## **1.0 INTRODUCTION**

The Florida Department of Transportation (Department) is conducting a Feasibility Study to evaluate improvement alternatives along SR 676 (Causeway Boulevard) in the vicinity of US 41 in Hillsborough County. The project location map in Figure 1 illustrates the location and limits of the Study.

## **2.0 PROJECT DESCRIPTION**

The FDOT is evaluating the improvement alternatives along the Causeway Boulevard corridor. Causeway Boulevard is an east/west facility, which in its entirety, extends from McKay Bay on the west to US 301 on the east. East of US 301, SR 676 continues easterly as Lumsden Road to the eastern terminus at Mulrennan Road. West of US 41, Causeway Boulevard is classified as an urban other principal arterial. East of US 41, the facility is classified as an urban minor arterial. The limits of this study extend along Causeway Boulevard from 2400 feet (ft.) west of, to 3500 ft. east of the US 41 intersection. The limits of the study extend north/south along US 41 from 2790 ft. south of, to 2070 ft. north of the intersection. The total length of the Study is approximately 1.1 miles (mi.) along Causeway Boulevard.

A dominant feature of the area is the CSX Railroad leading in and out of the Port of Tampa. A single railroad track currently crosses US 41 at grade approximately 1475 ft. south of the intersection and crosses Causeway Boulevard approximately 1400 ft. east of the intersection. These at-grade crossings create long delays to vehicular traffic on both US 41 and Causeway Boulevard. A significant portion of this traffic is truck traffic traveling to and from the port.

## **3.0 PD&E STUDY ALTERNATIVE**

A Project Development and Environment (PD&E) Study was conducted for Causeway Boulevard in the early 1990's. That study identified an alternative which included a tight urban diamond interchange at US 41, with US 41 elevated over Causeway Boulevard. The

## STUDY AREA & PROJECT LOCATION MAP

Hillsborough County, Florida

FIGURE 1

ramps for this PD&E Alternative were oriented along US 41 and both railroad crossings were at grade. One-lane, one-way frontage roads were provided in the southeast and northeast quadrants to handle local property access. This PD&E Alternative identified the need for six-lane divided urban roadways on both Causeway Boulevard and US 41. The original hand drawings have been reproduced using Computer Aided Drafting and Design (CADD) for this study. The plan layout, referred to, as the Original PD&E Alternative is included in Appendix A. Construction costs in year 2001 dollars were estimated using the 2001 FDOT Long Range Estimate (LRE) computer program, a printout of which is included in Appendix B. The construction cost estimated for this alternative is \$14,631,228.

#### **4.0 PREFERRED PD&E STUDY ALTERNATIVE**

The PD&E Study identified a Preferred Alternative which included a grade separation on US 41 over the CSX Railroad. No concept plans have been found that depict this alternative. However, it is outlined in the Preliminary Engineering Report, and has been developed in CADD for this study. Due to the grade separation, access roads have been added to accommodate local property access where needed. All other aspects of this alternative are identical to the Original PD&E Alternative. The plan layout for this alternative, referred to as the Revised PD&E Alternative is included in Appendix A. The construction cost of this alternative is estimated to be \$25,010,605.

#### **5.0 NEW ALTERNATIVES**

Under direction from District Seven Environmental Management Office (EMO) staff, several additional alternatives were developed which include grade separations at both railroad crossings. The Scope of Services for this task indicated that alignments were to be developed that elevate Causeway Boulevard over US 41 and the north/south leg of the CSX Railroad, as well as elevate US 41 over the east/west leg of the railroad. No pond sites were identified or assessed as part of this Study. Bike lanes were included along Causeway Boulevard, but not along US 41, since improvements along US 41 tie back to the existing

facility. All new alternatives were developed on a centered alignment. Right-of-way (ROW) costs for each alternative were being developed by the Department as this report was being prepared.

