a public hearing will be held.

**Public Hearing Site**: The public hearing is anticipated to be held at the following location:

First Baptist Church – Heritage Hall 1900 Gandy Boulevard St. Petersburg, FL 33702

Public Advertisement: See Section V

In addition, an announcement of the public hearing will be published in the Florida Administrative Register at least seven days prior to the public hearing. The notice will be prepared at least 35 days prior to the public hearing for review and approval by the FDOT.

Letters of Invitation: See Section V

**Hearing Preparation**: An audio/visual presentation, graphics, brochures, comment forms, and other exhibits will be prepared to support the public hearing.

**Transcript**: A verbatim transcript of the public hearing will be prepared by a court reporter. The transcript package will include oral comments received at the hearing by the court reporter, both during the informal and formal portions of the hearing. All public hearing documentation (handouts, presentations, graphics, etc.) will be included in a Public Hearing Scrapbook.

**Documents for Public Review**: Environmental and engineering reports to support the PD&E study evaluation will be made available for public review at least 21 days prior to the hearing date.

**Locations of Documents for Public Review:** Public notice will be provided in the public hearing advertisement newsletter invitation explaining where the study documents are located for public review. Documents to be provided include the Preliminary Engineering Report and other relevant reports, maps, or graphics. It is anticipated documents will be available at the following locations:

St. Petersburg Public Library – North Branch 861 70 Ave. N St. Petersburg, FL 33702 727-893-7214 FDOT – District 7 Headquarters 11201 N. Malcolm McKinley Drive Tampa, FL 33612 813-975-6000

St. Petersburg Public Library – South Branch 2300 Roy Hanna Dr. S St. Petersburg, FL 33712 727-893-7244

Non Discrimination Laws and Americans with Disabilities Act Compliance: Title VI and Americans with Disabilities Act Compliance: Notification during the public hearing will be provided in the presentation, brochure, signage, and through all public advertisements and newsletters/letters of invitation using the following wording:

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation service (free of charge) should contact Lori Marable, Public Involvement Coordinator, at (813) 975-6405 or (800) 226-7220 at least seven (7) working days in advance of the Hearing.

Assistance for Spanish Speaking Attendees: Persons who require translation service (free of charge) should contact Elba Lopez, Transit/Intermodal Administrator, at (813) 675-6403 or (800) 226-7220 at least seven (7) working days in advance of the Hearing. Spanish-speaking personnel will be on hand to assist those in need.

# IX Public Hearing Follow-Up

The following procedures will occur after the public hearing.

**Responses:** Responses to all letters received as a result of the hearing and questions and comments not answered at the public hearing will be made in writing.

**Recommendation Notices:** A legal notice announcing the FHWA's approval of the final document and recommendations will be published in the Tampa Bay Times newspaper. In addition, news items detailing the Department's recommendations to FHWA will be provided to local media.

**Public Hearing Transcript Package**: A Transcript Package will be produced and submitted following the Public Hearing. The Transcript Package will included a verbatim hearing transcript prepared by an approved court reporter, an errata sheet detailing any transcript discrepancies, a copy of all correspondence received by the Department as

part of the pubic hearing record, and affidavits of publication for newspaper ads advertising the hearing.

Comments and Coordination Report: A Comments and Coordination Report will be produced and submitted at the conclusion of the study, in a bound booklet with a cover, containing, at a minimum, all documentation regarding public participation performed throughout the study period. This report shall include all comments and responses received from the public as well as the Advance Notification, coordination with local officials and agencies, and public meetings, etc., the verbatim transcript from the Public Hearing, proof of publication of legal ads, sign-in sheets, public hearing certification, and all public correspondence. A summary of the public involvement efforts shall be included with the final engineering document.

**Public Hearing Scrapbook:** A scrapbook containing 11"x17" reproductions of the public hearing display boards, concept plans, presentation materials, brochures, and sign-in sheets will be prepared. The scrapbook will also include a cover page with a project description, WPI No., FAP No., county; a project location map; information about the hearing, such as the date and location, as well as the total number of people in attendance; all the alternatives that were shown; a list of all reports that were displayed; and copies of sign-in sheets. A CD containing the electronic files in PDF format will also be included.

**Project Team Debriefing**: A debriefing meeting will be held with the project team approximately two weeks after the hearing. The purpose of the meeting is to identify, review, and discuss comments and issues expressed by the public at the hearing. Questions and comments received from the public, but not answered at the hearing, will be addressed as necessary. If a written response is required, the FDOT and/or their representatives will prepare all letters of response. A copy of all responses will be included in the project files and incorporated in the Comments and Coordination Report.

# X Evaluation of the Public Involvement Program

A public involvement evaluation process will be developed to assess the effectiveness of the public involvement efforts utilized throughout the PD&E study. This process will include identification of the public involvement tools, establishment of performance measures, performance evaluations, and identification of improvement strategies.

#### XI Public Involvement during Design

It is anticipated that the Design Project Manager will maintain the appropriate level of public involvement activities throughout the final design process. These public involvement activities may include additional coordination meetings with local government and environmental permitting agencies, work sessions, and small group meetings, as directed by FDOT.

