

I-275 (SR 93) Environmental Look Around

FDOT is conducting an Environmental Look Around (ELA) to identify opportunities to reduce or eliminate right of way required for pond sites identified in the PD&E study

The ELA opportunities identified include:

- Expanding an existing pond located within City of St. Petersburg owned right-of-way
- Expanding an existing pond located within Southwest Florida Water Management District (SWFWMD) owned right-of-way
- The potential to eliminate or reduce the size of 6 ponds identified in the PD&E study located outside of FDOT-owned right-of-way

ELA opportunities will be further evaluated through coordination with agency partners to determine the feasibility.