A meeting was held with the Department staff on July 30, 2001. It was determined that all new alternatives would evaluate Causeway Boulevard as a four-lane facility and US 41 as a six-lane facility. Additional direction was given as to the development of an interim phase with fully at-grade facilities for purposes of comparison. Other alternatives identified included a cantilever alternative in which left turn lanes would be tucked under the structure as a means to reduce ROW impacts. Meeting minutes are included in Appendix C.

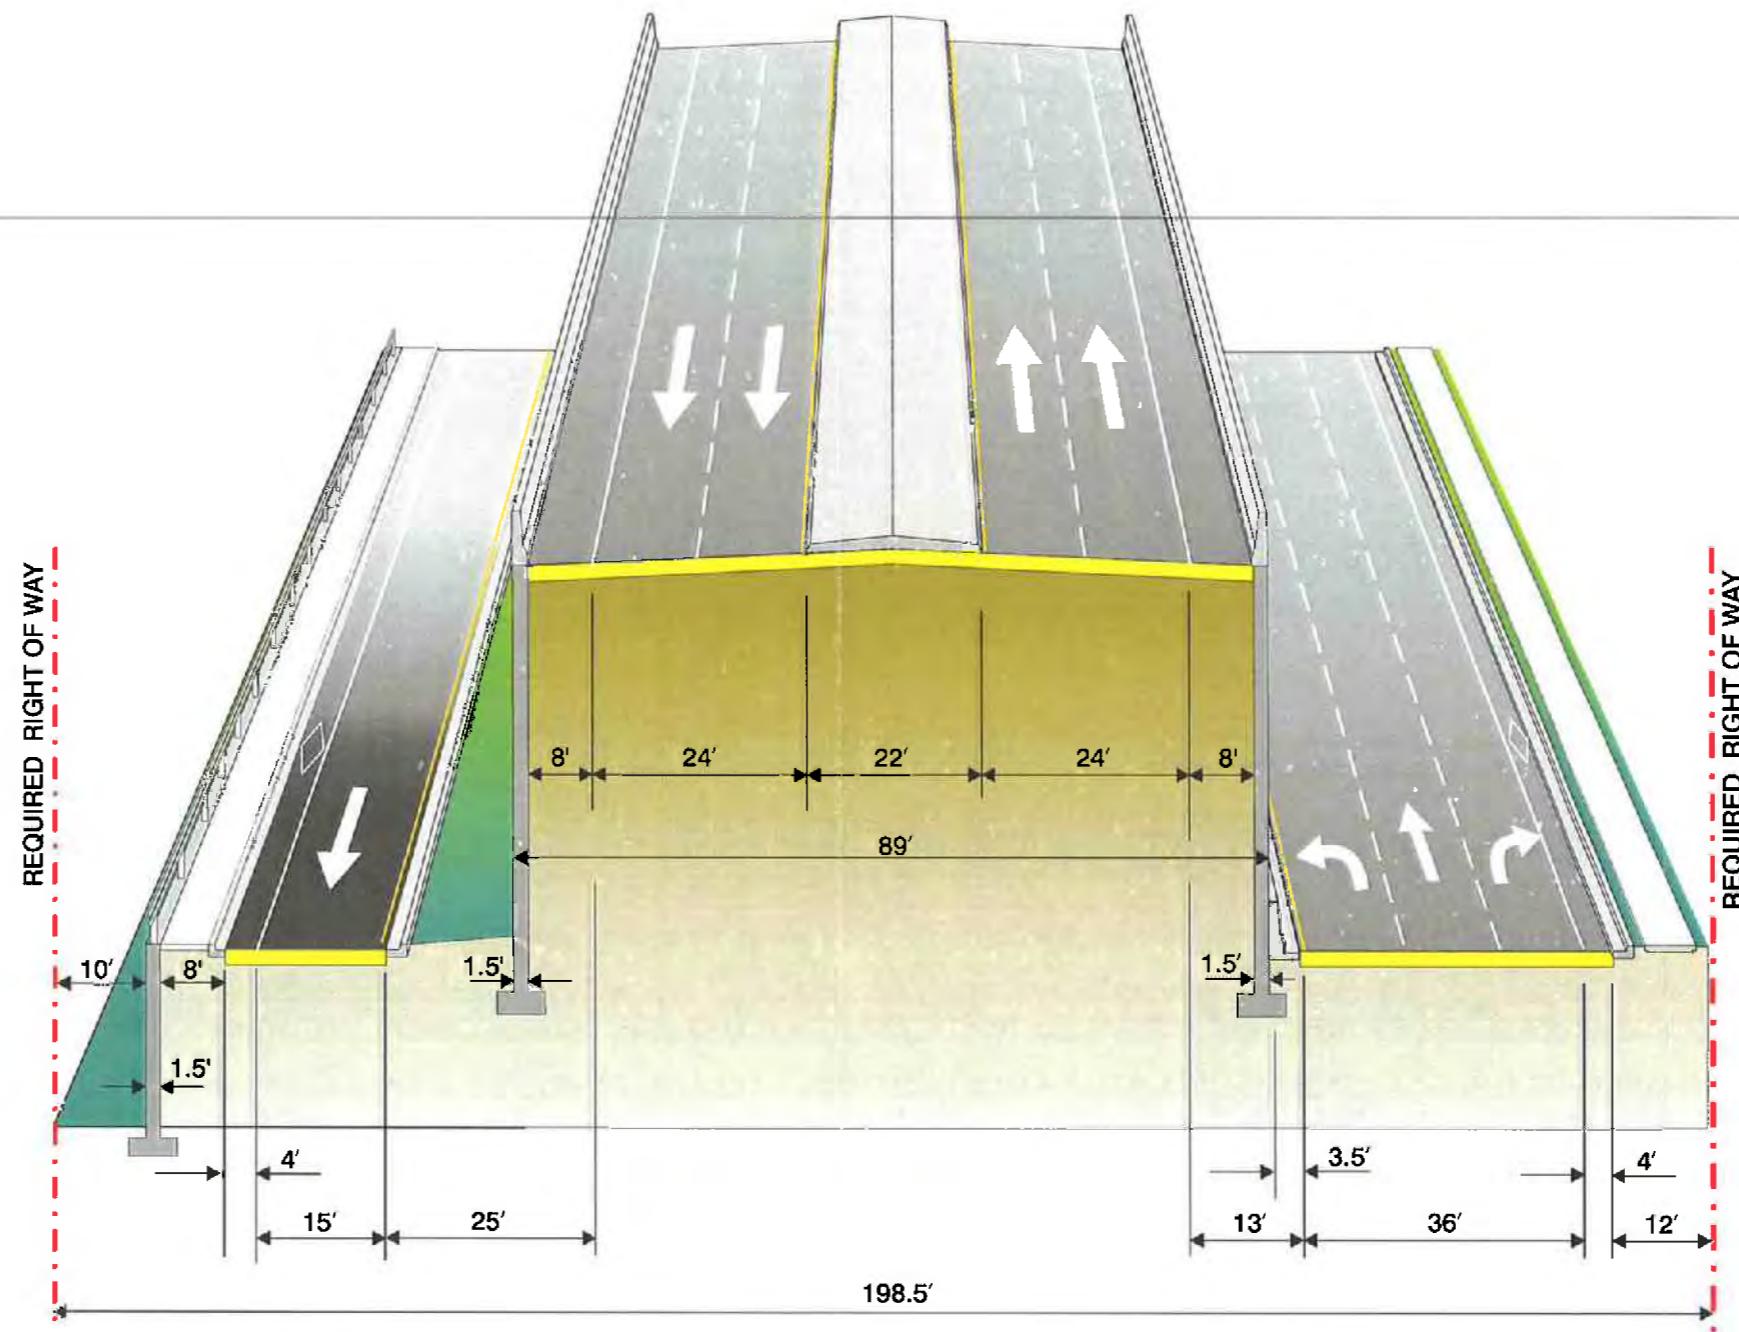

Proposed profiles have not been generated for any of the Alternatives. Instead, touchdown points on each side of the grade separations were estimated using Figure X-7 of the 1990 American Association of State Highway and Transportation Officials (AASHTO) publication A Policy on Geometric Design of Highways and Streets (see Appendix A). The resulting touchdown points are labeled on each of the plan layouts in Appendix A. Design criteria used for the development of alternatives is included in Table 1. For the purposes of this study, a beam depth of 5.5 ft. was assumed. For the grade separations over roadway, AASHTO Figure X-7 shows a horizontal distance of 950 ft. is required to effect the grade separation. Grade separations over the railroad require 1100 ft. to effect the grade separation.

## 6.0 ALTERNATIVE 1

Alternative 1 was developed as a single-point urban diamond interchange with ramps oriented in an east-west direction. An interchange typical section is shown in Figure 2. A four-lane Causeway Boulevard is grade-separated over US 41 and the railroad, while the