Appendix A Mailing List

Federal Agencies	
James Christian, Division Administrator Federal Highway Administration 545 John Knox Rd., Suite 200 Tallahassee, FL 32303	Madolyn Dominy, ETAT Representative U.S. Environmental Protection Agency Atlanta Federal Center 61 Forsyth St. SW Atlanta, GA 30303
Brad G. Loar, CFM Mitigation Division Director FEMA, Region IV 3003 Chamblee Tucker Rd Atlanta, GA 30341	Donnie Kinard, Chief U.S. Army Corps of Engineers, Regulatory Branch 701 San Marco Blvd, Room 372 Jacksonville, FL 32207
Bob Young, Regional Director HUD, Region IV Five Points Plaza Building 40 Marietta Street Atlanta, GA 30303	Dr. Roy E. Crabtree, Regional Administrator, SE Region U.S. Department of Commerce – National Marine Fisheries Service 263 13th Ave South St Petersburg, FL 33701
Marge Davenport, Acting Regional Director U.S. Geological Survey, Southeast Region 1770 Corporate Drive, Suite 500 Norcross, GA 30093	Steven Schnetzer, ETAT Representative U.S. Department of Agriculture, Forest Service 1720 Peachtree Road, NW Atlanta, GA 30309
Cindy Dohner, Director U.S. Fish & Wildlife Service, Region IV 1875 Century Blvd Atlanta, GA 30345	Stan Austin, Regional Director U.S. Department of Interior – National Parks Service, Southern Region 100 Alabama St., SW, 1924 Building Atlanta, GA 30303
Bruce Dawson, Field Manager Bureau of Land Management Southeast States Office 411 Briarwood Drive, Suite 404 Jackson, MS 39206	Rear Admiral John H. "Jake" Korn Commander – Seventh District US Coast Guard Brickell Plaza Federal Building 909 SE First Avenue Miami, FL 33131
Johnna Blackhair, Deputy Regional Director U.S. Department of Interiors – Bureau of Indian Affairs, Office of Trust Responsibilities 545 Marriott Drive, Ste 700 Nashville, TN 37214	Stacy Cummings, Executive Director Federal Railroad Administration 61 Forsyth Street, SW, Suite 16T20 Atlanta, GA 30303-3104
Andres Ramirez, ETAT Representative Federal Transit Administration 230 Peachtree, NW Atlanta, GA 30303	Virginia Fey, Assistant Regional Administrator U.S. Department of Commerce – National Marine Fisheries Services, Habitat Conservation Division 263 13th Avenue South St. Petersburg, FL 33701-5505
Pearlis Johnson, Acting Deputy Administrator Federal Aviation Administration Orlando Airports District Office 5950 Hazeltine National Dr., Suite 400 Orlando, FL 32822-5024	Linda Anderson, ETAT Representative Federal Highway Administration 545 John Knox Rd., Suite 200 Tallahassee, FL 32303

# Appendix B

# Tampa Bay Express Lanes Public Outreach Index

#### INTRODUCTION

The Florida Department of Transportation and District 7 (the District) recognize that it is critical that Tampa Bay regional community understands and accepts the Tampa Bay Express Lanes (TBX) as an integral element of improving the transportation network serving the driving and commuting public as well as facilitating the efficient and effective transport of goods and services. It is the District's intention to create a robust and broad public outreach plan every step of the way during the development, planning and implementation of TBX.

#### **OBJECTIVE**

With full recognition of the public involvement being undertaken by a number engineering consulting firms working on various stages of project development and environment process, this outreach plan is carefully designed to be strategic, collaborative, and inclusive while advancing two critical objectives:

- 1) Create awareness of and receive input, thoughts and opinions about Tampa Bay Express Lanes (TBX); and,
- 2) Develop support for TBX.

#### **APPROACH**

#### **Main Messaging and Positioning**

Communications and outreach approach will be coordinated effort in corporation with the consultant team and the communication firm throughout the project life. A narrative will be established for this project phase that supports and advances TBX from both the policy and user perspectives. In addition, the District will seek to understand how stakeholders and opinion leaders in the Tampa Bay region view TBX's innovative practicality. This will serve to facilitate ongoing dialogues and communications with the public to understand their opinions and predispositions as well as accommodate suggestions where reasonable and feasible. The messaging and narrative needs to be consistent, predictable, and repeatable.

To ensure that the TBX brand speaks with consistency and planned efficacy, consultants are requested to coordinate closely with the communications firm to improved public awareness as measured by use of tools and visits, posts and interactions to electronic and social channels.

#### Microsite:

The microsite serve as the main online entry (hub) and communications tool for TBX public engagement and information for the District, participating consultants and communications firm. The microsite link is <a href="https://www.tbxinfo.com">www.tbxinfo.com</a> with the password **Fastercommute**. Consultants will use templates from the site to produce materials such as powerpoints, fact sheets, etc. Also, the consultant will upload to the microsite so the communications firm will be able to post on the public website www.tampabayexpress.com

The Microsite contains E-templates using the name and visual identity. This includes:

- Graphic standard guidelines, font and logo expression
- Project Fact sheet
- Informational Video
- E-brochure
- File Pocket Folder
- Event/public meeting or hearing press release
- Maps
- Notifications
- Public information materials
- Prezi and/or PowerPoint templates/presentations
- Newsletters, pamphlets and/or brochures
- Invitations
- Project notices and updates
- Project banners will be available for live, group meetings and other engagement and outreach events as appropriate.

Press releases, media kits, social and online participation sites will be managed by the District Public Information with the communications firm. However, it is anticipated that the consultant firms will be providing information, responses to comments and other data to aid the Public Information effort.

- MindMixer will be linked to the project website <u>www.tampabayexpress.com</u> and will be capturing audience participation, feedback, and then organizing the information with MindMixer engagement data collection. Further, MindMixer templates will be customized to the TBX brand, palette and fonts.
- Social outlets such as Facebook, Twitter, blog, YouTube and LinkedIn. (With rise in mobile
  applications, this is excellent manner in which to reach minority and traditionally underserved
  groups) will also be used. Questions, comments and/or other information may be provided by the
  consultant team
- 3. Online advertising: Online ads will be designed and initiated right before the soft launch of the project to help raise awareness and drive traffic to the main microsite and social outlets.
