EXECUTIVE SUMMARY

The Florida Department of Transportation (FDOT) District 7 is conducting a Project Development and Environment (PD&E) study along US Highway 98 (US 98) / State Road (SR) 35 / SR 700 from County Road (CR) 54 to US 301 / SR 39, in Pasco County. The study will focus on widening this section of US 98 from a 2-lane undivided facility to a 4-lane divided facility and includes the realignment of US 98 between CR 35A to US 301. The realignment allows US 98 to align with the Clinton Avenue/CR 52A (New SR 52) intersection at US 301 and was the result of a separate Alternatives Corridor Evaluation (ACE) study (Work Program Item (WPI) Segment No. 443368-1). The study will also evaluate issues related to traffic operations, access management, safety, and include pedestrian and bicycle accommodations.

The PD&E study objectives include: determine proposed typical sections and develop preliminary conceptual design plans for proposed improvements, while minimizing impacts to the environment; consider agency and public comments; and ensure project compliance with all applicable federal and state laws. A Type 2 Categorical Exclusion is being prepared as part of this study. The proposed improvements will include construction of stormwater management facility (SMF) and floodplain compensation (FPC) sites. The PD&E study satisfies all applicable requirements, including the National Environmental Policy Act (NEPA), to qualify for federal-aid funding of subsequent development phases (design, right of way (ROW) acquisition, and construction).

The purpose of this Utility Assessment Report is to document what utilities are within the project. This Utility Assessment Report was conducted in accordance with the PD&E manual and other related regulations.

SECTION 1 INTRODUCTION

1.1 PD&E STUDY PURPOSE

The objective of the PD&E study is to assist the FDOT's Office of Environmental Management (OEM) in reaching a decision on the type, location, and conceptual design of the proposed improvements for the widening of US 98, including stormwater management facility (SMF) and floodplain compensation (FPC) sites. This study documents the need for the improvements as well as the procedures utilized to develop and evaluate various improvements, including elements such as proposed typical sections, preliminary horizontal alignments, and intersection enhancement alternatives.

The PD&E study satisfies all applicable requirements, including the National Environmental Policy Act (NEPA), to qualify for federal-aid funding of subsequent development phases (design, ROW acquisition, and construction). This project was screened through the FDOT's Efficient Transportation Decision Making (ETDM) process as ETDM Project No. 14374. The ETDM Programming Screen Summary Report was published on February 24, 2021, containing comments from the Environmental Technical Advisory Team (ETAT) on the project's effects on various natural, physical, and social resources. A Type 2 Categorical Exclusion will be prepared as part of this PD&E study.

The project is located in Sections 11, 12, 13, and 14, Township 25S, and Range 21E; and Sections 18, 19, 20, 27, 28, 29, 34 and 35, Township 25S, and Range 22E; Pasco County, Florida. See **Figure 1-1** for Project Location Map.

1.2 PROJECT PURPOSE AND NEED

Purpose

The purpose of this project is to evaluate the capacity improvements of the corridor, including the realigned intersection of US 98/Clinton Ave at US 301 which will enhance safety and provide system linkage/regional connectivity.

Need

A realignment of US 98 to Clinton Avenue intersection is needed to eliminate the existing closely spaced intersections of US 301 at US 98 and US 301 at Clinton Avenue, to reduce crashes, and to enhance safety. Construction of the realignment of SR 52 from east of McKendree Road to east of US 301 began in 2019 and will serve as an additional east/west route in the regional transportation network. When completed, this improvement will increase traffic at the US 301 at US 98 and US 301 at Clinton Avenue intersections, exacerbating the current intersection safety concerns. Also, plans are currently underway for the widening of US 98 from north of West Socrum Loop Road to South of CR 54 (Financial Management (FM) No.: 436673-1-22-01). This project will address capacity needs for the final segment of US 98 connecting to US 301 (which is a designated regional freight mobility corridor) as well as operational improvements to the intersection of US 98 and US 301 ultimately resulting in enhanced transportation network connectivity.