FIGURE 2

ramps in the eastern quadrants are also grade-separated over the railroad. Ramps in the western quadrants, being at-grade, also function as frontage roads for local property access. US 41 travels under Causeway Boulevard and is grade-separated over the southern railroad crossing. Two-way frontage roads are included for local property access where necessary. Cul-de-sacs are also included on some local streets. The plan layout for Alternative 1 is included in Appendix A. The LRE construction cost of this alternative is estimated to be \$26,348,484.

## **7.0 ALTERNATIVE 2**

Alternative 2 was also developed as a single-point urban diamond interchange with ramps oriented in an east-west direction. A four-lane Causeway Boulevard is grade-separated over US 41 and the railroad (see Figure 2). However, now the ramps in the eastern quadrants cross the railroad at grade. Ramps in the western quadrants are identical to Alternative 1, being at-grade and functioning as frontage roads for local property access. Identical to Alternative 1, US 41 again travels under Causeway Boulevard and is grade-separated over the southern railroad crossing. Two-way frontage roads are included for local property access where necessary. U-turns are also provided adjacent to the railroad, between the ramps under Causeway Boulevard. Cul-de-sacs are also included on some local streets. The plan layout for Alternative 2 is included in Appendix A. The LRE construction cost of this alternative is estimated to be \$27,164,982.