Figure 1-1 Project Location Map

Project Status

In April 2019, FDOT District Seven initiated the ACE process for the US 301/US 98/Clinton Avenue Intersection Realignment Study in Pasco County, Florida. The ACE completed in January 2021 and recommended the Alternative B alignment. The widening and realignment of US 98 is listed in both the Needs Plan and the Cost Feasible Plan of the Pasco County MPO's 2045 Long Range Transportation Plan (LRTP). The project is funded for ROW and design-build construction (WPI Segment #443368-3 and -4) on the Pasco County Metropolitan Planning Organization's (MPO's) 2023-2027 Transportation Improvement Program (TIP) Project List. The project is also listed on the current State Transportation Improvement Program (STIP) for ROW and design-build construction.

System Linkage

US 98 is a regional corridor which provides a connecting link between Polk and Pasco Counties and, within the area, provides a connection to the cities of Lakeland and Bartow to the south.

US 98 is the longest road in Florida and spans from Pensacola to Palm Beach primarily traveling along the Gulf Coast. Plans are currently underway for the widening of US 98 from north of West Socrum Loop Road to South of CR 54 (FM No.: 436673-1-22-01). This project will provide additional capacity for the final segment of US 98 connecting to US 301 (which is a designated regional freight mobility corridor) as well as operational improvements to the intersection of US 98 and US 301 ultimately resulting in enhanced transportation network connectivity. Currently, this segment of US 98 experiences truck volumes in excess of 23% of annual average daily traffic (AADT) which illustrates this facility's importance to the overall freight network within the State of Florida.

Also, the SR 52/Clinton Avenue extension from I-75 to West of Fort King Road (FM No.: 435142-1) is currently under construction. This extension will provide direct linkage to I-75 from this project.

Safety

The closely spaced intersections of US 301 at US 98 and US 301 at Clinton Avenue have crash rates that exceed the statewide average. Between 2014 and 2018, the intersection of US 301 at US 98 experienced a total of 63 crashes. The predominant crash types were angle crashes (58%) followed by rear end crashes (29%). This intersection exhibited a crash rate (0.816 crashes per million entering vehicles) that was consistently higher than the statewide average (0.270) for a similar type of intersection resulting in a crash ratio of 3.022 (crash rate divided by statewide average crash rate).

Between 2014 and 2018, the intersection of US 301 and Clinton Avenue experienced a total of 65 crashes. The predominant crash types were rear end crashes (55%) followed by angle crashes (25%). This intersection exhibited a crash rate (1.259) that was consistently higher than the statewide average (0.526) for a similar type of intersection resulting in a crash ratio of 2.394. A realignment of US 98 to Clinton Avenue to eliminate high traffic volumes at one of the two closely spaced intersections has the potential to reduce crashes and enhance safety.

Capacity

US 98 operates at Level of Service (LOS) C under the existing conditions. However, the US 301 at Clinton Avenue intersection fails to meet the LOS target D. In the design year (2045), US 98 from CR 54 to Old Lakeland Highway will fail to meet the LOS target C and both the intersections of US 301 at Clinton Avenue and US 301 at US 98 will fail to meet the LOS target of D with no improvements. Proposed improvements are expected to increase LOS along the corridor and at intersections to an acceptable LOS.

1.3 EXISTING FACILITY AND PROPOSED IMPROVEMENTS

1.3.1 Existing Facility

The existing US 98 from CR 54 to US 301 is a 2-lane roadway. The roadway is functionally classified by FDOT as a Principal Arterial – Other. In Pasco County, the 2-lane undivided facility has 12-foot travel lanes and 4-foot paved shoulders. The existing ROW along the project corridor is 160 feet. There are two (2) existing bridges in the project limits. The first carries US 98 over the Hillsborough River Bridge and the second carries US 98 over Old Lakeland Highway and the CSX railway. Both locations consist of a single bridge with two 12-foot lanes and 8-foot paved shoulders. There are no sidewalks, shared use paths, bike lanes or other similar multi-modal facilities within the project corridor.

1.3.2 Proposed Improvements

The proposed improvements will widen US 98 from a 2-lane undivided facility to a 4-lane divided facility from CR 54 to north of Townsend Road, approximately 6.8 miles, and realign US 98 from north of Townsend Road to US 301, approximately 2.0 miles. The realignment allows US 98 to align with the Clinton Avenue (New SR 52) intersection at US 301 and was the results of a separate ACE study (WPI Segment No. 443368-1).

The 4-lane divided facility will consist of two 11 to 12-foot travel lanes in each direction separated by a median which varies from 14 to 40 feet. Where the existing roadway is widened, the roadway consists of rural typical sections with two 12-foot travel lanes in each direction and will fit within the existing 160-foot wide ROW. In the realignment section, the roadway consists of a suburban typical section with two 12-foot travel lanes in each direction located within a proposed 245-foot wide ROW and includes a 6-foot sidewalk on the east side of the road and a 12-foot shared use path on the west side of the road. Where the new US 98 connects to Clinton Avenue and extends to US 301, the roadway consists of an urban typical section with two 11-foot travel lanes in each direction within a 140-foot wide ROW and includes a 6-foot sidewalk on the east side of the road and a 10-foot shared use path on the west side of the road that connects to the existing shared use path on US 301. At the Hillsborough River and Old Lakeland Highway / CSX Railroad locations, the bridges will be replaced with twin bridges with two 12-foot travel lanes with 6-foot inside shoulders and 10-foot outside shoulders. Both bridges will include barrier separated 10-foot walkway to accommodate future shared use path and/or sidewalk (bicycle and pedestrian) accommodations and will be located within the existing 160-foot ROW. The remaining segment of Old US 98 between the new US 98 connection and US 301 (Mile Post (MP) 7.185 to MP 8.183) will be milled and

resurfaced. Eight stormwater and two floodplain management sites were identified to capture and retain stormwater and compensate for any impacts to existing floodplain areas.

1.4 REPORT PURPOSE

The purpose of this Utility Assessment Report is to document what utilities are within the project. This Utility Assessment Report was conducted in accordance with the PD&E manual and other related regulations.

SECTION 2 UTILITY INFORMATION

2.1 GENERAL

The intent of this report is to furnish pertinent information concerning the location, size and characteristics of major utilities found within the proposed study limits (See **Figure 1-1**).

2.2 UTILITY COORDINATION

The preliminary utility coordination and investigation effort was conducted through written and verbal communications with the existing utility owners. A Sunshine State 811 of Florida Design Ticket System listing of existing utility owners was acquired on January 29, 2020 (**Appendix B**).

Initially, verbal communication was made to all utility’s owners outlining the investigation effort along with the project limits. The list of utility agencies owners (UAO) known to operate utilities within the project corridor is provided in **Table 2-1**.

Table 2-1 Utility Contact Information

Utility Agency	Utility Contact Name	Utility Contact Phone	Utility Contact Email
Spectrum	Gene Gregory	352-503-6312	Gene.Gregory@charter.com
CenturyLink	Ty Leslie	407-814-5293	michel.t.leslie@centurylink.com
City of Dade City	Jay Sheriden	813-601-4039	jsheridan@dadecityfl.com
Pasco County Traffic	Jack King	727- 847-819	jking@pascocountyfl.net
Pasco County Utilities	Martin Ramirez	813-235-6189	mramirez@pascocountyfl.net
Tampa Electric Company	Jeremy Williams	470-235-6349	Jeremy.williams.contractor@cro-wncastle.com
TECO Peoples Gas	Mark Foster	813-927-1675	mark.foster@stantec.com
Withlacoochee River Electric Cooperative	Corey Littlefield	352-588-5115 Ext. 1131	rlittlefield@wrec.net