## **8.0 ALTERNATIVE 3**

Alternative 3 is identical to Alternative 2, except that the structure over US 41 is constructed using a cantilever concept that allows the left turn lanes to be pulled under the overpass structure, reducing ROW impacts. The cantilever concept is similar to that which was developed for US 19 at Coachman Road and Sunset Point Road in Pinellas County. A typical section from that project is included in Appendix A. A noteworthy consequence of the cantilever concept is that the touchdown point on the west leg is forced further west, increasing ROW impacts in this area over that found in Alternatives 1 and 2. As a trade-off,

the ROW impacts on the east leg are reduced from that of Alternatives 1 and 2. As ROW costs have yet to be developed, it remains to be seen if a reduced ROW cost compensates for the increased structure cost. The LRE construction cost of this alternative is estimated to be \$29,946,486.

## **9.0 ALTERNATIVE 4**

Alternative 4 was developed as a fully at-grade alternative. The at-grade intersection of Causeway Boulevard and US 41 includes dual left turn lanes and exclusive right turn lanes on all approaches. Both railroad crossings are also at grade. While this alternative does not solve the problem of delays at the railroad crossings or the intersection, the construction cost is on the order of 20% of the cost to construct the other alternatives, and could be constructed as an interim improvement. The LRE construction cost of this alternative is estimated to be \$5,424, 637.

Construction costs are summarized for all alternatives in Table 2.