For the report’s preparation, utility owners were provided aerial based utility plans depicting the proposed US 98 / State Road (SR) 35 / SR 700 corridor improvement. Using these aerial plans as a base map, each utility owner was asked to indicate their existing and proposed utilities as well as any easements that may affect their reimbursement rights for potential relocations of their facilities. In response, most utility owners replied via written communications. The utility owners provided the requested information concerning their facilities using either the utility plans or reference documentation (i.e., “As Built” or GIS maps). “Marked” Plans or reference documentation was received from the below Utility Agency Owners.

SECTION 3 UTILITY EXISTING FACILITIES DESCRIPTIONS

3.1 SPECTRUM

Non-Responsive

3.2 CENTURYLINK

Non-Responsive

3.3 CITY OF DADE CITY

City of Dade City has provided marked plans showing their facilities both existing and proposed within the project limits. They have a 10" PVC force main (FM) that they propose to run north and south along private drive then turns and goes west on Clinton Avenue then continues west. At approx. sta. 1381+00 they have a 12" Gate valve and 12" water main (WM) that goes west along US 98 where it turns and goes north by the Publix on the north side. The city has an 8" WM that crosses US 98 at approximately Sta.1382+00 and continues south. The city also is proposing a 4" FM that runs east and west along the south side of US 98 with multiple 4" gate valves. The city has an existing 8"PVC Gravity Sewer main that is on the west side of US 301 from Clinton Avenue and runs north. (See **Appendix A**).

3.4 PASCO COUNTY TRAFFIC

Non-Responsive

3.5 PASCO COUNTY UTILITIES

Pasco County Utilities owns and operates an 8" PVC WM from Sta. 1210+50 to Sta. 1218+00 on the north side and crosses and turns west and continues on the south side with a 6" PVC WM crossing at approximately Sta. 1214+50. At approximately Sta. 1220+10 they have a 6" PVC WM that crosses the proposed frontage road and goes south along the Heavy Equipment building. From approximately Sta. 1219+00 to Sta. 1265+00 the County has a 12" PVC WM where they have a fire hydrant and a valve pad then a 10" PVC WM continues to Townsend Road and turns and goes SW (See **Appendix A**).

3.6 TAMPA ELECTRIC COMPANY

Non-Responsive

3.7 TECO PEOPLES GAS

TECO Peoples Gas has a 12" Coated Steel (CS) high pressure (HP) Transmission line within the existing right of way and runs along the north side of US 98 from the beginning of the project limits and continues west then crosses the railroad and turns and goes north along the east side of Old Lakeland Hwy.

TECO Peoples Gas has a 6" CS HP GM that runs north and south along the east side of US 301 at Clinton Avenue. and US 301 TECO has a 6" CS HP GM runs north and south along the east side of US 301. There is also a separate 6" CS HP Transmission line that runs along the east side approximately 500 feet and goes south then turns and goes east along Clinton Ave. about 200 ft and then crosses Clinton Ave. to the south and continues east along Clinton Ave. TECO feeds the Publix and Burger King from the north side and has a reg station at the entrance on US 301 (See **Appendix A**)

3.8 WITHLACOOCHEE RIVER ELECTRIC COOPERATIVE

Non-Responsive

3.9 PLANNED FACILITIES AND CONFLICTS

Coordination will continue with UAOs as the project progresses through the design phase to evaluate potential conflicts with existing and planned facilities.