**Table 2**  
**Construction Costs**

| Alternative  | FPID Number<br>(for LRE) | Causeway Boulevard |                    |                 |                  | US 41             |                 |                  |  | Total<br>Project Cost |  |

PROJ. MANAGER: GABOR F. CKD BY: PM  
PROJECT DESCRIPTION: NEW CONSTRUCTION DIVIDED MEDIAN, URBAN  
56TH ST. (US 41) FROM 34TH AVE TO 23RD AVE

SCOPE OF WORK : RECONSTRUCT EXISTING ROADWAY TO 6 LANE DIVIDED URBAN  
SECTION WITH A 22-FT RAISED MEDIAN. INCLUDES SIDEWALK ALONG BOTH  
SIDES OF THE ROADWAY, TRAFFIC SIGNALS AND LIGHTING. INCLUDES  
INTERCHANGE AT CAUSEWAY BLVD WITH MSE WALL AND CONCRETE BARRIER  
WALL.

PROJECT DESCRIPTION: NEW CONSTRUCTION DIVIDED MEDIAN, URBAN  
US 41 (56TH ST) FROM SOUTH OF COLUMBIA ST TO SOUTH OF 24TH AVE

SCOPE OF WORK : RECONSTRUCT EXISTING ROADWAY TO 6 LANE DIVIDED URBAN  
SECTION WITH A 22-FT RAISED MEDIAN. INCLUDES SIDEWALK ALONG BOTH  
SIDES OF THE ROADWAY, TRAFFIC SIGNALS AND LIGHTING.  
INCLUDES INTERCHANGE AT CAUSEWAY BLVD WITH MSE WALL AND CONCRETE  
BARRIER.

PROJECT DESCRIPTION: NEW CONSTRUCTION DIVIDED MEDIAN, URBAN  
CAUSEWAY BLVD (SR 676) FROM WEST OF 45TH ST. TO EAST OF 54TH ST.

SCOPE OF WORK : RECONSTRUCT EXISTING ROADWAY TO 4 LANE DIVIDED URBAN  
SECTION WITH A 22-FT RAISED MEDIAN. INCLUDES SIDEWALK ALONG BOTH  
SIDES OF THE ROADWAY, TRAFFIC SIGNALS AND LIGHTING.  
INCLUDES BRIDGE OVER US 41 AND CSX RAILROAD.

PROJ. MANAGER: GABOR F. CKD BY: PM  
PROJECT DESCRIPTION: NEW CONSTRUCTION DIVIDED MEDIAN, URBAN  
CAUSEWAY BLVD (SR 676) FROM WEST OF 45TH ST. TO EAST OF 54TH ST.

SCOPE OF WORK : RECONSTRUCT EXISTING ROADWAY TO 4 LANE DIVIDED URBAN  
SECTION WITH A 22-FT RAISED MEDIAN. INCLUDES SIDEWALK ALONG BOTH  
SIDES OF THE ROADWAY, TRAFFIC SIGNALS AND LIGHTING.  
INCLUDES BRIDGE OVER US 41 AND CSX RAILROAD.

PROJECT DESCRIPTION: NEW CONSTRUCTION DIVIDED MEDIAN, URBAN  
US 41 (56TH ST) FROM SOUTH OF COLUMBIA ST TO SOUTH OF 24TH AVE

SCOPE OF WORK : RECONSTRUCT EXISTING ROADWAY TO 6 LANE DIVIDED URBAN  
SECTION WITH A 22-FT RAISED MEDIAN. INCLUDES SIDEWALK ALONG BOTH  
SIDES OF THE ROADWAY, TRAFFIC SIGNALS AND LIGHTING.  
INCLUDES BRIDGE OVER CSX RAILROAD.

PROJECT DESCRIPTION: NEW CONSTRUCTION DIVIDED MEDIAN, URBAN  
CAUSEWAY BLVD (SR 676) FROM WEST OF 45TH ST, TO EAST OF 54TH ST.