Sunshine 811 Design Ticket

DESIGN TICKET 1 OF 5
Ticket : 027005775 Rev:000 Taken: 01/27/20 15:07ET

State: FL Cnty: PASCO GeoPlace: DADE CITY
CallerPlace: DADE CITY
Subdivision:

Address :
Street : CLINTON AVE
Cross 1 : US 98
Within 1/4 mile: Y

Locat: DESIGN BEGINS AT THE INTERSECTION OF CLINTON AVE & US 98 AND STOPS AT
THE INTERSECTION OF CLINTON AVE & CO RD 35A FOR APPROX 1.48 MI

:
Remarks : DESIGN ONLY, NO LOCATES
IN RESPONSE TO RECEIPT OF A DESIGN TICKET, SSOCOF PROVIDES THE ORIGINATOR OF
THE DESIGN TICKET WITH A LIST OF SSOCOF MEMBERS IN THE VICINITY OF THE DESIGN
PROJECT. SSOCOF DOES NOT NOTIFY SSOCOF MEMBERS OF THE RECEIPT BY SSOCOF OF A
DESIGN TICKET. IT IS THE SOLE RESPONSIBILITY OF THE DESIGN ENGINEER TO CONTACT
SSOCOF MEMBERS TO REQUEST INFORMATION ABOUT THE LOCATION OF SSOCOF MEMBERS'
UNDERGROUND FACILITIES. SUBMISSION OF A DESIGN TICKET WILL NOT SATISFY THE
REQUIREMENT OF CHAPTER 556, FLORIDA STATUTES, TO NOTIFY SSOCOF OF AN INTENT TO
EXCAVATE OR DEMOLISH. THAT INTENT MUST BE MADE KNOWN SPECIFICALLY TO SSOCOF IN
THE MANNER REQUIRED BY LAW. IN AN EFFORT TO SAVE TIME ON FUTURE CALLS, SAVE
YOUR DESIGN TICKET NUMBER IF YOU INTEND TO BEGIN EXCAVATION WITHIN 90 DAYS OF
YOUR DESIGN REQUEST. THE DESIGN TICKET CAN BE REFERENCED, AND THE INFORMATION
ON IT CAN BE USED TO SAVE TIME WHEN YOU CALL IN THE EXCAVATION REQUEST.

Address :
Street : CLINTON AVE
Cross 1 : CO RD 35 ALT
Within 1/4 mile: Y

Locat: DESIGN BEGINS AT THE INTERSECTION OF CLINTON AVE & CO RD 35A, GOING SOUTH AND STOPS AFTER 1.32 MI

:
Remarks : DESIGN ONLY, NO LOCATES
IN RESPONSE TO RECEIPT OF A DESIGN TICKET, SSOCOF PROVIDES THE ORIGINATOR OF THE DESIGN TICKET WITH A LIST OF SSOCOF MEMBERS IN THE VICINITY OF THE DESIGN PROJECT. SSOCOF DOES NOT NOTIFY SSOCOF MEMBERS OF THE RECEIPT BY SSOCOF OF A DESIGN TICKET. IT IS THE SOLE RESPONSIBILITY OF THE DESIGN ENGINEER TO CONTACT SSOCOF MEMBERS TO REQUEST INFORMATION ABOUT THE LOCATION OF SSOCOF MEMBERS' UNDERGROUND FACILITIES. SUBMISSION OF A DESIGN TICKET WILL NOT SATISFY THE REQUIREMENT OF CHAPTER 556, FLORIDA STATUTES, TO NOTIFY SSOCOF OF AN INTENT TO EXCAVATE OR DEMOLISH. THAT INTENT MUST BE MADE KNOWN SPECIFICALLY TO SSOCOF IN THE MANNER REQUIRED BY LAW. IN AN EFFORT TO SAVE TIME ON FUTURE CALLS, SAVE YOUR DESIGN TICKET NUMBER IF YOU INTEND TO BEGIN EXCAVATION WITHIN 90 DAYS OF YOUR DESIGN REQUEST. THE DESIGN TICKET CAN BE REFERENCED, AND THE INFORMATION ON IT CAN BE USED TO SAVE TIME WHEN YOU CALL IN THE EXCAVATION REQUEST.