SCOPE OF WORK : RECONSTRUCT EXISTING ROADWAY TO 4 LANE DIVIDED URBAN  
SECTION WITH A 22 FT RAISED MEDIAN. INCLUDES SIDEWALK ALONG BOTH  
SIDES OF THE ROADWAY, TRAFFIC SIGNALS, AND LIGHTING.  
THIS IS ALTERNATIVE 4 - AT GRADE.

PROJECT DESCRIPTION: NEW CONSTRUCTION DIVIDED MEDIAN, URBAN  
US 41 (56TH ST) FROM SOUTH OF 24TH AVE. TO NORTH OF 31ST AVE.

SCOPE OF WORK : RECONSTRUCT EXISTING ROADWAY TO 6 LANE DIVIDED URBAN  
SECTION WITH A CONCRETE SEPARATOR. INCLUDES SIDEWALK ALONG BOTH  
SIDES OF THE ROADWAY, TRAFFIC SIGNALS, AND LIGHTING.  
THIS IS ALTERNATIVE 4 - AT GRADE.

**APPENDIX C**  
**Meeting Minutes**

## MEETING MINUTES

---

**Date/Time:** July 30, 2001, 9:00 am

**Location:** District 7 Planning Conference Room

**Subject:** SR 676 (Causeway Boulevard) at US 41 and CSX Railroad Crossings  
Feasibility Study  
FPN: 254552 1 22 01  
Hillsborough County, Florida

**Attendees:** PBS&J: Doug Reed, Steve Gordillo  
FDOT: Kirk Bogen, Gabor Farkasfalvy, Ron Glass, Shari Barnwell

**Written By:** Doug Reed 

**Copies To:** Attendees, Mike Palozzi, File 600460.15

---

Mr. Farkasfalvy started the meeting with a brief description of the project. He explained that the original PD&E concept report included plans for a grade separation of US 41 over the railroad, but that the PD&E concept plans did not show this grade separation. All alternatives will evaluate four lanes on Causeway Boulevard and six lanes on US 41. All alternatives developed should meet basic design criteria for lanes (12') and median width (22').

Mr. Reed described the original PD&E Alternative and Alternative 1 that have been developed to date, including the number and orientation of lanes and two-way frontage roads. In this Alternative, Causeway Boulevard goes over US 41 and the railroad, with one-way ramps grade separated over the railroad and coming down to grade between the railroad and US 41, utilizing two-way frontage roads for local property access. US 41 stays at grade under Causeway Boulevard, but is grade-separated over the railroad. This Alternative utilizes MSE wall. Comments on Alternative 1 included a request to look at utilizing one-way frontage roads and Texas U-turns, as well as providing the required 23' vertical clearance for the entire railroad right of way (ROW), not just over the tracks.

An At-Grade Alternative should be developed for the purpose of comparing construction and ROW costs. This alternative would "blow out" the intersection with dual left turn lanes and exclusive right turn lanes. This alternative crosses both railroad locations at grade, but allows a future project to add overpasses at the railroad. Under this scenario, ROW could be purchased for the ultimate condition.

Another alternative will be developed that tucks turn lanes under the structure to reduce the ROW cost. PBS&J structural engineers will determine how much cantilever width is reasonable

July 30, 2001/9:00 a.m.

Minutes

for the structure. Right of Way staff should be consulted to determine if left or right alignments might produce further ROW cost savings.

Mr. Glass suggested that plans for a multi-use trails being planned by the City of Tampa and Hillsborough County be investigated to determine how this project might be affected. Mr. Farkasfalvy offered to check with the FDOT bike & pedestrian coordinator. Finally, it was suggested that Dwayne Kile approve the concepts prior to ROW and construction costs being generated.

Please notify the author no later than August 13, 2001 of any necessary revisions to these minutes. Otherwise, the foregoing shall be deemed an accurate account of the subject meeting. Thank you.
